it's the newest thing in china. See this row of small blue ornaments? Everyone of them is a turquoise set in that plate by hand. The opals, too, are used, but the turquoises are more popular. The price? Oh, about $400 for a dozen plates. And the best part of it all is that the goods sell. It has become a fad now that the richer families must have the very best china that can be made, and in consequence the factories are working overtime. There are styles in china just the same as in anything else. And as these styles change, the rich families buy more china.

"Perhaps you didn't know that experienced jewelers are employed in the larger china factories now," the salesman continued. "Fact, though. Everything now must be dainty. The lines of gold on china must be laid as finely as the parts of a watch are put together. Then, too, there are the jewels to be set."

Ancient Lapidary Tools.

IT is a source of wonder in these days how the ancients were able to cut such hard stones and to engrave such perfect work in them. The ancient lapidaries of Egypt and Greece worked their precise incisions by drilling in oil and water. They used the punch and the wheel. Pliny tells us that these artisans used corundum in the form of a splinter fixed in an iron stylus (penholder). Historical research would lead us to suppose that the ancients

AN ANCIENT LAPIDARY.

used diamond dust in oil and it is asserted that in very early days diamond splinters also were used in iron frames.

Recent investigation shows that even before the building of the great Pyramid these Egyptians cut diorite, syenite and other hard stones with saws as much as nine feet long having jeweled teeth inserted. And the centers of the large stone blocks used for sarcophagi (caskets) were drilled by tubular or circular drills having a cutting surface furnished with gems.

An interesting pictorial representation exists, on the tomb of Rekhmara, of an Egyptian working a bow-drill. This picture, reproduced on this page, is typical of the illustrative art of that period and proves an advanced knowledge of methods of depicting the human figure. Notice that abnormally prolonged and dislocated "off" leg.

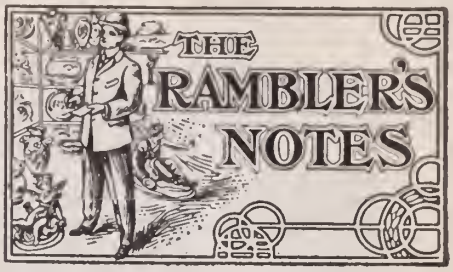
The Book of Enoch tells us that the lapidary's art was first taught to humanity by the angel Azazel, chief of those angels who took to themselves wives from among the daughters of men. C. W. C.

Beautiful Silver Testimonial Presented to Retiring Commander of Ancient and Honorable Artillery.

A VERY beautiful specimen of the silversmith's art was presented to the retiring commander of the Ancient and Honorable Artillery Co. of Boston at the anniversary banquet of the organization in Boston on June 1.

The gift is a silver loving cup and the recipient is Maj. Henry G. Jordan. The

LOVING CUP PRESENTED TO MAJ. H. G. JORDAN OF THE ANCIENT AND HONORABLE ARTILLERY.



order for its execution was placed with the Smith, Patterson Co., and the designing of the cup was entrusted to Barton Jenks. It was made from his design by the W. B. Durgin Co., Concord, N. H.

The cup stands about one foot high and weighs 120 ounces, and is inscribed with the name of the commander and the occasion of the gift.

Decrease in Silver and Cutlery Trade of Sheffield, England.

RECENT reports from Sheffield, England, show that the Spring trade in silver goods, especially in high grade sterling silver goods, has been a complete failure, and it is feared that wealthy people are no longer buying expensive silver goods for their homes or for presents. The skilled silver workers are experiencing a very hard time and the emigration of the younger men to the United States still continues, and they seem to find plenty of employment after they reach our shores.

It is also reported that the cutlery trade has never been worse, and there is practically no demand for the expensive ivory handled goods at one time recognized as staple, this has given way to a demand for metal handles, as they will stand wear better. Yet it must be admitted that the cutlery trade during last year was better than for some time past, and some firms are reported to have done a better trade with the United States than ever before.

RICH EFFECTS IN COALPORT CHINA.

THE varied array of Coalport china at the salesrooms of John Davison, 12 Barclay St., New York, affords an excellent opportunity for visiting jewelers to add to their lines of rich china novelties. Included in the exhibit are service plates with encrusted gold borders against a blue background. Some of the plates show pattern effects combined with floral designs. One plate, especially attractive to the close observer, has its rim slightly notched in covered with gold work. The shoulder of this plate has a background of deep blue on which are fantastic birds in repeated design interspersed with hand-painted roses. Plates with acid gold borders of different widths in which the rest of the plate is free of decoration are shown in several styles. Plates showing hand-painted Summer and Winter scenes are also attractive. One scene depicts a wandering stream beyond which stretches green fields.

*

ARTISTIC ELECTROLIERS.

"LE MINEUR" is the title given an attractive bronze electrolier on exhibition at the salesrooms of Bawo & Dotter, 30 Barclay St., New York. It shows a stalwart miner with a mining pick across his shoulder. In one hand he holds a miner's lantern, and he is dressed in the garb typical of a miner. Above the figure branches support clouded electric light bulbs. The figure is mounted on a rounded base. Another somewhat larger offering shows a woman holding in outstretched hands a large branch on which are small electric bulbs. The figure of the woman is draped in flowing garb. THE RAMBLER.

German Porcelain Trade is Dull.

ACCORDING to Consul-General Richard Guenther a Frankfort journal contains a statement from an expert in the porcelain trade who predicts a trade decline for Germany's porcelain manufacturing industries in the near future. He states as the principal cause the business depression in the United States, which already, during the last quarter of 1907, seriously affected the German export trade. In porcelain goods for electric uses the prices are cut and the orders not plentiful.

It is added, however, that the syndicate of German porcelain manufacturers has succeeded in uniting the porcelain works of Bohemia (Austria) into a trust and formed a price convention, whereby both trusts will be protected against underbidding and price-cutting.

TIME-SAVING equipment and methods that help us get every fractional value out of the filings, waste, sweep and scrap consignments treated by us. We do the work expeditiously and as a rule remit for more than the consignor expects his shipment to yield. Write us.

MONTAUK LIGHT, MONTAUK POINT, LONG ISLAND.

What a lighthouse is to the mariner FAHYS MONTAUK CASE is to the jeweler—a beacon of safety.

The lighthouse warns the mariner to avoid dangerous places. There are no "dangerous places" in FAHYS MONTAUK CASE, it is the best-made and best-known 20-year case on the market, and the liberal amount—and scientific distribution—of gold used in its manufacture eliminates "shallow places," and insures its wearing qualities for more than its guarantee of twenty years.

S. O. BIGNEY & CO.

MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

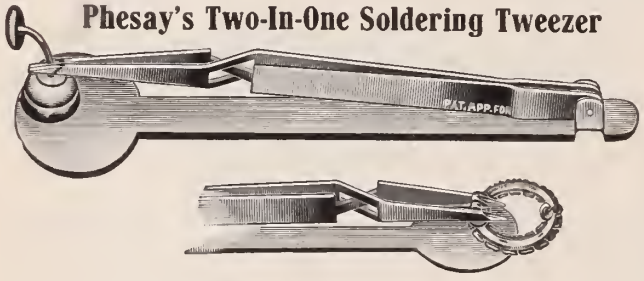
Pearl Setting Plier, No. 327

This tool should prove a useful addition to any jeweler's outfit. It is intended for setting half pearls or other stones of similar shape, which are imbedded in gold or other metal. It is used for cutting a burr and forcing it against the stone, either in hrooches or rings, thereby holding the stone securely without liahility of the tools slipping or breaking the stone, as is often the case with the use of other tools. The lower jaws are half round, to conform to the inner shape of rings. The work can be done more perfectly and under better control than with gravers or other tools used heretofore.

Made of best Swedish steel, nicely nickel-plated.

Price, each, $1.25

Randall Jewel Lamp

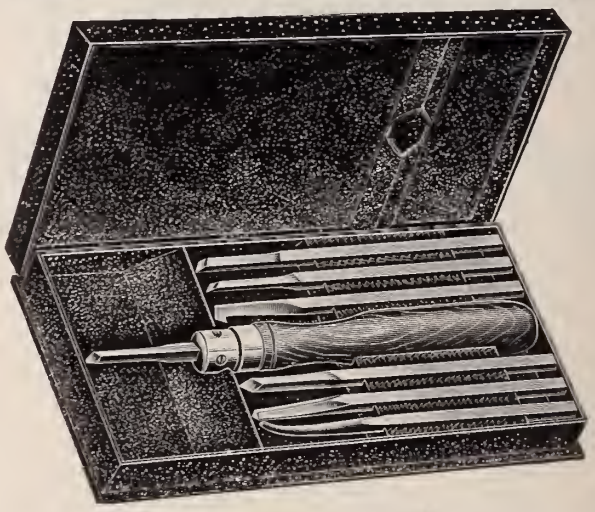


Cut is full size

Price, each, 50c.

Especially designed for work where very small flame is essential and very desirahle when cementing roller and pallet jewels, for drawing temper of pivots and annealing small parts of watches. Made of hrass full nickel plated. Has rubher washers inside of cap and under the hood to avoid leaking and evaporating.

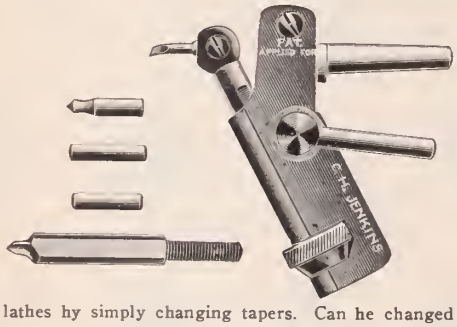
Phesay's Two-In-One Soldering Tweezer



Price, each, 75c.

By using Phesay's Two-in-One Soldering Tweezer the joint catch or Back is handled only once.

SAVES TROUBLE.—Phesay's Two-in-One Soldering Tweezers will solder plumb and true. Will not let article slide when solder flows. Will hold pieces of jewelry with rounded stones or flat surfaces with equal firmness.



Guaranteed "E.F.B." Turning Gravers No. 33

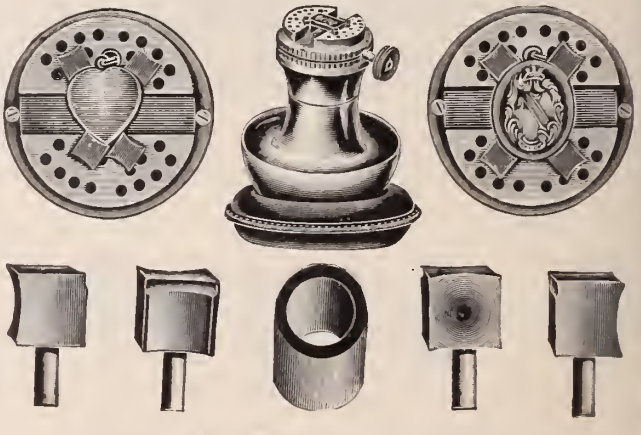
Price, per set of 7, in case, $3.00

The finest set of gravers on the market. Handle is of the finest cocoholo, fitted with nickel plated socket in which the gravers can he moved in or out as desired. The two set screws hold the graver rigid and prevent rocking or chattering. They will he appreciated by all users of fine tools.

Improved Turning and Jeweling Attachment No. 33

New Features

Adjustment for alignment, fine feed, with direct connected screw. Positive hinder operated hy slight movement of the thumb or finger. Cutters may be changed quickly. No small projecting parts to hecome lost or hroken. Special cutters can he made from wire.



And Other Good Points

One tool may he used on different makes of lathes hy simply changing tapers. Can he changed quickly.

All Standard Tapers in Stock

Each attachment is furnished with two cutters, one hurnisher and two hlanks. In ordering, please give name and size of lathe. **Price, each, $4.50**

"Ideal" Pins for Engraving Blocks

EXHIBITION BULLETIN

16th Year WEDNESDAY, JULY 15, 1908 Vol. VI. No. 8

Take, for instance, our medium priced Ladies' rings. It is a small matter simply to make a mounting and then set in the materials — that does not sell the article to the critical purchaser.

We were one of the first to point the way to the distinctive in Diamond Jewelry, but in the large business that grew up in the past few years, and with the inevitable desire to mimic success, there have been countless instances of over-reaching by imitators. In other words, freakishness has been confused with novelty in the minds of many who had the will but lacked the talent or facilities necessary for unique productions.

We are still producing — and always shall — choice Diamond Jewelry not limited by the confines of the ordinary, but, on the other hand, never transgressing the boundaries of refinement. Elegance and good taste will be two predominant features of our SIXTH ANNUAL EXHIBITION, which will be held in our offices from August 24th to 29th, inclusive.

QUALITY IN SILVERWARE

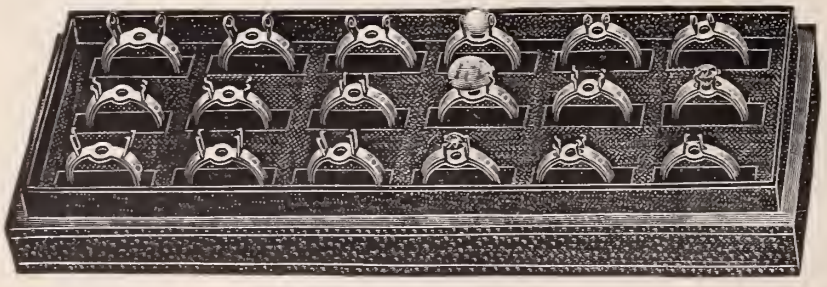
THE word quality in its broadest sense is descriptive of all Smith Silverware.

Quality in the beauty of design.

Quality in the excellence of finish.

Quality in workmanship and material.

Quality in our trade-mark which stands for the highest art of the Silversmith—it is a veritable hall-mark of quality.



Hollowware—Flatware—Pieces of Special Design

ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS

MEET A LONG-FELT WANT

THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,			**$6.00**
" " 12		" "	4.00
" " 9		" "	3.00

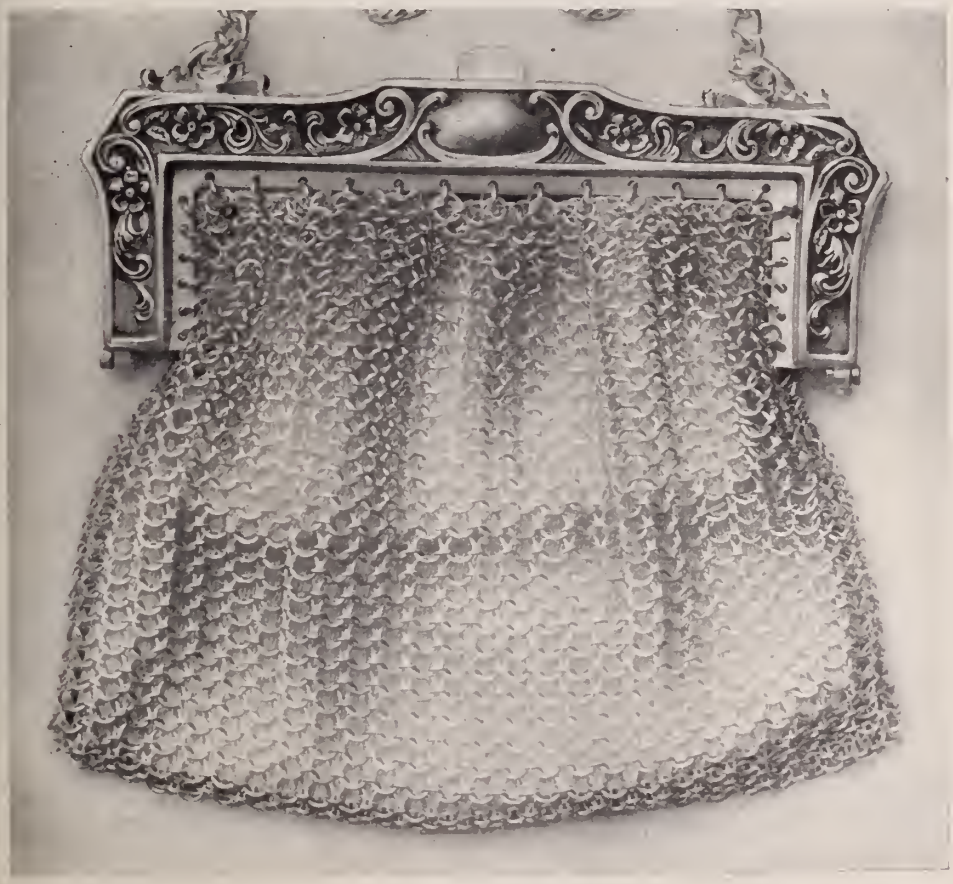
LEON ABELES

NEW YORK
37-39 MAIDEN LANE
(Lorsch Building)



MANUFACTURER OF

GOLD AND DIAMOND JEWELRY

TO WHOM IT MAY CONCERN:

I take this means of notifying the trade that I recently severed my connection with C. P. Goldsmith & Co., and am now manufacturing a line of Gold and Diamond Jewelry. In a short time I will again call on my friends in the trade and look with anticipation to a continuance of our pleasant business associations. Thanking you for past favors and patronage, I am,

Respectfully yours,
LEON ABELES.

Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "**Krementz-Bodkin Back**" **Stud** and **Vest Button** is the simplest and best mechanical Stud or Vest Button made.

The "**Krementz-Bodkin Back**" **Stud** and **Vest Button** is not one piece, but **is one-piece construction,** which makes it very simple and the strongest and most durable, because:

1—It is **Solderless**
2—It has **no** spring or hollow wire to bend or break
3—It is made of **solid, hard spring metal throughout**
4—It is made by **Krementz & Co.** which insures perfect **quality, construction** and **workmanship**

THE STORY OF THE HEAD

Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "**Krementz-Bodkin Back**" Studs and Vest Buttons are sold also under the unique **Krementz Collar Button Guarantee.**

THE STORY OF THE BODKIN BACK

GUARANTEE

If for any cause whatever, a "**Krementz-Bodkin Back**" **Stud** or **Vest Button** should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "**Krementz-Bodkin Back**" **Studs** and **Vest Buttons** are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

DESIGNING
AND
SPECIAL ORDER WORK

Sash Buckle Pins

AMONG THE NEW Summer Goods now coming from this factory is an impressive line of Sash Buckle Pins.

The demand is assured because Fashion decrees that they shall be an essential of feminine attire.

Style and quality are assured because the Buckle in all its forms has always been a notable specialty here.

THE DESIGNS are the very latest. Applied trim and Hand Engraving furnish many attractive decorations. Plain examples for those who choose simplicity. In some, well selected stones are used to advantage.

Altogether the line is seasonable, safe, moderately priced and profitable. What more need be said?

Roller Chain

OUR SPECIALTY

Do not forget that we will continue to show the best line of these goods on the market, in Fobs, Bracelets and Neck Chains. These wear longer, give better satisfaction than any metal fob made, and our designs are up-to-date. Also our line of chains of all kinds finds a ready market among the best trade, both in 1-10 and a medium wearing grade.

We also make a nice line of Brooches, Hatpins, Scarfpins, Barrettes, etc., that should demand your attention.

Ask your jobber, and if unable to obtain them from him, advise us who he is, and we will make arrangements for you to get them.

CAMEOS

KEEP abreast of the times and show a good line of Cameo jewelry for your Fall trade. It is not our intention to presume, but this is our advice to the Jobber.

Write to-day for our booklet showing the latest in Cameo Brooches and Scarf Pins. Except the penny for the postal, it is free for the asking.

10 Kt. Some stick to an inferior grade because their fathers used it, others because they have given nothing else a fair trial; but when buying 10 K. jewelry why not insist that it be 10K? The only absolutely sure way to protect yourself and trade is to demand stamped goods. For years our Trade-Mark has stood for honesty and quality in gold jewelry. Just give the W. E. R. Co. line a "look over."

Send for further information regarding our extensive line.

If You Are At a Standstill

It is Time to Put New Life Into Your Business

If trade is not coming your way, there is a way to make it come—a way to turn all of your goods into cash at once and to give your business a fresh start.

Why drag along when a week or so of HAND SERVICE will make things move, build up your bank account and give your store an advertising such as it never had?

No doubt you have on hand a lot of stock that is earning you nothing. It is tied up capital; that capital ought to be turned over several times a year at a good profit and you are losing money when it isn't.

Maybe you don't think well of auction sales.

My methods are different from those of other auctioneers. Let me tell you of them.

My long experience enables me to appreciate the conditions and solve the problems of the retailers. I can size up the situation immediately and give the needed advice.

For the asking, I will send you the letters of hundreds of jewelers that tell of the benefits of the HAND AUCTION and the GREAT AFTER EFFECTS.

My Latest Success—the Sale of the W. A. Sturgeon & Co. Stock, Detroit, Mich.

THE JEWELERS' CIRCULAR
WITH WHICH ARE CONSOLIDATED
THE HOROLOGICAL REVIEW
THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VOL. LVI. WEDNESDAY, JULY 15, 1908. No. 24.

ELSIE BEE'S FASHIONS.

SUMMER NOVELTIES NOTED IN A LADY'S RAMBLES AMONG THE JEWELERS.

CIGARETTE holders in plain gold cases to be worn on the chatelaine are growing in favor with the progress of the smoking habit among women.

* * *

Cameos continue their revival in popularity. The demand for them on the other side has led some dealers into laying in a good supply for Fall use.

* * *

A veil pin of the usual shape, but unique in design, has a row of sapphires in the center with a border in the form of a delicate tracery of oak leaves in diamonds.

* * *

Cigar lighters, which were first made of nickel, are now being made of polished gold. They are an ingenious substitute for matches, and require to be filled with alcohol but once a week.

* * *

The most approved shape for the now popular earring is that of a slender drop, which may be of turquoise, amethyst, pearls or decorated gold. Combinations of stones are most striking.

* * *

An attractive veil or collar pin is in the form of a slender bar of blue enamel having three narrow lines of gold. It is simple and dainty. The effect is heightened by an artistic treatment with pearls.

* * *

The "fashion collar pin" still has considerable vogue. Serving the purpose of two handy pins, which are hinged on and are therefore easily adjusted, it has the added advantage of the ornamentation of the connecting bar and also the support afforded to the collar. It now appears in several new designs.

* * *

Cigarette holders for women—dainty conceits to be worn on the little finger—are rapidly increasing in sale. The ring by means of which the part that holds the cigarette is adjusted is sometimes in the form of a tiny snake with a jewel in its head; or it is simply engraved or studded with brilliants.

* * *

A horseshoe of pearls and sapphires on a heavy gold wire with a row of stones on either side constitutes an attractive bracelet. Of a more unique order is the one of slender twin links of engraved gold joined by an amethyst of medium size; and also the scarab design, touched with enamel, as the central ornament for a stiff bracelet.

* * *

The soutoire maintains a growing popularity. It may be had in a simple style or plain or engraved gold sections and mountings, selling at $7, or it may be elaborate, with jeweled sections two or three inches in length and ranging in price from $100 upwards. The black grosgrain ribbon is very effective and smart with certain gowns when lit up by the dainty sections that ornament it.

ELSIE BEE.

Beautiful Presentation Clock Recently Made by British Silversmiths.

A MAGNIFICENT presentation piece recently turned out by a noted British firm of silversmiths is the large silver and bronze clock and barometer surmounted by a model of a locomotive and tender which was specially made for presentation to the retiring manager of the Great Western Railway Co., of Buenos Aires, Argentina. The piece is illustrated on the front cover of this issue.

The model of the engine was made to scale from the actual locomotive and is perfect in every detail, being practically a working model, and the miniature model at the base of the clock is a small replica of the first British engine used by this company in South America.

This handsome example of modern silversmithing bears eloquent testimony to the high state of the craft in England.

C. A. B.

Silver Cradle Presented to the Lord Mayor of Birmingham.

THE illustration herewith shows the silver cradle presented to the Lord Mayor of Birmingham, England, recently, in accordance with the custom of that city to present to the Mayor of the Corporation and his wife an article of this character whenever a child is born during his term of office. The presentation was made in the latter part of May.

The cradle was designed by Elkington & Co., is solid silver, measures 15 by 15 inches, and the base and canopy are ornamented with festoons of flowers. The body of the cradle is richly decorated, on one side with floating acanthus sprays of olive and the state arms, while on the other side is a shield bearing the following inscription:

"Presented to the Lord Mayor and Lady Mayoress of Birmingham (Alderman and Mrs. H. J. Sayer) by members of the City Council, co-opted members of the Committees, and chief officials, to commemorate the birth of a son during their term of office (December 27, 1907)."

SILVER CRADLE PRESENTED TO THE LORD MAYOR OF BIRMINGHAM, ENGLAND.

Ove Gulberg Hoegh, Spring Grove, Minn., was recently married to Miss Clara Etta Lyman, of Caledonia.

WE'RE OPTIMISTS.

During the recent depression in business, New York City was perhaps headquarters for pessimists, due to the fact that there were more bank failures in proportion than in any other place in the United States.

Now conditions have improved so much in New York that nearly all the institutions which had trouble have opened up under a new reorganization.

As jewelry Manufacturers, we have been optimistic as to the future, and by acts of this spring have backed up our optimistic thoughts by producing a large line of new, attractively-priced gold jewelry, in our various lines.

Progressive retail jewelers will undoubtedly have unusual demand this fall for this class of goods.

May our travelers when they call, or our mail order department, prove to you that we are optimists by showing you our new rings, lockets, sleeve buttons, Larter Shirt Studs and Larter Vest Buttons, etc.?

Death of Henry C. Klein.

MUNCIE, Ind., July 8.—The sudden death of Henry C. Klein, one of the pioneer jewelers of Muncie, which resulted from a stroke while he was out fishing in Lake James, in the northern part of this State, July 4, is deeply regretted throughout this section, as the deceased was among the most highly respected and prominent residents of this city, as well as one of its most leading merchants. Mr. Klein had been on a two weeks' outing with his wife and some friends, and was apparently in the best of health until stricken Saturday afternoon. He expired shortly afterward.

Deceased, who was a native of this State, was born in Delaware County, Nov. 8, 1842. He was the son of Armstead M. and Sarah Klein, and passed his early life in Muncie, where he received an excellent education. While still a youth he started to learn the jewelry business, and in 1855 became an apprentice in the store of his brother, John A. Klein. Five years later he went to Richmond to follow his trade, and about 1859 went to Vicksburg until the outbreak of the Civil War. Returning to Muncie in 1861, he joined Company E of the 19th Indiana Volunteers, from which he was discharged a short time later on account of ill-health, but re-enlisted in the company and served until the end of the war, participating in many battles.

On his return home after the war Mr. Klein started in to follow his old calling, starting in the jewelry business for himself about 1870 and continuing in the trade with success from that time. In 1892 he admitted two sons as partners, and from about that time the concern has run two stores, one at Walnut and Main Sts., and another at 110 E. Main St. In recent years the deceased had turned the active management of the stores over to his three sons, George A., Fred and Armstead, the business being run under the style of H. C. Klein's Sons and the Opera House Jewelry Store, though Mr. Klein continued to aid his sons in the management.

Deceased was married Feb. 19, 1866, to Sarah C. Spilker, of this city, who died Nov. 17, 1887. Mr. Klein was later married to Flora Patterson, also of this city. He is survived by his widow and four sons of his first wife, George, Edward M., Armstead M. and Fred A. Klein.

A liberal promoter of many enterprises which have given Muncie its high standing as a manufacturing city, Mr. Klein had long been considered a prominent figure in the local business world. In fraternal circles he was also prominent, and was a member of the B. P. O. E. and a 32d degree Mason.

Funeral services, in which the local lodge of Elks and the Masonic orders participated, were held yesterday afternoon at 2.30 o'clock in the residence, in charge of the Rev. Dr. Clarke Crawford, of High Street M. E. Church, and the Rev. P. W. Dierberger, of the Methodist Protestant Church. The interment took place at Beech Grove Cemetery.

E. C. Loper, Fort Morgan, Colo., has sold out to E. A. Maxwell.

Bennett Whitney has purchased the jewelry business of William M. Lockard in O'Neill, Nebr.

REPOUSSÉ WORK AND CHASING*

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(*Continued from issue of June* 17.)

17TH CENTURY WORK.

IN the period from the beginning of the 17th century until the present day no great or predominant style such as the Gothic or Renaissance ware has come into existence, but many pretty and unimportant styles have, from time to time, sprung up, only to be swept away again in favor of something fresh. During the whole of the 18th century French art and taste set the standard for all art and decorative work in Europe; the so-called baroque, rococo and Empire styles all originated in France, but were speedily taken up by the gold and silver smiths of other countries. Most of the work of the 19th century was merely copied from previous styles, and it cannot be said that a distinct style was evolved, although towards the end of the century a movement in the direction of a new style, now popularly known as *"l'art nouveau,"* was begun. Much of the work in this so-called new art style is not the sort of thing to be encouraged, but it yet remains to be seen whether the arts and crafts movement will not eventually lead to the development of a sound modern style.

During the first half of the 17th century there were but few changes, and so long as any of the great artists of the 16th century or their pupils remained the old designs continued to be reproduced. Gradually, however, the characteristics of the Renaissance style gave way to coarser and more ostentatious designs, the quantity of precious metal used in the manufacture of a piece of plate counting for more than beauty of form. In Spanish work of the 17th century this is particularly noticeable, and was doubtless due to the vast amount of precious metals brought into Spain from the American continent about this time. This feeling for ostentatious display has lasted in a greater or lesser degree down to the present day, when the first question with regard to a piece of plate is, as a rule, "How much does it weigh?" Germany clung to the better features of the Renaissance much longer than any other country, and the great guilds continued to do excellent work. One of the most important pieces of German work of this period is the famous chest containing dinner and toilet services made for Duke Phillip II. of Pomerania, and now preserved in the Kunstgewerbe Museum in Berlin. The main structure of the chest is made of ebony, overlaid with embossed silver panels and enamels. Small silver figures in the round, representing the various arts and sciences, are fitted into niches and corners. It was made at Augsburg in 1617, the silver work being made by Matthias Walbaum, the most important master in the guild at Augsburg about this time. The lobed cups which had been introduced during the 16th century continued to be made in large numbers, and several of these made in the first half of the 17th century are now in the Waddesdon Bequest Room of the British Museum. During this century the tankard shape was much developed in Germany, and many varieties can be seen in the different European museums, an interesting feature of these being that besides the ordinary methods of decoration, viz., embossing, chasing and engraving, medallions and coins were often introduced with good effect.

SILVER TANKARD, PARCEL GILT; DANISH, 1700 A. D.

During the reign of James I. the art of the gold and silver smith in this country followed on practically the same lines as in other countries. Since the Reformation in the 16th century practically no ecclesiastical plate had been made, and the silversmiths in consequence now turned their attention to the making of secular objects, notably silver toilet services, which had become the fashion both at home and abroad. Armor was also richly decorated in gold, silver and jewels; in 1606 King Christian of Denmark, when on a visit to this country, making James I. a present of a rapier and hanger estimated to be worth £7,000.

As the Reformation caused the destruction of church plate, so the civil wars between Charles I. and Parliament a century later caused the destruction of secular plate, and very little now remains, either ecclesiastical or secular, of an earlier date than the Restoration in 1660.

STYLE OF CHARLES II.

After the Restoration, the gold and silver smiths' art received a great impetus. Charles II. was fond of luxury, and caused much plate in the shape of tables, mirror frames and toilet services to be made, besides a number of maces which he presented to those corporations who had been faithful to his father's cause. Most of this work was in the French style which was then the fashion at the English Court. A copy of a silver mirror frame of the time of Charles II. is in this massive "Louis quatorze" style. Most of this work made to the order of Charles II. was melted down by William III. under the same necessity that had caused Louis XIV. to melt down a large part of his plate during the wars at the end of the 17th century. The silver plate made in England during Queen Anne's reign marked a distinct departure. It was much simpler and more dignified than the work previously made, and since the Gothic period was probably the best that had been made in England.

In the 17th and early 18th century Flemish and Danish metal workers were famous for their fine repoussé work and chasing. Although, in some instances, the ornamentation is extremely florid and perhaps a little cheap in the effect obtained, one cannot help admiring their bold and decorative treatment of floral forms, often simply obtained by raising a boss and putting one or two lines and tool marks over the front. Of course, in this case, there was no attempt at careful and correct modeling, but the effect of the thing they wished to represent was there. The silver tankard, of which a sketch is given, is in

the South Kensington Museum. It is Danish, and the ornamentation is in this typical and effective style. The three feet on which the body rests are three balls chased into a number of successive cusps. It is parcel gilt and dates from 1700. French taste continued to lay down the law all over Europe in all matters artistic during the first half of the 18th century. German and Russian princes followed both the style of architecture as well as the interior decorations of the French, and eventually the Germans, for a time, even exceeded the French and went into a wild extravagance of ornamentation such as had never been seen before. Evidence of this may be seen in the objects now stored in the Green Vaults at Dresden, belonging to the Saxon royal family. W. S.

(To be continued.)

Important Conference as to Technical Instruction Held in London.

London, July 6.—The question of technical instructions is now with us every day, and if anything were needed to prove the great importance of the question and the desirability of carefully discussing ways and means the annual conference of the British Association of Teachers in Technical Institutions should bring it home to us. The points made by the experts were such as obtain not only in Great Britain, but in France, Germany—indeed, practically all over the Continent and America. Among those who took part in the meetings were Mr. Lineham, B. Sc., of the Goldsmiths College; R. W. Ferguson, B. Sc., member of the St. Helen's Municipal Institute; Mr. Barker-North, of the Bradford Technical College; Mr. Adamson, Municipal School of Technology, Manchester; S. Hicks, director of the L. C. C. Shoreditch Technical Institute; P. A. Wells, of the same institution; Principal Millis, of the Borough Polytechnic, London; W. Augustus Steward, chief instructor in gold and silver smithing at the Central School of Arts and Crafts, London, and Lewis F. Day, the famous designer.

The president, Charles Harrap, in opening the proceedings, remarked upon the fact that there was need for watchfulness and criticism by those engaged in technical education to insure that the Municipal College of Technology which is being established in South Kensington should be fully co-ordinated with the main structure of English technical education. The fear is that it may become a college of the ordinary type and not a technical institute of the highest rank.

Dealing with the question of technical institutions, he pointed out that most wanted more students, particularly in the daytime, and owing to the break-up of the apprenticeship system it had become all the more necessary to found a real system whereby the rising youth of the nation might be educated. It was, in his opinion, very important that trade schools, as such, should be established, but what the trade school was to be, opened up a subject for discussion. Certainly the older methods of teaching apprentices no longer obtained, and were succeeded by spasmodic snatches of half-hearted education, and the learner was generally led to learn his craft himself or to pick up such things as he could by meandering round the workshop. Consequently the great point which must be considered by the conference of technical instructors was the question of a trade school, and in his opinion to be of any advantage at all a trade school should be so organized that a youth could actually learn a trade well within its walls.

"Judging from the students who come within the pale of technical education, it might be said, with little fear of contradiction, that the education of the mass of the boys leaving school to-day was not better than, even if so good as, that of the boys of 30 years ago," said Mr. Harrap. Personally, he felt it was not so good. Certainly there is something wrong in a system of elementary education which does not bring out the use of the hand and eye, and which insists more upon book learning than upon developing the quickness of the eye and the dexterity of the hand.

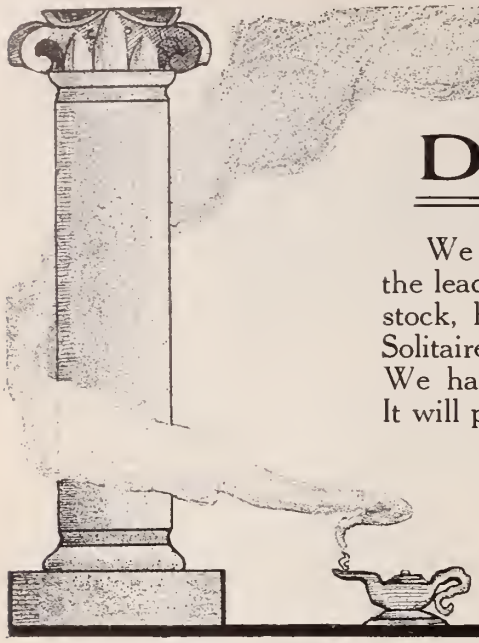
Mr. Hicks, in dealing with "Modern Education—the Technical Phase," also dealt with the same subject and criticized the elementary schools and their lack of proper training which would fit the 300,000 children leaving the British elementary schools every year to take their place in the great world with those who labor with the hands. He affirmed that the present system of elementary education was robbing the children of the imaginative faculty, it helped to kill constructive imagination and taught *ideas* when the children's time should be occupied in getting into touch with *things*.

C. T. Millis took exactly the same standpoint and insisted that the authorities were doing wrong in offering scholarships or "steps from the elementary school to the university" to those who demonstrated ability in book learning, while they practically ignored the demands of the great class who, as producers, were the backbone of the nation. He strongly advocated a considerable increase of scholarships offered for those who demonstrated dexterity in craft.

Mr. Wells pointed out, in dealing with the question of pre-apprenticeship, that in the trade school the boy's general education should be attended to, not on the lines of the ordinary school; such general education as he received should be so arranged as to bring him constantly into touch with the practice of the workshop. English, geography and mathematics might well be linked up with preparatory trade work and taught as part of the boy's training as a craftsman, but in no case should that training be less than two years nor should specialization take place until the third year, when time and conditions should as nearly as possible approximate to that of the ordinary workshop or factory. In offering the criticism of the schools Mr. Wells affirmed that we suffered from a general suspicion that technical school methods could not be practical. This was largely due to the fact that the authorities were too anxious to see immediate results. They did not seem to realize that the boys must do a certain amount of practice in the use of tools before they could produce an object of a satisfactory nature.

Lewis F. Day, in dealing with "Commercialism, the Schools and the Decorative Arts," delivered a very remarkable address. Mr. Day, who is the author possibly of more books upon design than any living man, holds views which are opposed to many modern educationalists and teachers of craft and design. He holds that the use of machinery is, in the main, perfectly legitimate. He asserted that he saw no reason why the noisy loom with its brain-splitting crashes should not be superseded by the quiet-running machine loom. The work did not suffer, and in his opinion the people were not worse off, but certainly worked under better conditions. He then generally argued that this applied practically all the way round, and then made the bold assertion—an assertion which could not be accepted by craft instructors—that the designer and actual craftsman should be absolutely distinct.

W. Augustus Steward pointed out that it was frequently a trial in the silversmith's shop to follow out and to successfully build up an object which had been designed by an architect or an artist. It might look very nice on paper, but was generally constructively faulty. Strangely enough, Mr. Day, in replying to the discussion, accepted Mr. Steward's points so far as smithing was concerned, and admitted that in gold and silver smithing, jewelry and metal working it were better if the designer and craftsman were one.



Many of those who took part in this national conference were visitors and guests to the American schools a short time since, and it frequently happened that items they had picked up in America were brought forth in the arguments, and I think this short resumé of a very useful conference of men who have all been through the workshop, and who are now employed by public authorities in instructing the young craftsmen, will be of interest to American readers. St. George.

Dress Pins as Weapons.

FOR decoration, defense and utility the woman's hat-pin is a present-day need. Its counterpart was found (in the ancient days of Egypt's and Greece's highest civilization) in the pin of the fibula (brooch). Whether to fasten a cloak or adorn the wearer or act as a weapon that "business end" of those ancient "notions" found active service in all three departments of usefulness.

In written history we find several instances of this fact. Polydorus, seeking revenge, put out the eyes of her son's murderer, Polymester, with the pin of a fibula. Oedipus, son of Laius, king of Thebes, pierced his eyes to blindness with the pin of a fibula from the dress of his wife, Jacosta, after she hanged herself. C. W. C.

J. D. Sowers was recently arrested at Pueblo, Colo., to answer the charge of robbing the jewelry store of Mrs. W. L. McCluer, 606 S. Union Ave. It is said that several weeks ago the prisoner, who claimed to be a jeweler from Paducah, Ky., on the pretense of wanting to buy the stock of Mrs. McCluer, made an inventory of it, and after he was gone a number of articles were missing, which were later found in a pawnshop.

DIAMOND RINGS

We import diamonds and other precious stones direct from the leading markets of the world and always carry a complete stock, hence we are able to show, at all times, a fine line of Solitaire Diamond Rings, also Cluster, Princess and Fancy Rings. We have rings to please every taste at prices that are right. It will pay you to know our line. Send for illustrated catalog.

Well Dressed Woman Arrested After Stealing Ring from Brooklyn Jeweler.

A woman who said she was Georgiana McKelvey, of 148 1st St., Brooklyn, and who later described herself as Mabel Bryan, was held by Magistrate Tighe, sitting in the Adams St. Court last Wednesday, charged with the larceny of a ring set with three diamonds and valued at $80, from the store of Louis Amols, 425 Fulton St., Brooklyn. The woman is described as being about 35 years old, and seems like a person who has good education and training. She had a prosperous look when she entered Mr. Amols' store, and was rather nicely dressed in a light blue suit and straw hat. Mr. Amols, when he first saw her considered her a good customer.

In speaking to a CIRCULAR-WEEKLY reporter relative to the matter, Mr. Amols said that the woman came to his place of business late in the afternoon of July 7, and said that she wanted a comparatively inexpensive ring with three stones. Mr. Amols picked out three rings, one of them valued at $70, one at $80, and another at $100. The woman inspected the rings, but was not satisfied and asked to look at another. The jeweler left the three rings on the counter and turned to get another.

As he returned Mr. Amols said that he noticed that the $80 ring was missing. He spoke to the woman about the missing ring, but did not think of charging her with the theft. She told him that he had taken it back and put it away with the stock. He was sure that he had not done this, but searched for it in vain. The woman said that she did not know what had become of the ring.

Mr. Amols then began a search of the place, but failed to discover the missing article, and asked the woman to help him find it. Going in front of the counter, he found on the floor the stock tag number 665 and the price, $80. He was then sure that the ring had been stolen.

The woman said that she could not remain at the store longer, as it was getting toward 5 o'clock. The jeweler told her that the ring must be found before she departed, whereupon she offered to do anything in her power to help find the jewel. He said that the only way to straighten out the matter was to notify police headquarters, which he did. Policeman Mahon came from the central office and put the woman under arrest, whereupon she threatened the jeweler if he made a charge and protested her innocence.

The officers took her to the Adams St. station, where she was searched by Miss Duree, the matron, and it was not until the matron told her to take a sip of water that any trace of the ring was found. The prisoner before drinking the water slipped something from her mouth to her hand. The matron immediately grabbed the hand and demanded to know what she had taken from her mouth, whereupon the woman threw the ring out of the window. It went into an alleyway which can only be reached by dropping out of a window, where it was recovered. Mr. Amols identified it later as his property and made a complaint of larceny against the woman.

The woman admitted that she had taken the ring, and said that she was penniless and needed the money to pay rent. She had been walking down Fulton St., where the display of diamonds in the jeweler's window tempted her to make an effort to obtain the ring by a trick. Mr. Amols said that the woman had not impressed him as being a crook, and that he told her before notifying the police that if she would produce the ring that he would not enter any charges against her.

Assets and Liabilities of Herman Streiff, New York, as Shown by His Schedules.

The schedules in bankruptcy of Herman Streiff, 415 Broadway, New York, were filed last week in the United States District Court, New York. They show liabilities of $10,988 and nominal assets of $14,158, the latter including stock, negotiable bonds, etc., $11,222; jewelry (stock), $1,500; machinery, $173; household goods, $150; unliquidated claims, $948, and cash in bank, $50.

Among the unsecured creditors named in the schedules are: I. Schmuckler, $136; Silverman Bros., $242; W. H. Saart & Co., $370; Freeman Daughaday & Co., $214; Tuttle & Starck, $263; American-Swiss Watch Co., $287; Max Klass, $142; McRae & Keeler, $334; Attleboro Mfg. Co., $786; Frank I. Gould Co., $265; Cunningham & McCarty Co., $102; M. W. Carr, $300; M. F. William Co., $255; Standard Button Co., $342; Edward Moosbrugger, $106; Fontneau & Cook Co., $998; Attleboro Chain Co., $377; F. M. & T. L. Cobb, $415; F. Solinger, $246; Esser & Co., $129; Castiglioni, Capaldi & Co., $122; Marden & Kettlety, $400; New Haven Clock Co., $125; Lyons Mfg. Co., $456; Wm. H. Luther & Son, $260; Workman & Newman, $153; Oscar Gottlieb, $311; Keller & Becker Co., $164; Louis Meyer Bros., $110; Henry Lederer & Bro., $204; Electric Chain Co., $184; S. & B. Lederer Co., $370; Providence Stock Co., $249; Cory & Reynolds Co., $148; Butler Bros., $275; H. Cardin, $100; Mutual Alliance Trust Co., $500.

A claim for damages against the Public Service Corporation of New Jersey for $844 and a claim against the receivers of the New York City Railway Co., $104, are also set down in the schedules.

Mr. Streiff was formerly a member of Streiff & Cardon, Passaic, N. J., and previous to that time was of Streiff & Goldstein. He was located in business for himself at 23 Lispenard St., New York, but discontinued at that address and engaged in the wholesale diamond and jewelry business at 415 Broadway.

The International Committee of Weights and Measures has pronounced in favor of making the weight value of the carat uniform. The carat, the unit of quantity for precious stones, at present varies in different countries, and according to the decision of the committee it is fixed at 200 milligrammes. In conformity with this decision the French Government is introducing a bill whereby the designation of "metric carat" in transactions relating to diamonds, pearls of fine quality and precious stones can be given to the double decigramme. The use of the word carat to designate any other weight is prohibited.

British Salesmen Remain in Jail at Pittsburg Awaiting Trial on Smuggling Charge.

PITTSBURG, Pa., July 11.—E. R. Carder, manager for Abraham Bros., Birmingham, England, who came to Pittsburg several weeks ago to lay claim to the diamonds and jewelry, valued at $5,000, brought into the country by Frank J. Walker and Ralph Waldeman, has returned to England, placing the firm's interests in the hands of the law firm of Dalzell, Fisher & Hawkins. Walker was employed by Abraham Bros. He met at Kingston Waldeman, who, it is alleged, induced Walker to come to America to dispose of the goods and then return to Kingston to secure $10,000 worth more. The details of the arrest of the men have already been told in THE CIRCULAR-WEEKLY.

Both men are now in jail, where they must remain yet for several months before their cases are disposed of, being charged with smuggling by the Government.

Before leaving Pittsburg Mr. Carder made a disposition, setting forth in detail that the goods taken from the men under arrest belong to Abraham Bros. This disposition is to be used in the trial of the case. The indictment against the men will not be brought before the United States Grand Jury until next October, and the case cannot be tried until November. It was therefore useless for Mr. Carder to remain in America, so he went back to England, under the advice of his attorneys.

Two weeks ago the Government brought forfeiture proceedings for the purpose of selling the goods to pay the duty, but the proceeding was offset by claims made by Mr. Carder on behalf of his firm to secure possession of them, and the case must be regularly disposed of in court. No additional charges have been made against Walker and Waldeman, and it is doubtful if there will be.

Attorney Lawrence B. Cook, who represents Walker and Waldeman, will fight for the freedom of the men. "It is up to the Government to show," said Mr. Cook to THE CIRCULAR-WEEKLY correspondent, "that these men smuggled the goods into this country. We deny that there was anything wrong about the transaction. No further charges have been made against the men, and I cannot see how there can be."

The men are very impatient because of their imprisonment. The Government officials here, however, feel disposed to prosecute the case thoroughly on the smuggling charge, and the case will be bitterly fought by the accused, who are anxious to regain their freedom. The men will have served nearly six months in jail before their case is called by Uncle Sam unless they furnish bail.

The partnership existing between Burnstein & Kilbert, Evansville, Ind., has been dissolved. M. Kilbert, of the old firm, will conduct the business alone.

A short time ago someone broke into the plate glass window of the Phipps jewelry store, Salisbury, Md., and stole six watches that were in the window. The robbery took place about 11 P. M. The stolen property is worth about $150. The police have been working on the case, but have found no clue.

Semi-Annual Convention of the Minnesota Retail Jewelers' Association Held at Minneapolis, Minn.

MINNEAPOLIS, Minn., July 9.—The 10th semi-annual meeting of the Minnesota Retail Jewelers' Association was held in this city, July 6, 7 and 8, at the West Hotel. The meetings alternated with the sessions of the Minnesota Association of Optometrists, the latter opening Monday morning, and holding a forenoon and evening session, the jewelers taking the afternoon.

On Tuesday, July 7, the jewelers occupied the morning and evening and the optometrists the afternoon. Wednesday, the entire day was devoted to pleasure, there being a joint excursion by chartered trolley cars to St. Paul, thence to Stillwater, 18 miles east of St. Paul, where the Minnesota State Prison is located. An hour was spent visiting the institution, after which the party embarked upon the steamer *Purchase* and barge, and took a trip down the St. Croix river from Stillwater, to its junction with the Mississippi river, thence up that river to St. Paul. Dinner and supper were served upon the boat.

Exhibits were not numerous, there being showings by the Eagle and National Cut Glass companies, and by the Marine Co. E. Schmalz & Son, manufacturing jewelers of St. Paul, presented the association with a very neat rose gold shield lapel pin bearing the initials of the organization. The South Bend Watch Co. and others were represented.

A. E. Paegel, State Organizer, called the meeting to order, for the jewelers, and A. E. Barker, president, made his opening address, reviewing conditions and touching upon some of the things which the organization had accomplished and more which it wanted to accomplish. He was hopeful for better things for the profession, with the advance of the organization, and the increase of its membership.

I. M. Radabaugh, Hastings, the secretary, made his regular report, as did I. Reiner, of Hutchinson, the treasurer. G. H. Lang, Mankato, chairman of the membership committee, reported the names of 36 applicants for membership.

The Vreeland Watch Case Stamping bill was made the subject of a liberal discussion. F. H. Straub had the topic for his address, and was followed by discussion. The sentiment was fairly well divided for and against the bill, and the organization took no action in the matter, as a whole.

John D. Bodfors, Minneapolis, spoke upon "Should the City Jeweler Carry Side Lines, and If So, What? If Not, Why Not?" Mr. Bodfors favored the lines of cut glass, leather goods, canes, umbrellas, stationery, fountain pens and the usual accessories. He took the position that the side line to be a success, must be pushed, and if it was pushed the results would be satisfactory. But too many carry articles, and then place them away in an obscure position and do not attempt to give them publicity, the result being that they do not sell.

"A Profitable Way to Take in Watch Work" was the topic of D. C. Spaulding, who argued for good reliable and substantial work, at a fair price, and avoiding cut prices and inducements of that character. He believed in presenting to the customer the fact that cheap work meant uncertainty and possible dissatisfaction.

"Should We Favor the 'Solid Gold' Amendment to the National Stamping Law?" was the topic of M. S. Nelson, Hutchinson, which was followed by a discussion. The tendency of the members was against additional legislation limiting the character of the goods to be sold, any more than should hardware dealers be required to handle none but all-steel cutlery, or tailors none but all-wool cloths. None favored misrepresentation of goods, but they also felt that the people who wanted the cheaper and less expensive goods, had the same right to get them that the buyers of the more expensive articles had to get what they wanted, and that the retailers had the same right to sell that the other had to buy.

"Qualities and Assays, Good, Bad and Indifferent," was handled by J. L. Williams, who brought out information from his experience and that of others upon this line.

"Side Lines for the Country Jeweler" was the subject of a talk of J. C. Herdliska, Princeton, Minn. Mr. Herdliska is a successful country jeweler, and he outlined briefly the array of side lines which in his judgment afforded the best opportunity for profit to the country jeweler.

"Should Engraving be Free?" aroused considerable discussion, although the bulk of those present were fairly agreed that it should not be free. There were some who felt that under certain circumstances it should probably be included, and a single letter was rather held out for by some. The matter was not formally treated, but it will doubtless come up again at the annual meeting to be held in the Winter, when the association is expected to take some positive action.

The question box included a number of pertinent topics, and aroused much live discussion. Among the questions presented were the following: "How can we best cope with the evil of retailing by jobbers?" "How shall we treat the lines of goods that are sold through other channels, as clocks, silverware, carving sets, etc.?" "How to treat the mail-order customer when he quotes catalogue prices"; "Buying goods from sample lines at home or at the wholesale house"; "Should the retail jeweler advertise prices for repair work, considered from a financial standpoint?" "What kinds of advertising are best for the retail jeweler?" "Does it pay to conduct a jewelry store on a strictly cash basis?" "To what extent should time guarantees be given on jewelry, silverware, etc.?" "How often should a retailer turn his stock; what should be the average profit, and how much should his expense be in comparison to the business done?"

The resolutions adopted included a strong objection to the passage of any new stamping law of any kind, and recommending instead the enforcement of the present laws on fraudulent advertising.

Frank Logan, Royalton, was elected vice-president, to succeed J. C. Marx, Shakopee, who resigned. Mr. Marx has sold his business and will remove from the State.

Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from the Port of New York.

WASHINGTON, D. C., July 8.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Algoa Bay: 1 case plated ware, $181; 27 cases clocks, $818; 2 cases jewelry, $304.

Buenos Ayres: 2 cases plated ware, $175; 30 cases clocks, $574; 1 case optical goods, $138.

Bremen: 2 cases plated ware, $193; 3 cases watches, $2,070; 1 case jewelry, $500.

Berlin: 15 cases clocks, $2,917.

Callao: 1 case plated ware, $132; 1 case watches, $315.

Calcutta: 4 cases clocks, $604.

Christiania: 10 cases clocks, $280.

Christiansand: 10 cases clocks, $150.

Cienfuegos: 4 cases plated ware, $248.

Coatzacoalcas: 14 cases clocks, $115.

Fremantle: 6 cases plated ware, $475.

Glasgow: 18 cases clocks, $825: 14 cases clocks, $235.

Guayaquil: 3 cases plated ware, $105.

Hamburg: 7 cases scopes and views, $300.

Havana: 24 cases clocks, $762; 1 case watch cases, $264.

Havre: 1 case jewelry, $300; 1 case optical goods, $127.

Liverpool: 5 cases watches, $2,500; 3 cases precious stones, $4,010; 1 case jewelry, $635; 1 case silverware, $923; 1 case jewelry, $500; 1 case watch cases, $500; 1 case silverware, $537; 2 cases jewelry, $975; 3 cases watches, $1,500.

London: 37 cases clocks, $561; 65 cases clocks, $2,624; 2 cases watches, $600; 7 cases optical goods, $3,694; 36 cases clocks, $812; 2 cases optical goods, $613.

Macoris: 3 cases watches, $173; 1 case jewelry, $117.

Madras: 50 cases clocks, $1,157.

Matanzas: 7 cases clocks, $102.

Oporto: 21 cases clocks, $277.

Port Madryn: 35 cases clocks, $555.

Santos: 12 cases clocks, $265.

Savanilla: 2 cases clocks, $174.

Sheffield: 7 cases jewelers' sweepings, $2,100.

Stockholm: 1 case jewelry, $328.

Southampton: 1 case plated ware, $110; 1 case silversmith's sundries, $212; 3 cases scopes and views, $552.

Sydney: 1 case thermometers, $137; 6 cases optical goods, $646; 1 case jewelers' findings, $126; 216 cases clocks, $3,929; 24 cases plated ware, $2,306; 1 case watches, $2,102.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended July 10, 1908.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin	$126,973.34
Gold bars paid depositors	78,467.25
Total	$205,440.59

Of this the gold bars exchanged for gold coin are reported as follows:

July 6	$16,329.84
" 7	32,902.93
" 8	41,523.46
" 9	10,413.15
" 10	25,803.96
Total	$126,973.34

Market Price for Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London.	*New York. .999 Basis.*
July 7	24 13-16d.	$.55¾
" 8	24d.	.55¼
" 9	24 11-16d.	.55½
" 10	24 9-16d.	.55¼
" 11	24 9-16d.	.55¼
" 13	24 3-4d.	.55⅝

Modern Cameos

The first samples of the MODERN CUT CAMEOS were brought over by us about two years ago.

Confident of the ultimate success of the stone we never tired in our efforts to acquaint the trade with its merits. Its immense popularity now attests to our correct foresight.

The same effort has been exerted on the other side in improving the quality as well as securing an adequate supply. We have succeeded also in this respect, and our Cameos are unexcelled in the matter of superior engraving, and precision of size and finish—and at right prices.

ONYX CAMEOS in MODERN and CLASSIC DESIGNS on hand in all sizes and colors for immediate delivery.

AMERICA'S NEWEST GEM **AMATRICE**

The Most Remarkable, Beautiful and Individual Matrix Precious Stone Ever Offered to Jewelry Wearers.

Entirely superior to any other matrix gem in permanent jewelry merit.

COLOR—Wonderful shades of green combined wi h infinite forms of matrix effects in shades ranging from subdued pink through tans and light browns down to very dark brown. Peculiarly adapted to gold jewelry.

HARDNESS AND POLISH—Matrix and color polish equally and brilliantly, and there is no roughness nor any porosity in the polished matrix. Amatrice is materially harder than turquoise.

INDIVIDUALITY—The unequaled variety of matrix effects makes each stone an individual gem. Exact duplicates do not exist, but beautiful matching effects for sets are obtainable.

SALABILITY—At retail the most salable of matrix gems, because the range of color combinations and innumerable matrix effects appeal strongly to the individual buyer.

RETAILERS SHOULD REQUIRE MANUFACTURERS TO SUPPLY DIFFERENT TYPES IN EACH LOT BOUGHT

Amatrice Positively Does Not Fade Nor Change Color.

Buy through the regular trade. Only one Amatrice mine in the world owned solely by

OCCIDENTAL GEM CORPORATION
216-217 Dooly Block, Salt Lake City, Utah

A. J. Bruneau, Secretary, will be at Manhattan Hotel, New York, until July 15th, 1908.
Descriptive folders for distribution to public furnished by manufacturers with each lot of Amatrice jewelry.

Michigan Retail Jewelers Gather in Annual Convention at Detroit, July 8 and 9.

DETROIT, July 13.—Particularly successful in every way was the 1908 convention of the Michigan Retail Jewelers' Association held in Detroit last week. Attendance was larger than that of the previous year, the papers were interesting and discussed with great interest and the reports of the officers showed the organization to be thriving and on a better financial basis than ever before.

From the time the jewelers began to gather in the Hotel Tuller Tuesday evening until the Ku-Ku banquet, which closed the programme, everything went smoothly. Ideal convention weather helped to make the meeting enjoyable. Most of those who came from outside took the occasion to spend a few days of recreation visiting the pleasure spots about Detroit.

Greater interest than usual was taken in the gathering by Detroit retailers and a number of new members joined the association from the State metropolis. The general sentiment was that the convention created a better sentiment of fellowship among the members of the trade in the State.

The presence of a number of ladies who accompanied their husbands to the convention gave a social side to the affair. Mrs. Victor C. Morse, wife of the secretary-treasurer, took an important part in the meetings, acting as assistant secretary. She is a practical jeweler herself, and was at home when technical subjects were discussed.

FIRST SESSION, WEDNESDAY AFTERNOON.

President Sandy McKay, West Branch, called the meeting to order and reviewed the progress of the association in the year, saying that it had made advances in several ways. He was pleased by the interest shown by those in attendance and assured all that the officers had used their utmost endeavors to arrange a programme that would be instructive.

"The greatest evils of the retail business are at home," he declared. "Once a year we meet in convention, to discuss trade evils and grievances, to exchange ideas and to select delegates to the National Association's convention.

"In times past the big retailers of the cities have looked on the State association as something of a joke. Now they feel that the retailing jobber has hit them a slap in the face. We, in the small towns, wish to act together against the mail-order houses. Now that each of us has something to fight, the big retailer and the little one may come together, making harmony and causing the association to be a live one."

The secretary then read a cordial letter of greeting from Secretary Radebaugh of the national association.

This communication was spread upon the records. The minutes of the last meeting were read and approved. President McKay then apointed these committees to act at this convention:

Resolutions—W. F. King, Jr., Adrian; G. W. Stotz, Saginaw; W. H. Beck, Detroit.

Credentials—A. B. Hull, Belding; J. M. Hellinger, Suttons Bay; W. E. Leach, Detroit.

Grievances—E. E. Thomas and J. H. Ehrlich, Detroit; Max Jennings, St. Clair.

J. H. Purdy was then called to read a paper on the subject of "Catalogues." He said in part:

"Catalogues have found their way outside the limits of business ethics. It is your place to regulate this. Believing that no honorable house would knowingly supply outsiders with catalogues, yet the retail jewelers must take steps to protect themselves. One solid, large organization can accomplish this, for the jobber and manufacturer, after all, are at your mercy when you are organized.

A. B. HULL, PRESIDENT-ELECT.

"The best solution so far proposed is for the national association to insist upon such houses as are designated by them to combine in one universal catalogue, for each line, with all their names and addresses on each cover and title page. The retail jewelers then supply them with a mailing list; then you have the catalogue problem under control.

"Each of the 20,000 legitimate jewelers of the United States can receive this catalogue and 20,000 catalogues would supply every one and save to the jobbers perhaps 75 per cent. of the present cost, varying with number in the combine, and encourage a corresponding reduction in price of their merchandise, and possibly giving the retail jewelers a lower price than could be obtained outside.

"Then, when you arrange so that only members of your association will receive these special benefits (such a plan is now under consideration), the retail jewelers' association will have a power that will force the recalcitrant jeweler into your ranks."

Max Jennings, St. Clair, read an interesting paper on "Jewelers' Guarantees." His conclusions were:

"First, know your goods and who makes them; then guarantee accordingly.

"Second, never allow yourself to be led into the error of giving an extravagant guarantee.

"Third, your guarantee should always be honest and never misleading.

"Fourth, the price and quality combined of an article should consistently harmonize with the duration of a guarantee.

"Fifth, always bear in mind that your customer looks to you for redress and knows no one else in the transaction. And, finally, do not overlook the fact that a reputation for square dealing is a jeweler's strongest asset and that it is better to lose one occasional sale than to play tag with your reputation."

H. C. Carpenter, of the South Bend Watch Co., was then called on to deliver an address on "Salesmanship." He said that salesmanship has become an art or science rather than a mere calling. The old method of hanging up a sign and then waiting for trade to come to one's counter has passed away. It is now necessary to create confidence in one's wares and to follow that up by shrewd business methods and fair dealing.

"The jeweler to-day has more of the confidence of the people than he realizes," he said. "It is necessary to be careful of your acts. More people look to you for careful methods than the men of any other business.

"There is no bank at which people would leave money without a receipt, although banks hold so high a place in the community. Yet people come into town from a long distance every day and walk into your shop to leave their jewels, their watches, without a receipt of any kind. That shows the confidence the trade inspires.

"Be careful to live in your town so that you have that kind of respect. Appearances count more than we think. There are lots of men in the jewelry business who ought to be in some other business.

"When a man gives attention to himself, he gives attention to his business. If you notice a store where the proprietor is slovenly, where the show window is poorly arranged and the cards are specked—you think that is the way that man does everything.

"I indorse what Mr. Jennings has said as to guarantees. Many men are afraid to get fair prices for their work, especially repair jobs. They do not stop to think that the repair bench has to pay its proportionate share of the cost of rent, lights and percentage on selling goods. I remember one case of a man who was accustomed to pay $10 for getting his fine Swiss watch repaired. He happened to be in a strange town when it got out of order, and the jeweler asked him only $1 to repair it. The customer put the watch back in his pocket and walked out. That low price had made him loose confidence in the ability of the jeweler."

President McKay asked J. H. Purdy to give his opinion of the Vreeland Stamping bill. Mr. Purdy declared his belief that it does not sufficiently cover filled goods. He described the filling processes and declared that "gold-filled" is a misnomer. He advised that the National Association of Jew-

elers adopt a system of co-operation with the manufacturers by which quality and association marks be put on goods. The jeweler would then know just what he was selling and could guarantee it.

Max Jennings praised the bill, declaring that it fulfills its purpose to the extent that was expected.

Walter H. Beck, Detroit, said that he received no copy of the programme and that he understood the secretary had the only copy at the convention. He said that a booklet which cost $75 per page for advertising should be more generously distributed.

Secretary Morse replied by saying that a copy had been sent to every Michigan jeweler, so far as they could be located, but that mistakes might have occurred. The cost of getting up the programme has been large, he said, and the supply had not been sufficient owing to the demand being greater than was expected.

THURSDAY MORNING SESSION.

At the second session, Thursday morning, A. B. Hull, Belding, was called upon to lead in the discussion of the subject: "How Does the Organization of Retail Jewelers Benefit the Legitimate Jobber?" Mr. Hull declared that the jeweler does not ask favors, but objects to double dealing. He said that retailers can make their trade profitable to jobbers who refuse to sell to mail order houses.

A question was asked in regard to the Burlington watch, sold by Babson Bros. It was stated that the Elgin Watch Co. had discontinued making it, and that the watch is now made by the Illinois Watch Co. J. W. Armbruster, of that company, explained the position of his firm, which holds that it is better to make watches under a separate brand for the mail order trade than to sell their regular brands to such houses.

The following resolution was then passed: "Resolved, That we endorse the Illinois Watch Co.'s policy in keeping their regular named line of watches out of retail mail order catalogues, by making watches under a special name and brand for these firms."

Walter H. Beck declared that mail order houses have come to stay and advised that retailers take measures to meet such competition. B. E. Chapman and Max Jennings also spoke on this topic.

An executive session was then held. Secretary Morse said, in his report, that the association has tripled its membership during the year. It has a balance of $300 on hand.

The report of the committee on resolutions was then submitted. With regard to a government stamping law, the associations went on record as desiring to have all agitation cease. It was recommended that the national association adopt such a trademark plan as their judgment dictates. The second resolution expresses appreciation of the efforts of the watch case companies to protect the legitimate trade. H. C. Carpenter was thanked for his aid given to the secretary-treasurer, and the association in general. A resolution of sorrow at the death of Chas. S. Graves was adopted, and a committee consisting of A. B. Hull, Belding; G. W. Stolz, Saginaw, and J. M. Hollinger, Sutton's Bay, was appointed to send a letter of condolence to Mrs. Graves.

The manufacturers and jobbers who assisted in making the association manual a success were also thanked by resolution.

No report was made by the grievance committee, but the secretary-treasurer reported that two complaints against jobbers for sending catalogues to people not entitled to receive them had been settled satisfactorily.

The election of officers was then held and the following were named without opposition: President, A. B. Hull, Belding; vice-president, Walter H. Beck, Detroit; secretary-treasurer (re-elected), Victor C. Morse, Ithaca; members of the executive committee, G. W. Stolz, Saginaw; Max Jennings, St. Clair.

A motion was adopted that the traveling expenses of the executive committee for the year past be approved. The secretary-treasurer's salary was increased $50 a year.

The following were named as delegates to the national convention: Max Jennings, St. Clair; W. F. King, Jr., Adrian; A. B. Hull, Belding; G. W. Stolz, Saginaw.

It was decided to leave the date and place of the next meeting open, decision to be made by the executive committee.

THURSDAY AFTERNOON.

Jewelers and optometrists met together in the Tuller banquet hall for the afternoon session. The speaker was Mr. Gilbert, Chicago.

A vote of thanks was extended to Mr. Gilbert, on motion of G. W. Scorey, of Detroit.

The convention then adjourned and the members assembled to have a group picture taken.

KU-KU MEETING.

All was expectancy when the word was given, shortly after 6 P. M., that the initiation ceremonies of the Ku-Kus were about to begin. A class of 115 gathered in the Tuller to take the work and these were drafted in small squads, passing into a hall in the basement. Although watchers were carefully kept back, some caught a glimpse of enormous eggs being borne into the lodge room and the hatching of the chicks seemed to require a great amount of noise. Finally all were taken into the nest and at

8:30 the flock flew out again, all of the young birds having their pin feathers nicely trimmed.

The following acted as temporary officers of the nest: Ku-Ku King, Nelson K. Standart; Prince, J. T. Morehouse; Chief, Frank Kennedy; Scratcher, A. E. Charlesworth; Keeper of the Kash, Holmes S. Kimball; Guards, A. W. Kludt, David Thompson, Frank P. Mathauer and Henry Dorweld.

Permanent officers will be chosen at the next hatching in August, at which time it is hoped to take in practically all the jewelers and optometrists of Detroit.

The Ku-Ku banquet followed in the banquet room of the Tuller, about 150 sitting down at the table. After the feast, the Royal Top-Knot of the order, King Thoma, Piqua, O., spoke of the birth of the order and its objects. Short talks were then made by the officers of the two associations present, after which the room was cleared and dancing followed.

Among the wholesale representatives present were:

W. R. Stevens, Bay State Optical Co., accompanied by Mrs. Stevens; Carl T. Weibezahn, with S. O. Bigney & Co.; B. E. Chapman, with the Elgin National Watch Co.; E. C. Moore, with the Oneida Community, Ltd.; G. S. Webb, with Kreis & Hubbard; Howard C. Carpenter, sales manager South Bend Watch Co., accompanied by Mrs. Carpenter; J. K. Coulter, with the South Bend Watch Co., and Mrs. Coulter; F. M. Younglove, with the South Bend Watch Co.; Chas F. Damm and his representative, F. C. Smith; J. W. Armbruster, Illinois Watch Co.; J. H. Purdy, with the A. C. Becken Co.

Diamonds valued at $270, which had been forwarded from New York to E. J. Kittell, a jeweler at 246 Main St., Springfield, Mass., were lost recently, but soon found in an alleyway back of the Island Hotel, where it is believed they were thrown by some one who picked up the package and did not realize its value. The bill which accompanied the shipment had been torn into small pieces.

Wisconsin Retail Jewelers' Association Holds Its Most Successful Convention at Milwaukee—Optometrists Also Meet.

MILWAUKEE, Wis., July 10.—The most successful convention in the history of the Wisconsin Retail Jewelers' Association was held at the Hotel Blatz, in Milwaukee, July 7 and 8. The attendance was excellent and jewelers were present from every section of Wisconsin. The association was formed only two years ago, but in that time the growth of the organization has been remarkable, the past year having been especially progressive.

The convention was opened on Tuesday morning by President Gustave Keller, of Appleton, and the address of welcome was delivered by W. G. Bruce, secretary of the Merchants and Manufacturers' Association of Milwaukee, who spoke as the official representative of Mayor Rose, of Milwaukee, who was absent from the city. President Keller then made a brief but pointed address.

ADDRESS OF PRESIDENT GUSTAVE KELLER.

President Gustave Keller said in part:

Witb the work that has been done by our own and by other associations and by the journals, I feel that the jewelers have come to realize more fully, not only the advantage and benefit, but tbe absolute need of a strong organization of the craft. And wben I speak of tbe craft I mean not only the retail jewelers, but the jobbers and manufacturers as well.

It is true we cannot organize the jobbers or the manufacturers, but by organizing strongly and along broad lines the retail jewelers of the several States, eventually federating them into an even stronger national organization, we will contribute migbtily toward the organization of tbe jobbers and manufacturers of jewelry and allied lines.

As it is, the jobber bas bis troubles; the manufacturer his. Between the two, the retail jeweler ofttimes fares worst. The closest and most amicable relations must exist among the three, would we bring the jewelry business wbere it rightfully belongs.

Let the watchword of the jewelers of Wisconsin for the coming 12 months therefore be "Organize."

Following the valuable suggestion of our honored ex-president, A. J. Stoesel, in his report to us last year, we have started organizing district associations. Milwaukee has been organized for some time with splendid results. A few weeks ago we organized at Appleton tbe jewelers of the Fox River Valley, from Green Bay to Fond Du Lac, and I am sure that the first meeting has accomplisbed much toward bringing about that social and fraternal feeling which must exist would we be successful. We should have district organizations in every section of the State. Nothing will do more to bring the jewelers of the various cities together. * * * *

Organization has already accomplisbed considerable. Quite a number of manufacturers bave established a minimum sales price on their goods, doing away with cut rate competition. Catalogue and department stores are no longer sold by many. Catalogues from legitimate jobbers are sent out with more care, less indiscriminately. Fraudulent advertising has been shown up to the detriment of those using it to beguile the public. Attention bas been given to prizes and schemes, each of wbich means the killing of a possible sale for the same jeweler.

There is far more to be accomplished. I recommend tbat this convention consider the question of our joining tbe national organization.

In our State, during the past year, a committee has been considering questions as to proper horological instruction and the proposed establisbment of a State Examining Board for Watchmakers. * * * *

In an organization sucb as ours, I feel tbat if we could have something which would directly mean dollars and cents to the members, something they could see and feel, many new members would be attracted. I feel that such an inducement may be offered in the matter of fire insurance. Far more than the association's dues can be saved to each and every member belonging to our organization. * * * *

I recommend the appointment of a committee whose duty it shall be to investigate this matter.

The committee on the president's report recommended the following:

That the able report of our president be adopted in its entirety.

That we view favorably the suggestion in regard to mutual fire insurance, and recommend that the same be referred to the board of directors with full power to act.

That we approve the steps taken towards the organization of the State into districts, and urge a continuation of the work on the part of tbe new board of directors.

Seeing in the president's recommendation that the trade must be organized in all its branches,

GUSTAVE KELLER, PRESIDENT.

tbe keynote of success for the whole organization movement, we move the adoption of the following resolution:

"Since it is apparent that no single branch of the jewelry business can alone accomplish the very best results without co-operation of all the other branches, be it

"*Resolved*, That the Wisconsin Retail Jewelers' Association, in convention assembled, strongly urge the other branches of the jewelry trade manufacturers and jobbers to organize sectionally and to enter into close communication with the National Retail Jewelers' Association, thereby insuring to the whole trade those advantages which organization makes possible."

After the announcement of the following committees, the convention adjourned until the afternoon session:

On Resolutions—Reinhold Hille, of Menominee Falls; F. P. Wilde and Theodore Scholle, of Milwaukee; Paul R. Kehls, of Rasholt, and F. S. Eberhart, of Prairie du Sac.

On the President's Report—George Durner and Henry Stecher, of Milwaukee; C. T. Delaporte, of Berlin; John P. Hess, of Fond du Lac, and W. D. Sproesser, of Watertown.

On Nomination of Officers—G. E. Carlson, of Ashland; Rudolph Steller and F. C. Buege, of Milwaukee; W. P. Ortschied, of Cosseville; J. H. Chapman, of Oshkosh.

Auditing Accounts—E. L. Fischer, of Reeseville; A. C. Hentschel and August Rack, of Milwaukee; Joseph Ballard, of Evansville, and George Rathke, of Mayville.

On Revision of the Constitution and By-Laws—F. C. Hyde and H. A. Kamps, of Appleton; Walter Grunert, of Green Bay; G. S. Scherzinger, of Fond du Lac.

Edward Taylor, secretary and treasurer of the Rockford Silver Plate Co., Rockford, Ill., was to have presented an interesting paper upon "Selling to Retail Jewelers Exclusively," but, owing to illness, was unable to be present and the afternoon session was opened by a general discussion on topics of interest to the retail jewelers. G. E. G. Kuechle, of the Alsted-Kasten Co., of Milwaukee, followed with an instructive paper on "Store Management." It seemed to be the consensus of opinion that this was one of the most interesting addresses presented before the convention. Mr. Kuechle is a retailer of long standing, having been a member of the Alsted-Kasten Co. for several years. One of the strong points of Mr. Kuechle's address was that he advocated the marking of all goods in plain figures. The reason given for this view was that large buyers often felt entitled to discounts and disagreeable instances often arise. The paper was followed by interesting discussion and Mr. Kuechle was plied with many questions.

A meeting of the convention committees closed the afternoon session for Tuesday.

The ladies visiting the convention were entertained Tuesday afternoon by an automobile ride to Lake Park and Whitefish Bay, two of the interesting beauty spots in and about Milwaukee. Committees of Milwaukee ladies took the visiting ladies in charge and provided one round of entertainment. In the evening the ladies were given an enjoyable theater party at the Pabst Theater.

The jewelers themselves held a stag party Tuesday evening at the Forst Keller, which was thoroughly enjoyed. Some 138 retailers sat at the tables, listened to the discussion of trade subjects and to the various toasts and addresses which were presented.

WEDNESDAY'S SESSIONS.

The largest attendance of the convention greeted the opening of the session on Wednesday morning. R. B. Watrous, secretary of the Citizens' Business League of Milwaukee, opened the session and invited the association to meet in Milwaukee next year. Mr. Watrous believed that Milwaukee should always be a happy meeting place for the organization, which was formed in the city two years ago.

Three important and entirely new features were adopted during the Wednesday session and it is believed that these will do much for the future working of the association. These were steps for the formation of (1) a board of examiners, later appointed by the convention, for the examination of all who may desire to become watchmakers; (2) of a buyers' club, which will be conducted for the benefit of the smaller retail jewelers, who may, by pooling with other members, secure the advantage of the wholesale rates as the larger dealer, and (3) of a mutual fire insurance department similar to the fire insurance auxiliary of the Wisconsin Retail Hard-

ware Dealers' Association, which has been in successful operation for several years.

These three features are entirely new and no State association of jewelers has ever before touched upon all of them.

It is the belief that with these features put into practical operation the association will make a decided inducement for retail jewelers to become actively identified with the State organization. After an applicant has passed the examination given by the board, he will be given a certificate of guarantee that he is competent for all work in connection with the watchmaking trade. Through the buyers' club it will be the aim to place the smaller dealer upon an equal footing with the larger dealer in the matter of buying, since his purchases will be made through a pool for the equal benefit of all.

The committee appointed for the examination of watchmakers is made up of E. F. Rohn, George Durner and Theodore Shelle. Certificates of guarantee issued to watchmakers after they have passed the examination, will be placed on record at the Milwaukee offices of Franklin Thomson, where they will be accessible for the inspection of all jewelers in Wisconsin.

Secretary Thomson has been instructed to immediately proceed with the formation of the new buyers' club, and, upon request, A. J. Stoessel, George Durner and E. F. Rohn were appointed as members of an advisory committee.

The session of Wednesday afternoon was taken up with the discussion of the following subjects: "What to do with Repairs Left on the Hands of Jewelers," discussion led by Frank C. Hyde, of Appleton; "What is Proper Profit on Jewelry," discussion led by George Durner, Milwaukee, and W. H. Becker, Beaver Dam. The consensus of opinion seemed to be that the "Dutchman's Profit" is the safest basis on which to work. "The Engraving Abuse" was also taken up, led by J. E. Carlson, Ashland; John Armbruster, Cedarburg, and F. P. Welde, Milwaukee. Members of the association believe that the near future will see some equitable basis arrived at so that the entire trade will be protected. The question of "Jobbers and Manufacturers Selling Outside of the Trade" was discussed and was referred to the committee on grievances, which later passed a definite resolution upon the matter.

The active executive sessions closed with the annual election of officers. The committee on nominations felt that the present staff of officers should be re-elected as follows: Gustave Keller, Appleton, president; George Durner, Milwaukee, vice-president; Harry F. Stecher, Milwaukee, treasurer; directors, with a few changes, G. E. G. Kuechle, Milwaukee; C. T. J. Delaporte, Berlin; W. H. Becken, Beaver Dam; G. R. Chapman, Oshkosh. The new board of directors unanimously re-elected Franklin Thomson as secretary of the association.

Wednesday evening was given up to merriment for the jewelers and their lady friends. Cars were taken to North Ave. of the city, where the party embarked on boats to Pleasant Valley, where the annual banquet of the association was held. Later the party visited wonderland, where every concession on the grounds was inspected.

Among other resolutions adopted by the

convention the following were important:

"Resolved, That it be the purpose of the members of this organization that preference be given to jobbers and manufacturers who sell only to the legitimate jewelry trade.

"Resolved, That we strongly condemn the practices of manufacturing jewelers, such as those doing work for the retail trade, catering to business which belongs to the retail jewelers, and suggest that this resolution be referred to the Milwaukee Jewelers' Club at its next monthly session and that the secretary be instructed to send same to the district organizations throughout the State.

"Resolved, That we indorse the Wisconsin Institute of Horology and the methods employed in instruction."

THE EXHIBITS.

A fine display of exhibits was made at the convention by the following: Queen City Silverware Co., Cincinnati; C. G. Breitenbach & Co., Chicago; Guy Pen Co., Milwaukee; Alvin Mfg. Co., New York; Burley & Tyrrell, Chicago; Omega Watch Co., Chicago; Rockford Watch Co., Rockford, Ill.; Oneida Community, Ltd., Niagara Falls, N. Y.; Heintz Bros., Buffalo, N. Y.; Block Jewelry Co., Milwaukee; Elgin National Watch Co., Elgin, Ill.; White Art Co., Chicago.

Milwaukee will again be the meeting place of the association and next year's convention will be held about the middle of July, the exact date to be decided later.

Many of the State jewelry associations hold their conventions at the same time, and the result is that it is inconvenient for manufacturers and jobbers to be represented at all of the gatherings. Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association, will attend the coming annual national convention and, among other things, will endeavor to bring about a meeting of all of the State association secretaries with the aim of arranging definite and non-conflicting schedules. The State jewelers' associations of Wisconsin, Michigan and Minnesota were in session at identically the same time.

CONVENTION OF OPTOMETRISTS.

Ways and means for securing legislation during the coming session of the Wisconsin legislature to provide for the licensing and examining of optometrists, thus protecting the members from the "faker," was the chief subject for discussion at the eighth annual convention of the Wisconsin Association of Optometrists in session at the Hotel Blatz, July 6 and 7. The attendance was large, 75 registering on the first day.

Dr. M. A. Brandt, chairman of the State Board of Medical Examiners, delivered an interesting address on external diseases of the eye, and Dr. T. O. F. Randolph, of Milwaukee, read a paper in the afternoon. At 4 o'clock the optometrists visited Waukesha Beach.

On the second day of the convention, July 7, papers were read by A. J. Stoessel, Milwaukee; A. A. Lueck, Antigo, and Dr. Reno Weiss, of the College of Physicians and Surgeons, Milwaukee.

The officers elected in the afternoon session were as follows: President, T. O. F. Randolph, Milwaukee; vice-president, W. H. Becken, Beaver Dam; secretary, C. D. Waugh, Milwaukee; treasurer, J. A. Schoeller, Janesville. H. McEwan, Fond du Lac, was chosen as director, to succeed Dr. I. M. Iddleman, Wausau.

Subscriptions were taken and plans were laid for the formation of legislation to be proposed that will protect the people from quacks. The place of meeting for the next convention was left to the board of directors to decide, although Madison seemed to be the preference of the convention.

BADGER STATE OPTICAL ASSOCIATION.

The Badger State Optical Association, long contemplated by Wisconsin jeweler opticians, was formally organized, Thursday, July 9, after the close of the convention of the Wisconsin Retail Jewelers' Association. Members of the jewelers' association organized the new society with the express purpose of promoting legislation against impostors.

Officers were elected as follows: President, G. T. Ranson, Milwaukee; vice-president, O. P. Berg, Mount Horeb; secretary, George Durner, Milwaukee; treasurer, W. D. Sproesser, Watertown; directors, G. E. Carlson, Ashland; H. E. Anger, Oshkosh, and William Kah, Jr., Milwaukee.

A legislative board, the duties of which will be to frame a bill to be presented to the Wisconsin legislature to protect the people against swindlers was selected, consisting of W. H. Ditrich, Madison; William Calkins, Waukesha; L. Baumgarten, Tomah; Jacob Garlenstein, Milwaukee, and A. F. Sheringer, Fond du Lac.

The legislative board was instructed to bring about a meeting with the representatives of the Wisconsin Association of Optometrists with the aim of formulating and ultimately passing such a law.

The New Canadian Gold and Silver Marks Law to Become Effective Oct. 1 Next.

OTTAWA, July 10.—The act respecting the sale and marking of manufactures of gold and silver and gold and silver plated ware, after having passed the Senate, June 26, was passed in the House of Commons today, and comes into force Oct. 1. Such articles need not bear any marks at all, but, if they do, such mark or marks must truly and correctly indicate the quality of the gold, silver and alloy, and is designated a quality mark. A trade-mark, also, may be stamped upon such goods, registered in accordance with the Trade-Mark and Design Act; and they may bear hall-marks lawfully applied, according to the laws of the United Kingdom of Great Britain and Ireland, or marks applied by the governments of any foreign country, so long as the provisions of this act are complied with. The articles may likewise bear numerals intended to indicate pattern, the name or initials of a dealer, or any other mark not calculated to deceive.

The main purpose of the act is to prevent any piece of metal from being stamped "gold" that is not at least nine karats fine. After Oct. 1 next, articles composed of gold or any alloy of gold must be stamped, if stamped at all as to quality, with marks truly describing the quality used in the construction, such as 12k, 18k, as the case may be. The act, however, will not apply to any article made in Canada or imported into Canada before Oct. 1, nor will it apply to any such parts of articles manufactured of gold or any alloy of gold as require adaptation to the use of the trade, as, for example, springs, winding bars, sleeves, crown cores, joint-pins, screws, rivets, dust-bands, movement rings, brooch pins, scarfpin stems and hatpin stems, attached otherwise than by solder.

As for silver, after Oct. 1, it shall not be lawful for a dealer to make or sell or bring into Canada any article purporting to be wholly or partly composed of silver or any alloy of silver, which has applied thereto any mark indicating, or purporting or intended to indicate, that the metal or alloy of which such article is composed is of higher quality than it really is. The marks "Silver," "Sterling" or "Sterling Silver," "Coin" or "Coin Silver," or any colorable imitation thereof, or any other mark intended to represent such a quality, shall not be applied to any such article or part thereof, if the metal or alloy of which such article or part is composed contains silver in less proportion than 925 parts of pure silver in every 1,000 parts of such metal or alloy. Articles composed in whole or in part of any alloy of silver of a lower quality than sterling silver must indicate, where marks are used, the fineness of the silver in decimals, such as .800 or .900, as the case may be.

After the same date, as above, it shall not be lawful for a dealer to make or sell or to bring into Canada any article of silver or gold electroplate to which is applied a mark indicating otherwise than truly and correctly the metal on which the plating is deposited, the metal of which the plating is composed, and the grade, quality or description, as known to the trade, of the plating. The following marks when applied to articles of gold or silver plate or electroplate shall be taken to mean, respectively, as follows: R. P., rolled plate; E. P. silver electroplate; G. F., gold filled; Gilt, gold electroplate; N. S., nickel silver; G. S., German silver; B. M., Britannia metal; W. M., white metal. The Governor in Council may, from time to time, designate other marks for such application and define their signification.

Every dealer who shall be convicted of an offense under this act, or of an attempt to commit any such offense, shall be liable to a fine not exceeding $100 for each article or part of an article in respect of which the conviction is had; and after the conviction every such article shall be broken up.

At a meeting of the Western Classification Association jewelers' sweepings were eliminated from tariff sheets. It is said this was done on account of a large number of jewelry concerns having claimed excessive damages for the shipments of sweepings which had been lost. George H. Rentz, of Rentz Bros., Minneapolis, Minn., has sent a petition to the Western Classification Association, asking that bullion sweepings be classified and accepted as such by the railroads for shipment. The order to withdraw the sweepings from classification went into effect last October, and since that time railroads have failed to accept them, claiming that they are of too much value to be shipped as freight and should be sent by express.

What is Epidote ?

41 MAIDEN LANE NEW YORK

Death of John S. Palmer.

PROVIDENCE, R. I., July 9.—Providence has lost one of its veteran manufacturing jewelers and the ring manufacturing trade in New England has lost one of its most worthy exponents in the death of John S. Palmer, which took place early Wednesday morning at his home, 577 Westminster St. Mr. Palmer's death was unexpected and was a great shock to his friends, though he had been in poor health for a long time. He had been severely ill for six months, but for two years past had been practically incapacitated for business. The deceased was the head of the firm of Palmer & Capron, ring manufacturers, at 167 Dorrance St., this city, and 20 Maiden Lane, New York, in which his son, Julius Palmer, has been the head for some time.

Mr. Palmer's career as a manufacturer was one of the longest in the jewelry trade of Providence, in which city he has been widely known for many years. He began 68 years ago next September, at which time he entered the employ of G. & S. Owen, manufacturing jewelers of this city, and learned the jewelry business, George Owen, of the firm, being a brother-in-law of the deceased. After spending five years as an apprentice he started in business for himself in 1845 when about 21 years of age, his first firm being known under the style of Palmer & Stave. When his partner removed to Wisconsin, Mr. Palmer became associated with Lucien Lamson, which firm continued until the early '50's, when the deceased with Charles A. Capron organized the present business.

Messrs. Palmer and Capron continued actively together until advancing age caused Mr. Capron to retire about 1891. During the entire time of the partnership the firm was not only successful, but progressed in a way that well rewarded them for the industry, integrity and ability for which they soon became noted. The concern established a New York office which later became the selling headquarters for the house, but the factory has remained in Providence until the present date. After the retirement of Mr. Capron, Julius Palmer and F. A. Pierce were admitted into the partnership, but the concern continued under the old name.

At the time of his death Mr. Palmer was over 84 years old, having first seen the light in Newport in March, 1824. He had lived in Providence over 80 years, having been brought there by his father, Gideon M. Palmer, when about three years old. Although one of 14 children, Mr. Palmer is survived by no brothers and but one sister, Mrs. George Owen, of this city. The deceased was married in 1848 to Miss Frances Prentice, who died July 7, 1906. There is but one surviving child, Julius Palmer, present head of the jewelry business.

Despite his age, Mr. Palmer continued active in affairs of business and took an interest in social matters until very recently. Two years ago he became incapacitated for work, owing to the cataracts which formed over his eyes, and although he had been operated on several times these operations proved unsuccessful, and his health steadily declined. At the time of his death he was almost blind.

Jewelers and Opticians of Tennessee in Annual Convention at Chattanooga.

CHATTANOOGA, Tenn., July 9.—The retail jewelers and opticians have held a joint convention in this city, the members of the Tennessee Retail Jewelers Association and the Tennessee Optical Society having begun their session here at the Hotel Patten, Tuesday last. The first session of the opticians was held Tuesday morning and that of the jewelers in the afternoon in the assembly room of the hotel. The business meetings were held separately, though at the same place.

The convention opened Tuesday morning with President H. J. Cook, Knoxville, calling the opticians to order and Chas. T. Alexander delivered the address of welcome. The opticians spent the morning in routine business and listening to addresses by the secretary, Weakley Ruth, of Shelbyville; R. H. Jetton, Nashville; I. L. Grady, Jackson, and William Tegen, Chattanooga.

Tuesday afternoon the jewelers met with Vice-President Ruth in the chair. The address of welcome was made by A. Fischer and was responded to by Mr. Grady. After the routine business the jewelers held an interesting discussion on the question of "How the Trade Was Damaged by the Practice of Catalogue Houses from Chicago and Elsewhere," in which most of the members participated.

The opticians met Wednesday morning, the following being the programme:

"Chat Talks on the Eyes," Dr. S. W. Lane, of Kansas City, Mo., president Southwestern Optical College.

"Astigmatism," F. H. Theile, of Chattanooga.

"Difficult Cases," C. E. Folsom, of Atlanta, Ga., chairman Executive Committee American Association, Secretary Georgia Optical Society.

"Presbyopia," A. H. Wenning, of Nashville.

Adjournment for lunch.

"The Making of Lenses," (How Kryptoks and other bifocals are made)—Jno. L. Moore, of the firm of Jno. L. Moore & Sons, of Atlanta, Ga.

"Importance of the Use of the Retinoscope," H. W. Johnson, of Chattanooga.

"Second Sight," R. P. Hudson, of Nashville.

"Optometry—Past, Present and Future," D. M. Quarels, of Clarksville.

"Advantages of Optical Legislation," R. L. Jetton, of Nashville.

Unfinished business.

General business and election of officers.

Adjournment.

The jewelers finished their session this morning and elected the following officers for the ensuing year: D. R. Pless, Morristown, president; Weakley Ruth, Shelbyville, vice-president, and Richard B. Herzer, Nashville, secretary and treasurer.

To-night the visitors will be entertained on Lookout Mountain by the local committee on arrangements.

Among those attending the convention of the jewelers were: C. C. Breese, Franklin; I. L. Grady, Jackson; W. L. Baumgardner, Tazewell; E. L. Lightfoot, Bolivar; S. P. Pinson, Memphis; J. E. Jahnke, Chattanooga; Weakley Ruth, Shelbyville; R. B. Herzer, Nashville; H. J. Cook, Knoxville; Irby Pate, McKenzie; R. L. Akers, Big Sandy; H. C. Warner, Waterbury, Conn.; Joseph Irons, New York; M. Greer, Atlanta; Julius Wikstrom, Chattanooga.

Among those attending the optical convention were: H. J. Cook and wife, Knoxville; Mrs. C. L. Hackworth, South Pittsburg; William Tegen, Chattanooga; W. B. Lawhorn, Chattanooga; Weakley Ruth, Shelbyville; R. L. Jetton, Nashville; I. L. Grady, Jackson; J. E. Jahnke, Chattanooga; E. L. Lightfoot, Bolivar; R. P. Hudson, Nashville; C. C. Breese, Franklin; C. C. Brooks, Martin; L. D. Boddour, Lebanon; S. J. Purser, Memphis; J. J. McGuire, Knoxville; J. T. Smyth, Monteagle; Irby Pate and wife, McKenzie; H. W. Johnson, Chattanooga; M. D. Sivils, Harriman; C. L. Harrison, Petersburg; C. H. Harris, Chattanooga.

New Members Admitted and Rewards Paid by the Jewelers Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers Security Alliance was held on Friday, the following members being present: Chairman Butts, Vice-President Champenois, Secretary Noyes, Treasurer Karsch and Messrs. Alford, Brown, Bowden and Stern of the committee. The following new members were admitted:

C. E. Doolittle, Brodhead, Wis.; Ed. Hans, Haywards, Cal.; Fred R. Weigle, Melrose, Cal.; J. W. Beverly, S. Berwick, Me.; Z. S. Boswell, Canandaigua, N. Y.; Wm. Davidson, San Francisco, Cal.; P. Dinan, Biddeford, Me.; J. W. Goldstein, San Francisco, Cal.; O. H. Pyper, Janesville, Wis.; Werner Bros., San Francisco, Cal.; Adolph Balizer, Brooklyn, N. Y.; Harry I. Bolton, W. C. Bryant and Bert O. Gordon, Bangor, Me.; F. H. Mangliers, Gonzales, Texas; W. M. Purlington, Rockland, Me.; Adolph Roth, Syracuse, N. Y.; C. R. Rudrauff, Philadelphia, Pa.; A. Weiller, Charleston, Miss.; G. H. Abendroth, Goldfield, Nev.; L. M. Buthm, Circleville, O.; H. A. Hulett, Marshall, Mich.; S. Z. Goodstein, Poughkeepsie, N. Y.; Fred A. Perry, Lewiston, Me.; Frank Clark, Wilkesbarre, Pa.; G. W. Hickox Co., Albuquerque, N. M.; C. J. Thiry, Detroit, Mich.; Tinker Bros., Anacortes, Wash.; I. Block, Beaumont, Tex.; E. M. Henderson, Brooklyn, N. Y.; T. E. Towell, Hot Springs, Ark.; Gustafson & Prader, Baraboo, Wis.

The 51st reward of $100 was ordered paid to George M. Beach, superintendent of police, at Waterbury, Conn., for the arrest and conviction of Luigi Capabianco, who broke into the store of Henry J. Dunlap, Naugatuck, Conn., Jan. 23, and stole miscellaneous jewelry out of the show cases. Under instructions from the secretary, Mr. Dunlap offered the reward, and March 17, the burglar was arrested and a part of the goods recovered. On June 16 he pleaded guilty and was sentenced to the county jail at New Haven for the term of one year.

The Death of Arthur C. Freeman.

NORFOLK, Va., July 8.—Arthur C. Freeman, who died at the Protestant Norfolk Hospital, Monday evening, was one of Norfolk's best-known citizens, and for many years had been widely known and highly regarded in the jewelry trade. The funeral which took place at Christ's P. E. Church yesterday afternoon was largely attended.

The deceased, who was 63 years old, was a veteran of the Civil War, having enlisted when 16 years old in the Confederate navy and served throughout the war. He was conspicuous for his gallantry, especially in the capture of the gunboat *Waterwitch*. After the war he engaged in the jewelry business and built up a good trade.

Mr. Freeman is survived by a widow, one son and two daughters.

Death of Lazarus Heller.

News of the death of Lazarus Heller, senior member and founder of the firm of L. Heller & Son, importers of precious stones, 68 Nassau St., New York, was received in the trade last week with much regret by a large circle of acquaintances. Mr. Heller died on Sunday, July 5, at his home, 1459 49th St., Brooklyn, after a lingering illness of a year, which confined him to his bed during the last three months. Death was the result of a complication of diseases, aided by the declining strength of advanced years.

Lazarus Heller was born in the Province of Misk in Russia, in October, 1831, where he spent his early life. He was married in 1854 to Sarah Chautin, and went to Moscow, where he started in business. He came to New York in 1891, and in 1892 began a business which was a continuation of that carried on in Moscow.

Soon after the establishment of the business in New York two sons, Samuel and Abraham, were admitted to the concern, and the business was carried on under the firm style of L. Heller & Son. Abraham is the Paris member of the concern and Samuel is in charge of the New York office. The business was years ago located on Nassau St., and was later moved to 48 and then to 51 Maiden Lane. The concern moved to the present address at 68 Nassau St., May 1, 1907.

Deceased retired from active business 10 years ago, but is recalled by those who knew him as a kind-hearted old-time business man, who won many friends because of his gentle ways, his strict integrity and fair business dealings. During his later years he gave his time to doing good and helping others. He was a member of a large number of charitable and religious organizations in this city, and also gave liberally to private charities. He was a hearty supporter of a number of hospitals. He was in every way broad minded and a well-educated man.

In July, 1904, Mr. Heller celebrated his golden wedding, and had he lived until July 12 of this year he would have reached the 54th milestone of his married life. He is survived by a widow, four sons and three daughters. There are also 38 grandchildren and two great-grandchildren left to mourn his demise.

The funeral services were held Monday, July 6, from the Temple at 41st St., near 13th Ave., Brooklyn, and were attended by a large number of members of the jewelry trade and from the different charitable organizations with which the deceased was connected.

Interment took place in Washington Cemetery, Brooklyn.

The store of Huddleston & Feeder, Nashville, Ark., has been robbed of jewelry to the value of $150.

American Watch Case Co.

9-11-13 Maiden Lane New York

Chas. Remillet is about to open a new store at Newark, O.

F. W. Harvey & Co. are starting in business at Bay City, Mich.

E. T. Murphy has opened a watchmaking establishment at Haines, Ore.

Arthur W. Haley is just opening a new jewelry store at Delphos, Kans.

Huch. & Fitch have recently opened a jewelry store at Wenatchee, Wash.

Aug. Shuet, Kansas City, Mo., is opening up a new jewelry store in Shubert, Nebr.

Wm. Marshall will open an office as manufacturers' agent in Los Angeles, Cal.

Calvin Barnes, formerly of Ladoga, Ind., will engage in the jewelry business at Linton, Ind.

M. J. Running & Son have engaged in the retail jewelry business in Mount Vernon, Wash.

Herman E. Promnitz, Cincinnati, O., will, about Sept. 15, open a retail jewelry store at Van Wert, O.

J. C. Vaider opened, last week, a small retail jewelry store at 427 E. Girard Ave., Philadelphia, Pa.

The Hammatt-Dickey Co. is now being organized in Jacksonville, Fla., to engage in the mining, cutting and sale of gems.

John Earnest has engaged in business on his own account as a watchmaker for the trade at 623 Sansom St., Philadelphia, Pa.

Lud. Dioughy has resigned his position with W. D. Nelson & Co., at Pierre, S. Dak., and will start up for himself in the I. W. Cole drug store.

Charles B. Baryman, formerly of Toledo, O., but more recently in the employ of N. Friedman, Phoenix, Ariz., has opened a store at 42 N. Center St., in the latter city.

The Shoptaugh-Anderson Co. was incorporated in Camden, N. J., recently, with a capital stock of $10,000 by C. A. Shoptaugh, Colwyn, Pa.; W. R. Fairman, Philadelphia.

Death of William H. Newby.

INDIANAPOLIS, Ind., July 10.—William H. Newby, one of the oldest jewelers and watchmakers in the city, died at his home, 1634 Spann Ave., Wednesday, following an attack of heart failure.

Mr. Newby was 71 years old, and came here from Columbus 25 years ago. During that time he conducted a store on W. Washington St., later locating on S. Illinois St., where he remained until the time of his death. He was noted as a watchmaker and repairer. During the Civil War he served with the Second Missouri Cavalry, and was a member of the G. A. R. and of the Loyal Legion.

The funeral, which was held this afternoon, was attended by a number of jewelers, and the body was taken to Seymour, his birthplace, for burial.

A widow, two sons and a daughter survive.

Canada Notes.

A. Bousny, Hull, has removed to Ottawa.

O. H. Benoit, St. Johns, Quebec, has sold out to Leopold Labelle.

William Northgraves, Perth, Ont., has assigned to Charles J. Foy.

W. J. Hollingshead, Woodbridge, Ont., has given a renewal chattel mortgage for $778 to W. E. Jones.

H. B. Kent, of B. & H. B. Kent, Toronto, started this week on a week's automobile trip, with Ottawa as its objective point

Wednesday last A. M. Graham, chief clerk of the jewelry department of the Goldsmiths' Stock Co., Toronto, was married to Miss Alma May Lewis.

Out-of-town jewelers calling on the Toronto trade this week included E. W. Ross, North Bay; H. Altemann, Wellesley; J. J. Hollingshead, Tottenham, and W. H. Smith, Oakville, all in Ontario.

Burglars entered the store of J. J. Douglas at Owen Sound, Ont., on the night of July 3 and stole a quantity of cheap jewelry and silverware, also a number of articles which were left for repairs.

Much excitement was caused in Belleville, Ont., the other day by the discovery of burglars in the village. They were entering A. C. Gardner's jewelry store and were followed in an automobile, but escaped. One of the pursuers fired at them with a rifle, but missed.

I. Crackover's store, St. Johns, Quebec, was broken open July 9 and $300 worth of watches and jewelry was stolen. A comical side of the story is that Mr. Crackover had the model of a man in the window on the head of which was placed a new Panama hat. This was removed and an old one substituted.

The jewelry store of C. A. Gardner, in the village of Foxboro, near Belleville, Ont., was visited by burglars on the morning of Friday, July 3. The noise awakened Mr. Gardner, who entered the store, when the robbers rushed out of the back door. They were followed by some of the citizens, but escaped to the woods. They succeeded better at the general store of Denny & Son, where they secured considerable plunder. They are believed to be the same men who have committed several burglaries in western Ontario.

On the night of Thursday, July 2, the jewelry store of Clement Lachapelle, 322 Duluth Ave., Montreal, was broken into by thieves, who removed an iron grill from one of the rear windows and stole merchandise valued at several hundred dollars. To cover up their tracks and divert suspicion the burglars who robbed the store of Mr. Lachapelle attempted to set it on fire. Apparently they were disturbed and fled before starting the blaze, for matches and oily cloths and rubbish were found gathered together Thirty-two watches and 24 rings were stolen.

The old-established jewelry firm of John Warless & Co., 168 Yonge St., Toronto, is selling out and giving up business after a prosperous career of 50 years. Mr. Wanless has disposed of the store property, having leased it for 99 years, the lessee to pay annually three per cent. of the valuation, which is fixed at $140,000, for the first 33 years, and there is to be a revaluation at the end of that period. This makes a present rental of $4,200 for a store of 22 feet six inches in frontage, and practically establishes new values for property in the retail jewelry section. The store will be remodeled as a dry goods establishment.

Baltimore.

The stock of the late Wm. H. Saxton, 322 N. Charles St., is being sold out by order of the administrators.

John Coxon, Trenton, N. J., long identified with the pottery trade, is visiting in this city, which was his home 50 years ago.

Abraham Levine, 2031 Pennsylvania Ave., has filed a petition in the bankruptcy court. His schedules show liabilities of $2,728 and nominal assets of $1,220.

The Maryland Retail Jewelers' Association held a special meeting Thursday at its rooms in Baltimore to elect delegates to the convention of the American National Retail Jewelers' Association, at Cincinnati, Aug. 4 to 9. A. Wallenhorst and F. J. Euler, Baltimore, were elected delegates, and T. E. Sanford, Baltimore, and Walter Powell, Cumberland, alternates.

Walter Krauss had a hearing in court one day last week, and several of the rings found in the boy's possession were identified as part of a tray of rings, valued at $374, which was stolen from the jewelry store of George E. M. Wareheim, 1103 W. Baltimore St. The boy was held in default of $2,500 bail for further examination. The police are looking for another boy, who was an accomplice, it is said.

Mrs. Emma Castelberg died Wednesday of last week at her home, 2039 Madison Ave., Baltimore, Md., after protracted suffering from diabetes. She was the wife of Jacob Castelberg, of the firm of J. Castelberg & Sons, jewelers, at 106 North Eutaw St. Besides her husband she is survived by two sons (Henry and Joseph Castelberg) and four daughters: Mrs. Albert Wildman and Mrs. Samuel Heller, Baltimore, and Mrs. Joseph Meyer and Mrs. Dr. Harry Rodman, New York. Mrs. Castelberg had 10 grandchildren and three great-grandchildren.

The New England Manufacturing Jewelers and Silversmiths' Association announced last week the names of the following members who signified their desire to close from Aug. 1 to Aug. 10. In Providence: E. A. Bennett & Co., George N. Babbington, E. R. Barker, Frank Guild Co., A. A. Greene & Co., Charles E. Hancock, Williams & Anderson Co., Payton & Kelly Co., Thornton Bros. Co. and M. F. Williams & Co. In Attleboro and vicinity the firms are: C. H. Allen & Co., D. F. Briggs Co., A. H. Bliss Co., W. H. Bell & Co., Bliss Bros. Co., John P. Bonnet, Bugbee & Niles Co., S. O. Bigney & Co., Codding & Heilborn Co., Cheever, Tweedy & Co., F. H. Cutler & Co., Doran, Bagnell & Co., Estate of O. M. Draper, T. G. Frothingham & Co., J. M. Fisher & Co., Fontneau & Cook Co., Walter E. Hayward Co., Mandalian & Hawkins, Miller, Fuller & Whiting, H. D. Merrill Co., Moore Bros., J. H. Peckham & Co., Plainville Stock Co., Simms & Co., Scofield, Melcher & Schofield, J. J. Sommer & Co., Smith & Crosby, J. F. Sturdy & Sons Co. and Whiting & Davis Co.

Connecticut

Earle White, Bristol, last week, entered the employ of the American Silver Co.

The Empire Knife Co., Winsted, went on full time Monday, after being shut down for a week.

The factories of the Seth Thomas Clock Co., Thomaston, have resumed operations after being shut down for two weeks.

E. A. Jennings, treasurer of the Jennings Bros. Mfg. Co., Bridgeport, and his family, are occupying the Walker cottage at Woodmont, six miles from New Haven.

Ezben Wheeler, a clerk employed by the Aldrich-Murphy Co., Winsted, on July 6, swam almost the entire length of Island Lake, nearly three miles, in two hours and 30 minutes.

The ownership of a mahogany hall clock, said to be a valuable colonial relic, is involved in a suit pending in the city court at Bridgeport, by Mrs. Ida Parmly against Mrs. Hetty A. Hawley.

Miss Ada Lockton, who had been employed as a stenographer in the office of Landers, Frary & Clark, New Britain, was married July 8 to Leslie F. Brotherton, a clerk in the local postoffice.

Frank I. Fay, Willimantic, dropped dead while at work in his garden, Saturday of last week. He leaves two sons and three daughters, one son being an instructor in the high school. Mr. Fay was 52 years old.

Walter Mason, Meriden, who had been employed for 38 years in the German silver department of Factory "E," International Silver Co., retired recently, and his shopmates presented to him a gold-headed cane and a purse.

E. G. Fendrich, optician at Bridgeport, returned, last week, from his wedding trip and received the congratulations of many friends. The newly-married couple have taken up their residence at Fairfield and Lenox Aves.

The new dam of the Waterbury Clock Co., near the Waterbury Mfg. Co., Waterbury, has been completed and has been filled with water. The dam is about 20 feet deep at its lower end and is triangular in shape, with a perimeter of 500 feet.

A set of silverware stolen from the home of Lieutenant-Governor Sill and held in a pawnshop for 31 years was recovered last week by the police of Hartford, and turned over to Wm. Heymond Sill, New York, a son of the former Lieutenant-Governor.

At a special term of the Civil Superior Court, held last Thursday, a number of orders were approved bearing on the affairs of the Silver City Plate Co., Meriden, now in the hands of receivers. Claims amounting to $18,000 were allowed and an extra dividend of 18 per cent. was ordered.

The estate of Peter Busch, who had a watchmaking establishment on State St., New Haven, is now being settled in Probate Court. The property is valued at $60,000. Legacies are left to the German Catholic Church, and to a German society, and there are other bequests, all amounting to several thousand dollars. The main portion of the estate will be divided among nephews and nieces in Germany.

M. B. Whitaker, formerly of Newberry, S. C., is now at Greensboro, S. C.

E. H. H. SMITH SILVER COMPANY

BRIDGEPORT, CONN.

This beautiful chest of silver will be given to the person suggesting the best trade-mark and sub-title for our new patented method of plating, by which we are able to deposit 65 per cent. of the whole amount of silver on the backs of spoons and forks.

One of our largest customers, carrying eighteen different patterns of various manufacturers, tells us his sale on the Mission pattern is more than double that of any other design.

Oak Chest with Drawer

Will Hold 57 Pieces

Jewelers are finding it advantageous to have one of these chests in stock, showing one or more of our nine beautiful patterns. Have you seen our new Wistaria pattern? Write for our new folder.

SUBSTANTIAL BLANKS

12 ARTISTIC DESIGNS, SUPERIOR QUALITY

REASONABLE PRICES

Attleboro.

The Finberg Mfg. Co. will close, July 18, for one week.

Emmons D. Guild has opened his Summer cottage at Provincetown.

W. H. Wilmarth & Co. were closed last week for the Summer vacation.

P. J. Cummings is spending the Summer with his family at North Eastham.

Roy Inman was in New York last week on business in the interests of J. T. Inman & Co.

Aldro A. French, vice-president of D. E. Makepeace Co., is enjoying an outing at Cape Cod.

The factory of Bates & Bacon will close from July 24 to Aug. 3 to give the employes a week's vacation.

W. Henry Blake, of the James E. Blake Co., is reported as suffering a relapse. He recently underwent an operation at a Providence hospital.

Harold E. Sweet, of the R. F. Simmons Co., is chairman of a committee that will inaugurate a penny savings system in the Attleboro schools.

In the Jewelers' Baseball League on Saturday, the clans of the D. F. Briggs Co. beat Bates & Bacon, while Horton, Angell Co. downed R. F. Simmons Co.

John M. Fisher is chairman of the transportation committee of the delegates who will attend the national convention of the Prohibition party at Columbus, O.

The factory now occupied by the Mansfield Braiding Co. will be sold at auction Aug. 4. It is possible that it may become the future home of C. D. Lyons & Co.

A. A. McRae, of McRae & Keeler, and W. H. Saart have handsome specimens of mounted trout and white perch on exhibition, which testify to the fruitfulness of the recent fishing expedition to the Maine lakes.

The concerns located in the old condemned Steam Power building are beginning to devise plans for the future, although all are not in a position to take the public into their confidence just yet. A. S. Ingraham will erect a factory at the corner of Union and Dunham Sts. He is having an architect drawing plans now. It is almost positive that Attleboro will lose the Rothschild Bros. Co., which employs between 60 and 100 hands. One of the members of the concern states that in all probability the business will go to Providence. There is a possibility that C. D. Lyons Co. will move to Mansfield. Mr. Lyons states that he has not finally made up his mind as to what to do. E. D. Gilmore & Co., Moore Bros. Co., Minard & Minard, and A. Grover will remain in Attleboro, although they are not able to say at the present writing where they will be located.

An attempt to defraud the Fontneau & Cook Co. was nipped in the bud last Friday by detectives representing the Jewelers' Protective Association. According to the story of the police, William J. Wallace, who has been employed by Fontneau & Cook for some time, went to Providence with gold belonging to his employers in the pocket of his coat, which he carried on his arm. When he met John Nelson the coat was transferred. Wallace had no coat when arrested by the police. In the Sixth District Court of Providence Nelson was charged with receiving stolen goods from W. J. Wallace. He pleaded not guilty and was held in $500 bonds for trial July 17. Security was furnished. Wallace was arraigned in the Attleboro Court on a larceny charge. He pleaded guilty. When questioned by the police Wallace is said to have admitted that he has been taking scrap from his employers for some little time. He said that he called Nelson on the telephone when he had scrap to dispose of. He did the jewelry up in a package, put it in a coat pocket and passed the whole thing over to Nelson, receiving his pay later. Members of the Fontneau & Cook Co. examined the scrap in Providence and easily identified the property. Wallace was fined $20.

North Attleboro

TRADE CONDITIONS.

The Summer business among the jewelers has been peculiar although it has been much better than was anticipated in the Spring. The odd feature lies in the fact that some firms are obliged to work overtime to fill orders while others are operating on a short time schedule. The demand for bracelets has been fairly good this Summer.

Paul H. Barr, Pittsburg, was in town last week.

C. Ray Randall is enjoying a vacation at Oak Bluffs.

H. A. Mayer, San Francisco, was a local visitor last week.

Mr. Bloomer, western representative of E. I. Franklin & Co., is at the factory.

Frederick E. Sturdy, of New York, has been enjoying a vacation in North Attleboro.

The old Everett jewelry shop on East St. has been sold to Henry Dakin, who will utilize it for a carpenter shop.

The fire sprinkling system being installed in the larger of the company shops is being connected with the town water.

K. L. Taylor, western salesman for Riley & French, was the guest of G. Herbert French at his Cape home for several days last week.

An assignee's sale of the William A. Read Co. property will take place this week in Providence. Several North Attleboro parties are interested in the sale.

Oscar H. Hornig, Thursday, terminated his connection with Codding & Heilborn Co. Mr. Horning has been with the firm for six years, the last two of which he has been a member of the force of travelers.

Washington, D. C.

John F. Shaw, who was found dead in his bed, 702 Tenth St., early last week, and who was believed to have committed suicide, was the brother of William C. Shaw, of the jewelry firm of Shaw & Brown, but had no connection with the latter's business in any way.

The handsome silver service made for the cruiser *North Carolina* as a present from the citizens of the State after which it was named, was presented to the cruiser early last week. The presentation took place off Cape Lookout. The service, which consisted of 121 pieces, is valued at about $6,000.

The will of the late Edwin H. Harris, of the Harris & Shafer Co., was probated recently, but no schedule of the estate was filed. The American Security & Trust Co. is named as executor and is also named as trustee for 20 shares of the Harris & Shafer Co., the income from which is left to the son of the testator, George McL. Harris, for life, but on his death they are to become the property of the other children. The will is dated July 7, 1905.

Lancaster, Pa.

A. W. Moyer, of the Non-Retailing Co., has returned from a trip to Pittsburg.

John Miller, who made his home with his son-in-law, S. Kurtz Zook, died July 5.

Walter Bird Mehl, of the Howard Watch Co., was in Lancaster, last week, doing missionary work.

Harry Wertsch, who recently opened a store at Lititz, is putting in a new front and improving the interior of the establishment.

A beautiful display showing a Colonial table service in a show window of H. C. Demuth & Sons, last week, attracted much attention.

O. M. Lowrie, formerly of the firm of Lowrie & Keller, Lancaster, but now with Faust & Co., Allentown, Pa., was here on a vacation trip, last week.

Among the jewelers who lately visited Lancaster were Frank J. Coulton, Louisville, Ky.; John Bossler, Baltimore, and Conrad Cramer, Cleveland, O.

It will be of interest to traveling representatives to know that Friday afternoons here are a half-holiday, and observed by the jewelers. This will continue during July and August.

Norman McLaughlin, a jeweler in the service of John B. Roth, Jr., recently saved a young son of Police Officer Rittenhouse from drowning in the Conestoga River at Rocky Springs at the risk of his own life.

E. M. Bracher, who formerly represented New York firms, has entered the service of the H. S. Meiskey Co. as a traveling representative, and will cover his old territory. He and F. A. Peters, of the firm, have just returned from a purchasing trip down east.

G. W. Reisner has equipped his factory for the manufacture of fraternity jewelry on a larger scale. Mr. Reisner has employed representatives for the following districts: K. L. Reisner for the central States, John H. Reisner for New England, and W. E. Crozier for the southern States.

During the late heavy night storm which swept Lancaster County the residence of F. A. Peters, of the H. S. Meiskey Co. was struck by lightning, which acted in a freakish manner. Had Mr. Peters been in bed at the time he would have been killed, as the center of the electrical disturbance was in this part of his room.

Ralph Springer, Uniontown, Pa., has returned to the Ezra F. Bowman Technical School after a two weeks' vacation at home. August Ketterly, Sandusky, O., has entered the school as a student in watchmaking and engraving. He was a watchmaker some years in England. Allen T. Altick, Harrisburg, has entered the school as a student in engraving and watchmaking.

GORHAM SILVER

THE BEST IS NONE TOO GOOD

¶ The Jeweler of discretion concerns himself with only the best quality of silverware, for that, and that alone, is demanded of him by the most desirable class of his customers.

¶ It requires no argument on his part to establish the pre-eminent quality of Gorham Silverware, for this has a reputation extending over three-quarters of a century to commend it.

¶ Yet the advantages arising from these years of strenuous endeavor are placed freely and unrestrictedly at the service of the Jeweler whose stock consists of Gorham Silverware. Despite its recognized superiority it costs no more than wares which lack the prestige conferred by the Gorham name and trade-mark.

A LETTER in another column of this issue from the firm of Taylor Bros., Houston, Tex., acknowledges with gratitude the service performed by THE CIRCULAR-WEEKLY in being directly responsible for the recovery of a large part of the goods recently stolen from this firm. As noted in a recent issue, a description of the stolen articles was published in THE CIRCULAR-WEEKLY after the robbery, and this publication reached a subscriber in Memphis directly before some of the stolen property was offered to him by a negro. Recognizing it from the numbers and marks which had been mentioned in THE CIRCULAR-WEEKLY'S account, the Memphis jeweler put the police on the trail of the thief, with the result that not only was he captured, but about four-fifths of the stolen property has been recovered and the thief has pleaded guilty and will be sentenced to prison for a long term. Thus ends another case in which the value of publicity as a protection to the jewelry trade is clearly demonstrated.

Trade-Marks and Their Imitations.

MUCH has appeared in the business journals of the country recently upon the question of the value of a trade-mark, and according to reports of patent attorneys the litigation involving the subject of trade-marks has increased in large proportion recently, showing that the mercantile community is appreciating more and more the fact that property right in a good trade-mark is an exceedingly valuable asset to any business. The value of trade-marks has been appreciated by the jewelry trade for many years past; originally more particularly by the silversmiths, but of recent years by manufacturers in all the lines which come into the trade.

These marks serve a twofold purpose—first, as a means of identification for the retail jeweler, that he may know from whom the goods were purchased, and, second, as a practical guarantee from manufacturers who have advertised their trade-mark to the public that the article is of the kind, quality and make which the customer has been led by advertising to ask for. In many instances the trade-mark of a firm has become recognized as practically a stamp of quality, and there are many lines which both dealers and consumers would no more think of buying without the trade-mark of the manufacturer than they would think of buying 18-karat or 14-karat gold without the karat stamp. The good will of a concern may be so bound up in its trade-mark as to make its right to the mark as valuable as its right to its firm name; therefore, a necessity for proper protection of trade-marks is growing more and more vital to the business community as time goes on, and the legislation as well as decisions of the courts in the matter of protecting manufacturers from infringers are followed closely at all times by the mercantile world.

Unfortunately, however, as is well pointed out by a writer in *Printers' Ink*, with the growing value of the trade-mark and trade-name there appears to be a growing class of shrewd persons who seek to wrest from the man who has built up a reputation behind a mark or name, the benefits that

Advertising to pay must be brought to the attention of those able to buy. The Jewelers' Circular-Weekly reaches this class.

accrue from the use of this mark as well as from the advertising he has done, by using on a similar product of poorer quality a mark or name so similar to the one established (either in form of spelling or sound) that the ordinary purchaser may be deceived into buying the imitation bearing this mark or name instead of the genuine article with the original trade-mark of reputation. In fact, infringers are growing so skilful that they are learning how to keep within the law, and even within lines which make suits against them under the trade-mark law doubtful as to the issue. However, the courts seem to be recognizing this, and in actions brought on the ground of unfair competition to protect trade-names, more than in actions in regard to protection of trade-marks, our judges are no longer looking at the subject in an abstract or academic way, but are dealing with the question more intelligently from the common sense standpoint of the business man.

The trade-mark and the trade-name are the great protection of the honest manufacture as well as the dealer and consumer, and the man or firm who seeks to imitate the mark or name which has become well reputed and known by years of honest effort on the part of the owner, is but a low form of commercial pirate who should be given no encouragement by honest merchants. The mere fact that his mark or name is an imitation should condemn his product, no matter what its quality may pretend to be. Members of the jewelry trade will help themselves and protect the manufacturers from whom they buy by giving the cold shoulder to the imitator of honest names, marks or products, for, whether the imitation is within or without the strict letter of the law, the fact that it is an imitation stamps its manufacturer as an unscrupulous parasite in the world of business, whose every action is open to suspicion.

Failures During June and the Second Quarter.

AN analysis of the statistics of the commercial failures in the country for the month of June, which have just been compiled by *Dun's Review*, gives many evidences of improvement as compared with records of proceedings of months back to last July, but the failures for the jewelry trade show a distinct increase in the amount of liabilities, owing to one large failure. According to *Dun's Review* there were 23 failures among jewelry and clock dealers in June, with liabilities of $526,806, as compared with five failures in 1907, with liabilities of $11,690; 13 failures in 1906, with liabilities of $77,237; 20 failures in 1905, with liabilities of $119,431, and 10 failures

CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS *Telephone, 480 John* *31 Maiden Lane NEW YORK*

Trade-Mark

OUR guiding principle has always been to incorporate as much artistic skill and good material in the construction of our jewelry as possible: This is contrary to the skimming, economic operations so extensively practiced in the manufacture of inexpensive gold jewelry. In observing this standard we naturally sacrifice the petty profits resulting from the less exacting methods of others; nevertheless our jewelry is consistently low priced and of a quality away beyond the ordinary.

¶ *Ask to see it and look for our trade-mark—the imprint of originality and all that's good.*

NEW YORK CITY

in 1904, with liabilities of $71,982. Eliminating the one large failure, however, the figures would not be very much above the average.

The statistics of the failures in the trade for the second quarter of the year ending June, while showing an increase for the same reason in the amount of liabilities as did the month of June, also show a slight increase in number. According to *Dun's Review* there were 72 failures in the three months ending June 30, with liabilities of $1,064,952, as compared with 41 in 1907, with liabilities of $314,249; 43 in 1906, with liabilities of $452,662; 49 in 1905, with liabilities of $650,246, and 58 in 1904, with liabilities of $278,107.

LETTERS TO THE EDITOR.

An Appreciation of a Service Received.

HOUSTON, Tex., July 6, 1908.

Editor THE JEWELERS' CIRCULAR WEEKLY:

We are in receipt of yours of recent date, enclosing copy of a letter written you by S. Friedlander, Memphis, Tenn., relative to capture of the thief who robbed us. We certainly appreciate what you have done for us in giving this matter publicity through your paper. We consider THE JEWELERS' CIRCULAR-WEEKLY the official organ of the jewelry trade in all matters, and we believe it is more widely read than any other publication of like nature.

Judging from Mr. Friedlander's letter, we are indebted to you for the recovery of our lost goods. With what we have already recovered, and otherwise, we will lose, including the reward, in all about one-fifth value of the goods stolen—in other words, will recover about four-fifths of the value of the goods. We have already had returned to us nearly this amount, and have the thief in jail awaiting trial. As he has confessed to everything, he will probably get about 10 years.

Thanking you very kindly for your interest in the matter, and assuring you that whenever we are able to serve you we will be only too glad to do so, and hoping that you will call upon us at any time we can serve you, we are,

Most sincerely yours,

TAYLOR BROS.

Per C. W. Taylor.

An interesting story comes from Hagerstown, Md., of a controversy between a jeweler and a customer who had ordered a special engagement ring made. Before the engagement ring was completed the customer married his fiancee and thereupon considered that he had no use for the jewel. When he refused to take it the jeweler, it is said, was angry and mounting it on a card, bearing the name of the customer and stating that it was an engagement ring and was ordered and not paid for and must be sold, he hung the card in the window. This in turn made the customer angry and the latter tried to invoke the local court to issue an injunction against the jeweler running the sign. Before the court could intervene, the matter was settled by another prospective bridegroom who went to the jeweler and bought the ring.

New York Notes

Leo Cahn is no longer connected with the firm of T. De Simone & Son, 76 Nassau St.

Harry Thomas, of the Jewelers Board of Trade, returns this week from a vacation trip.

David Kaiser, of David Kaiser & Co., has been spending a vacation in the Catskills.

Miss R. Merebaum, jewelry buyer for the Simpson, Crawford Co., is in Europe on a buying trip.

Albert Wyss, manager of the American-Swiss Watch Co., started, last Friday, on a trip to Canada.

Geo. Wiltshire, of the Waite, Evans Co., is spending a two weeks' vacation in the Pocono Mountains.

Frederick W. Gesswein, manufacturer and importer of tools and supplies for the trade, is now located at 26 John St., where he opened an office early this month.

Harry B. Bliss, formerly connected with the Gorham Co., is now representing the B. M. Shanley, Jr., Co., Newark, in the north and northwest. He is also covering Philadelphia, Baltimore, Washington and Boston for that firm.

The firm of M. Greenspan has been incorporated under the laws of New York State to conduct a jewelry business with a capital of $5,000. The incorporators are Botha Greenspan and Annie Sternbach, of this city, and Minnie Seigler, Roselle, N. J.

Judge Hough has appointed William Lesser receiver in bankruptcy for the Merchants' Specialty Mfg. Co., 259 Greenwich St., dealers in silver-plated ware, novelties, etc., under a bond of $500. The company was incorporated, May 9, 1898, with a capital of $15,000.

Sam Wolff, a representative of Treibs Bros., 68 Nassau St., and Miss Cecelia Sabel, who were married at Tuxedo Hall, Madison Ave. and 59th St., on Sunday, June 28, are making a honeymoon tour in an automobile, visiting the principal Summer resorts. The wedding was attended by a number of representatives of the trade.

The creditors of Wm. A. Keddie, 170 Broadway, are notified that the first meeting of creditors will be held at the offices of Referee in Bankruptcy John J. Townsend, 45 Cedar St., July 21, at 3 P. M., at which time the creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transmit such other business as may properly come before the meeting.

Judge Hough, in the United States District Court, has granted a discharge in bankruptcy to Victor Jonest, diamond dealer at 33 Union Sq., who filed a petition in bankruptcy in January showing liabilities of $49,822 and assets of $44,099. A discharge in bankruptcy has also been granted to Davis Zaiden, 491½ Sixth Ave., against whom a petition in bankruptcy was filed in January, showing liabilities of $4,946, with no assets except a patent which he holds on a coin clock wheel.

An accidental ringing of a burglar alarm in the jewelry store of J. A. Piccard, 1233 Fulton St., Brooklyn, attracted considerable attention Wednesday night. More than $1,000 worth of booty was stolen from that store during April last by thieves, and Mr. Piccard later installed a burglar alarm system. Several wires led from the windows and doors to a gong on the wall. Without apparent cause the alarm began ringing at 11 o'clock and continued ringing for about an hour, until the owner of the store arrived and turned off the power. In the meantime a crowd had collected to witness the capture of the burglars who were supposed to be in the store.

A bronze replica of the figure of Washington, the original of which was the work of Jean Antoine Houdon, has been loaned by the city of New York to the Metropolitan Museum of Art. Six copies of the original marble statue were at one time made in bronze by William Jay Hubard, a Virginia sculptor. One of these copies was presented to the city of New York as a tribute from the pupils of the public schools. It has at different times stood in various places, until some years ago it was erected near the Soldiers and Sailors' Monument on Riverside Park. It is now moved to the Museum as a permanent loan from the city to protect it from the weather.

Among the recent accessions at the Metropolitan Museum of Art were a silver watch, maker John Mitzell, London, 1697, the gift of George S. Palmer; a bronze memorial medal of Agrippina the Elder, Roman, first century, A. D., the gift of Sir Caspar Purdon Clarke, and a bronze copy of the Hicks Prize medal, Meriden High School, Meriden, Conn., obverse and reverse, by Louis A. Gudebrod, a gift of Samuel Stehr. The recent loans include 75 pieces of silver, European, 18th century, lent by George S. Palmer; a silver cake basket, made by William Plummer, London, 1762 lent by Miss Elizabeth Sterry du Fais, and a marble bust of Cardinal Richelieu, lent by Dr. J. A. Irwin.

A meeting of the creditors of J. C. Condon, Opelika, Ala., was held at the offices of the Jewelers Board of Trade last Wednesday, a large majority of creditors being represented. A letter from Mr. Condon's attorney was presented, making an offer of settlement at 25 cents on the dollar, payable 12½ per cent. in cash and 12½ per cent. Jan. 1, 1909. The assets were said to be $6,326, consisting of stock and fixtures, $5,513, and accounts receivable, $812. The liabilities are $5,887. It was the opinion of the creditors at the meeting that the offer was not sufficient, and the Board of Trade was directed to communicate with Mr. Condon's attorney and ask for a settlement at 50 per cent., one-half in cash and the balance in notes indorsed by the debtor's wife, payable in January, 1909.

Four of the largest and costliest bells in the world, on which will be struck the quarter, half, three-quarter and hour chimes, are to be placed in the 46th story of the new tower on the Metropolitan Life Insurance building, Madison Sq., at a distance of 360 feet above the pavement. An order for the bells has been placed with the Meneely Bell Co., Troy, N. Y. The work of casting them will be begun at once, and it is expected that they will be in use by the new year. The largest bell, toned to B flat, will be 70 inches at the mouth and weigh 7,000 pounds; the second, in E flat, will weigh 3,000 pounds; the third, in F natural, will weigh 2,000 pounds, and the fourth, in G, will weigh 1,500 pounds. They are to be mounted on pedestals between the marble pillars outside the 46th story. The striking will give what is known as the Cambridge quarters, four blows each quarter of an hour, eight blows on the half, 12 on the three-quarters, and 16 on the hour, followed by a striking of the hour.

Experienced burglars bored through a brick wall and drilled through the steel door of a safe on the fourth floor of 102 Beekman St., occupied by the Diamond Pen Point Co., early last Wednesday morning, and secured about $1,000 worth of gold and several hundred fountain pens. The burglars entered the building at 98 Beekman St. by means of a skeleton key and then climbed to the fourth floor, where they bored a hole in the brick division wall large enough for a man to crawl through. A policeman discovered the hole in the wall, whereupon he called up the Oak St. station and other members of the police force joined him. They found two safes in the pen company's office, one of which had been drilled and broken into. The other was found opened. The burglars left a jimmy and skeleton key and several pieces of burlap lying about. The police say that they have no clue as to who the perpetrators of the deed were, but say they were probably experienced cracksmen. In the larger of the two safes was an oblong steel box in which was deposited the gold bars used in making pens. This box was removed from the safe and taken to an adjoining room, where it was forced open and its contents rifled. The other safe contained books of the concern, but no valuables. In July of last year two men broke into the Diamond Pen Point Co.'s place, but failed to secure any plunder. It is the opinion of the concern that the same persons were interested in the recent robbery.

Supreme Court Justice Kelly of Brooklyn, in a decision handed down recently, thinks that there is no necessity for a writ of prohibition in the contention made by the pawnbrokers summoned into the County Court by Judge Dike, and ordered to give into the court's custody the jewelry pawned with them, the result, it is claimed, of the thefts of Sadie Papps, the Flatbush manicure girl, and Haussler, the ex-policeman. But Justice Kelly thinks the county judge has the right to proceed to a determination whether Benjamin Knowles, the complaining witness against the two defendants, is the owner or not of the jewelry in pawn. This authority, Justice Kelly says, comes from Sec. 688 of the Code of Criminal Procedure. "Such proceedings," said Justice Kelly in his memorandum, "are reasonable and necessary, and the pawnbroker has an opportunity to state his case. Proceedings of this nature are summary from the very nature of the case, but the rights of honest holders of property, whether they are public pawnbrokers or private citizens, are entirely safe in the hands of the courts. The judge can order the property restored to the owner or send the parties to the civil courts. I understand that this is all the county judge intends to do, and so the order or writ must be modified so as to allow the county judge to make an order providing for inquiry as to title, on notice to both parties, or to amend the order al-

(Continued from page 65.)

ready made so as to bring about the same end. When that action is taken, the necessity for a writ of prohibition is obviated."

A. Kenneth Merrill, head of the Merrill-Broer Co., Detroit, Mich., is in town.

William Moore, a pearl dealer, Prairie-du-Chien, Wis., is in town this week.

Geo. W. Read, of Larter & Sons, is spending a vacation at Oak Lake, Philadelphia.

Mr. Woodruff, buyer for P. W. Ellis & Co., Toronto, Can., is in New York this week.

Albert Levy, a salesman for I. Lewkowitz, Sixth Ave., is enjoying a vacation this week.

J. G. Donovan, of J. G. Donovan & Co., Los Angeles, Cal., is spending a vacation in this city.

A. A. Gillespie and Samuel Sipe, Pittsburg jewelers, sail this week from this city for Europe.

C. S. Hannon, connected with Wright, Kay & Co., Detroit, Mich., is making a visit to this city.

A. R. Von Dette, manager for J. Lowe & Co., Monroe, La., is in town for a week on a buying trip.

Fritz Klee, pattern maker for the R. F. Simmons Co., Attleboro, was in New York during the past week.

Donald Le Stage, of the H. D. Merritt Co., North Attleboro, Mass., was a Maiden Lane visitor last week.

A. Winkelstein of Marks & Winkelstein, Elmira, N. Y., was a caller in the Maiden Lane district last week.

Simon Adler, of Rosenbaum & Adler, 65 Nassau St., sails for Europe on the *Kaiser Wilhelm II.*, July 21.

I. H. Weinberg, 15 Maiden Lane, accompanied by his wife, sailed for Europe, Monday morning, on the *Adriatic*.

Eugene Valle, employed by Cross & Beguelin, 33 Maiden Lane, is spending his vacation at Long Branch, N. J.

Adrian J. Morais, who is about to start in the jobbing business in New Orleans, La., is in New York this week.

C. H. King and G. L. Paine, members of the G. L. Paine Co., North Attleboro, Mass., were callers in this city last week.

William E. Smith, of the L. E. Waterman Co., was in Denver last week helping nominate the Democratic candidate for President.

Louis Steiner, importer of fans and fancy goods, 520 Broadway, is at present on a buying trip in Europe. He will return early in August.

Frank Ruggles, traveling salesman for W. H. Bell & Co., Attleboro Falls, is at the Astor House, detained there by an attack of rheumatism.

Abraham A. Heller, of L. Heller & Son, 68 Nassau St., arrived in this city yesterday on the *Kaiser Wilhelm II.*, called here by the recent death of his father.

The L. E. Waterman Co. has on exhibition in its windows, 173 Broadway, the trophies competed for at the meet of the Federation of American Motorcyclists, which occurred July 1, 2, 3 and 4. The trophies were supplied by John Frick.

Chester Billings & Son, importers of diamonds and manufacturing jewelers, will to-day discontinue their office at 29 Maiden Lane and 58 Nassau St. The wholesale department will hereafter be located at their uptown store, 34th St. and Fifth Ave.

At the regular meeting of the directors of the Jewelers Board of Trade, held on Thursday, the following firms were unanimously elected to membership in the board: Follmer-Clogg & Co., Lancaster, Pa., and MacPherson & Rouboud Co., Providenee, R. I.

M. P. Doyle, trustee in bankruptcy for Daniel Offenhutter, 12 John St., has been directed by the United States District Court to sell the benches, tools, fixtures, etc., used in the business at private sale. If no acceptable bid is received the goods will be sold at public auction.

Leon Abeles, who formerly traveled for the firm of C. P. Goldsmith & Co. in the south and on the Pacific coast, has engaged in the jewelry manufacturing business. His office is located in the Lorseh building, 37 Maiden Lane. Mr. Abeles will form a partnership on Jan. 1 and both members of the firm will travel. The factory is located in Newark, N. J.

A decision was handed down by United States General Appraiser Sharretts last week, holding that diminutive alarm clocks with a compass on the reverse side flimsily constructed are dutiable at 35 per cent. ad valorem under Par. 413 of the present Tariff Act. The collector's decision assessing the duty at 60 per cent. ad valorem under Par. 434 is reversed. This question came up on the protest of the Southern Pacific Co.

Frederick Kenny and J. D. Schenck, the two men who were caught in an alleged attempt to steal a package of loose diamonds from the firm of Cooper & Forman, 3 Maiden Lane, New York, on July 6, and who were arrested and taken to police headquarters, where they were searched and held, were before the magistrate in the Tombs Police Court, Friday, and waived examination. They were held in $3,000 bail for the Grand Jury.

H. M. Ryman, Calvert, Tex., is on a trip to the north, and was among the visitors at the office of THE CIRCULAR-WEEKLY last week. Mr. Ryman is making a trip for rest and recreation, and will be away until the latter part of next month. Mr. Ryman will attend the convention of the American Association of Opticians at Philadelphia, Pa., and perhaps that of the American National Retail Jewelers' Association at Cincinnati, before returning to his home.

A fire at 39 Barclay St., Sunday afternoon, managed to do $25,000 worth of damage and to give the firemen a stiff fight for over an hour. The fire started in the fourth floor of the building, where were stored the artificial flowers made by the Frank Netschert Co. The fourth and fifth stories were wrecked and water did great damage to the stock of goods owned by the Netschert concern and the firm of L. Wertheimer & Co., importers of Chinese and Japanese goods, on the lower floors.

It was learned recently that Charles A. Fries, the thief arrested at the office of Mathey Bros., Mathez Co., early in May, on the charge of stealing a watch, had at one time been connected with the jewelry trade in various capacities. The picture of Fries, who is now serving a long term in prison, was recognized by several people as that of Chas. S. Osterhout, who had at one time been employed by the Non-Retailing Co., Lancaster, Pa., C. G. Alford & Co., New York, and other firms in the trade.

A well-dressed man and woman called at the store of Charles Kalbow, 311 Broadway, Williamsburg, Monday morning, and asked to see some diamonds. The jeweler brought out a tray of diamond rings and showed them to the prospective customers. After looking at the goods the man, so the jeweler says, walked leisurely toward the back of the store while the woman continued her inspection of the rings. The jeweler noticed that the man was very close to the safe and was on the point of opening an inner compartment in which was kept valuable jewelry. He at once ran to the back of the store, taking his pistol to protect his property. The man saw him coming and closed with him before the jeweler could fire. The stranger managed to break away, but was followed by Kalbow, who overtook him near the door and held him until a policeman arrived and arrested him. Meanwhile, the woman left the store. The prisoner said in the Bedford Ave. police station that he was a jewelry salesman, living at 233 E. 112th St. A search revealed that he had with him three diamond rings, three unset diamonds, several gold lockets and a gold watch and chain. He was sent to Police Headquarters that they might try to identify him there.

Early last Friday thieves sought to enter the Summer home of Ira Barrows, of the H. F. Barrows Co., 15 Maiden Lane, who has a cottage on Rumson Road, Sea Bright, N. J. Mrs. Barrows was treasurer for a sale held at her home for the benefit of a babies' hospital. She was obliged to have nearly $2,000 in the house over night, so Mr. Barrows employed two watchmen to protect the house. The watchmen at the Barrows home saw an automobile come up from the road near the home of Thomas N. McCarter, which adjoins that of Mr. Barrows. The machine bore no lights and the exhaust was muffled. In it were two men. When the machine reached the Barrows house one man jumped out and stole around to the rear of the dwelling. The watchmen hid behind a large box. Soon the man reappeared and directed the chauffeur to drive to a near-by side road. At this the watchmen fired two shots and started in pursuit. The man who had given the order, they say, scrambled into the auto and the machine made off at high speed.

The Death of C. H. Church.

INDIANAPOLIS, Ind., July 11.—Word was received from Logansport, Ind., last week, of the death of C. H. Church, a pioneer jeweler of that town who for many years had been inspector of watches for the Pennsylvania Railroad system.

The deceased, who was widely known in the jewelry trade and also well known to railroad men from Chicago to Pittsburg, was essentially a repairer, though he carried a small stock. He was highly regarded in the community and his loss is deeply regretted.

Mr. Church is survived by a widow and two daughters.

STRICTLY A COMMERCIAL BANK **ACCOUNTS SOLICITED**

New Orleans, La.

H. L. Lathrop, New York, arrived in Morgan City recently, having come to assume charge of the business of C. O. Johnson. The latter will take charge of his business in Bay St. Louis.

Charles E. Schober, a well-known jeweler and diamond setter, employed for the last 20 years by the various manufacturing jewelers of the city, died, July 4, after an illness of several months. Mr. Schober was born in Memphis, Tenn., 36 years ago, and came to New Orleans when he was six years old. A widow and six children survive him. He was a member of Elysian Grove, No. 39, of the Druids, and was a charter member of the Jewelers' Fraternity.

A note which appeared in these columns a few weeks ago referred to a suit of Wm. Frantz & Co. against a pawnbroker for the recovery of certain diamonds which had been obtained from the jewelers by misrepresentation and pledged with the defendant. In that case, judgment was rendered in favor of Wm. Frantz & Co. against the thief, but not against the pledgee, but a similar case a short time later was decided in favor of the jewelers. The suit which Wm. Frantz & Co. lost against the pawnbroker has been appealed to a higher court by their attorney, who expects to be able to establish the right of the jewelers to recover the full value of the stolen property from the man with whom it was pledged. The suits have been followed with interest by the trade, as the points and principles involved are important to all jewelers.

Springfield, Ill.

Announcement was made last week of the sale of the Pierik building on the east side of the square, to W. F. Workman, the purchase being made from John C. Pierik, the local jeweler, and his brother, H. C. Pierik, who owned the property jointly. The building, which has a frontage of 28 feet and is five stories high, is of red brick and stone, and houses Mr. Pierik's big jewelry establishment on the first floor, the four upper floors being used for offices. The building was erected 12 years ago at a cost of $55,000, the ground at that time costing $28,000. The price which has now been paid for the property is said to be about $110,000.

Frank G. Burch, of 110 N. 1st St., is to engage in the manufacture of balance staffs at his residence in a short time on a small scale with a capacity of 10 gross of staffs daily. Mr. Burch is one of the best known men in the watch manufacturing line in this State. For 25 years he was employed in various watch factories, and for 12 years he was foreman of the train department of the Illinois Watch Co., of this city. Mr. Burch has lately invented and patented a machine of the stave lathe pattern, which is especially adapted for the manufacture of balance staffs. The construction of the machine involves a new mechanical motion. In prior practice where multiple turnings have been made, it was necessary to employ a cam especially designed for the turning. In the new Burch machine a number of simple cams are used with adjusting points for each cam. The product will be handled by jobbers over the entire country.

Boston.

Oscar H. Solomont, of James Solomont & Bros., Inc., has left for Old Orchard, Me., where he will remain a few weeks.

George A. Carpenter, Boston manager for the Crescent Watch Case Co., and his son, Ralph G. Carpenter, are at the country estate of Mr. Carpenter, senior, "Cobham Hall," Wolfeboro, overlooking Lake Winnipesaukee.

Adolph C. Ackerman, Roxbury, recently reported the loss of a diamond valued at $65. He sent George Cole, messenger boy, to the store of W. L. Russell, 77 Warren St., with three rings, a locket and a chain. The package was sealed, but when the boy reached the store the diamond was missing.

James S. Blake, of Kettell & Blake, who is one of the most prominent Masons in Boston, is one of the four delegates from Aleppo Temple, of this city, to the annual session of the imperial council of the Mystic Shriners at St. Paul, who left here last Saturday, escorted by about 90 members of the order.

Harrisburg, Pa.

TRADE CONDITIONS.

There seems to be a more hopeful feeling among the local jewelers now that both old parties have made their Presidential nominations, and more than one tradesman has expressed himself as being well satisfied with the outlook for the near future.

State Health Commissioner Dixon has offered a handsome silver loving cup as a prize for the best baseball team made up of employes of that department.

A. S. Felker and E. D. Daron, two of Steelton's most prominent jewelers, have formed a partnership and combined their stores, continuing the business at Mr. Daron's old location.

A new mercantile license ordinance has been presented in City Councils. Its promoters say that it is designed to equalize the tax on merchants as much as possible, each merchant being taxed according to the volume of his business the year previous.

J. Levinson, a hawker and peddler of watches, clocks and jewelry, has been arrested in an adjoining county, charged with false pretense and selling these goods illegally. He was held in $400 bail on each charge. Levinson has been operating in that section for more than a year.

Denver.

The Bohm, Allen Jewelry Co. made a handsome gold belt, which was given by the Denver *Post* as a trophy to the winner in a broncho busting contest.

The new officers elected at the recent meeting of the Jewelry Workers are as follows: President, Peter Fink; vice-president, S. J. Simpson; recording secretary, P. H. Otto; financial secretary, J. Adams; treasurer, Morris Ensendorfer.

James B. Walker, Kimball, W. Va., has moved to New Castle, Va.

Newark.

A fire at South River, N. J., July 11, destroyed the jewelry store of Arthur Levy. The fire burned several other business houses.

Investigation by the police of the First Precinct into the destruction by bullets of the windows at the factory of the Whitehead & Hoag Co., badge makers, Washington and Warren Sts., revealed that instead of mischievous boys the guilty parties were none other than Special Policeman Thomas Bruen and his wife, who reside on the second floor of 13 Plum St., directly back of the factory. More than 30 bullets were fired through several windows of the building, and most of them were found inside. An officer visited the Plum St. house, and on making inquiry learned that Bruen and Mrs. Bruen had been firing shots from a rear window of their home. Bruen explained that he had just purchased the weapon and was testing it. He was taken to the factory and there the matter was settled, the firm declining to press any complaint.

It is probable that the Committee on Public Buildings may take legal action against the New York concern that installed the timekeeping system in the city hall under contract with the commission. The clocks have not given satisfaction. The committee has looked to the City Hall Commission to compel the company to put the clocks in repair, and Secretary Clarence E. Tobin has informed the aldermen that repeated efforts to have the clocks put in proper condition have been made by the commission, but, while there has been considerable tinkering with the timepieces, no satisfaction has been obtained, and the company has practically declined to do anything more, claiming that the condition of the clocks was due to lack of attention on the part of the city's employes. This is denied by the committee.

The funeral of James J. Boylan, a well-known young Newark man, took place Tuesday morning, July 7, from his home at 145 Monroe St. to St. John's Roman Catholic Church, where a solemn high mass of requiem was offered by deceased's uncle, the Rev. John F. Boylan. Interment was made in the Cemetery of the Holy Sepulchre. Mr. Boylan had been sick for more than a year. His family believed that he was regaining his former health until Saturday, July 4, when his death suddenly occurred, being due to heart failure and caused by the heat. Mr. Boylan was an expert jeweler, having worked at the business since a boy of 15 years of age, and had been employed up to the time of his death by the Eastwood & Parks Mfg. Co., of Oliver St. He was 26 years of age and was a member of St. James Roman Catholic Church. He belonged to its Junior Holy Name Society.

A distinct improvement in business has been noticed in Galesburg, Ill., according to a report from jewelers in that town. Business for June was particularly good and the condition is continuing through July. Lester F. Lawrence reported that June business ran ahead of that of last year, and that he is looking to a larger holiday business than ever before.

ENTERPRISING and successful jewelers everywhere are pushing the sale of some individual line of watches which they believe to be superior to all others, and upon which they can also make a satisfactory and justifiable profit.

This explains the growing demand for ILLINOIS WATCHES, in 0, 12, 16 and 18 sizes, by increasing numbers of leading jewelers throughout the United States.

If you are not familiar with the superior quality of — and advantages gained by handling—Illinois Watches, it will mean reputation and dollars for you to investigate.

Every one fully guaranteed.

Vol. LVI. CHICAGO WEDNESDAY, JULY 15, 1908. No. 24.

Chicago Notes.

C. G. Breitenbach was a visitor in Milwaukee last week.

A. Y. Boswell, Tulsa, Okla., spent a day here, last week, on his way east.

G. W. Flanders recently removed from Three Rivers, Mich., to Niles, Mich.

R. J. Wilson, western representative of the C. E. Hancock Co., is on his vacation.

M. Schwab, of the M. Schwab Jewelry Co., Cincinnati, O., was a recent visitor in Chicago.

Mr. and Mrs. A. C. Bard have been making a two-weeks' visit to Colorado Springs, Colo.

F. W. Hoyt, of the Hoyt Jewelry Co., St. Louis, stopped over a day here, last week, on his way east.

Harry E. Farquharson, representing E. D. Gilmore Co., has just returned from a trip to the Pacific coast.

H. A. Bredel, head of the watch department of the A. C. Becken Co., is spending a two weeks' vacation at Bluff Lake.

L. A. MacKawn, Chicago manager of the Oneida Community Co., Ltd., is attending a meeting of agents at Oneida, N. Y.

Roy White, A. E. Andrews and H. S. Knapp, travelers for Henry Paulson & Co., have now left for their respective territories.

R. J. Hillinger & Co. contemplate taking the space recently vacated by the New England Watch Co., in the Silversmiths' building.

M. O. Milligan, salesman in Nebraska territory for E. A. Dayton & Co., is spending some time at the house, getting ready for his Fall trip.

F. W. Harvey, Bay City, Mich., was in Chicago, last week, buying his opening order for his new store. The firm style will be F. W. Harvey & Co.

G. W. Cureton, manager of the western office of Henry G. Lefort, returns, this week, from a two weeks' outing with a party of friends at State Line, Wisconsin.

Miss Eunice Hoefer, daughter of C. C. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., Kansas City, Mo., passed a day here last week on her way to Green Lake, Wis.

Sam Bauman, of the Bauman-Massa Jewelry Co., St. Louis, accompanied by his wife and daughter, stopped over here a day, last week, on his way for a few weeks' outing in Michigan.

J. L. Gross, traveler for the Knickerbocker Silver Co., left last week, for an extended Pacific coast trip. Chas. J. Jacobs, of the same company, leaves this week for a trip to the northwest.

There is great gratification at Elgin, Ill., owing to the fact that the Elgin National Watch Co.'s factory did not shut down for July, as the employes had expected. Superintendent Hunter stated that it would probably run all Summer.

Louis M. Nystrom, with the Chicago office of R. Wallace & Sons Mfg. Co., is having a two weeks' outing at Lake Delevan. R. W. Morris, manager here for R. Wallace & Sons Mfg. Co., is making a visit to the factory at Wallingford, Conn., and incidentally taking a little recreation.

In the bankruptcy settlement of Jos. Brown & Co., which was recently confirmed, checks were mailed, last week, to the creditors of the concern for 12½ per cent. of the amount of their claim, and also notes for the same amount due in six months, this composition being on a basis of 25 per cent.

Joseph Wright, traveling salesman for the Illinois Watch Case Co., returned recently to Elgin from a 10 months' trip in the interests of the company. He visited nearly all the principal cities in South America, Spain, Portugal, Germany and Sweden. Mr. Wright is an Englishman who came to Elgin from Sheffield, England, about four years ago.

The following were among the visitors during the past week: J. A. Berg, Westby, Wis.; Mr. White, of Krug & White, Toulon, Ill.; D. A. Keene, Ft. Worth, Tex.; E. S. Hilton, New Glarns, Wis.; F. W. Hoyt, St. Louis, Mo.; A. Y. Boswell, Tulsa, Ind. Ter.; W. J. Graffe, Bascobel, Wis.; F. H. Young, Maquoketa, Ia.; F. W. Harvey, Bay City, Mich.; J. W. Nelson, of Nelson & Sons, Marion, O., and N. Nierel, of J. Nierel & Son, Muscatine, Ia.

J. C. Marx, Shakopee, Minn., has sold his business to Lorenz Nachtshein. Mr. Marx will go to the Pacific coast to locate.

Stephen G. Massey, 126 W. 3d St., Chester, Pa., has been receiving newspaper notoriety on the fact that he had celebrated his 21st year as member of the Moyamensing Hook & Ladder Co. Mr. Massey has also been a member of the Chester Council, No. 36, and of the Independent Americans Order for over 20 years.

Cleveland.

Webb C. Ball was in Chicago last Wednesday and Thursday.

Geo. L. Sweet, of the R. F. Simmons Co., was in Cleveland last Friday.

B. W. King, of the Julius King Optical Co.'s headquarters office, is spending a few days in Cleveland.

Geo. Strong, of the Julius King Optical Co., Cleveland, has been elected "Scribbler" for the new order of Ku Kus.

A. E. Ellenbogen and W. F. Miller will start out on their regular trips for the Bowler & Burdick Co. this week.

Mr. and Mrs. Geo. W. Scribner are at Passaic, N. J., with their son-in-law and daughter, Mr. and Mrs. J. G. Whittier. A grandson arrived on July 7 and Mr. Scribner is now busy passing around the cigars.

The following firms are closing Saturday afternoons during July and August: Arnstine Bros. Co., Bowler & Burdick Co., Cowell & Hubbard Co., Scribner & Loehr Co., Webb C. Ball Watch Co., Sigler Bros. Co.

The following retailers were in this city during the past week: W. J. Higgins, Shelby; E. H. Overton, Westfield, N. Y.; H. H. Brainerd, Medina; Robert Miller, Lorain; Steve Emery, of Birrell & Fobes, Kinsman, O.; Benj. Mosely, Willoughby; J. H. Bihl, Fremont.

Jos. Welf & Sons Co. has just finished installing a Howard striking clock with six foot dials in the Geauga County Court House, Chardon, O. Mr. Welf and his two sons were personally in charge of the work, spending several days of the past week on the ground. Everyone is immensely pleased with it, and it is the subject of conversation for miles around.

Chas. A. Danner has recently moved from his old location at Detroit and Pearl Sts., to a newly equipped storeroom at the corner of Franklin Ave. and Pearl St. Mr. Danner's window displays are a particular feature of his establishment; he has both windows very handsomely built of plate glass and mahogany and nicely lighted by electricity, at his new location.

A wedding recently took place at Fairmont, Minn., when Miss Clara Crosby became the wife of Charles Altenberg, at the home of her sister, Mrs. H. M. Blaisdell. Mr. Altenberg is in the retail business there.

We know the wants from the standpoint of the Retailer, and are perfectly equipped for making Catalogs that bring results. It's our business

Grand Junction, Col.
Jan. 30th, 1908.

THE ARNSTINE BROS. COMPANY,
Cleveland, O.

Gentlemen—I can truly say that I was well pleased with the Catalogs, goods and other advertising matter. I think it is the right way to advertise to get results. We had many compliments on the Catalogs.

Wishing you a prosperous business for 1908, I am,

Respectfully yours,
C. W. PRIMROSE.

This firm used The Arnstine Bros. Company Catalogs in 1907.

Circleville, O., Jan. 10, '08.

THE ARNSTINE BROS. Co.,
Cleveland, Ohio.

Dear Sirs—This being my first experience with any Catalog, I am hardly in a position to fully judge its real benefits so soon, but in my mind no piece of printing, such as your Catalog, can be distributed through any locality without giving the sender an advantage and prestige not enjoyed before. Even if the immediate returns do not show a profit, it cannot help but be money well expended.

Respectfully,
E. SENSENBRENNER.

This firm used The Arnstine Bros. Company Catalogs in 1907, and again placed an order for 1908.

STORE OF E. SENSENBRENNER, CIRCLEVILLE, OHIO.

CLEVELAND, OHIO

IN WRITING US PLEASE MENTION THIS ISSUE "JEWELERS' CIRCULAR-WEEKLY"

Cincinnati.

B. S. Newman, of Frohman & Co., and his wife, are home from a several months' tour of Europe.

Charles Straub, Elgin, Ill., was here looking for help and stated their factory business is rapidly picking up.

A. J. Augustin, local manager for the Dennison Mfg. Co., has gone to Pine Lake, Mich., for a month's fishing.

Dennis Schram, prominent jeweler of Jacksonville, Ill., stopped over here on his way to a northern Summer resort.

George H. Opie, of the Wadsworth Watch Case Co., and his bride, have returned from their honeymoon in the east.

The Frank Herschede Co. having just completed a very satisfactory stock taking, held the annual stockholders' meeting, July 11.

S. C. Bingaman, Fifth and Vine Sts., has been detained from business the past two weeks, having undergone an operation for appendicitis.

The sympathy of the trade has been extended to L. H. Becht, with A. & J. Plaut, owing to the recent death of his 19-year-old daughter Elsa.

Charles Remillet, having recently sold out his business at Canton, O., was here last week buying an opening stock for his new store at Newark, O.

Frank Herschede, of the Frank Herschede Co., and Walter Herschede, of the Herschede Hall Clock Co., are at Grand Rapids, Mich., where the latter company is largely represented in the annual furniture exhibition at that place.

William Pflueger, of Joseph Noterman & Co., is entertaining his son, who is home from Henderson, Ky., where he is engaged as watchmaker. J. B. Osthoff, of the same house, has left for his Summer's outing in the North Carolina mountains.

Frank L. Miller, formerly in the retail jewelry business at New Vienna, O., has purchased the E. F. Marble & Bro. jewelry store at Wilmington, O., and was here, last week, purchasing stock. He will also enlarge and add many improvements to his new place.

Herman E. Promnitz, well and favorably known here as a manufacturing jeweler, is arranging to open a retail jewelry business in Van Wert, O., about Sept. 15. Carl Lesley, who was formerly engaged in the watch repair business here, will associate himself with Mr. Promnitz as watchmaker.

The Rockford Watch Co., the past week, had a very interesting exhibit in one of the Oskamp Jewelry Co.'s windows. The display showed the various parts of a watch, and was arranged by J. M. Rosenbach, a representative of the company, who also explained to those interested in the display, the construction of a Rockford watch from beginning to end.

L. Gutmann & Sons have just received an importation of some very fine pieces of Japanese bronze. The collection includes facsimiles of the old Japanese house wares, which particularly attracted Mr. Gutmann's notice while on his recent visit to that country. In the shipment was also a quantity of silver novelties, which in their oddity are very attractive and show great skill in workmanship.

Out-of-town jewelers who were here the past week purchasing stock included: Charles Sieglitz, Vevay, Ind.; F. L. Horning, Brookville, Ind.; E. B. Scott, Batavia, O.; R. Baldwin, of Baldwin Bros., Winchester, Ky.; Owen Sherwood, Falmouth, Ky.; E. De Voss and wife, Wilmington, O.; A. M. Stamm, Williamsburg, O.; Chas. Hofman, Springfield, O.; Roy Collett, Callao, Mo., Frank L. Miller, New Vienna, O.

The following resolutions have been drawn up and adopted by the Cincinnati Wholesale Jewelers and Manufacturers' Association in memory of their departed member, Eugene Swigart: "Whereas, It has pleased the Divine Providence to take from our midst our friend and fellow member, Eugene Swigart, the members of the Cincinnati Wholesale Jewelers and Manufacturers' Association take this means of showing the high regard and esteem in which he was held by them and hereby extend their heartfelt sympathy to the bereaved family. Therefore be it, RESOLVED, That in the taking away of Eugene Swigart, the community loses an honored and faithful citizen; the association an energetic and capable member, and his family a loving and devoted husband and father. Be it further, RESOLVED, That these resolutions be spread on the minutes of our association, and a copy be sent to the bereaved family.

Pacific Coast Notes.

J. S. Johnson, Concord, Cal., has sold his business to C. W. Tissell.

The store of E. M. Mather, at Downey, Cal., was closed last week under an attachment levied by a Los Angeles firm.

F. M. Mason, Merced, was in Lincoln, Cal., last week, looking over the ground with a view of opening a jewelry store.

B. Jackson, Gridley, is desirous of changing his location, and is looking about Calistoga, Cal., with a view of locating there.

C. A. Whited, Raton, N. Mex., is exhibiting a magnificent piece of Smithsonite in his window. This lump weighs 84½ pounds, and is the largest piece ever mined. It was secured at Kelly, N. Mex.

A new gem merchant appeared upon the Pacific Coast, July 1, in the form of an eight-pound son, which was presented to Doc Wilson, manager of the San Diego Gem Co., San Diego, Cal., by his wife.

Capt. C. V. Mount, of Mount & Ross, Petaluma, Cal., has disposed of his share of the business to George Ross, a brother of Mr. Mount's partner and son-in-law, Arthur Ross, and will retire from all mercantile pursuits.

Chester Hough, who was formerly located in Eureka, Cal., and who was at one time connected with C. H. Wright's jewelry store at that place, is in Humboldt County on a business trip. He is connected with a New York jewelry house.

C. J. Moore and R. J. Wilke, Palo Alto, Cal., have purchased the Victor mine, also the Rincon and Mack & Bristol claims at Mesa Grande, of J. A. Mack and Jessop & Sons, Los Angeles. It is the purpose of the new owners to develop the properties, and ship tourmaline and kunzite to the eastern markets more extensively than has been done heretofore.

San Francisco.

TRADE CONDITIONS.

The great American fleet of battleships and cruisers has resumed its journey. After its arrival here in the early part of May, business on the Coast received quite an impetus and the jewelry business came in for a direct share of the benefits. The fruit crops are maturing in the country and idle men in the city are rather scarce. People are leaving San Francisco on their regular Summer vacations, but there still remain enough to keep business close to the usual level for this season of the year. One thing is noticeable at the retail stores—that the majority of the purchases are of either the highest or the lowest priced goods. People seem to prefer to get a cheap grade of goods to tide them over until they can afford better articles, or, if they have the money, they get the best now. Collections show a slight improvement, it is said, and both wholesaler and retailer are now looking more hopefully towards a flourishing Fall and Winter trade.

M. Farber has opened a store at 954 Market St.

R. L. Radke and wife have recently returned from a visit to the Yosemite Valley.

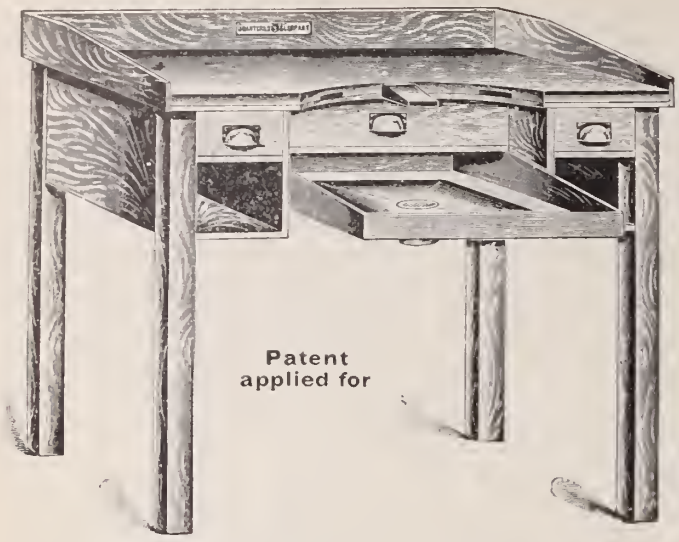
A. J. Breiling, of the sales force of the W. K. Vanderslice Co., is away for a short vacation.

Morley Van Vliet, of the Baldwin Jewelry Co., has just returned from an extended European trip.

Notice has been given to the trade of the sale of the stock of Max Dawdedoff, a retail jeweler, to William Rosin.

J. R. Jenkel has moved into his retail store on Market St., near Davis, and is closing out the stock in the Van Ness Ave. store.

During the months of July and August, Shreve & Co., following their usual custom, will close their store at 1 P. M. on Saturdays.



J. C. Blythe, who has represented Jos. Fahys & Co. on the coast, will also represent the silver lines of the Alvin Mfg. Co. in the future.

Among the visitors from the retail jewelers of the country towns who have been in the city recently on buying trips are: T. White, of A. T. White & Co., Vallejo; M. K. Giant, of the same city; F. J. Stumm, Benicia; F. Chaffee, Yountville, and A. E. Morro, Los Angeles.

Several members of the sales force of Shreve & Co. are absent on their mid-Summer vacations. H. S. Dana is enjoying a fishing trip on the McCloud river, while J. B. Birmingham is resting at Laurel Dell. George B. Lewis, secretary of this company, has left on an extended European trip.

William Marshall, who has been for seven years with Burr W. Freer, a well-known local manufacturers' agent, has gone to Los Angeles, Cal., where he will establish an office for himself. He will begin by representing two Los Angeles firms—Hambright & Walsh, jobbers, and Schwartzkopf & Penniman, manufacturers' agents.

Hammersmith & Co. say that business has been very good in the past week. In addition to the extra trade, which is secured by the special moving sale, and there has been much work on many trophies and medals incident to the festivities of July 4. There were 48 of these in the silver room at the commencement of the week, ready to be inscribed, and this does not represent the full number sold.

TRADE CONDITIONS.

As noted last week, there are unmistakable indications of an improvement in business among the jewelers. A number of the retailers report a quite marked increase in sales. The prevailing hopefulness among retailers is confirmed by the report of a traveling man representing a large wholesale house, who has been here for about a week and reports that his sales have been very satisfactory, amounting to three times what he had expected and what he would have been satisfied with in view of conditions existing during the past few months.

The J. C. Fleming Co. has just installed a large new line of clocks.

W. W. Meadows, San Diego, was here, last week, on his way home from Arizona.

P. T. Hoeffer, with George H. Curry, 138 S. Broadway, is taking a vacation at Catalina Island.

Clarence O. Goldman, Main and Washington Sts., has gone on a vacation and is enjoying his favorite sport of fishing.

The H. J. Whitley Co. has sold 25 cups which will be given as prizes at the dog show in Venice, Cal., July 23, 24 and 25.

A. Fink, of the J. P. Trafton Co., left, last week, on a trip through Arizona, Texas, Colorado and Utah, to be gone two months or more.

A. E. Slaughter, formerly of Jefferson St., west of Vermont, has moved into a handsome new store on Vermont Ave., near Jefferson.

Ernest L. Dayton, of E. W. Reynolds Co., has been at Catalina Island for the past two weeks, while convalescing from an attack of typhoid fever.

J. B. Rowe, who was in business on N. Spring St., near Temple St., has moved into a new and larger store, near his former location, and has installed new fixtures.

George G. Koeberle is in charge of the business of J. G. Donavan & Co. during Mr. Donavan's absence in the east. Max Hirschfeldt has taken a position as watchmaker with J. G. Donavan & Co.

George E. Feagans has now removed from Joliet, Ill., and is making his permanent home in this city. He is taking charge of the business of Brock & Feagans during the absence of Mr. Brock in the east.

John Wooster, formerly of the California Optical Co., who has been in the Imperial Valley for three months on account of ill-health, stopped here briefly on his way to the Yosemite Valley, where he will remain for two months. He is accompanied by his wife.

Out-of-town jewelers who have visited this city recently include George L. Dietrich, Anaheim; Frank De Arman, Ontario; Geo. Heston, of the Ernsting Co., San Diego; A. N. Pequegnat, Riverside; A. R. Moon, Escondido; J. D. Morrow, Oceanside; C. C. Zilles, Pomona.

Joseph Rittigstein, 427 S. Broadway, has decided to move, Jan. 1, from his present location to a room upstairs in the O. T. Johnson building, corner of Broadway and 4th St. He will dispose of a considerable part of his miscellaneous stock, and has already begun a closing-out sale.

Henry B. Crouch, corner of Broadway and Mercantile Pl., is displaying in his window two notable athletic trophies brought from England by Fred Welsh. They are a massive sterling silver belt won by Welsh as the champion welterweight of England, Sept. 16, 1907, and a fine silk banner awarded for the championship in 1845.

T. W. Copner and A. W. Andrews, who have been in the jewelry manufacturing business in quarters adjacent to Gilmore & Lee's salesroom, have discontinued, Mr. Copner going to the Carl Entenmann Jewelry Co. and Mr. Andrews associating himself with J. W. Crogan in the location formerly occupied by Janes & Co.

The Carl Entenmann Jewelry Co. has just made a handsome solid gold watch case of unique design. It is made for a mining man of wealth, and is decorated with representations of a miner's cabin, a cactus and other characteristic mining and desert scenes. Accompanying the watch is a massive solid gold fob and several pendants comprising beautiful precious stones. The pendants are made to be interchangeable.

R. H. Schwarzkopf started early last week for a circuit of the cities of the coast, going as far east as Denver. He will be gone about two months. G. L. Penniman, his partner, started a few days later for a trip covering all the western States. He expects to be gone about four months. William S. Marshall, formerly with Burr W. Freer, San Francisco, also started out last week as a representative of Schwarzkopf & Penniman, making a trip up the coast.

The H. J. Whitley Co. furnished to the Chamber of Commerce of San Pedro a large and beautiful sterling silver loving cup to be presented to the Chamber of Commerce of Honolulu. It was sent to Hawaii on board the *Hawaiian,* a yacht which left San Pedro on July 4 as one of the contestants in the yacht race between San Pedro and Honolulu. The presentation of the cup was an event in the general festivities incident to an effort to promote larger commerce between San Pedro and Honolulu.

Detroit.

J. H. Garlick and R. L. Weyhing are away on short vacations.

Preparations are now being made for the Buyers' Excursion in August.

Wm. A. Walker, Kalkaska, sustained a loss of about $1,000 in the fire which recently destroyed most of the business portion of that city.

M. E. Rowley, salesman for the E. H. Pudrith Co., has returned to the city after a wedding trip to the east, including a stop at Niagara Falls. He was married to Miss Sadie Brooks, June 24.

E. H. Pudrith displayed an agility that surprised his friends when he was locked up in a room at the Tuller, preparatory to the Ku-Ku initiation. He calmly clambered down the fire escape and laughed at the crowd.

G. W. French, Ionia, who recently purchased the stock of John Hellerich at 39 Michigan Ave., has decided to sell off the goods at auction sale, beginning this week. The stock, which was inventoried at $9,440, sold for $4,065, the lease going for $505 more.

David W. Davis, who conducted the "Jewelry Box" on Michigan Ave., has gone out of business, after selling his stock and fixtures. He was formerly in the jewelry business in Grand Rapids, coming here later as a pawnbroker and then going into the retail business.

Warrants have been sworn out at Ann Arbor against George J. Haller, Jr., son of one of the best known jewelers of that city, and himself a former jeweler. He is accused by the Empire State Surety Co., of Chicago, and the General Assurance Co., of Detroit, of having $300 of their money which has not been accounted for

Indianapolis.

Frank L. Bryant has returned from Sullivan, where he spent a few days with friends.

Daniel A. Hickman has decided that he can master a motor cycle, and he bought one last week.

A postponed meeting of the Indianapolis Retail Jewelers' Association was held Monday evening. The subject of early closing was discussed.

Charles Mayer has been appointed a member of the committees on shipping and local mercantile interests by the Indianapolis Board of Trade.

William Baity, West Lebanon; J. E. Schrorer, Lebanon; W. E. Inman, Bloomfield, and J. W. Thompson, Danville, were in the city, last week, buying stock.

Julius C. Walk & Son, Fredk. M. Herron and Fletcher M. Noe have joined the movement to close downtown stores at 5 P. M. each day until September. Others are expected to join in the movement.

The Indianapolis Merchants' Association, to which many jewelers belong, has asked both political parties not to have demonstrations on Saturday night during the Summer, as they interfere with business.

Charles Mayer will accompany Murat Temple to St. Paul, Minn., this week, to attend the Imperial Council of the Ancient Accepted Order of Nobles of the Mystic Shrine. He will be one of the leaders of the Nomad band.

Mason Massie Johnson, a watchmaker employed by Julius C. Walk & Son, was married at Winchester, Ky., July 6, to Miss Mae Reamy Shirley, of that city. After a short wedding trip they will be at home to their friends in Indianapolis.

The Baldwin, Miller Co. has leased space adjoining their present quarters in the State Life building, and by Aug. 1 will have completed alterations, making one of the largest wholesale jewelry establishments in the State. The increased space will give them 10 front windows and seven side windows.

Without letting any of his office force know of it, W. J. Hoffman, of Hoffman & Lauer, went to Charleston, Ill., Sunday, July 5, where he was married to Miss Helen Highland. The ceremony was performed at the home of the bride in the presence of a few friends and relatives. Following the ceremony, Mr. and Mrs. Hoffman came to Indianapolis, where they will make their home. A large circle of friends is extending congratulations.

S. G. Twambley & Son, who is now settled in attractively furnished quarters at 162 Maine St., Biddeford, Me., on July 7 celebrated his 80th birthday. Mr. Twambley, despite his advanced years, is still an active worker at the bench, and has been engaged in business in Biddeford since 1862.

Milwaukee.

S. Martin, jewelers' auctioneer of this city, has been attending the convention of the Elks' Grand Lodge, at Dallas, Tex.

Gustave Keller, Appleton, Wis., who was re-elected president of the Wisconsin Retail Jewelers' Association, is a member of the Board of Regents of the University of Wisconsin. Mr. Keller is a member of the Common Council of his home city, Appleton.

A flag pole on the building occupied by Archie Tegtmeyer, jeweler at 392 National Ave., was struck by lightning several days ago, and was demolished. The building caught fire, but the heavy rain extinguished the blaze before the arrival of the fire department.

The Fass clock ordinance was passed July 6 by a vote of 16 to 12. Ald. Fred C. Fass asked that his measure be taken from the committee on finance and acted upon immediately so that sidewalk clocks can be put up legally. Ald. Oscar Altpeter, chairman of the committee, said that the proposed sign ordinance contained a provision covering clocks and that it was proposed to handle the entire question in the one measure. Ald. Fass declared the sign ordinance would never pass, but that the clock ordinance ought to pass.

The Court Commissioner of Milwaukee, Lucian R. Worden, has signed a temporary injunction restraining Max Krieger, 498 Mitchell St., Milwaukee, from carrying on his business in such a way as to interfere with the business of another jeweler, Herman S. Miller, 486 Mitchell St. Miller also asks damages to the amount of $1,000 from Krieger, on the claim that the latter, taking advantage of Miller's business reputation, opened a store nearby, decorated the front in such a manner as to imitate the Miller store, and then tried to carry out the illusion when customers called. A permanent injunction is asked by Miller and the matter will be taken to the Circuit Court.

Toledo.

S. Maisel, 1203 Dorr St., is making some improvements in his store-room.

A number of Toledo jewelers have started their annual July clearance sales, and several announce a liberal buying for holiday purposes, something which may mean the institution of a custom which to date has not been tried to any extent in this city.

Julius J. Vernier, who for many years has conducted a jewelry store at 603 Adams St., has greatly increased the scope of his business, and will hereafter occupy the entire first floor room, instead of half the size as heretofore. Mr. Vernier has installed new furniture, and now has one of the best fitted stores in the city.

J. J. Freeman & Co. are arranging for the annual outing of their employes, an entire day being devoted to the event, which consists of field sports, outdoor amusements and a banquet. Mr. Freeman started in business near his present location 37 years ago, and some years since enlarged by admitting to partnership some of his employes who had been with him for a number of years.

Toledo opticians are being worked by a clever rogue who has invented a new scheme to raise a little ready money. His system of operating, as tried on the Gray Optical Co., is to place an order for a pair of glasses and then to negotiate a small loan on the strength of the order. It is needless to say that after securing the money he immediately disappears and fails to either claim the glasses or to repay the loan.

Pacific Northwest.

E. T. Murphy has opened a repair shop at Haines, Ore.

A "Rose Show" was recently given in the jewelry store of Tinker Bros., Anacortes, Wash., and was most successful.

E. J. Carr, formerly a manufacturing jeweler of Portland, Ore., has received from the county commissioners an appointment as clerk of the County Board of Relief.

H. Leffert, Portland, Ore., secretary of the Oregon Retail Jewelers' Association, is publishing a souvenir booklet of the doings of the recent convention held in Portland.

J. Jaskulek, formerly a well known jeweler of Roseburg, Ore., but who for the past two years has been leading a retired life at Spokane, died at the latter place recently.

R. L. Wells recently obtained a judgment in a Portland, Ore., court against the Great Northern Railway Co. for $390.45 for the loss of a trunk containing jewelers' tools, which was destroyed in a railroad wreck in Dakota. Mr. Wells came to Portland from Chicago and on his arrival learned of the destruction of his trunk.

Harry Wilbur, until June 15 a jeweler with a store in Seattle, Wash., is sought by the local police. Telegrams authorizing his arrest have been sent out. Leaving a safe filled with cheap jewelry, Wilbur departed and articles of jewelry left in the store to be cleaned or repaired are missing. Several watches have been found in the local pawnshops and these have been returned to their owners.

Columbus, O.

Frank F. Bonnet, of the Frank F. Bonnet Co., is spending a vacation at Columbus Beach, Indian River, Mich. His wife accompanies him.

D. L. Auld, of the D. L. Auld Co., will be one of the incorporators of a company to be called the Photo Crafts Co., which has rented quarters at 25 N. 4th St. Mr. Auld is to be president, and F. H. Auld the general manager.

The following jewelry stores have agreed to a Friday afternoon half holiday during the months of July and August: Albaugh & Pickering, Andrew Morden, Frank M. Deinlein, Frank B. Ross, Harrington Co., Frank F. Bonnet Co., Hofman Jewelry Co., Bancroft Bros. Co., L. W. Lewis and Goodman Bros.

Clarence H. Hanna, aged 55, vice-president of the White-Haines Optical Co., died Thursday evening at 10.30 o'clock, of acute tuberculosis, from which he had been suffering since January. A trip to California failed to benefit him. He was also vice-president of the Hanna Paint Co. and vice-president of the Columbus Varnish Co. He was a brother of Mrs. J. B. White, whose husband is president of the White-Haines Concern.

Omaha.

E. Paul Shaw, with Samuel W. Lindsay, is on his vacation.

J. L. Jacobson has just remodeled his offices and has added new machinery to the factory.

Fred Nelson, with Albert Edholm, and family, have returned from a trip to Lincoln, Nebr.

W. M. De Camp, with Henry Copley, has returned from a visit to his parents in Shenandoah, Ia.

Albert Edholm gave a beautiful silver prize cup to the Omaha Gun & Rod Club, for its sailing races.

Frank B. Harris, Lincoln, Nebr., accompanied by his family, stopped off in Omaha, while en route to Europe.

John Henrickson, of Gustafson & Henrickson, has gone to the lakes of Minnesota for a two weeks' fishing trip.

Harry Holmes, with Fred Brodegaard, has returned to work, having been absent for two weeks on account of illness.

H. A. Potts, formerly with Samuel W. Lindsay, has gone to Red Oak, Ia., where he has accepted a position with E. L. McIlvain.

T. L. Combs, accompanied by his wife, leave shortly for a trip to New York and Boston. They will visit Duluth, taking the lake trip to Buffalo.

Mrs. A. B. Peilstecker has given an order to C. B. Brown Co., to make a fancy belt out of a large snake that she killed and dried several weeks ago.

Geo. F. Heidet, representing C. F. Rumpp & Sons, and Ed. D. Cahn, with Henry Froehlich & Co., were in the city calling on the jewelers, last week.

C. B. Brown and wife left last week for a trip to New York and other eastern cities, going first to Duluth, thence by boat to Buffalo, by rail to Albany, and down the Hudson River to New York.

Geo. W. Ryan, of Mawhinney & Ryan, and wife have gone east, taking the lake trip to Montreal and down the St. Lawrence. They will visit New York and Boston before returning home, being absent two months.

J. C. Huteson, of the Huteson Optical Co., and Henry Copley, jeweler, with their families, will leave July 15 for a trip to Canada and Puget Sound. They will be absent from the city about six weeks, four of which will be spent cruising on Mr. Huteson's yacht, the *Optic*.

A man, nicely dressed and representing himself to be a cattleman from the west, entered the store of Albert Edholm, one day last week, and selected a diamond ring. He gave a check in payment. Mr. Edholm refused to take it, and asked the man to give references, which he could not do, knowing no one in the city whom Mr. Edholm knew. Mr. Edholm then offered to send the check and diamond ring through the bank for collection, but the man refused. As a last resort, the jeweler telegraphed to the town where the bank was located and found that the check was worthless and the drawer not known there. Mr. Edholm is congratulating himself on keeping the ring.

G. T. Sewall, Iola, Kans., has removed to Morro, Cal.

St. Louis.

H. L. Leffler and his wife and daughter, Gainesville, Tex., were in St. Louis last week.

George R. Stumpf and his mother have gone to Niagara Falls, N. Y., to spend a few weeks.

The Gill building, which was built by Wm. A. Gill, at Broadway and St. Charles St., is now ready for occupancy.

Among the other out-of-town visitors in the last week were: M. Ziegel, Kimmswick, Mo.; Mr. Butler, Oxford, Miss., and Otto Weller, Flat River, Mo.

Adolph Umbrecht has returned to his old position as city drummer for the Bauman-Massa Jewelry Co., after having been away five months for his health.

J. K. Venoble, formerly with the A. J. Jordan Cutlery Co., will make the northern and western tour this year for the Maschmeyer-Richards Silver Co. Mr. Venoble left, Tuesday, to be gone three months.

Leo Bauman, junior member of the firm of the Bauman-Massa Jewelry Co., who was married several weeks ago, has returned from his honeymoon trip to Atlantic City with his bride. S. H. Bauman, president of the firm, is spending his vacation with his family at Lake Harbor, Mich.

Goodman King, of the Mermod, Jaccard & King Jewelry Co., Broadway and Locust St., will leave soon for Europe with J. J. Menges, manager of the jewelry and silverware department, and R. Niehaus, head of the china, marble, bronze and bric-à-brac departments, to purchase additional supplies.

Louis G. Kurtzeborn, of A. Kurtzeborn & Sons, left, Sunday morning, with the 300 Mystic Shriners for the annual Imperial Council in St. Paul. Mr. Kurtzeborn is one of Moolah Temple's famous "Arab Patrol," which expects to carry off the drill prize this year as it did last year at Los Angeles. Among the other jewelers in St. Louis who are members of the Mystic Shriners and who will make the trip to St. Paul for a week's stay are Herman Mauch, Otto Kortkamp and Martin Hacker.

The store of Ralph Geist, 1707 Market St., was robbed in daylight Wednesday of jewelry valued at $500, a check for $75 and currency to the amount of $170, following numerous anonymous letters to the proprietor threatening to blow up the store. Geist left his store at 9 o'clock for a few moments, with the outer door to the safe open and the inner closed. When he came back he could see that an intruder had been at work. The missing gems are three diamonds, a gold ring set with pearls and two packages of diamond chips.

The St. Louis police department has no clue to the whereabouts of $35,000 in gems thought to have been lost last week in St. Louis or on the way to Chicago by S. C. Powell, of S. C. Powell & Co., New York. For a time they worked on the theory that he had been robbed, and that the robbers were an organized Chicago gang who have recently been operating in New Orleans and Cairo. A negro and negress were arrested on their arrival in the city Monday, and were held to account for $2,000 worth of gems found in their possession.

Thieves were chased away from the jewelry store of Louis Leon, 802 Franklin Ave., early last Wednesday morning, after they had broken open the front show window. The damage to the window was $50. A policeman heard the crash and pursued the men. Leon's store is only a block away from the store of Adolphe S. Levi, at 617 Franklin Ave., which was robbed some time between the prior Saturday afternoon and Monday morning of jewelry valued at $15,000 and $900 in currency. Detectives were put at work on this case after the police department had reported it to be the work of expert jewelry crooks. Detective Joyce, after conferring with Jacob Weis, a safe expert, declared that the combination had been knocked off and the tumblers removed after the door of the safe was open. Entrance to the place is supposed to have been effected through a window and door. Levi was out in the country from Saturday until Monday. The burglar or burglars took plenty of time to the work, as was shown by the marks about the shop.

Minneapolis and St. Paul.

E. McAyeal, Morris, Minn., recently visited the cities on his way to La Crosse, Wis.

A. E. Hall, of the Holmes & Edwards Co., has been at Eden Valley, Minn., on a fishing trip.

O. E. Ostrem, optician, has opened for business on S. 7th St., between First and Second Aves., Minneapolis. He has added watch repairing.

Mrs. Morris E. Samelson, the wife of a St. Paul jeweler at 192 E. 7th St., was rescued from drowning in Clearwater Lake, near Waconia, Minn., Friday, by Bell Kelly, who discovered the woman in the water and in a perilous position.

John D. Bodfors, 304 Nicollet Ave., Minneapolis, will enlarge his store for the third time Sept. 1, when he will occupy the entire ground floor store room, which he shared heretofore with another merchant. The store is well located in the center of the retail district of the city.

The meeting of the Minnesota Retail Jewelers' Association brought to the two cities a large number of retail merchants during the past week, among them being Mr. and Mrs. Nels S. Nelson, Hutchinson, Minn.; C. A. Sherdahl and son, Montevideo, Minn.; Mr. and Mrs. Carl A. Brown, Appleton, Minn.; A. M. Harper, Renville, Minn.; Mr. and Mrs. G. R. Simons, Langford, S. Dak.; Mr. and Mrs. W. G. Gould, Glencoe, Minn.; Mr. and Mrs. M. E. Crockett, Bird Island, Minn.; Mr. and Mrs. Hugo O. Schleuder, Springfield, Minn.; Carl Anderson, Willmar, Minn.; Mr. and Mrs. Wm. Plackner, Benson, Minn.; Mr. and Mrs. A. L. Mealey, Delano, Minn.; Mr. and Mrs. Paul T. Hunziker, Jordan, Minn.; Mr. and Mrs. J. H. Eggers, Jr., Plainview, Minn.; Frank B. Logan, Royalton, Minn.; C. W. Logan, Herman, Minn.; Mr. and Mrs. Fred Green, Buffalo, Minn.; Mr. and Mrs. M. C. Weyer, Faribault, Minn.; Mr. and Mrs. E. C. Gross, Litchfield, Minn.; Elwin More, Blue Earth, Minn.; J. L. Williams, Zumbrota, Minn.; Olaf Rygh and daughter, Glenwood Minn.; J. M. Chalmers, Lake City, Minn.; E. B. Woodward, Bismarck, N. Dak.; Andrew Thompson, Spring Valley, Minn.; J. C. Marx, Shakopee, Minn.; I. M. Radabaugh, Hastings, Minn.; George H. Lang, Mankato, Minn.; H. C. Smith, Miles City, Mont.

Kansas City

Mr. and Mrs. E. E. Branch are visiting in Topeka, Kans.

Myrtle Wheatley and Eugene Mills, with the Porter & Weiger Jewelry Co., are away on vacations.

Leslie White and W. E. Crellin, representing Ward & Crellin, started, this week, for their Fall trips into their respective fields.

Amos Plank, the oldest jeweler in Hutchinson, Kans., passed through the city early in the week on his way to Iowa on a pleasure trip.

A. R. Kane and wife, Baxter Springs, Kans., passed through the city early last week on their way to Mr. Kane's old home at Albion, N. Y.

H. A. Maxwell has been added to the traveling force of the C. B. Norton Jewelry Co. His territory will include Arkansas, Louisiana and Mississippi.

B. H. Beattie and wife, Woodward, Okla., stopped in this city a day or two on their way to New York, Canada and the east on a trip combining business and pleasure.

Henry Linn, formerly of Rupp & Linn, Atchison, Kans., stopped over in the city recently on his way to California on a pleasure trip. He was accompanied by his wife.

Kionka & Kionka, dealers in diamonds and precious stones, authorize the statement that their business will hereafter be under the management of R. L. Warner. The old name will be continued.

The mother of R. R. Smithers, a jeweler of Cameron, Mo., died Monday, July 6, at the South Side Hospital, in this city, after undergoing a surgical operation. The remains were taken to Cameron for burial.

A. C. Hahn has moved into his new store at 410 E. 12th St., two doors east of his old location. The building, on which he has secured a long lease, was thoroughly remodeled and a new front was built. New fixtures were installed.

E. J. Krieke, of the Hassig & Krieke Jewelry Co., has sold his interest in the business to his partner, L. R. Hassig. The name will probably be changed to the Hassig Jewelry Co. Mr. Hassig says the office and shop will be remodeled with a view to enlarging and extending the business.

The following retailers from Kansas City territory were in town this week: C. B. Libby, Weir City, Kans.; Mrs. A. House, Belton, Mo.; D. E. De Lanty, Parkville, Mo.; J. H. Whiteside, Liberty, Mo.; Chas. Hildinger, Inman, Kans.; F. W. Grover, Porum, Okla.; C. J. Keil, Clinton, Mo.; W. Edmonds, North Topeka, Kans.; E. Stone, Blue Rapids, Kans.

In an unconfirmed report last week it was stated that Henry Lemoine, the swindler who claimed that he could manufacture diamonds, and who skipped from Paris June 17 when called to answer the charge by Sir Julius Wernher, had been arrested in Constance, Switzerland. Another report stated that he was arrested at Kustengei, a seaport on the Black Sea.

Philadelphia

J. I. Gorfine, 109 N. 13th St., has been confined to his home ill nearly two weeks.

John Oberholtzer, with J. B. Bechtel & Co., will return this week from a vacation trip to Niagara Falls.

Abe. Sickles, of M. Sickles & Sons, has gone to Atlantic City with his family for the remainder of the Summer.

Walter Sheppard, 520 N. 10th St., and Mrs. Sheppard are passing July at the old Sheppard homestead in Pottstown, Pa.

Charles Muth, 17th St. and Columbia Ave., spent the Fourth of July holidays with his family at New Brunswick, N. J.

J. C. Vaiden, watchmaker, formerly of Richmond, Va., opened, last week, a small retail jewelry store at 427 E. Girard Ave.

The sympathy of the trade has been extended to Roland Oliver, Burlington, N. J., on account of the grave illness of his wife.

John Earnest, formerly watchmaker for S. J. Lyons, 2258 N. Front St., has opened a place as watchmaker for the trade at 623 Sansom St.

Wm. Waples, with C. H. O'Bryon, 735 Sansom St., was shot in the hand, July 4, and was compelled to go to St. Mary's Hospital for treatment.

Donald Smedley, now with M. A. Leese, a Washington, D. C., optician, is visiting his father, John Smedley, at the latter's home in Collingswood, N. J.

The bulk window of the jewelry store of Charles B. Lynch, 16th and Market Sts., was broken by thieves on the 10th inst. and jewelry valued at $30 stolen.

James W. Barry, manufacturing jeweler, 727 Sansom St., spent a few days last week at Atlantic City as the guest of his daughter, Mrs. J. Washington Logue.

George Hales, optician, 11th St. below Walnut St., has abandoned his branch store, 2836 Germantown Ave., and will concentrate his business at the 11th St. store.

C. P. Meyer, 929 Passayunk Ave., has notified his friends in the trade here of his safe arrival in Germany. Mr. Meyer will remain abroad on a pleasure trip until September.

George Price, 726 Sansom St., watchmaker for the trade, had a dozen friends as his guests upon the occasion of a birthday anniversary, Wednesday, at Brady's Corner, Pa.

F. B. Wallen, 405 Broadway, Camden, N. J., has returned from a pleasure trip to Wildwood, and proposes to leave this week with his family for a month's stay in New York State.

H. E. Cain, of the Dennison Mfg. Co., with his family, is spending vacation days touring through the White Mountains, Thousand Islands, Canadian resorts and Nova Scotia.

E. Allez, Millville, N. J., is making extensive alterations to his store with an idea of making it one of the most attractive stores in the village. New show cases and counters are being installed.

George Spoerhase, son of Louis Spoerhase, 4078 Lancaster Ave., with his wife, was a victim of a trolley car collision at 11th and Market Sts., last week, but escaped with a few bruises and lacerations.

Fred Broomhall, watchmaker and Burgess of Conshohocken, Pa., was the Good Samaritan, July 4, when he treated a boy mangled by a premature fireworks explosion and then drove him several miles to a doctor.

A. F. J. Dorn, 834 Market St., Camden, N. J., has returned from an extended yachting trip along the New Jersey coast, visiting all the important seashore resorts. Mr. Dorn was accompanied by Mrs. Dorn and their children.

The final meeting of the creditors of Frederick Street, a bankrupt retail jeweler of Kensington Ave., will be held Tuesday, July 21, at the office of Alfred Driver, referee, 505 Chestnut St. The trustee reports no assets for distribution.

Donald M. Rogers has taken title from Daniel Riggs to the property at 310 Market St., for a consideration named in the deed as nominal. The property is a store building long occupied by Riggs & Bro., jewelers. The lot has a frontage on Market St. of 13.2½ feet, with a depth of 81.10 feet.

John Johnson, the old-time Southwark jeweler, but now living in practical retirement at Darby, Pa., had a reunion of his family at his home over July 4. When it is known that Mr. Johnson is the father of a score of children it will be appreciated that the reunion was of more than ordinary interest.

The trade of this city learned with regret last week of the death of John Miller, at Lancaster, Pa., and hastened to extend its sympathy to the bereaved sons of the deceased and to S. Kurtz Zook, a son-in-law of Mr. Miller. J. T. Miller, of the traveling force of L. P. White, wholesaler, 9th and Chestnut Sts., is a son of the deceased, as is also W. J. Miller, the Chicago representative of the Seth Thomas Watch Co.

E. J. Crane, a colored retail jeweler at 1527 South St., was attacked and beaten in his store last week by Costello Domingo, another colored man, aged 32 years, of 11th and Locust Sts. While counting some money Domingo, who was acquainted with Crane, rushed into the store and beat him with a club. Crane's cries attracted a policeman. Domingo rushed out, but was overtaken and arrested. On him were found three diamond rings. He has been held.

Visitors to this city's trade during the week included: R. C. Green, Jr., Pottsville, Pa.; Charles Berry, Washington, D. C.; W. L. Roberts, Wilmington, Del.; James H. Gordon, Allentown, Pa.; John MacPherson, Mauch Chunk, Pa.; D. H. Krause, North Wales, Pa.; Frank Kline, Spring City, Pa.; B. C. Foster, Bristol, Pa.; A. E. Baylies, Bristol; H. MacFarlan, Downingtown, Pa.; E. K. Bean, Lansdale, Pa.; Henry Bolte, Atlantic City, N. J.; E. Allez, Millville, N. J.

Further litigation over the Simon Muhr estate, once head of the famous house of H. Muhr's Sons, is threatened by the action of the trustees, Judge Sulzberger and Wm. B. Hackenburg, asking the Orphans' Court to issue a citation on Miss Fannie Muhr, another of the trustees, to show cause why she should not give her consent to the sale of a valuable plot of ground at the northwest corner of Broad and Poplar Sts., in one of which properties Miss Muhr resides. The trustees had arranged to sell the properties to the Knights of Columbus for $85,000, but Miss Muhr objects.

Pittsburg.

George Dunbar will go on the road, July 20, for the George B. Barrett Co.

Abraham Lewis was confined to his bed for four days last week.

J. F. Murphy, Donora, and Roy W. Kuhn, of Scottdale, were in Pittsburg last week on business.

Sam F. Sipe and Mrs. Sipe left Pittsburg Sunday night for New York, whence they sail to-day for Europe.

Elmer Vey, a son of Benjamin Vey, who was seriously injured by falling from a Butler traction car, continues to improve.

A number of retail stores closed Saturday at 1 P. M., which is a custom some of them have followed for a number of years.

Harry Heeren, of Heeren Bros. & Co., leaves next week on his vacation, which he expects to spend in a fishing camp.

George White, of West, White & Christy, last week entertained some friends who stopped over here on their way from Chicago to New York in an automobile.

Joseph Kaufman, with S. Davis & Co., who was a brother-in-law of Abraham Lewis, the Fifth Ave. jeweler, died a few days ago of inflammation of the bowels. He is survived by his mother and he was her only support.

J. C. Grogan & Co. are making a display of the cups which will be awarded to the employes of the Carnegie Steel Co. at the annual field meet of that concern to be celebrated in a few days. There are 27 in number, nearly all of which are of the same pattern and design.

Steele F. Roberts, of E. P. Roberts & Sons, and Mrs. Roberts, are contemplating a trip to Europe in a few weeks. Mr. Roberts' daughter is at present abroad and Mr. and Mrs. Roberts expect to meet her and bring her home after spending a week in London and a week in Paris.

In speaking of the execution issued against him July 3 in favor of Fybush Bros., S. F. Mohr explained last week that this was an account disputed by him and that after being sued he appealed the case. Owing to the negligence of his attorney, he says, the affidavits of defense were not filed in time and the execution was issued on this technicality. The execution was satisfied.

C. S. Wylie, secretary of the Pennsylvania Retail Jewelers' Association, reports that the executive committee continues to hold weekly meetings here to arrange for the annual convention in Philadelphia next month. A number of Pittsburg jewelers who do not belong to the association are arranging their business affairs to be in Philadelphia at that time to take in the proceedings.

The diamonds shipped from Pittsburg to Columbus, O., by Sam F. Sipe, which figured in the bold express robbery committed near Pittsburg a few weeks ago, as related at the time in THE CIRCULAR-WEEKLY, have not yet been recovered from the Adams Express Co., although the company's officials several days ago sent Mr. Sipe word that they had the diamonds in their possession. The stones are supposed to have been picked up near the place where the bandits left the train, after they had bound and gagged the express messenger.

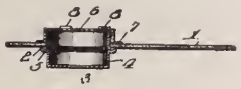
PATENT DEPARTMENT

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUED JULY 7, 1908.

892,642. WATCH CASE. JOHN M. BIGGS, Glasgow, Ky. Filed Dec. 7, 1906. Serial No. 346,727.

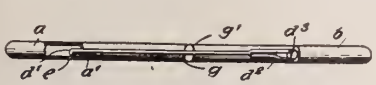


A watch case lid or section having in its outer face a circular recess and provided around said recess with a series of seven subdivisions each having a series of numerals in arithmetical progression of seven with the initial numerals of the seven series in numerical order, said numerals being produced by enamel in and flush with the outer face of the case section or lid, a disk fitting and

turning within the recess in the case and having on its outer face at its edge a series of seven subdivisions arranged to register with the sub-divisions on the case section or lid and having in said subdivisions of the disk the names of the days of the week, and a fastening device having a pin projecting through the disk and secured to the lid or case section and forming a pivot for the disk and a cap or head at the outer end of the pin and overlying the disk.

892,879. MAILING DEVICE. HENRY M. O'REILLY, Corning, N. Y. Filed March 29, 1907. Serial No. 365,376.

A mailing device comprising a card having an opening therein, a receptacle positioned in the opening, and radial clamps disposed around the



periphery of the receptacle and bearing upon the opposite sides of the card around the wall of the opening to fasten said receptacle to the card.

REISSUE.

12,824. BRACELET. STEPHEN B. KENT, East Orange, N. J. Filed Nov. 5, 1907. Serial No. 400,894. Original No. 804,137, dated Nov. 7, 1905, Serial No. 264,133.

A bracelet comprising two hollow sections hinged together, a plug secured within and projecting from the free end of one of said sections and providing a seat for the open end of the other section, said plug carrying a guard and a latch, the former en-

tering the opposing section and bridging the space between the ends of said sections when separated, and a stop within said opposing section co-operating with the end of said guard to prevent complete withdrawal thereof and with said latch to lock said section in their closed condition.

Now It's The Lord Elgin

The demand to-day is for thin watches.

The public have been waiting for a thin Elgin Watch—now it's here—the

LORD ELGIN

the thinnest watch made in America with enamel dial.

Like all Elgin Watches—it was not put on the market until worthy to carry with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory and timed in the case—the most accurate thin watch in America.

Four grades—7, 15, 17, and 17 Jewels adjusted. 18K and 14K solid gold cases, also 25 year filled cases.

Furnished with metal dials, plain or engraved, gilt or silver.

Prices furnished on application by your jobber, or write the Company for only authorized price list.

The Thinnest Watch Made in America with Enamel Dial

Factories, Elgin, Ill., U. S. A. New York Office, 15 Maiden Lane
General Offices, 131 Wabash Ave., Chicago

THE HOROLOGICAL REVIEW

The Scientific Adjustment of Watches

By Prof. E. James of the School of Horology and Mechanics at Geneva, Switzerland

HISTORICAL.

QUESTION.—Were the first watches made with a balance spring?

ANSWER.—The first watches were regulated without a balance spring. The verge escapement could be regulated without a balance spring, but the variations of such watches were considerable. Later a pin was placed in the rim of the balance (Fig. 1). This pin caused the bending of a straight spring at each vibration, which

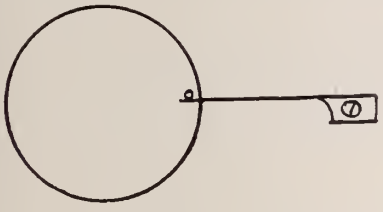

FIG. 1.

spring was at first represented by a hog's bristle.

It was Huyghens, who, in the year 1674, invented the spiral spring. A spiral spring had at first only a turn and a half, and its form was first made by the tweezers (see Fig. 2). This spiral spring, though crudely made, improved the timekeeping of watches considerably.

QUESTION.—Name the different kinds of balance springs in use at present.

ANSWER.—The flat spiral, the Breguet

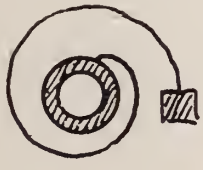

FIG. 2.

spiral, the cylindrical spiral and sometimes the spherical spiral.

DIMENSIONS OF BALANCE SPRINGS.

QUESTION.—What dimensions must the spiral springs have?

ANSWER.—The Breguet spiral spring and the flat spiral have for a diameter the semi-diameter of the balance. The cylindrical must have for a diameter the third of the diameter of the balance and should contain as many coils as possible.

When the balance springs are made larger than stated, and over their proper weight, it will put them out of shape while vibrating, and when they are made smaller their blades will work too much.

QUESTION.—How can spiral springs be tested if they have the proper shape?

ANSWER.—Regardless of all the care which the manufacturer of balance springs

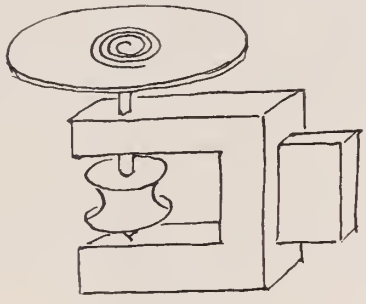

FIG. 3.

employs, it will sometimes happen that these springs will be oval. In such a case their adjustment is impossible. In order to be convinced that a spiral is of a proper

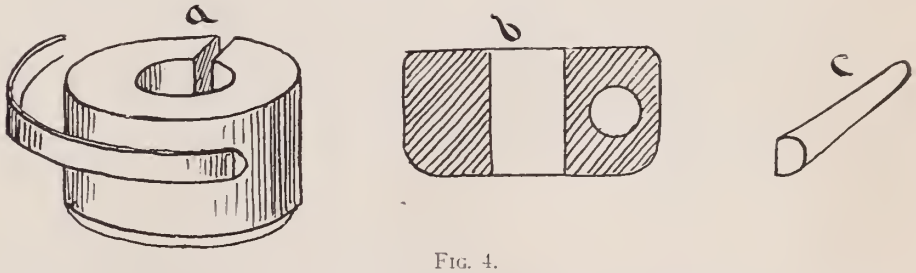

FIG. 4.

form, the spiral is placed on the platform of a tool represented in Fig. 3, which platform is caused to revolve by a bow. In this manner it is seen immediately if the spiral is defective.

QUESTION.—What is the proper way in which to select a correct spiral for any given balance?

ANSWER.—The center of a spiral is attached to the upper part of the staff of the balance and the balance is suspended by holding the spiral by its outer coil. In this way, the spiral forms a cone, the height of which ought to be equal to the diameter of the spiral. Then it is attached to the collet and the vibrations must be counted. Several means are employed for this operation.

(1) You may seize the outer coil of the spiral in the tweezers and cause the balance,

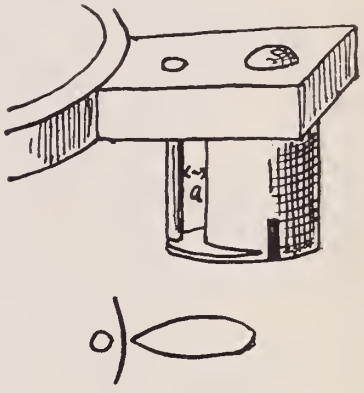

FIG. 5.

so suspended, to vibrate on the surface of the enameled dial. For 18,000 vibrations, five double vibrations are counted for each finger, twice for the hands, which should be performed in 20 seconds, because five double vibrations for each finger make 50 vibrations, repeated twice, equal to 100 vibrations in 20 seconds, or 300 vibrations per minute at 18,000 per hour.

(2) In another operation the use of a regulating tool may be employed, which tool consists of a balance perfectly timed and enclosed in a glass-covered box, on the surface of which the balance to be timed with the balance staff and the spiral is placed in a vibrating position. Here the outer coil of the spiral is attached to a stationary fix-

WALTHAM WATCHES

COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

RIVERSIDE; NICKEL;

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

ROYAL; NICKEL;

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

NO. 1425; NICKEL;

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

NO. 1420; NICKEL;

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint).

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

Movements manufactured and guaranteed by

WALTHAM WATCH COMPANY,

WALTHAM, MASS.

ture. By an external motion, both balances are set vibrating and the spiral on the balance to be timed has its length modified, until both balances vibrate together. In this manner the point is reached, which should be attached to the stud if there is no regulator, but if there is such an attachment, the point to be reached is the position of the regulator pins.

POSITION OF THE SPIRAL ON THE COLLET.

QUESTION.—How is a spiral placed on the collet?

ANSWER.—All spirals are fastened on the center of a collet, which cannot maintain the spiral perfectly centered and flat. The spiral must be placed in such a manner

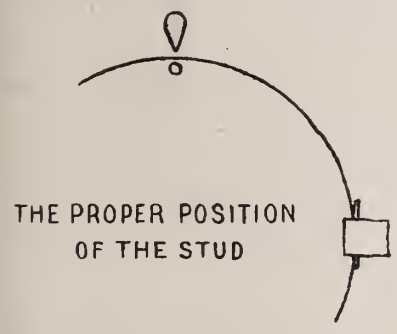

FIG. 6.

that the first coil is opposite the incision, which serves to keep the collet friction tight. For the purpose of holding the spiral firmly to the collet, in order that it may not be thrown out of shape, it must be fastened, by means of a pin, which has one side filed flat. See Fig. 4, where a is collet, b, incision of the collet, and c, pin filed flat on one side.

ISOCHRONISM.

QUESTION.—What is isochronism?

ANSWER.—Isochronism is the property which causes vibrations of different extent to be performed in the same time. When the mainspring is nearly run down, the vi-

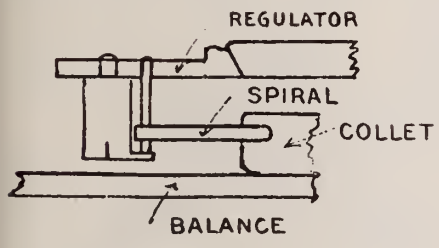

FIG. 7.

brations of the balance are of smaller extent than when the mainspring is totally wound. In both cases the vibrations must be performed in the same time and the vibrations are then isochronous.

THE FLAT HAIRSPRING.

QUESTION.—Is it possible to obtain isochronism with a flat spiral spring.

ANSWER.—The flat spiral spring has this property, which was discovered by Pierre Leroy, in the year 1766. This scientific watchmaker explains this property as follows: "In every spiral spring of sufficient extent there exists a certain length, by means of which the long and short oscillations are isochronous. This length is difficult to find, for which reason the flat spiral spring is not used for accurate timepieces."

QUESTION.—How is the regulator for watches constructed?

ANSWER.—The regulator, as shown in Fig. 5, contains a pin and a key, leaving a space as marked a. The external coil of the spiral is placed between the pin and the key of the regulator.

QUESTION.—How much freedom is necessary for the balance spring between the pin and the key of the regulator?

ANSWER.—The room between pin and key of the regulator must be equal to three times the thickness of the blade of a coil and the balance spring must be kept exactly in the middle of this space when it lies at rest. (See Fig. 6.)

QUESTION.—Which precaution is it necessary to make when making a key for the regulator?

ANSWER.—Before making such a key the corresponding pin should be made, of such length in relation to the balance arms that the combined length of pin and key leave the necessary freedom for the balance arms required. The projection of the key should overlap the pin, as shown in Fig. 7, without touching the balance spring, because if the latter were touched, the regulating of a timepiece would be impossible.

QUESTION.—What should be done, if the

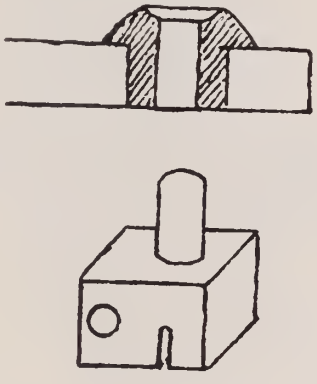

FIG. 8.

regulator did not suffice, to correct the gaining or losing of a watch?

ANSWER.—When a watch gains or loses time and the regulator is not of sufficient extent to correct either error, the balance spring has to be lengthened or shortened. Care must be taken after either of such operations that the spring stud is replaced to the movement in correct relation to the escapement by turning the collet.

QUESTION.—How is the outer extremity of the balance spring attached?

ANSWER.—The outer extremity of the balance spring is attached to the stud for the purpose of adjusting the position of the stud to the balance cock. A point is placed thereon as an exact mark, as shown in Fig. 8. The stud should be turned in such a manner that when drawing a circle, passing between the pin and the key of the regulator, such circle should pass through the line of the hole in the center of the stud, leaving very little metal before the edge of the hole in the stud, as shown in Fig. 6, and also that the second coil of the spring cannot touch the stud when expanding during its course of action.

QUESTION.—Can isochronism be obtained in the use of Breguet balance spring?

ANSWER.—In the use of a Breguet balance spring, isochronism may be obtained when such a spring is fitted with a theoretical end curve.

QUESTION.—Can isochronism be obtained with a cylindrical balance spring?

ANSWER.—The cylindrical balance spring is the best for theoretical terminal curves

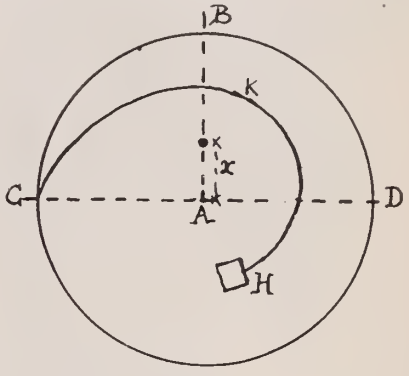

FIG. 9.

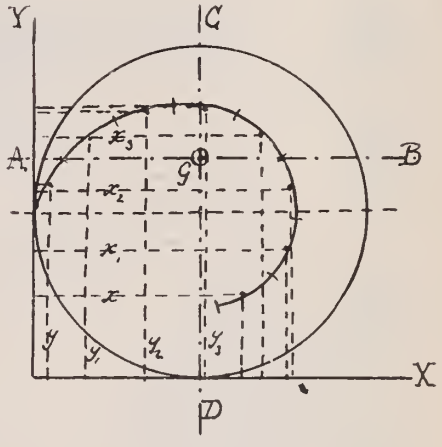
on both its extremities which impart to it its isochronous property.

QUESTION.—What is meant by terminal theoretical curves?

ANSWER.—There are curves the theory of which has been established by Philippe, an engineer of mines, and published in a scientific treatise in 1861. The following are the conditions which these curves should satisfy:

The center of gravity must meet to the right AB, a line located perpendicularly on CD, at a distance $x = \frac{R^2}{L}$, Fig. 9. R is the radius of the balance spring; L is the



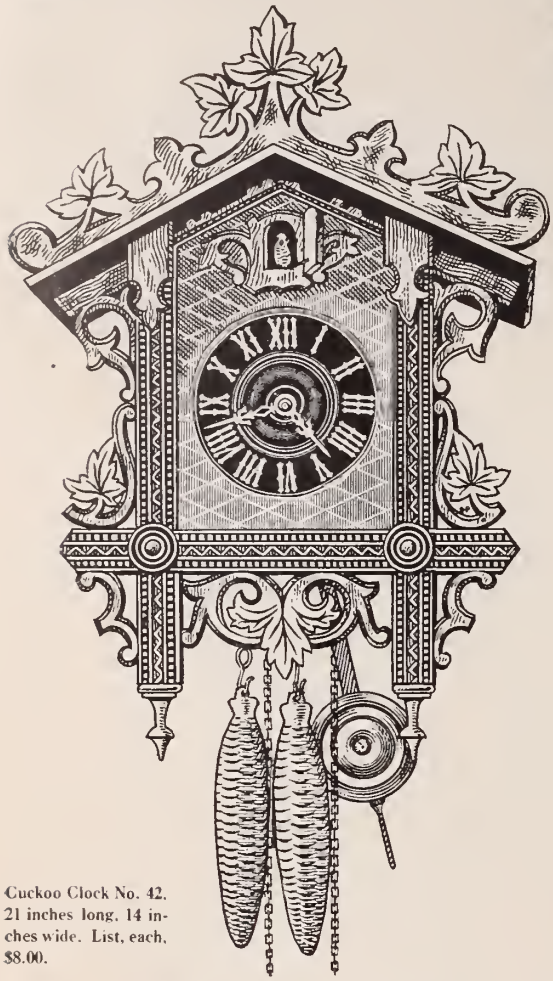


FIG. 10.

length of the terminal curve. It is measured to the stud, when there is no regulator, and to the pins of the regulator, when there is a regulator.

QUESTION.—How is a theoretical terminal curve traced?

ANSWER.—You trace a circumference with a radius 100 millimeters, in which you

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane **New York City**

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

Absolute Security

Patented U. S. June 9, 1908.
Patents Pending in Foreign Countries.

UTILITY

It can be raised so as to read the time, and reversed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

Will not pull or wear off

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

Watch worn as Chatelaine, showing it lifted to read the time.

Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pinned to garment as additional security.

trace an approximate radius, having a determined length. For example, For half of the outside of the spiral, you calculate the position of the center of gravity and mark it on the figure projected. You execute the curve in thick, brass wire, then repeat it before the design in two different positions, each time tracing the vertical positions. The intersection of these verticals gives the center of gravity. If this latter does not coincide with the center of gravity calculated, you modify the curve till you arrive at this result. You then draw the curve carefully with China ink and photograph the same the size wanted.

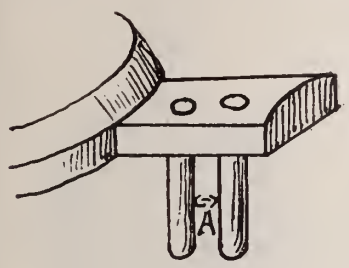

Fig. 11.

Question.—How can I verify, by the calculation, the correctness of a theoretical curve obtained by the above drawing?

Answer.—You trace two axes of co-ordinate tangents to the circumference of 100 millimeters (See Fig. 10). You divide the curve into equal parts and you can easily determine the center of gravity. You determine the distances X, X^1, X^2, X^3, etc., and Y, Y^1, Y^2, Y^3, etc., of each center of gravity between the two axes of the co-ordinate. The means of these distances gives two lines A-B and C-D, of which the intersection is the center of gravity G.

THE PRACTICAL FORMING OF TERMINAL CURVES.

Question.—How can I reproduce one of these photographed curves on the balance spring of a watch?

Answer.—To reproduce practically a terminal curve, it is sufficient to lay the balance spring over the photograph and copy the spiral with the help of a pair of tweezers. If the spiral does not coincide exactly with this copy, you interpose a piece of glass of proper thickness until you obtain an exact copy.

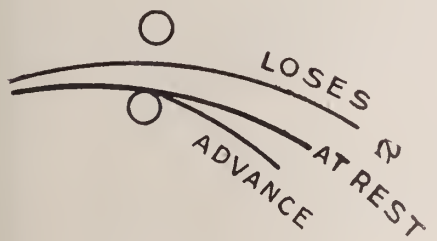

Fig 12.

Question.—Where must I begin to bend the curve?

Answer.—The curve is copied in taking for length a half circle of a spiral and an operator must take half a spiral back of the point from which he counts the coils in his spiral spring.

Question.—How can I find the curve which must be used in every case?

Answer.—The curves form a proportionate radius for that of the radius of balance spring.

Question.—How can I find the number of parts which I must use for a balance spring of a radius of 4.8, of which the pins of the regulator are placed at a radius of 3.12?

Answer.—The rule of determining such a proportion gives us:

$$\frac{4.8}{3.12} = \frac{100}{x}, \text{ of which } x = \frac{100 \times 3.12}{4.8} = 65.$$

Question.—Where should I place the regulator pins to be able to use a curve No. 55 with a radius of the spiral of 5.2?

Answer.—

$$\frac{100}{55} = \frac{5.2}{x}, \text{ of which } x = \frac{55 \times 5.2}{100} = 2.86$$

The regulator pin will have to be placed at a radius of 2.86.

Question.—Is it proper to allow the pins of the regulator to have a certain amount of play between them, or should they hold the blade of a Breguet or of a cylindrical spiral spring tightly?

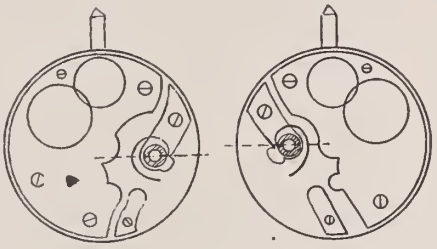

Fig. 13.

Answer.—The distance between the regulator pins must be equal to the thickness of the blade of the spiral spring, which must neither be bound tightly nor have any play between the regulator pins. (See Fig. 11.)

Question.—What variation can be produced by any freedom between the pins and a tension against one of them?

Answer.—When the balance spring has any play between the pins, the curve will become elongated, its center of gravity is no longer at its theoretic point; on the other hand, the balance spring will become shortened during its long vibrations, in consequence of which the watch will gain in flat position.

When the balance spring touches the pin, when the balance is at rest, its vibration will not be performed with regularity. In the first part of the oscillation it will produce a contact which will produce a gain, in the second part when the balance spring does not touch the pin any more, it will produce a loss. (See Fig. 12.)

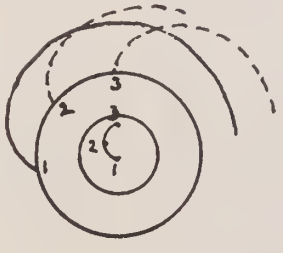

Fig. 14.

POSITION OF ADJUSTMENTS.

Question.—Where should I place the point of attachment to the collet?

Answer.—When the watch is in a hanging position it has a tendency to lose. This loss is caused by friction. You must therefore attach the balance spring in a manner to cause a gain. This point is found in the following manner: The watch, being in a hanging position, the side of the movement before you, the point of attachment must be found perpendicularly to the stem passing through the center of the cock to the left for a balance spring coiled up to the right, and to the right for a balance spring coiled to the left. (See Fig. 13.)

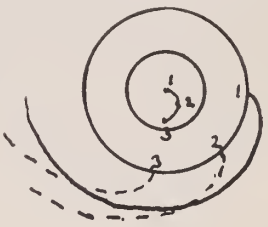

Fig. 15.

Question.—How may I determine the effect produced on the different positions of the point of attachment?

Answer.—When the point of attachment is to the left and the balance turns to the right, the center of gravity of the plane part of the balance spring rises, which diminishes the extent of vibration and produces a gain. (See Fig. 14.)

When the point of attachment is at the right and when the balance turns to the left, the center of gravity descends, the extent of vibration increases and produces a loss. (See Fig. 15.)

When the point of attachment is below the center of gravity, the descent is followed by an ascent, and the losing about neutralizes the gain. The gain is slightly greater than the loss because the center of gravity increases its distance from the center, consequently the length of the lever becomes greater. (See Fig. 16.)

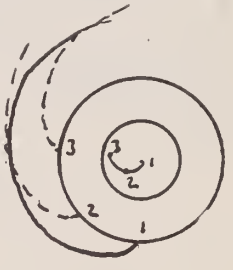

Fig. 16.

Question.—Can I form a theoretical curve at the center of the collet?

Answer.—You can make a theoretical curve at its center and in this case it is not necessary to take the position of the collet into consideration.

(To be continued.)

William Lynn, a retailer of Preston, Ia., and Miss Anna Blanche Grote, daughter of Mr. and Mrs. John Grote, of Clinton, were married recently.

Profit

Is what you are in business for—"Ball Watches" assure you several varieties.

1—A fair cash return.

2—Satisfied customers—most desirable "profit."

3—No preliminary repairing of movement—No fitting to case—No long regulation. Thus, saving your time is "profit."

4—No "price cutting" competitors.

SETH THOMAS CLOCK COMPANY

ESTABLISHED 1813

Automatic 8-Day Long-Alarm Clocks

PATENT APPLIED FOR

The modern up-to-date Alarm Idea the public has been demanding for years.

It requires winding but once a week. Movement is so constructed **that clock does not need any attention each night like all other long-ringing alarms. AUTOMATICALLY IT ALARMS EACH MORNING, ringing until owner arises and stops it by pushing switch.** No further attention is required throughout the week. Alarm switch can be locked should you not want clock to ring Sunday or any special day.

Cases

These three patterns represent a new departure in shapes and quality of cases for alarm clocks, being ornamental as well as useful for alarm purposes.

Movement

A superior 8-day pendulum movement, fitted with an ingenious 24-hour alarm dial so that clock can be set for A. M. or P. M., as desired.

VIGIL

Metal case of artistic design and workmanship.
Height, 12½ in.; Dial, 4½ in.

Fine Bronze Finish.

Time-Alarm, list $8.50
Strike and Alarm, list..... 10.50

Rich Gold Finish.

Burnished and lacquered.
Time-Alarm, list $10.50
Strike and Alarm, list..... 12.50

ADVANCE

Black adamantine finish, green marbleized top and base mouldings, the best imitation of marble ever produced. Guaranteed not to crack, chip or peel. Gold plated trimmings.

Height, 11 in.; Dial, 4½ in.

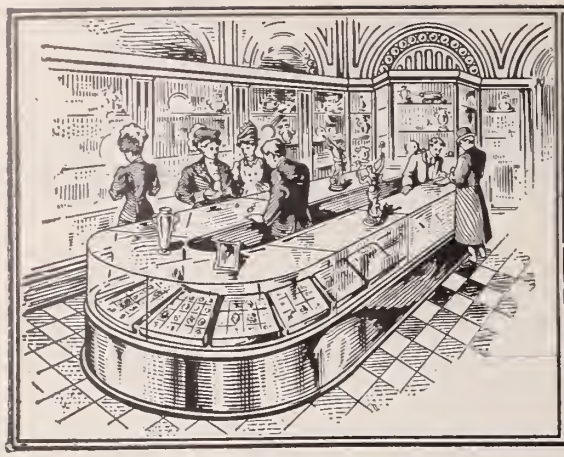
Time-Alarm, list.....$6.50
Strike and Alarm, list..... 8.50

Dealers should place their orders early for this complete assortment as these Clocks will have a large sale and pay a good profit. Electrotypes will be mailed free to any Jeweler desiring them.

PROGRESS

Quartered Oak and Mahogany.
Highly finished and polished.
Height, 12½ in.; Dial, 4½ in.

Time-Alarm, list..... $6.50
Strike and Alarm, list..... 8.50



These clocks represent a combination of the modern AUTOMATIC 8-day long-alarm idea with fine mantel cases, the assortment of patterns and finishes is such that a selection can be made which would be suitable for almost any room. ¶ Please note that these cases can be had with two kinds of movements, *i. e.*, Time-Alarm, also Strike and Alarm, striking the hours on a Cathedral gong and the half hours on a Cup Bell.

The Alarm in Time-Alarm Clock will ring 50 minutes, and in Strike and Alarm Clocks for 25 minutes unless shut off.

Send to your jobber, or to us for special circulars for distribution to the public. If your jobber cannot serve you, please order direct.

51 MAIDEN LANE NEW YORK **SETH THOMAS CLOCK COMPANY** 70 WABASH AVE. CHICAGO

Makers of Superior timepieces of all kinds, sizes and prices, from a Ladies' 0 size Watch to 40-foot dial Tower Clock, largest in the World.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Getting in Touch with the Details of Your Business

Written Expressly for The Jewelers' Circular-Weekly by Xeno W. Putnam

NO business man is wholly master of his own house who is not in close personal touch with all of its departments, and there is no more certain way of accomplishing this than to occasionally divest himself of his proprietary character and assume the responsibilities and sorrows of his various employes.

Let him be his own bookkeeper for a season, even though he has entire confidence in the man who does the work regularly. A close acquaintance with the details of his own ledgers will be almost certain to develop various surprises to him and may be the means of cutting many an unwise item of expense from the current year's showing that had full sway during the year just past.

Let him be his own advertising manager long enough to find out whether the publicity ideas in force for the promotion of his business are in harmony with his own. If they are not, it is time for him to find out whether he or his advertising man is the most modern, and then to bring the laggard, whoever it may be, up to the more progressive standard.

Many good advertising men would be better advertisers if brought more closely into touch with the establishment they represent, and many store owners would be better business managers for being brought more directly into contact with the public they are trying to cater to. So, whoever should prove to be the teacher, there is ample chance for the learning of a lesson from which the business will be the gainer. It is quite an easy matter for a business man to get his eyes so closely riveted upon the routine phases of his business that he forgets the public entirely, and it is possible for the advertising man to become so conscious of the limelight, in which he is standing, before the people that he forgets about the business.

Let the business man be his own clerk a little while—at least long enough to find out about the ragged places that his clerks are called upon to travel over heedlessly. He will thus find out more about his troubles with employes, if he has them, than from books in many generations. He will find out why this line of goods moves slowly; why that particular article looks tarnished after a very brief existence in the storeroom, in spite of closest care; why something else fails to show up its beauty because of poor light or untoward shelving. He will find that some of his lines require a great amount of persuasion on the salesman's part to render them salable; that no amount of argument will avail with other articles. Possibly he may learn to wonder, as his clerks have long been wondering, why the proprietor of the place does not use a little better judgment in his selection and arrangement of goods.

It might even pay him to be his own office boy a little while, at least long enough to gain some just appreciation of that individual's trials, temptations and services. He may then have a better understanding why that worn-out hinge refuses to relinquish its exasperating squeak, in spite of all the oiling it is treated with. He may even learn to put the blame for undelivered messages less confidently upon the boy until he can become more certain that the words in which he framed them for delivery ever got beyond the limits of his intentions.

Then he could very profitably be his own customer occasionally, approaching his house of business with the cold, disinterested eye of the most casual stranger; determine whether there is anything about the place which justifies his interest or whether he might not better seek his purchase from some other establishment down street, where the windows are better trimmed or the clerks look neater.

Let him honestly try to be as unfeeling in his criticism as though his personal interest in the place were absolutely wanting, then pass inside and study whether the treatment received there was of the nature he would expect to get from his competitor. He should find out whether his customers are left to hunt around for the article they want and then made to feel like a clam in a refrigerator or whether they are assailed by the enthusiasm of a cheap second-hand dealer. It may help him in finding out why so many of his customers do not come back a second time.

Then, after he has been a part of his establishment from all its vantage points he should again assume the reins of government, prepared to strengthen what is weak, to co-operate a little more cordially with what is strong; to promote, to criticise and to correct with his own hands the errors in himself, his employes or his house that he has seen with his own eyes.

Business Integrity.

"YOU can't be too truthful in making representations about your business," says the high-class business man nowadays. A great many merchants may recognize such a sentiment as simple and straightforward, yet the practical dealer at once recognizes the practical value of simplicity and straightforwardness as the qualities that inspire confidence. The merchant striving to build up a large business has many problems to face. Honesty of intention should be carried into practice by every employe.

Misrepresentation by clerks is a source of injury against which every retail merchant must be on guard. Especially is this so when employes are promoted on the basis of their sales report or in many instances where they are paid a percentage on their sales. You may be scrupulously honest yourself and may make right any misrepresentation brought to your notice, yet there is something else to be considered.

It frequently happens that the most valued patrons of a store do not have time to make a complaint; they simply avoid your store the next time they have purchases to make, because they have lost confidence in you. The question of store policy and the burden of keeping the confidence of the customers necessarily rests on the merchant himself.

There is a certain store on State St. where one frequently hears it said: "I don't know much about these goods myself, but I bought it at So and So's, so I know it is all right." Such an expression of confidence cannot be estimated in money value. The most successful store nowadays has the letter of credit on its very face. The margins of profit can never be so narrow nor competition so fierce and bitter but that business integrity will be consistent with business success.

In localities where men and women spend a large part of their time in a struggle to cheapen wares, even below their cost, buyers are apt to scruple at falsehood to gain their point.

Even scrupulous honesty in itself is not enough to inspire absolute confidence. The retailer must take into consideration the effect of his habitual speech and actions from a customer's standpoint and must avoid even

Storekeeping Department.

the suggestion of deceit in his ads. Even bargain trifles have great weight in this matter of inspiring confidence. The merchant who tells a customer that a certain fabric is "all wool" when it is fairly meshed with threads of cotton belongs in the same category as the man who misrepresents the age of his child in order to avoid paying car fare.

It is even easier to "wreck" a railroad, "salt" a gold mine, "water" the stock of a corporation or "ground" overworked employes to earn a dividend on fictitious values and thereby become a millionaire than it is to build up a large retail business in a country town when the merchant has a conflicting opinion as to just what "honesty" is. The most successful retailers aver that business integrity is consistent with the highest success. It is possible for blind luck to stumble on good fortune, but only real merit can truly deserve it.

The want of integrity in business has inflated the stocks of large corporations and has given birth to much trouble through the greed of stockholders demanding a dividend on such inflated stock. Certain methods in business have done much to work changes not dreamed of in the humdrum wagon-road days of our fathers.

A certain merchant prince began his business life on a very small space with a limited capital. His business grew to phenomenal proportions and his annual income amounted to millions of dollars. The fortune is now scattered and the colossal trade has disappeared, although he has been dead but a few years. This downfall and unenviable reputation was partly due to the half-hearted confidence on the part of this store's patrons.

"You can't be too truthful in making representations about your business," says a merchant prince of to-day. More and more merchants want intelligent, loyal, happy, progressive employes. In a large store it is necessary that the merchant trust a large number of salespeople. Each salesperson is in a position of more or less trust. So it is with the customer. A merchant's good name, reputation, countenance of friends and endorsers; his feeling of strength in himself—all go when he proves faithless to that trust.—*General Merchants' Review.*

A New Aluminun Alloy.

A NEW aluminum alloy has been patented by Walter Gosman, of the steel works of Friedrich Krupp, of Essen-on-the-Ruhr, Germany. This alloy is composed of the following:

Aluminum	87 per cent.
Copper	8 per cent.
Tin	5 per cent.

It is claimed that the alloy casts better than the aluminum and zinc mixtures, machines well, is homogeneous and has a relatively high rigidity.—*The Brass World.*

It is reported that the Orton Jewelry Co., Muskogee, Okla., is conducting an auction sale for the benefit of creditors. They have offered 50 cents on the dollar.

The Attractively Furnished Store of O. T. Fenton, Hightstown, N. J.

THE retail jewelry establishment of O. T. Fenton, Hightstown, N. J., is illustrated below. The present quarters have been occupied since December, 1906. The store is 51 feet deep and 17 feet wide. The ceiling is of metal and is embellished with conventional designs.

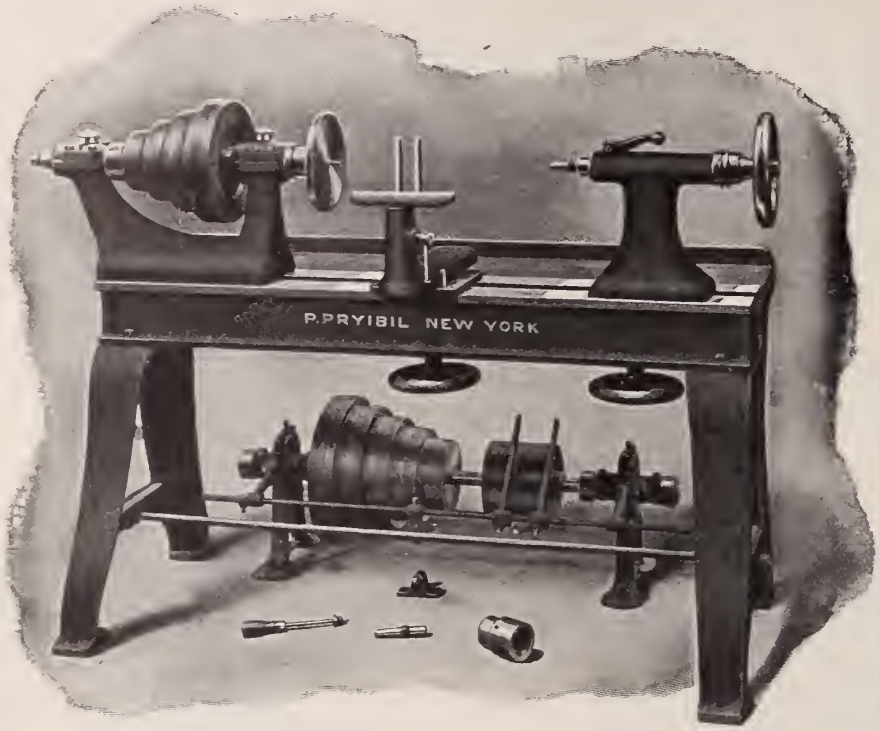
The show window is four feet deep, nine feet wide and nine feet high. The floor is of maple. The wall cases and show cases are made of antique oak. All the display cases are equipped with electric lights for the more effective display of the stock.

INTERIOR VIEW OF THE STORE OF O. T. FENTON, HIGHTSTOWN, N. J.

The Unusual in Advertising.

DURING a recent voyage to London the writer was one of about 300 saloon passengers, the sexes being pretty evenly divided, says a writer in *Fame*. For the first day or two the usual confusion reigned as to identities and individualities, but by the third day out two male passengers in particular began to loom ahead and be pronouncedly prominent among the rest of us. Everybody knew them and everybody liked them.

Why? Well, they were *unusual*. They were entirely different from the rest of us. They were brighter, wittier, better natured, better humored. They mixed freely among the sick and the well, cheering the former and chaffing the latter. They were here, there and everywhere, tireless in their efforts to amuse everybody. They did not seem to care what they did so long as they could put their fellow-passengers in good humor.



I said they were brighter and wittier than we. They really might not have been, but it seemed so—to all in their hearing. At any rate, they had the courage to assert themselves, and their courage, under the circumstances, was so unusual, so conspicuous among the great crowd that none could fail to notice it.

They *advertised themselves*—that's the correct way to put it—and they did it skilfully. Not for the sake of gaining anything, except, perhaps, the good will of their fellow-passengers, but the fact that they were so energetically different in their speech and manners made them favorably conspicuous and attracted general attention, respect and admiration.

And is it not the odd, the unusual, the pleasingly different in advertising, that makes it so successful, where the commonplace or the mediocre always fails? Nobody notices the ordinary man or woman, the ordinary article or the ordinary advertisement, when they happen to be in company with brighter or better or more unusual competitors. The eye and the attention are given—willingly or otherwise—to the pleasingly, attractive, the strikingly novel, the unusually interesting, which claims and centers our attention at once, to the utter exclusion of the ordinary and the commonplace.

And the keynote to success in modern advertising—whether it be in the newspapers or magazines, the street cars or wall posters, the circulars or the souvenir, is—"unusualness," if I may use the word. Keeping everlastingly in the beaten path, the worn-down ruts, is courting public neglect and aiming straight at failure. All the men of history who have become famous have done something unusual, something boldly and strikingly original, to earn their fame.

The best and greatest field for "unusualness" to-day is advertising—the best and greatest rewards are waiting therein for the men whose bold and pleasing originality can strike the great reading and buying public most forcibly. Advertising is the best market for the man of ideas, the fellow who can write "unusual" stuff, clothe old arguments in startlingly new dress, convince with old "saws" that have been reset and resharpened, or evolve new methods of display or of illustrating the text.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]

No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2174.—**Gilding Rings.**—*How can I gild a ring without the use of the battery or current?* *G. R.*

ANSWER:—Rings can be given a very good color without the electric current as follows: Immerse the ring in a solution of caustic potash, 180 parts; carbonate of potash, 20 parts; cyanide, nine parts; water, 1,000 parts, and 1½ parts of chloride of gold to be dissolved in water. Prepare the gold, first, by dissolving it in part of the water, then add all of the other substances and boil together. This boiling solution should give the ring a gold appearance with a few moments' immersion; then rinse off well in water and dry in sawdust. For dull gilding, scratch-brush the article well and color in aurine, alum and nitrate of potash. Boil in a strong lye in a crucible, rinse off in water and dry in sawdust.

QUESTION No. 2175.—**Gold Pickle.**—*How can I make a pickle for gold jewelry that will remove mercury and will act as a cleansing solution?* *G. P.*

ANSWER:—Prepare the following for cleaning and removing mercury from gold: Chloride of lime, 80 grms.; bicarbonate of soda, 80 grms.; common salt, 20 grms.; distilled water, three pints. Let the articles remain in this a short time. Keep the solution in a closed bottle. Then take out and wash with alcohol and dry in sawdust. Another good pickle for gold is a solution of cyanide, one-half ounce, and one pint of rain water. Dip the articles into this, rinse off and dry in sawdust; then brush with prepared chalk.

QUESTION No. 2176.—**Mending Alabaster and Marble.**—*I want something which I can use to mend alabaster and marble.* *M. A.*

ANSWER:—One of the simplest ways of mending alabaster is to mix together fine slaked chalk lime and the white of an egg. The parts to be mended should be well cleaned, the lime and white of egg prepared on a glass plate and applied to the parts with a knife. This cement is not good unless used at once; therefore do not prepare any more than one can use. There are several cements that are suitable for both alabaster and marble: (1) Pour together four parts each of vinegar and skimmed milk, and mix the curd with the whites of three eggs, well beaten, and sufficient powdered quicklime sifted in, while stirring, to form a paste. (2) Use equal parts of yellow beeswax resin and plaster of paris. The resin and wax should be melted and the plaster stirred in.

QUESTION No. 2177.—**To Apply Gold to Ivory.**—*We have some ivory ornaments on which we want to apply gold lettering. Kindly inform us how we can do this.* *T. & A.*

ANSWER:—Gold may be applied to ivory by tracing the letters with a fine camel's hair brush moistened with chloride of gold. Then hold the ivory over a bottle having a large opening, in which is placed diluted sulphuric acid and zinc. The hydrogen gas produced in the bottle will reduce the painted gold letters to metallic gold and will develop a good glitter.

QUESTION No. 2178.—**For Polishing Celluloid.**—*What kind of material is suitable for polishing celluloid combs?* *F. P.*

ANSWER:—Prepare a kind of putty of hot soap, free from resin, in which equal parts of flour of emery and fine pumice have been mixed. It is best to have a leather buff on a lathe; use in connection with above preparation.

QUESTION No. 2179.—**Tinned Steel Wire for Plated Ware.**—*We are manufacturing a silver-plated line that requires brass wire for some parts, such as bails for cake baskets, berry frames and pickle casters. We are using brass wire, but this is objectionable, as it requires a dip to enable the silver to take hold, and the amount of silver deposited on the white metal is not enough. Could we tin the brass wire over, or use some other wire for this purpose?* *T. S. & W.*

ANSWER:—Brass wire for the above purpose could be tinned and the surface would then be nearly the same material as the other parts, and could be plated readily. You could use a smooth steel wire, tinned heavily. This is being used by several well-known manufacturers of silver-plated ware, and it gives satisfactory results. This steel wire is stronger than brass, will hold its shape, and is easy to work into difficult shapes. The tinning is usually done at the wire mill, so that the trimmings can be readily soldered to it. Some of this tinned steel wire will stand burnishing after silver plating. In appearance there is no difference between brass and steel wire on the finished articles. The steel wire will cost about one-third as much as brass.

QUESTION No. 2180.—**Venting Casting Moulds.**—*How can I make an ornamental casting in a brass mould?* *V. C.*

ANSWER:—A brass mould should be oxidized with sulphuric acid and placed over a fire for a few moments. This will coat the mould so that the metal will run close to the walls. If there be deep recesses, which will show blow holes or will not run full, then it is necessary to vent the mould, so that the air can escape out of these pockets. The venting is done by drilling a small hole from the deep recess through the mould and then driving a brass wire, which has been flattened on one side, through the hole until even with the recess, so that it will not show in the castings.

QUESTION No. 2181.—**To Prevent Silver from Tarnishing.**—*How can I prevent silverware from tarnishing in the show cases, and jewelry from turning red in a safe?* *T. P. S.*

ANSWER:—Silverware in show cases may be prevented from tarnishing by making the cases nearly airtight. But no soft rubber should be used to exclude the air, as rubber will facilitate the tarnishing. The silver should be wiped off two or three times each week with a soft chamois, which would prevent the oxidizing from accumulating on the pieces. Gold jewelry will be affected if placed in a safe, on account of foul air, which may be avoided if a little gum camphor is placed in the safe. Camphor is also good if placed in a show case with silverware. It draws and absorbs some of the moisture from the air.

Jewelry in San Salvador.

THERE are only three jewelry stores in the city of San Salvador, says the *Metal Industry*. It is believed that the rich natives make their purchases in New York and Paris while traveling. The solid silver articles on sale consist chiefly of fruit spoons, cups, hand mirrors, napkin rings, toilet articles, etc., which are mostly bought from American manufacturers because of the fineness of design and workmanship. But the trade complains that a lighter article of the same grade would find a more ready sale. Plated ware comes from the United States and Germany in about the same proportions, the former being preferred on account of quality.

Watches come from America and Switzerland in about equal numbers, but clocks are almost all American. Gold-plated articles are from Austria, whose dealers offer a great variety of styles at less cost than those made by American houses.

Solid gold rings, scarf pins, breastpins and other solid settings come equally from the United States and Germany, each having certain advantages which make it advisable to keep both kinds in stock. Prices are about the same.

The finer grades of knives and forks are purchased in the United States because of their quality and finish, while in the ordinary and common grades the prices of German goods are lower than those offered by American houses.

Frits Hoefer, Aurora, Nebr., has incorporated his business as the F. Hoefer Jewelry Co.

Chief of Police George Ellis, of Houston, Tex., has brought back to Memphis, Tenn., the negro named Washington, alias "Love," who is believed to have stolen a tray of rings worth $4,000 from the store of Taylor Bros., of Houston. As noted, last week, the rings were described in THE CIRCULAR-WEEKLY and were recognized by a Memphis jeweler, who had read the description when Washington, or Love, tried to sell one to him.

Glass as a Decoration and the Early Decoration of Glass

THE manufacture of colored glass, which is the basis of the art of glass painting, originated at a very remote period, and the use of enamel to ornament its surface was practised by the Egyptians, says a special correspondent of the *Canadian Pottery and Glass Gazette*. The formation of windows of mosaics of colored glass was most probably suggested by the mosaic pictures with which churches were adorned from an early period for the instruction of the illiterate. I do not propose to pursue this most interesting and wide subject, and therefore pass on to other forms of early glass decoration, of which the finest example handed down to us is the famous Portland or Barberini vase.

The history of that vase is so full of interest—it reads more like romance than reality—that it may perhaps be given in full, with illustrations, at a future date. That vase is the earliest example known, as it is also still the finest specimen of what is now popularly known as cameo glass cutting. Cameo cutting was originally an Italian art. The artist selected a precious stone composed of different colored natural layers. He then cut a subject in relief in one or more of the upper layers, the under layer being left as the ground or base. Shells also were treated in this way, but, like precious stones, the cameo cutter made use of natural formations. But in the case of glass cameos the material itself has to be made. The Barberini vase was made of transparent blue metal upon which was superimposed a coating of opaque white. The outer coating was removed from that portion which was to constitute the ground, leaving the white for the figures, foliage or other ornamentations. These were then sculptured by means of the gem engraver's tools.

The Barberini vase was found in a sarcophagus about 1623, but there is no record to indicate when it was placed there and none to give a clue as to where it was made. It was always regarded as an incomparable work of art, but there was a mystery about it which could not be fathomed. It was not till the middle of the 19th century that it was demonstrated that the material was glass, fashioned in layers, and cut as a lapidary would cut a precious stone. Then the vase was reproduced and in glass. I am dealing now with the early decoration of glass, and it would be out of place to speak of modern decoration. I may say, however, that notwithstanding the exquisite modern incrustations rock-crystal productions, cameo cutting presents the finest example of the artistic decoration of glass.

Several other methods of decorating glass were adopted at a much later date. One was the use of coarse threads trailed over the surface of the piece to be ornamented, forming rather crude patterns. Another was the placing of colored enamels at irregular intervals over the surface. Colored, gilt and enameled decorations appear at various eras to have been practiced by the Romans, Greeks and Egyptians. The Chinese never excelled in the art of glass decoration as they did in that of pottery. There is, however, at Nara, in Japan, a glass vase supposed to be of Chinese manufacture, said to have been placed there in the eighth century. This is not authenticated by evidence. The Chinese ornamented glass in imitation of natural stone, but, as in the majority of other countries, cutting was the principal means of ornamentation.

The Venetians, who have since held quite a high position as decorators of glass, were not the earliest in the field. They made glass in 1090, but as to ornamenting it blue glass, enameled and gilt, does not seem to have been of earlier date than 1440. Many of the ornamental processes so much admired in Venetian glass to-day were in use in that century. Rods of various colors are joined by heat and so arranged that when cut transversely they form patterns. Lace glass is a variation of the same process. Rods or canes composed of opaque white threads and surrounded by transparent glass were placed side by side in a mould and a bubble of glass blown into the middle so as to adhere the canes. The whole was then reheated and fashioned into various forms as ordinary glass would be. The peculiar merits of Venetian productions were their thinness, lightness and brilliancy. The Venetian workmen, however, did not aim at classical or artistic forms. Really clever artists, as they were, they debased their art by making drinking vessels in such inappropriate forms as lions, ships, birds, whales, etc.

Glass-making in Britain is of very ancient date, according to some authorities of a date prior to the Roman conquest. The art of manufacturing glass beads and amulets was known to the Druids, but the first English glass houses were those of the Savoy and certain other friars in London, established about the middle of the 16th century; but for a long time no attempt was made to decorate glass as the Venetians did. In 1623 Sir Robert Mansel was granted a patent "for making glass with sea coal, pit coal or other fuel not timber or wood." He evidently did not make decorated glass, for in 1635—a full hundred years after the starting of the Savoy glass house—he was granted a monopoly for importing ornamental Venetian drinking glasses into England.

At the end of the 17th century the manufacture of glass was brought to considerable perfection, and from that time attention was given to the decoration of it. At the end of the 18th and beginning of the 19th centuries English flint glass was superior to that of any other country for its purity and brilliancy, and they set themselves to attain superiority in the ornamental branches. They were adepts at cutting glass, and they addressed themselves to the art of incrustation. The ancients were acquainted with it, but their results were imperfect.

The Bohemian ornamental stems were perfect incrustations, but they were curious rather than useful or artistic. Toward the end of the 17th century the Bohemians had attempted to incrust small figures of a grayish clay in glass, but were not always successful. French manufacturers succeeded in incrusting small medallions of Bonaparte, but so many were broken under the operation of cutting that those that were finished were very expensive. An English manufacturer, Apsley Pellatt, then attempted to bring to perfection and to direct to useful application the crude inventions of other countries. In 1819 Mr. Pellatt took out a patent for ornamental incrustation, which he called "Crystallo Ceramie." This was a subject of considerable interest in the artistic and industrial circles at the time, though its merits, from an artistic point of view, would not be so appreciated to-day.

The art of glass decoration has made marvelous strides since then. With the beautiful, refined and artistic productions of Thomas Webb & Sons, the Baccarat Glass Co., C. Dorflinger & Sons, Tiffany, Foster & Co. and a host of others, we may smile at the estimation in which "Crystallo Ceramie" was held. But we must remember that was nearly 100 years ago. I have the specification granted to Apsley Pellatt for ornamenting glass now before me, and I submit it, not for comparison with glass decorators of to-day, but as an interesting example of early English glass decoration well worth preserving. In his formal specification Mr. Pellatt claims in the usual phraseology that by his improved process ornaments of any description, arms,

"How to Run an Auction"

cyphers, portraits and landscapes of any variety of color may be introduced into glass, so as to become perfectly imperishable. The substance of which they are made is less fusible than glass, incapable of generating air and at the same time susceptible of contraction or expansion, as, in the course of manufacture, the glass becomes hot or cold. The special composition may previously be formed into any device or figure by moulding or modelling, and may be painted with metallic colors, fixed by exposure to a melting heat. The ornaments are introduced into the body of the glass while hot, by which means the air is excluded, the composition being actually incorporated with the glass. In this way any description of glassware may be decorated with embossed white or colored arms or crests.

A Campaign to Promote Industrial Education.

THE campaign being waged by the National Society for the Promotion of Industrial Education is rapidly bringing the questions of industrial education to the fore. The Board of Education in New York City has recently decided to establish vocational schools for girls and boys from 14 to 16 years of age and also to extend the teaching of manual training in the seventh and eighth grades to many more schools than at present.

This action was taken at the suggestion of a committee that has been studying the subject of industrial education as part of the public school system. The committee consists of Frederic R. Coudert, chairman; John Greene, L. Katzenberg, Cornelius J. Sullivan, Hugo Kanzlar and Samuel Donnelly, who, in addition to being a member of the Board of Education, is secretary of the General Arbitration Board of the New York Building Trades, and on the Board of Managers of the National Society for the Promotion of Industrial Education.

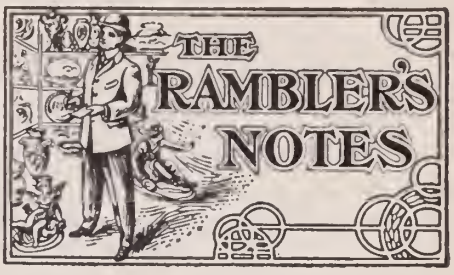
In a recent address before the last-named society, Mr. Donnelly said: "Our public schools have 'featured' literature and devoted too much attention to the literary development of the imaginative faculties. There has been too much one-sided presentation of our great men to the children of the public schools. Washington as the agriculturist and Jefferson as the architect and builder have been neglected. I contend that the prevalent methods in the elementary schools influence and unduly attract all children toward those occupations known as professional service. The superintendent of schools in the City of New York, Dr. William H. Maxwell, has extolled the merits of a 'system of schools which discovers and reveals genius born in low estate and enables it to fructify for the common good.' We ask for a system that not only reveals the genius of music, the genius of art, the genius of literature, the genius of statesmanship, but one that reveals the genius of mechanics and the genius of industry."

The vocational school for boys to be organized by the New York Board of Education will be opened in the autumn at Allen and Hester Sts., in the crowded lower east side of the city. The instruction will include woodworking, metal working and mechanical drawing and several hours a day will be devoted to scholastic subjects related to industrial topics. It is planned to locate the vocational school for girls in Brooklyn. The courses will consist of the domestic arts and sciences, including hand and machine work, dressmaking, millinery, cooking and possibly certain phases of design and the applied arts.

As an aid to any board of education wishing to establish elementary industrial schools, the National Society for the Promotion of Industrial Education has formed a committee of 10, under the chairmanship of Dr. Henry S. Pritchett, president of the Carnegie Foundation for the Advancement of Teaching. This committee will lay out plans for the development of these schools in connection with any public school system, indicate the subjects to be pursued and methods of articulating them with the chief industries of the town. It is not the intention to have these schools take the place of trade schools, but rather to lay a foundation that will enable a girl or boy to greatly shorten the apprenticeship period, which cannot begin until the age of 16. It is expected that this committee will equal in importance the famous committee of 10, of which President Eliot, of Harvard, was chairman, and which laid out the course for elementary schools which is now practically followed throughout the country.

Nankin Viceroy Plans a Commercial and Industrial Exhibition.

OUR Consul, J. C. McNally, sends the information that Viceroy Tuan Fang has under consideration the organization of a commercial and industrial exhibition at Nankin, the object of which is to demonstrate to the world the variety and value of China's productions. The Consul adds:



"Plans are now being formulated to perfect an organization to select the location and present plans for the numerous buildings. The opening of the Shanghai-Nankin Railway and the valuable river service will, it is thought, offer unusual facilities for passengers touching at Shanghai to witness at once the former capital of China, the viceregal city of the Liangkiang provinces, with its interesting features and the valuable products of China.

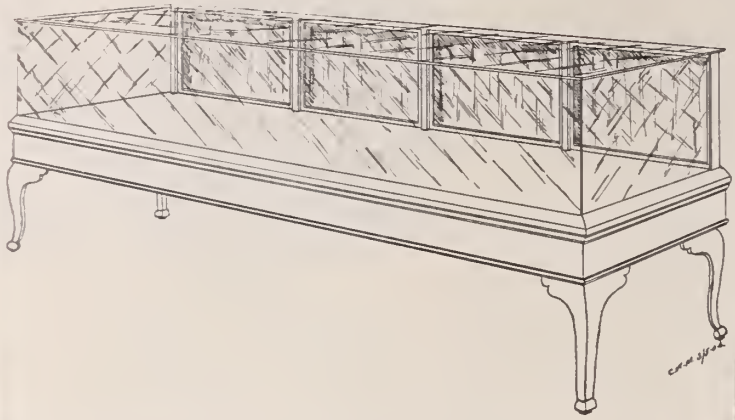
"In anticipation of this important event, the viceroy has purchased several hundred acres of land encircled by a splendid driveway on which he proposes to build a public park, zoological gardens and other interesting features."

Preparation for a National Affair at Puebla, Mexico.

ADVICES from Puebla state that for the Mexican National Exposition, to be held there in the Spring of 1910, the San Juan ranch has been ceded to the board of management. The work of fencing the grounds and other initial work has been started. Lic. Gomez Haro is secretary.

J. S. Rhoads, Streator, Ill., has gone to Red Wing, Minn., to take charge of the repair department of F. M. Schouivailer's store.

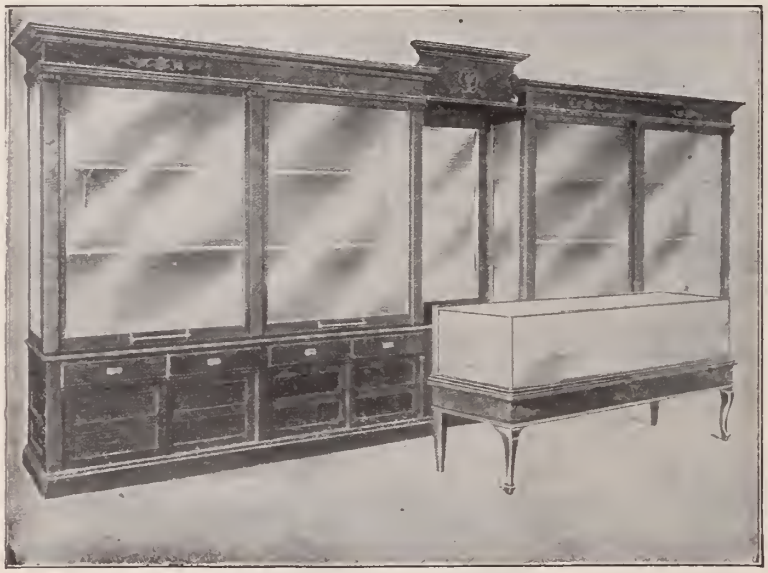
PLEASING EFFECTS IN BRITISH PORCELAIN.



AT his salesrooms, 43 W. 4th St., New York, Hugh C. Edmiston, American agent for the product of the Crown Staffordshire Porcelain Co., has on exhibition a most interesting display of articles. This concern, to meet the demand caused by the revival in public taste and appreciation of the really beautiful work which was in use in England during the early part of the 18th century, has produced pieces of porcelain which exhibit beauty and simplicity of shape and combine with this the decorative use of color in designs worked out in the spirit and with the knowledge that produced the earlier products, the principal features of which were perfection in drawing in a conventional and artistic manner objects of every-day life, flowers, buds, etc. The exact shades of the enamel colors used by the Chinese have only been obtained as the result of long and careful experiment. Vases are shown in powder blue decorative effects of extreme beauty. Plates, cups and saucers, jars, etc., included in the exhibit, show flower effects against the blue background, where typical scenes from Chinese life are also depicted in the decorations. The extreme difficulty of producing perfect specimens makes the wares attractive to people of taste.

*

CHINA FROM MANY COUNTRIES.



A COMPREHENSIVE line of French, Russian and Swedish china is now on exhibition at the salesrooms of J. H. Vernon, 43 W. 4th St., New York. Russian china dinner plates are shown with deep red borders on which are intricate pattern designs in gold effect. Russian service plates with sleighing scenes and other scenes typical of the Czar's empire are also shown. Swedish china in white and green appears in many styles, the decorative treatment including flower and vine effects. In French china a large display of a number of patterns and styles. Plates in blue and white effects are shown together with a comprehensive line of plates in acid gold decoration. Other plates have leavy floral decorations. THE RAMBLER.

C. S. Sherwood has incorporated his business at Portsmouth, Va., under the style of C. S. Sherwood, Inc., the new corporation beginning July 1 at the old location, 222 High St. The capital stock, which is fully paid in, amounts to $40,000. Mr. Sherwood, who is president of the corporation, obtained the charter for the purpose of affording employes an opportunity of participating in the business. The vice-president is W. E. Gayle; secretary, E. H. Hartsell, and treasurer, C. S. Sherwood, Jr.

SOLID gold jewelry at less than plated jewelry costs. I bought 5,000 pieces, including cameo scarf pins, brooches in real cameo and corals, veil pins, cuff pins, rings, etc., all at less than one-half the regular price, as I bought them in trade sales; prices from 45 cents to $1.38 in scarf pins, cuff pins, etc., large fine solid gold cameo belt pins and brooches, $3.37 to $5.00. Sent on memo. bill to well-rated dealers. Sold for cash only.

Look them over, return what is not wanted, enclose your check in box for goods kept, no other way. I have fine coral and amber necklaces, 38 cents a string; diamond rings, $3 up to $300.00 each; ½ carat fine white diamonds, perfect, $60 to $85 carat. A few imperfect, $45 carat. Be quick for these bargains.

Imported ladies' elastic belts, 25c. to 75c. each, less than half the cost of the duty to import them. Gold-filled chatelaine watches, inlaid in gold; fancy enamel watch and pin to match in handsome velvet case, $3.55 each.

A modern battleship costs from $3,000,000.00 to $5,000,000.00 but its life is limited.

FAHYS PERMANENT CASE costs a fractional part of one of these ships, and because it is so well made and the amount of gold used so liberal and scientifically distributed it will withstand "hard battering" for a lifetime.

When selecting a gold filled case, if you want the best, insist on **FAHYS PERMANENT CASE** which is guaranteed to wear permanently.

JOSEPH FAHYS & CO.

S. O. BIGNEY & CO.

MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

Office and Factory, Attleboro, Mass.

New York Office, 3 Maiden Lane

Flat Belcher ring as received with claws badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

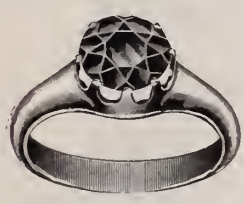
How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

When we tell you that we have received as many as 75 diamond rings in one day for new claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

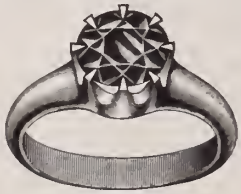
99 out of every 100 owners of diamond rings willingly pay $1.50 to $5 for new claws or settings on their rings, but would not buy new mountings for $5 to $25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that helps to make your business profitable.



WENDELL & COMPANY

The firm that did much to change the repair end of the Retail Jewelry Business from a source of worry and dissatisfaction to one of pleasure and profit.



103-105 William Street

STAR WATCH CASE CO.

LUDINGTON, MICHIGAN

COPYRIGHTED BY T. F. KENNEDY.

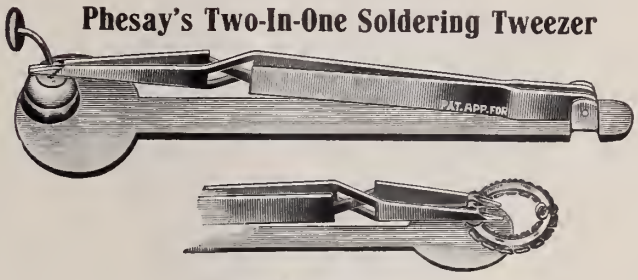
Pearl Setting Plier, No. 327

This tool should prove a useful addition to any jeweler's outfit. It is intended for setting half pearls or other stones of similar shape, which are imbedded in gold or other metal. It is used for cutting a burr and forcing it against the stone, either in brooches or rings, thereby holding the stone securely without liability of the tools slipping or breaking the stone, as is often the case with the use of other tools. The lower jaws are half round, to conform to the inner shape of rings. The work can be done more perfectly and under better control than with gravers or other tools used heretofore.

Made of best Swedish steel, nicely nickel-plated.

Price, each, $1.25

Randall Jewel Lamp

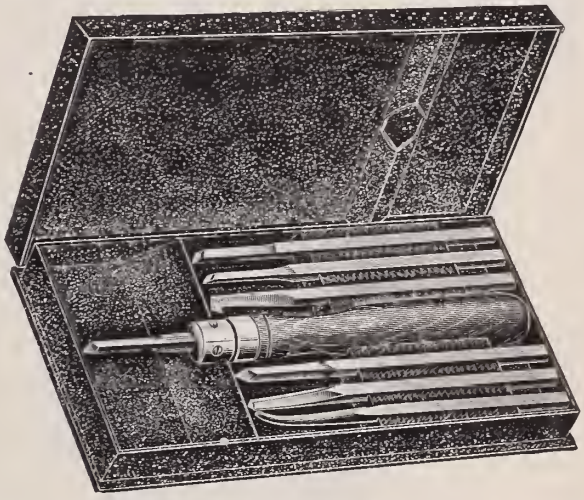


Cut is full size

Price, each, 50c.

Especially designed for work where very small flame is essential and very desirable when cementing roller and pallet jewels, for drawing temper of pivots and annealing small parts of watches. Made of brass full nickel plated. Has rubber washers inside of cap and under the hood to avoid leaking and evaporating.

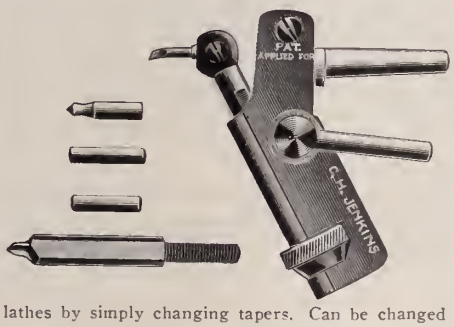
Phesay's Two-In-One Soldering Tweezer



Price, each, 75c.

By using Phesay's Two-in-One Soldering Tweezer the joint catch or Back is handled only once.

SAVES TROUBLE.—Phesay's Two-in-One, Soldering Tweezers will solder plumb and true. Will not let article slide when solder flows. Will hold pieces of jewelry with rounded stones or flat surfaces with equal firmness.



Guaranteed "E.F.B." Turning Gravers No. 33

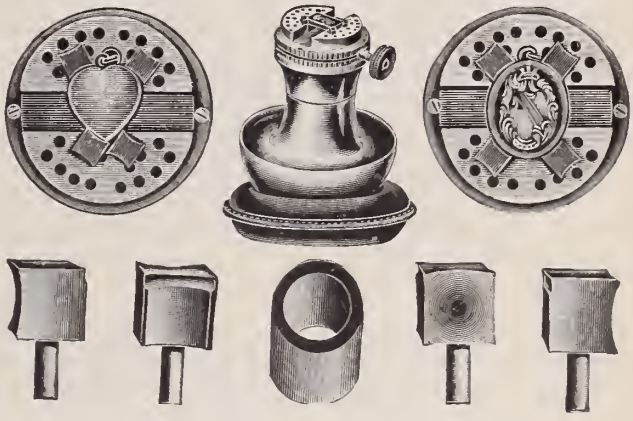
Price, per set of 7, in case, $3.00

The finest set of gravers on the market. Handle is of the finest cocobolo, fitted with nickel plated socket in which the gravers can be moved in or out as desired. The two set screws hold the graver rigid and prevent rocking or chattering. They will be appreciated by all users of fine tools.

Improved Turning and Jeweling Attachment No. 33

New Features

Adjustment for alignment, fine feed, with direct connected screw. Positive binder operated by slight movement of the thumb or finger. Cutters may be changed quickly. No small projecting parts to become lost or broken. Special cutters can be made from wire.



And Other Good Points

One tool may be used on different makes of lathes by simply changing tapers. Can be changed quickly.

All Standard Tapers in Stock

Each attachment is furnished with two cutters, one burnisher and two blanks. In ordering, please give name and size of lathe. **Price, each, $4.50**

"Ideal" Pins for Engraving Blocks

Per set of 4 with 4 pure rubber tubes, 50c.

The faces are milled to various shapes to take regular and irregularly formed articles. The few illustrations show their possibilities. Four pure rubber rings are furnished to slip over the pins when very delicate and highly polished articles are to be clamped. Made for all Standard Engraving Blocks. Please state name of Block when ordering.

EXHIBITION BULLETIN

16th Year WEDNESDAY, JULY 22, 1908 Vol. VI. No. 9

We have inaugurated a new movement in the manufacture of Diamond Jewelry by producing a large and varied line of medium priced Rings, Brooches, La Vallieres, Pendants and Earrings. This is not for the purpose of creating a new demand, but simply to satisfy an existing one. We present remarkable opportunities in this line—values that in every way merit the wide attention which they have already received. However, our best previous offering will be eclipsed by the coming one, with an unusually complete assortment. Those sceptics who doubt that distinctive styles can be obtained in a commercial grade of Diamond Jewelry will be convinced of their mistake when they visit our SIXTH ANNUAL EXHIBITION, which will take place in our offices from August 24th to 29th, inclusive. Here they will see the most complete line with up-to-date designs for those seeking the "bread and butter" articles.

Our Mr. Mayer has returned from his purchasing trip abroad. He has succeeded in procuring important stones for fall demands.

are excellent for the Jeweler to sell

They're in demand because they distil the coffee, thus always insuring a beverage free from bitterness, delicious and wholesome.

Fitted with the Sterno-inferno Alcohol Lamp, or Sternau Gas Burner, they make coffee on the table.

This very convenient feature instantly appeals to those wishing novelty combined with usefulness.

Booklets illustrating the different styles are supplied without charge to those dealers stocking the Coffee-machines.

ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS

MEET A LONG-FELT WANT

THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased,* as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,			$6.00
" " 12		" "	4.00
" " 9		" "	3.00

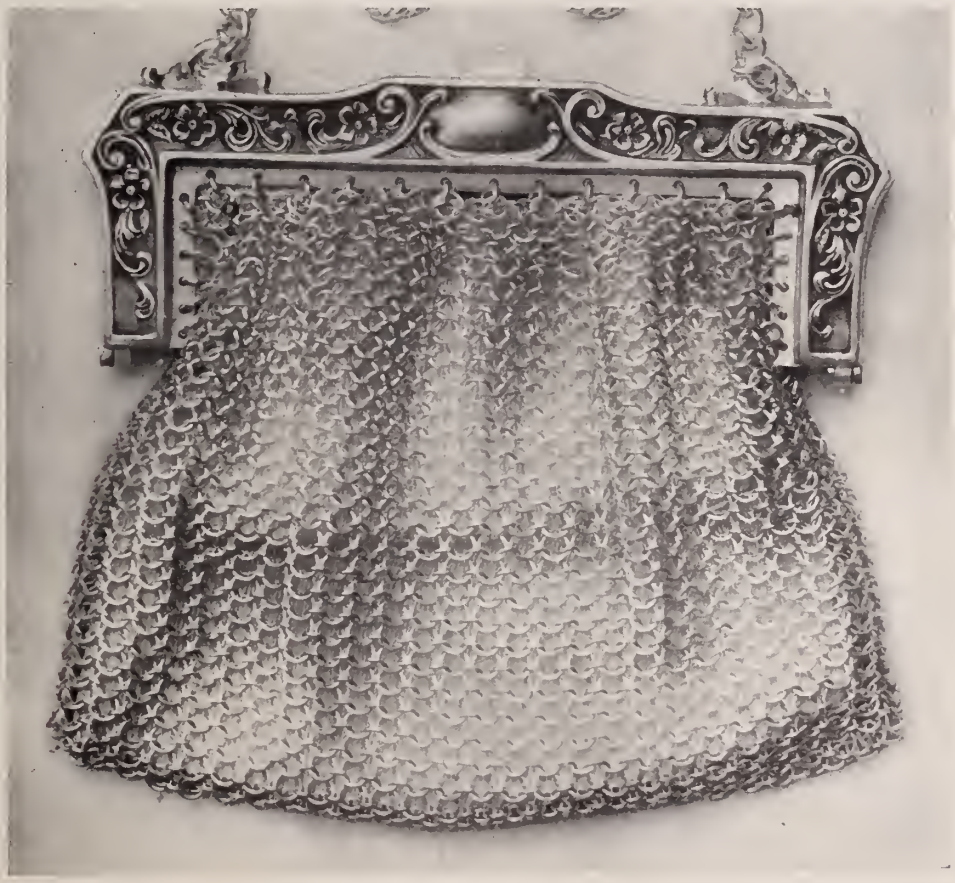
STERLING 925/1000

THE EXCELLENCE OF SMITH SILVERWARE



TRADE MARK.
STERLING 925/1000

Is not confined to its beauty in design and finish but to the general skill and workmanship that enters into the making of every piece of Flatware, Hollowware or especially designed products. Originality, quality, and material have gained for this Company an enviable reputation throughout the entire trade.

FRANK W. SMITH CO.

Manufacturers of Sterling Silverware
GARDNER, MASS.

Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the **"Krementz-Bodkin Back" Stud** and **Vest Button** is the simplest and best mechanical Stud or Vest Button made.

The **"Krementz-Bodkin Back" Stud** and **Vest Button** is not one piece, but **is one-piece construction,** which makes it very simple and the strongest and most durable, because:

1—It is **Solderless**
2—It has **no** spring or hollow wire to bend or break
3—It is made of **solid, hard spring metal throughout**
4—It is made by **Krementz & Co.** which insures perfect **quality, construction** and **workmanship**

THE STORY OF THE HEAD

Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All **"Krementz-Bodkin Back"** Studs and Vest Buttons are sold also under the unique **Krementz Collar Button Guarantee.**

THE STORY OF THE BODKIN BACK

GUARANTEE

If for any cause whatever, a **"Krementz-Bodkin Back" Stud** or **Vest Button** should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. **"Krementz-Bodkin Back" Studs and Vest Buttons** are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

Fair Warning

Delamothe Real Rose Hat Pins are not handled by Jobbers — They sell only the imitations, and the imitations do not sell in places where the Delamothe Real Rose Hat Pins are on sale.

Every genuine DELAMOTHE Real Rose Hat Pin, has the name stamped on the pin here →

Delamothe
METALLIZED

REAL ROSE HAT PINS

Something really new to sell —which sells. The largest selling article put on the market for years. Not only a large profit maker and seller, but a great drawing attraction for the stores which sell them.

DELAMOTHE Real Rose Hat Pins are made out of live roses, which by a secret process changes them into metal, and are then mounted on hat pins and finished in several colors to conform to the prevailing fashions in millinery. Being made out of real roses there can be no two alike. The process used for making DELAMOTHE Real Rose Hat Pins is the discovery of Prof. L. G. Delamothe, and is the only process by which open roses can be perfectly metalized. This process is owned solely by the DELAMOTHE Natural Art Decorating Co., of which this company are the sole distributors to retailers.

WE DO NOT SELL THROUGH JOBBERS.

Write at once for Illustrated Price List or Two Dozen Trial Assortment on approval.

Gold Casket Presented to President of French Republic by the City of London.

ONE of the main features of the reception to the President of the French Republic in London, the latter part of May, was the presentation to him by the Lord Mayor, in the name of the Corporation, of an address which was inclosed in a casket of 18-karat gold enriched with precious stones and enamel. An illustration of the casket appears on the front page of this issue.

In general outline the casket is oblong and the ornamentation Renaissance character, containing heraldic, English and "La France roses." The obverse and reverse sides are each divided into two gracefully shaped panels, the former showing a beautiful enamel picture of the Guildhall and Mansion House, and the latter the St. Paul Cathedral from the Tower bridge. M. Fallières' monogram set in diamonds appears between the two front panels, and on either end of the casket on raised pedestals are panels representing Britannia and the French Republic. On the reverse is the following inscription beautifully etched:

"Presented by the Corporation of the City of London to M. Armand Fallières, President of the French Republic, with an address of welcome on his auspicious visit to England as the guest of His Majesty Edward VII. Guildhall, 27th May, 1908."

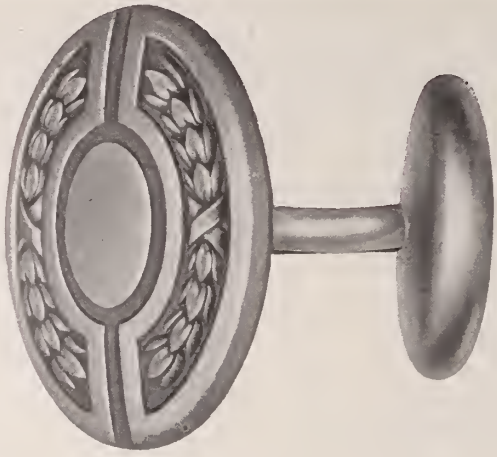
The casket was designed by the Goldsmiths & Silversmiths Co., Ltd., London. For the illustrations we are indebted to the *Municipal Gazette* and the *London Argus*.

CASKET PRESENTED TO M. FALLIÈRES BY BRITISH MEMBERS OF THE LEGION OF HONOR AND OF OTHER FRENCH ORDERS.

THE INTERPORT CHALLENGE TROPHY.

Another notable recent work by a British silversmith is the Interport Challenge Trophy, the shield illustrated on this page.

Some Hints from Paris as to New Silverware and Jewelry Novelties.



FOR a dinner table center, a bronze gilt gondola three-quarters of a yard in length and silver lined, stands on an oval silver-bound mirror. The fairy-like craft is manned by two female figures in sculptured silver. The gondola is intended to contain flowers or bon-bons. Another receptacle for the table or buffet was a woman in terra-cotta holding a gilded basket for flowers. Pretty little silver-wire baskets are intended for the name card, which is attached to the handle, while violets or other small blossoms are contained in the dainty basket.

What is designated as the "Auto-Flor" is a kind of quiver-shaped vase of decorated porcelain of baccarat or cut or engraved glass, which is attached by a bracket to a metal plaque affixed to the side of an automobile or carriage and intended to hold flowers. It is very decorative. Others more practical are of gold-tooled leather around a metal receptacle.

New hand bags are in flat envelope shape, metal bound, and sometimes stamped with a design in gilt of fleur-de-lis, or a tall and slender monogram in gold or silver. Others are of quaint *aumoniere* 16th century shape and of illuminated or embossed Spanish or scented Russia leather. A novel way of carrying not too large hand bags is to suspend them from an extensible bracelet. These ornaments come in a variety of patterns, and when the tiny watch is not set on the front of the bag it appears upon the bracelet.

Novelties in parasols are numerous, and some of the handles are extremely costly. One showed the handle to the depth of a finger thickly incrusted with tiny garnets, a great cut stone set in the top. For mourning are handles of ebony so thickly incrusted with tiny faceted jet beads that the wood is not visible. Pretty are parasols of flat Japanese shape, which are extremely fashionable. Each rib is tipped with a spatula-like ornament of smoked ivory, and when closed it is held by a wide and flat ivory ring as wide as a napkin ring.

Liliputian tea and coffee services perfect reproductions of those in use are not more

No. 2447G.

A Complete Comprehensive Line in Patterns and Sizes of Stiff Bar Buttons

Our stock of sleeve buttons has been broadened in scope by the addition of many new patterns at popular prices. All are made in **14-K** gold with the strongest construction possible.

We make eight distinct lines of patterns at the following prices:

$2.75	$4.25
$3.15	$5.50
$3.50	$6.00
$3.75	$7.00

Wise, progressive jewelers before they purchase elsewhere, will look at the above lines of sleeve buttons when our travelers call, or, we will be pleased to forward a selection package to jewelers in good standing.

Yours very truly,

TRADE-MARK

Registered in the U. S. Patent Office

than an inch and a half high, and are set on a mirror salver. They are intended as cabinet curio pieces.

Convenient are tall lemonade glasses for two people, individual or double, which are set on a silver-plated stand upon which is fixed supports holding a silver lemonade squeezer, while a silver knife and spoon is suspended on each side.

Ornate are tiny boudoir clocks not more than three inches high and of precious marbles with enameled dials.

A wide chain of gold from which depends a couple of tassels imitates the narrow cravats of gold galloon so much worn.

A gentleman's timepiece with a gold face is square instead of round, and is a noticeable novelty. Very pretty are lady's watches, the case and face of mother-of-pearl without any carving. Tortoise shell watches gold engraved with a monogram are handsome. A. M.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., July 15.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Auckland: 44 cases clocks, $950.
Bremen: 2 cases watches, $1,957.
Calcutta: 8 cases clocks, $160.
Colon: 2 cases jewelry, $327; 2 cases watches, $115; 1 case watches, $190.
Curacao: 12 cases watches, $235.
Glasgow: 1 case optical goods, $175.
Hamburg: 8 cases optical goods, $1,498; 1 case optical goods, $490.
Havana: 6 cases jewelry, $637; 3 cases optical goods, $177; 20 cases clocks, $240.
Havre: 1 case optical goods, $154; 4 cases jewelry, $671.
Kingston: 7 cases clocks, $121.
Limono: 1 case plated ware, $112.
Liverpool: 2 cases jewelry, $595; 96 cases clocks, $1,361.
London: 4 cases optical goods, $265; 165 cases clocks, $1,152; 1 case plated ware, $100; 3 cases watches, $710; 34 cases clocks, $1,100; 11 cases optical goods, $4,894.
Marseilles: 2 cases time clocks, $115; 6 cases plated ware, $531; 2 cases watches, $1,600.
Melbourne: 2 cases optical goods, $197; 12 cases clocks, $279; 12 cases clocks, $370.
Mollando: 2 cases jewelry, $340.
Para: 1 case watches, $51,405.
Rio de Janeiro: 2 cases plated ware, $230; 4 cases silver ware, $1,000; 4 cases watches, $1,059; 85 cases clocks, $1,568; 1 case jewelry, $185.
Sengina: 14 cases clocks, $120.
Southampton: 9 cases watches, $1,185; 4 cases scopes and views, $795; 14 cases watches, $2,515; 1 case optical goods, $100.
Valparaiso: 32 cases clocks, $750.
Yokohama: 6 cases clocks, $170.

Benjamin T. Nixon, the Justice of the Peace, of Jeffersonville, Ind., who died at the age of 81 years, at his home in that town recently, was for many years a watchmaker. He was born in Salem, Ind., Nov. 19, 1827, and later moved to Charleston, where he conducted business as watchmaker and jeweler until 1883. He then went to Jeffersonville, and though he later obtained employment with several firms, he continued doing watch repairing until his 80th year. Mr. Nixon was married 50 years ago and survived his wife by 10 years. He leaves two daughters, Mrs. James Keigeen, Jeffersonville, and Mrs. George Small, of Philadelphia. Mr. Nixon had long served as Justice of the Peace and is reported to have married 3,600 couples.

Jewelry and Fans at the Musée Galliera, Paris.

PARIS, July 10.—The Musée Galliera frequently inaugurates exhibitions of various art objects, jewelry, lace, magnificent stuffs, painted porcelain and glass, silver and wrought iron, with books artistically bound and emanating from masters of fine tooling and gilding. At the exhibition rooms the jewelry is displayed in ornate cases, hung with diaphanous stuffs. Lalique has one of the largest, lined with, instead of the usual white which he affects, maize-colored chiffon, which formed a lovely background for the various objects displayed.

The Art Nouveau craftsman has tried his hand as a milliner, with his own hands making several hats fluffily trimmed, and which served for showing off some very ornate hat pins. One set was long and slender and of tarnished gold in a design of wheat ears and slender leaves. Against a drapery of maize were long scarf pins, among the most remarkable an orchid, life-size, carved out of ivory tinted in shaded yellow and standing out several inches from its green foliage of translucent enamel picked out with diamonds. A long and narrow scarf pin showed an amethyst at least an inch in diameter, set between ends of carved pearl shading onto light mauve. An enormous wine-colored topaz formed the center of a design of fir cones in green and brown enamel with green pine needles.

George Fouquet is a remarkable worker in the precious metals. One of his most notable pieces was a superb chain consisting of narrow sticks of white enamel and gold two inches long, of which there was a double row linked together by slender pearl-threaded chains and punctuated at intervals by circular medallions in a delicate fretwork in blue and green enamel, enriched with sapphires. An exquisite creation is a thistle leaf and a shell in opals and other gems, while a pendant of sea algae afforded a novel note in jewelry designing. M. Fouquet is renowned for the purity of conception and delicacy of execution of his creations, pale colors and an artistic blending of shades being his chief characteristics.

Boucheron's exhibit lacked in grace, and was heavy and not as attractive as some of the others. However, as an example of rather conventional handling was a necklace with bunches of currants formed of cabochon amethysts, while pendant from it were big oval stones, gold banded, which hung from the center. A collar formed of links of diagonal shape in vari-colored gold was also good.

Boutet de Monvel sent a collection of ornaments rather in the robust style, and a very remarkable necklace which would cover the neck and fall to the bust of the wearer. It was a spider web of platinum in which were entangled a number of beetles with opal bodies and gauzy enameled wings, the web studded unequally with small gray and white baroque pearls. Barbaric in its splendor was a serpent of gold and enamel, with scales of fiery opals, and intended to coil about the neck or arm. Another necklace, also intended to entirely cover the front of the neck, was in a floral design, gem-set and studded with very large pearls. M. de Monvel runs somewhat to the Byzantine in art.

Very original is the exhibit of M. Archambaut, among which was a cloak clasp showing two roosters in high relief in dark tarnished gold connected with a heavy chain. Ponderous and archaic was a ring in the shape of a golden cat's head, with other articles on the same order. Another artist chooses as a vehicle of expression ivory stained to imitate time-worn examples of ancient objects. A charming hair pin was in the form of a raised *fleur de lis* with here and there the discreet glint of a single radiant stone, with a dead gold setting almost as thin as a thread.

Eugene Feuillattre shows a collection of dainty bits of the goldsmith's art, a splendid corsage ornament of black enameled pansies with silver-veined petals branching from frosted silver stems, and in the center a magnificent amethyst encircled in a light open setting. There were two very handsome lorgnons, one in blonde tortoise shell, while over it was a flight of small blue and silver winged butterflies; the other, also of shell, was adorned with silver marguerites with tiny topaz hearts. An ornament to be worn in front of the pompadour consisted of two graceful dragon flies of translucid blue enamel, flying reversed and holding diamonds in their beaks, from which hung silver flowers. Eugene Feuillatre obtains his effects by the use of pale colorings, silver and blue enamels, the workmanship being of unexcelled delicacy.

In direct contrast is the exhibit of Count Suau de la Croix, who obtains the most brilliant effects of color with translucent enamels, *au grands feux* made in the form of cabochon gems, sapphires, amethysts, moonstones, rubies and emeralds, which are embedded in quaint geometrical settings on wide dog collars, necklaces, belt clasps and a variety of other objects of personal wear. They are gorgeous symphonies of color, and remind one of stained glass windows.

Frank Schneidecker has originated a new field of art in that he succeeds in producing beautiful objects of simple design where gold and silver is treated differently from the conventional standards. He makes brooches, hat pins and various articles in flat and thin open-work designs of conventionalized plant forms, and in burnished gold and silver with absolutely no relief. This artist shows what can be done without the aid of high relief and precious stones.

The works of M. Gaillard must not be neglected. Among them is to be mentioned a long ornament of carved mother-of-pearl allied with enamel and gold and pearl set at each corner, with topaz center. His buckles in *ciselé* iron, gold and silver encrusted, are veritable *chefs d'œuvres*. Exquisite is a comb decorated with a branch of cyprus executed in brilliants, mounted on gold and platinum, which brings out the details of the pattern and is altogether a wonderful piece of goldsmithing. He also shows some very handsome parasol handles.

Fans are a dominant note in the Galliera exhibit devoted to feminine ornament. Extremely interesting was the collection of Jorel, with sticks as fragile as a dream and carved as if by fairy fingers. One of ivory with oval vignette of colored pearl, with figures in relief enriched with garlands in vari-colored gold encrusted between, was much admired. Another with pearl arabesques in a pattern of leaves on ivory sticks of high artistic excellence was equally popular. The most delicate greens, mauves and blues flash from broad mother-of-pearl sticks, with a design of raised mythological figures. Very curious was a fan of ethereal lace made of the finest blonde hair.

The Faucon exhibit was quite complete. One of the finest fans in needle point in raised chrysanthemums, with painted vignette and tortoise shell mount, had a raised gold decoration, while another showed a great spread eagle of lace spangled all over with pearl paillettes. Faucon exhibits the curious collection of fans on which Prince Demidoff caused to be reproduced his famous pictures which hung on the walls of his palace at San Donato. These include lovely genre scenes, hunting episodes, landscapes, religious subjects, and, in fact, numerous examples from the paintings of renowned artists, most beautifully done on kid and vellum.

A fan of fairy-like black Chantilly from the *Compagnie des Indes* showed a design of a chateau, a road with an ass climbing the ascent and female figures executed in threads as fine as a cobweb. The fans in Vernis Martin emanating from Buissot were in the ancient style, scenes painted in dull colors peculiar to the painters of medieval times and of admirable workmanship.

Few women's names figured in the catalogue.

The exhibit has attracted a number of people, especially jewelers, who have received many valuable hints from the collection of objects emanating from masters of the craft. There were interesting exhibits from pupils of the jewelers' schools, showing articles of silver and wrought iron, the execution most finished and revealing great promise. COUNTESS DE MONTAIGU.

Antwerp's Second Quarterly Ivory Sale.

OUR Consul-General at Antwerp, Belgium, Henry W. Diederich, reports that at the second quarterly ivory sale at Antwerp, May 5, 78,472 pounds were offered, the largest lot of which was 46,393 pounds of hard Kongo. The auction sale began with much hesitation, but ended with sharp competition for Kongo and Angola ivory, for which the market closed at a decrease of 5 francs (96.5 cents) for large tusks and bangles and 4 francs (77 cents) for "srivailles." Prices for billiard ball tusks remained firm.

The present stock is 197 tons. The next quarterly sale is fixed for July 28.

The town council of Bangor, Pa., is directing the purchasing of a four-dial clock to be placed in the tower of the Municipal building. Six hundred and twenty-five dollars was appropriated to defray the expenses.

Models Showing the Great Cullinan Diamond as It Will Look When Cut.

How the great Cullinan diamond, the Transvaal's gift to King Edward of England, will look when the cutting of it has been completed by the firm of Joseph Ascher & Co., Amsterdam, is a matter of especial interest to the diamond trade and to the general public as well. Although the work on this monster gem will not be completed before the end of the year, a crystal model of the gem as it will appear when finished has been made by R. Oblatt, New York, an expert in the manufacture of scientific precious stones, and through his courtesy THE CIRCULAR-WEEKLY obtained the photographs of the models of the gem to be cut from it as they will appear when completed. The original stone will be cut into three separate pieces, and the stones which will be cut from these pieces are shown in the accompanying illustration in their exact size according to the model made by Mr. Oblatt, together with the model of the stone in the rough state, which he also completed.

MODELS SHOWING THE CULLINAN DIAMOND IN ROUGH AND AS IT WILL APPEAR WHEN CUT

The central stone, which will be placed among the crown jewels, will be drop-shaped and will, when completed, be the largest cut diamond in existence. The two smaller stones will also be among the largest that have ever been cut.

This monster among diamonds was found near Pretoria in the new Premier mines in the Transvaal in the latter part of January, 1905. The stone weighed 3,032 carats and was found by Mr. Wells, the manager, close to the surface in the open workings of the Premier mine No. 2. Mr. Wells, who is an old employe of the De Beers Co., on making his rounds on Jan. 27, 1905, caught a gleam of the large diamond half imbedded in the debris. He walked to the spot, picked up the stone and put it in his coat pocket, and then took it to the office of the company, where, after the officials had recovered from their astonishment, the news was telegraphed to all parts of the world. The diamond was named the Cullinan diamond, after T. N. Cullinan, the chairman of the company, and was presented by the Transvaal Assembly, on the instance of Premier Botha, to King Edward of England in recognition of His Majesty's granting of a constitution to the Colony.

The original diamond weighed 3,032 carats, or 1¾ pounds, and measured 4 by 2½ by 1 to 2 inches. It had four cleavage planes, which indicate to experts that there are other pieces of the stone still in the mines. The diamond is white, and resembles a piece of ice to the layman.

The great work of cutting the Cullinan diamond was for a long time kept a secret to the general public, and was a matter of widespread curiosity until L. Ascher, of the firm of J. Ascher & Co., visited New York in May and gave out to THE CIRCULAR-WEEKLY an interview in which he described the process by which the great work was being accomplished. "The diamond," said Mr. Ascher, "was first cleft in two pieces by J. Ascher himself, the head of the firm, in such a way that a defective spot in the stone was cut exactly in the center, leaving a part on each piece of the stone." From one of these pieces Mr. Ascher said that the large diamond was being cut, and that the other pieces would be cut into smaller diamonds, which would even then be among the largest stones in the world. Mr. Ascher expressed the belief that the work of cutting the diamond would be completed before the end of the year, and that it would weigh between 500 and 600 carats when finished.

A model of the diamond was first prepared in clay, and experiments were tried on this model to arrive at a definite plan of procedure. When this decision had been reached special instruments were made for the work, among which was a special dop weighing 20 pounds and measuring about six inches across.

The models shown herewith are on exhibition at the 23d St. store of the Columbia Phonograph Co., in New York, for which they were specially made.

Trade-Marks in German Colonies.

AN American firm having made inquiry regarding the protection of trade-marks in German possessions, the following information from Vice-Consul Ernest Vollmer, at Tsingtau, will be of interest to exporters:

"According to Par. 4 of the imperial orders of Nov. 9, 1900, regarding laws in the German colonies, the law of the German Empire for the protection of trade-marks of May 12, 1894, is in force in the German possessions. Registry of trade-marks is made and the register kept by the Patent Bureau in Berlin. Notice of the establishment of a trade-mark must be made to that office in writing. With every such notice there must be a description of the business in which the proposed mark is to be used, a description of the goods which it is to mark or accompany, as well as a clear copy and description of the mark, as far as these may be deemed necessary.

"For every trade-mark a fee of 30 marks (mark = 23.8 cents) is to be paid upon giving the notice."

Friends of E. E. Hight, of Henderson, N. C., were grieved to learn that he had attempted to commit suicide recently and had been taken to St. Luke's Hospital at Richmond. Mr. Hight's act is said to have grown out of a charge by A. W. Goldern, to whom he sold his jewelry business in Henderson, of having taken some jewelry and sold it for his own benefit. Mr. Hight recovered sufficiently from his wound to be taken to Henderson to answer the charge.

Members of Defunct Knickerbocker Clock Co., of Brooklyn, Arrested on Charge of Fraudulent Use of the Mails.

Wm. G. Osgoodby, who had been connected with the Knickerbocker Clock Co., 901 Lexington Ave., Brooklyn, which suddenly went out of business late in May, was arrested last Wednesday in New York by Officer Wilbur and Post Office Inspector C. E. Crowell and taken before United States Commissioner Shields in the Federal building, where he waived examination. He was paroled in the custody of his attorney and taken before Judge Chatfield sitting in the United States District Court, Brooklyn, where he was arraigned and held in $1,500 bail for trial at the October term.

The arrest was made on an indictment found June 30, by the United States Grand Jury, against Wm. G. Osgoodby and Mortimer Warren, who was associated with him in the Knickerbocker Clock Co., charging Warren with fraudulent use of the United States mail and charging Osgoodby and Warren with conspiracy to defraud. The indictment is based on information furnished by Inspector Crowell, charging that between Feb. 17 and June 1, 1908, the United States mails were used as a means for fraudulently obtaining money from various people in reply to circulars sent out through the mails advertising a "Father Knickerbocker mission clock." It is alleged that orders were received for the goods accompanied by money in payment and that the goods were not delivered.

The indictment sets forth that money was received from J. N. Decker, Erie, Pa., by means of a Wells Fargo money order for $7.75 and that the company failed to deliver to him the clock or any kind of a clock in payment for the money received. E. A. Engle, New Berlin, Pa., is another complainant named in the indictment. It is said that he sent a postal money order for $3.85 for the clock advertised by the Knickerbocker Clock Co., and that he never received either the return of his money or the clock.

The indictment charges that "The said W. G. Osgoodby and Mortimer Warren did then and there fraudulently plan and intend to enter into communication and correspondence with divers and sundry persons heretofore mentioned through and by means of the mails of the United States and the post office establishment of the United States in order to obtain orders for goods," and goes on to charge as follows: "The Grand Jurors do further present that William G. Osgoodby and Mortimer Warren on and after Feb. 17, 1908, to June 1, 1908, did seek to defraud these persons by opening correspondence and communication by means of the post office in order to obtain orders for goods which they stated in their communications to be on sale for delivery by the Knickerbocker Clock Co."

It took several days to get on Osgoodby's trail and incidentally the authorities ran into a picture scheme whereby so many pictures were to be sold for a profitable commission. The trouble with that scheme was the pictures were of imaginary variety.

Behind that was a supposedly powerful syndicate knows as the "Arts-Crafts League," the manager of which, fortunately for the secret service men, was the same Mr. Osgoodby they were seeking.

The mail of the "Arts-Crafts League" was traced back to 37 W. 42d St., New York, and it was there that Mr. Osgoodby was finally rounded up, by detectives of the Manhattan Central Office and Inspector Crowell.

Newark, N. J., July 20.—Deputy United States Marshal Mayhew arrested Mortimer Warren in Orange last week on an indictment of the United States District Court of Brooklyn, charging him with the misuse of the mails. He was brought before United States Commissioner Bigelow and held for a hearing under $1,000 bail.

Upon an affidavit submitted by Assistant United States District Attorney Lindabury, Warren was charged with having sent out notices through the mails offering for sale what was known as "Father Knickerbocker mission clocks" at $7.50 each. Upon receipt of the money no clocks were returned, it was said.

Warren pleaded not guilty.

Post-Office Inspector Charles E. Crowell, Brooklyn, is desirous that jewelers throughout the country who have had business dealings with the Knickerbocker Clock Co., send their names and the date of the transactions to him if they have advanced money and have failed to receive the clocks as advertised.

Charles Beghtol, Canyon City, Colo., Goes Into Voluntary Bankruptcy.

Canyon City, Colo., July 15.—Charles Beghtol filed a voluntary petition in bankruptcy in the United States court Saturday last and has been adjudicated a bankrupt. According to the schedules which he filed with his petition his liabilities reached $6,600 and his assets amounted to $4,896, of which the stock and fixtures are estimated at $4,500, bills receivable at $171 and wearing apparel at $225. Among his secured creditors are the First National Bank of Denver, with a claim of $900, secured by a lien on the furniture and fixtures valued at $2,000, and the National Cash Register Co., secured to the amount of $100 and taxes $98.50.

Among the unsecured creditors are: L. Bauman Jewelry Co., $833; Bauman-Massa Jewelry Co., $300; D. Gruen Sons & Co., $416; Chas. Wadthan Co., $500; M. Myer & Co., $279; L. C. Page & Co., $177; T. G. Hawks & Co., $150; Pacific Gem Co., $550; Gans Bros., $109; Morris Vogel & Bros., $268; New England Watch Co., $100.

It is said that Beghtol gave a chattel mortgage, July 1, covering all his fixtures and furniture at 45 Main St.

Mr. Beghtol has been in business in Canyon City since 1905, but originally had been located at Holdrege, Nebr., where, with J. R. Schreck, he started the firm of C. A. Beghtol & Co. Mr. Schreck succeeded to the business and Beghtol started alone, but later sold out to his mother and started at Trinidad, Colo., where he sold out in 1898. In 1900 he began business in Ogden, Utah, as successor to George V. Schramm and gave up business there October, 1904.

Window Smashing Thief Comes to Grief When He Operates on Store of Auburn, N. Y., Jeweler.

A report received Saturday by the Jewelers Security Alliance, New York, states that a thief smashed the window in the store belonging to William A. Tice, Auburn, N. Y., late in the afternoon of July 11, and tried to get away with a tray of watches, but was apprehended by one of the salesmen and taken into custody. Patrolman Holmes, while on duty on Genesee St. Saturday afternoon, about 5 P. M., heard the crash of glass, and on investigation found that the thief had been caught by Miles Hanlon, the chief salesman, before he had time to get away in the crowd.

The prisoner gave the name of Peter Maddon and claimed to have come from Buffalo, N. Y. He said he was out of work and desperate and had taken this method of attempting to get some jewelry on which to raise money. He also admitted that he had been arrested before and had served several terms in the Erie County Penitentiary, and that up to about two months ago he had been working at the stock yards in Buffalo. He is described as being about 50 years old, five feet 10 inches high and weighs 150 pounds. He has gray hair and mustache.

When questioned the man admitted that he attempted to break into a clothing store in Buffalo, for which offense he was arrested, and added that in Syracuse in 1906 he smashed the window of Jacob's pawnshop and stole a watch, but was caught and served a year in the Onondaga County Penitentiary. The prisoner said he had used a short stick in smashing the Auburn jeweler's window.

Mr. Hanlon, the clerk who captured the thief, stated that on the afternoon in question he had noticed a man watching the store and acting in a peculiar manner. The salesman was behind the horseshoe counter, and before he could reach the end of the counter he saw a man walk quickly toward the window with a stick in his hand and smash the glass. Hanlon then vaulted the counter and seized the man as he started away with a handful of watches. He threw him to the pavement and then dragged him into the store and held him until the police arrived.

Death of Benjamin T. Nixon.

Indianapolis, Ind., July 20.—The death of Benjamin T. Nixon at Jeffersonville, a few days ago, marked the passing of an interesting figure in the jewelry trade.

Mr. Nixon was born near Salem, in 1827, and at an early age learned the watchmaker's trade, which he followed at New Albany, Charleston and, until a year ago, in this city. About eight years ago Mr. Nixon was appointed a justice of the peace, and during the seven years he held this office attained a reputation for the number of marriage ceremonies which he performed. During that time he was called upon to officiate at 7,200 marriages.

When Mr. Nixon retired both from business and as a justice of the peace, he was succeeded by his son-in-law, James Keigwin. It is said that Squire Nixon did not preside over more than a dozen civil and criminal cases while he was in office.

DIAMOND RINGS

We import diamonds and other precious stones direct from the leading markets of the world and always carry a complete stock, hence we are able to show, at all times, a fine line of Solitaire Diamond Rings, also Cluster, Princess and Fancy Rings. Recent Decisions on Jewelry, Silverware, Coral, Etc., by United States General Appraisers.

The following were among the decisions of lesser importance recently handed down by the Board of United States General Appraisers:

CORAL ARTICLES—STRUNG BEADS. Protest of Samstag & Hilder Bros., New York. Opinion by Sharretts, G. A. G. A. 6584 (T. D. 28131) and G. A. 6610 (T. D. 28221) followed, relating, respectively, to coral articles and to strung beads.

BOTTLES WITH SILVER MOUNTINGS.—Protest of G. Collamore & Co., New York. Opinion by Sharretts, G. A. Cut or engraved glass bottles fitted with sterling silver caps were held dutiable as manufactures in chief value of metal under paragraph 193, tariff act of 1897, as claimed by the importers.

WAX BEADS.—Protests of Wiener Bros. *et al.*, New York. Opinion by Sharretts, G. A. Protests sustained as to wax beads. G. A. 6639 (T. D. 28297) followed.

JEWELRY—ORNAMENTS—TOY NECKLACES.—Protests 192824, etc., of D. Lisner & Co., *et al.* and protests 2807 *h*, etc., of Samstag & Hilder Bros., New York. Opinions by Sharretts, G. A. The protests were overruled except as to certain ornaments, toy necklaces, pins and strung beads. G. A. 6374 (T. D. 27382), G. A. 6658 (T. D. 28391), and G. A. 6610 (T. D. 28221) followed.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended July 18, 1908.

J. D. SCHENCK, CHARGED WITH ATTEMPTING TO STEAL DIAMONDS.

Two Men Caught Trying to Steal Diamonds from New York Firm Indicted and Held for Trial.

Frederick Kenney and J. D. Schenck, the two men who were caught in an attempt to steal a package of loose stones from the firm of Cooper & Forman, 3 Maiden Lane, New York, on July 6, and who were detected, arrested and lodged in jail, pleaded not guilty last Wednesday to the charge of grand larceny in the first degree and were indicted by the New York Grand Jury and held for trial in $3,000 bail each.

As told in a recent issue of THE CIRCULAR-WEEKLY, the two men called at the office of Cooper & Forman and asked to see some loose diamonds, representing that they were deputized by employes of a large concern to buy a gift for the superintendent and his wife and had been directed to the Cooper & Forman establishment. While the sale was under way William Stenson, a clerk in the employ of the concern, who had been watching the transaction from an adjacent office, unobserved by the crooks, saw one of them, so he says, conceal a package of loose stones in his hatband.

The young man seized a large revolver and hastened to the room, where he accused the men of the theft, whereupon they rushed out of the office, followed by the clerk and other people in the office and were captured before reaching the street.

The police say that Kenney has a criminal record which dates back to 1901 and that the other prisoner is also well known to them. Photographs of the two men appear herewith, and jewelers throughout the country are advised to take careful note of the pictures, and that if the men should have operated elsewhere information as to their work should be sent to the New York police or to the office of THE CIRCULAR-WEEKLY.

The capture of the two men was due in great part to the quick wit and nerve of Mr. Stenson, the bookkeeper, who held the alleged burglars up with an unloaded revolver. The timely arrival of Lieutenant Monahan and Patrolman Dailey completed the capture.

FREDERICK KENNEY, ARRESTED AT NEW YORK.

WORKSHOP NOTES
For Jewelers and Watchmakers. Cloth. Postpaid, $2.50. Published by The Jewelers' Circular Pub. Co., 11 John St., New York.

AMERICA'S NEWEST GEM :: AMATRICE

The most remarkable, beautiful and individual matrix precious stone ever offered to jewelry wearers. Color and matrix polish equally. No porosity or roughness. Amatrice positively does not fade or change color.
No retail stock is complete without an assortment of Amatrice jewelry in gold mountings.
Wonderful individuality in matrix effects. Exact duplicates do not exist, but beautiful matching effects for sets are obtainable.
Retailers should require manufacturers to supply different types in each lot bought, as the range of color combinations and innumerable matrix effects appeal strongly to the individual buyer.
If your regular manufacturers do not offer Amatrice jewelry, write us and obtain list of first-class manufacturers who will meet your requirements.

ONLY AMATRICE MINE IN THE WORLD, OWNED SOLELY BY

Occidental Gem Corporation, 216-217 Dooly Block, Salt Lake City, Utah
New York Office will be established in August

Despondent from Grief Over Death of Loved Ones Herman Unger Commits Suicide.

NEWARK, N. J., July 20.—Grief over the recent deaths of his wife and of the grandchild to whom he was devotedly attached having driven him into an irresponsible mental condition, Herman Unger, president of the firm of Unger Bros., silversmiths, of 412 Halsey St., shot himself in the mouth in sight of his home on the River Road, about three miles from New Brunswick, yesterday morning. Since his wife died eight months ago Mr. Unger had been despondent and, it is alleged, his mind gradually gave way. When his grandson died two months ago, Mr. Unger's condition grew worse and he lost all interest in life.

Mr. Unger left his home shortly before 10 o'clock yesterday morning, telling his son-in-law and daughter, Mr. and Mrs. Edward Clark, who resided with him, that he was going down to see his cattle. Mr. Unger walked straight ahead in the direction of the Raritan River, 300 yards from the house. Crossing the river road he entered the meadow of his neighbor, J. V. D. Field. A farm hand watched Mr. Unger walk to an old tree and take a seat on a low branch and then lay his head against a fence. A shot caused the farm hand to investigate and he found Mr. Unger on the ground in a dying condition. He expired almost immediately. The revolver lay in the crotch of a tree.

Coroner Moke granted a burial permit.

Herman Unger was in his 64th year and had long been well known in the jewelry trade. The business of which he was the head was founded 37 years ago as H. Unger & Co. Later, in 1880, the style was changed to Unger Bros. In February, 1904, the concern incorporated under the same style with Herman Unger president and his brother, Eugene Unger, vice-president.

The funeral was held from the home of his daughter and was private. Rev. Edmond A. Wasson, rector of St. Stephen's Episcopal Church, Newark, of which Mr. Unger was at one time a vestryman, conducted the services. Interment was at Bound Brook.

Mr. Unger is survived by his brother, Eugene, with whom he was associated in business; his sister, Mrs. Pauline Hagney; his daughter, Mrs. Clark, of Bound Brook, and a grandson, Herman Clark.

Diamond Broker Reported Robbed by Pickpocket of Forty-Nine Diamonds While Riding from Denver to Salt Lake City.

SALT LAKE CITY, July 15.—Forty-nine fine white diamonds of various size and cuts, valued at about $5,000, were stolen by pickpockets from J. E. Baker, a diamond broker of Salt Lake City and Philadelphia, a few days ago. The robbery occurred on a train nearing Pueblo and the thieves are supposed to have left the train at that place.

As soon as he discovered his loss Mr. Baker notified the Pueblo police and offered a reward of $100 for the recovery of all or part of the diamonds. The police of other cities were also notified, but as yet no trace of the gems has been discovered.

Baker was on his way from Denver to Salt Lake City and carried the diamonds, which were unset, in a leather wallet in the inside pocket of his coat. In the wallet, in addition to the diamonds, were three silver dollars and a number of silver buttons, bearing lodge emblems.

The wallet was stolen from Baker's pocket while he was sleeping, and as the train neared Pueblo.

An Interesting Chain.

AN interesting chain recently came into the possession of Myers Bros., who run a jewelry store under the title of "Quality Shop," at 58 W. Market St., York, Pa. The chain was made in Glasgow about 1840, weighs 86 pwt. and the gold is 15 karats fine, every link being stamped with the quality.

AN INTERESTING CHAIN SHOWN BY YORK, PA., JEWELERS.

The man from whom the firm purchased the chain stated that it came into the possession of his father, who was a pawnbroker in Glasgow, and was never redeemed by the pledgee. The chain has been exciting considerable interest among the jewelers who have seen it.

Market Price for Silver Bars.

" 15	24 5-8d.	.55⅝
" 16	24 9-16d.	.55¼
" 17	24 7-16d.	.55
" 18	24 9-16d.	.55¼
" 20	24 1-2d.	.55⅜

Death of Byron S. Thompson.

PROVIDENCE, R. I., July 15.—It was with deep regret that the friends of Byron S. Thompson, who for many years had been secretary and treasurer of the J. A. Foster Co., manufacturing jewelers at Dorrance and Weybosset Sts., heard that he had died suddenly at his home, 76 Pocasset Ave., on the morning of July 12. The news was a distinct shock because Mr. Thompson was supposed to be in his usual good health until he was found lifeless by his daughter-in-law, Mrs. Herman Thompson, when she went to call him. Physicians were summoned and it was discovered that Mr. Thompson had passed away of heart disease several hours before.

Mr. Thompson had just passed his 63d birthday, which he celebrated a week ago at a supper at the home of his daughter, Mrs. Aspinwall. Though originally in business in the west, he had been prominently identified with the jewelry trade in Providence for nearly 20 years, and had been connected with the Foster Co. and the firm which it succeeded for nearly 18 years. The business was founded in 1876 by James A. Foster, who later admitted Walter H. Green to the partnership; Mr. Thompson joined the concern a few years after Mr. Green's death in 1886. When the present corporation was formed in June 24, 1898, he became secretary and treasurer of the concern.

Mr. Thompson is survived by a widow, a son and two daughters.

N. C. Styles has succeeded John F. Dodge.

The C. E. Hancock Co. will not close its factory Aug. 1, as reported last week.

Theodore W. Foster, with his family, is making an automobile trip of the White Mountains.

Peter Lind, the senior member of the Thos. W. Lind Co., is enjoying a vacation in Scotland.

The factory of the Wightman & Hough Co. will close for a vacation and repairs from Aug. 1 to Aug. 15, inclusive.

Robert E. Budlong, of the S. K. Merrill Co., who has been ill for the past two months, has so far recovered as to be able to get down to the office almost every day.

Abraham Bazar, a jewelry manufacturer, whose shop on Willard Ave. was destroyed by fire last February, has brought suit in the Superior Court against three fire insurance companies asking in all $6,000 damages. He claims to have held $2,000 policies in each company, but did not get the money after he had been burned out.

Harvey Huestis, of Hutchison & Huestis, entertained Count Alexandre Bobrinsky, of St. Petersburg, at his home in this city, last week. The Count was accompanied by Dr. William D. Carlisle, an American dentist, who is a cousin of Mr. Huestis and who has a large practice in the Russian capital. Mr. Huestis entertained his guests at the Pomham and West Side clubs.

Mr. and Mrs. Nathan H. Griffith recently celebrated their golden wedding anniversary at the home of their son, George D. Griffith, 31 Harvard Ave. Mr. Griffith, who has been connected with the trade since 1851, was a former member of the firm of Stone, Griffith & Co., and was later associated with Kent & Stanley, and still later with the R. L. Griffith & Son Co.

The two-story building in which is situated the plant of the Manufacturers' Refining Co., controlled by several leading concerns of this city, was practically destroyed, Tuesday, July 14, by a fire, the origin of which is not known. The flames broke out before anyone was in the building and did damage amounting to between $3,000 and $4,000 before they were checked.

Two Attleboro sisters and two Attleboro jewelers took part in a double wedding in this city Wednesday, the couples being married at the home of Rev. Alexander Mitchell. The brides are the daughters of Mr. and Mrs. Frank Shaw, of Attleboro—Miss Lena Frances Shaw, aged 23, and Miss Kate Elizabeth Shaw, who is 21. Their father is an Attleboro jeweler. The former was married to Noble Dow Sutherland, of North Attleboro, while the younger Miss Shaw was married to James Morton Bates, 2d, of Attleboro, the son of Charles R. Bates, a retired jeweler.

Newark.

Mrs. Martha Eymann, daughter of Xavier Sarron, of Paris, France, a watchmaker and inventor of miniature watches, died last week at her home in this city, after a long illness, from a complication of diseases. Mrs. Eymann, with her husband, Charles Eymann, was a successful artist. On more than one occasion they were exhibitors in the Paris Salon.

Alexander A. Narcross, a Civil War veteran and an expert jewelry worker, passed away in his home, 40 Kearny St., Wednesday, at the age of 80 years. Mr. Narcross was born in this city and had lived here all his life. For 30 years he was employed by the firm of Shafer & Douglas, manufacturing jewelers, at 9 Franklin St. He leaves a widow and one daughter.

Work resumed this week in the jewelry factories all over the city. The two weeks' shutdown which has become a local custom was not only fully observed, but several concerns ran over several days, while others shut down two and three days before the fortnight regularly began. In most of the large concerns the next week or two will be devoted to preparing samples so the salesmen will be starting out for their Fall trips.

Trade Gossip.

The Aikin-Lambert Co., 33 Maiden Lane, New York, has just issued a new booklet containing illustrations and descriptions of the stylographic pens which it manufactures. The illustrations are on heavy glazed paper. The booklet is 6½x3½ inches and is neatly bound in green.

The S. & B. Lederer Co., Providence, R. I., is pushing a novelty in the way of a design for lucky charm which they call the "Abydos," which is taken from one of the oldest symbols known to man as an emblem of good luck, long life, etc., and has been used from time immemorial. The concern has taken out a design patent upon the locket embracing this symbol, which is having a ready sale at the present time.

On Monday evening, Aug. 10, at the Liberty Theater, New York, Henry B. Harris will present for the first time in New York a new three-act comedy, entitled "The Traveling Salesman," written by James Forbes, author of "The Chorus Lady." This new play deals with incidents that happen in the life of a commercial man on the road and is the first play that has ever been written that takes the commercial tourist as the central figure without attempting to burlesque one of the most valuable aids to commerce the business world furnishes.

A new feature in umbrellas which will greatly enhance their sale is being put upon the market by Siegel, Rothschild & Co., Baltimore, Md. This consists of an improved detachable handle which has no spring or screws to get out of order or become misplaced. This detachable handle will be welcomed by travelers, for by removing the handle the umbrella may be placed in the trunk. These handles are supplied in an endless variety of new patterns in gold and silver. A new catalogue illustrating a complete line of all kinds of umbrellas and canes will be sent to any jeweler upon request by the makers, Siegel, Rothschild & Co., Baltimore and Howard Sts., Baltimore, Md.

It was reported in New York yesterday that E. O. Zadek, a prominent Mobile, Ala., jeweler, had died in that city Monday night.

Association Notes.

What the Retail Jewelers' Organizations Are Doing in Various Parts of the Country.

The retail jewelers of Buffalo, N. Y., met Thursday night at the Genesee Hotel and formed the Retail Jewelers' Association of Buffalo. The following temporary officers were elected: William Ehman, chairman; L. Schutt, secretary.

The members of the Kentucky Retail Jewelers' Association will attend the annual meeting of that organization at Cincinnati, O., Aug. 3, and the annual meeting of the American National Retail Jewelers' Association, which will begin in Cincinnati the day following. Secretary William M. Irion, of the State Association, has done much to build up that organization in its comparatively short existence, and believes that the Kentuckians will make a good showing in the national meeting.

The Arkansas Retail Jewelers' Association will hold its annual convention at the Hotel Arlington, Hot Springs, Aug. 25, 26, 27, and invitations have been sent to every retail jeweler in the State of Arkansas by J. W. Johnson, of Hope, the secretary, asking them to attend this meeting, whether or not they be members of the association. The president, E. A. Short, was recently in Hot Springs, arranging for the convention, and all details have been attended to that are necessary to provide for the comfort and convenience of the members, and to make this meeting one of the greatest events held in this section of the country. Among the notable exhibits at the convention will be those of the Rockford Silver Plate Co. and the South Bend Watch Co.

The great progress that has been made by the Pennsylvania Retail Jewelers' Association is evidenced not only by the increase in membership, but also by the character of the members added to the roll by the efforts of President Graul, Secretary Wiley and the other officers. Among the Pittsburg firms which applied for membership in the last week were the Hardy & Hays Co., J. R. Reed & Sons, E. P. Roberts & Son, R. Siedle & Sons, L. W. Vilsack & Co., Theo. Frey, A. C. Geis, Chris. Hauch, R. J. Henne, George T. Kloepfler, W. W. Warrick, E. A. Stevens, J. C. Stump. The following members have been elected delegates and alternates to represent this State society at the national convention in Cincinnati next month. The delegates are: J. P. Archibald, A. C. Graul, S. Kurtz Zook, Col. J. Warner Hutchins, G. A. Schlechter, C. S. Wiley and J. P. Steinmann. The alternates are: W. T. Steinmacher, P. G. Diener, T. H. McNary, R. F. Polack, C. R. Smith. The Pennsylvania jewelers will hold their State convention in Philadelphia during the time of the convention of the American Association of Opticians, Aug. 12 and 13, and the sessions are expected to be most interesting. A handsome programme of the coming convention will be mailed to the trade about the 25th of this month.

John Etrizak has moved from Windber, Pa., to Expedit, Pa.

LONDON PARIS OBERSTEIN PROVIDENCE

News Gleanings.

John Holt, Eau Claire, Wis., left, recently, for a trip to Norway.

The Prentice Jewelry Co., Brownwood, Tex., has been succeeded by Curry & Brewer.

N. Hajjar, Munising, Mich., recently visited old friends in Ishpeming, where he formerly resided.

The store of Wm. Weber, Birmingham, Ala., was recently damaged by fire to the extent of $1,500.

The picnic of the Bradford (Pa.) Business Men's Association will be held at Riverhurst, July 22.

The Ohio Watch Co., at Wadsworth, O., has increased its capital stock from $30,000 to $100,000.

Benjamin Howes, pearl buyer for Howes Bros., Clinton, Ia., was a recent visitor to Bellevue, Ia.

The death is reported of J. Jaskulek, a former jeweler of Roseburg, Ore. Mr. Jaskulek died in Spokane, Wash.

John C. Marx has sold his store at Shakopee, Minn., to Lawrence Nachtsheim, who learned his trade under Mr. Marx.

The store of J. A. Hartley & Co., Grand Forks, B. C., was damaged by fire, a short time ago, to the extent of $1,000. There was no insurance.

The store conducted by the Sturgell Jewelry Co., Ashland, Ky., was destroyed by fire last Wednesday. The loss was covered by insurance.

James Greenwood, who sold his interest in the business at Reedsburg, Wis., to his partner, Jasper Fish, has taken a position in C. E. Ryan's store, Baraboo, Wis.

Burglars recently broke into the retail jewelry store of John McCulloh, in Lexington, N. C., and stole watches, fobs, chains, etc., valued at about $50. There is no clue.

R. W. Boyle, Bandon, Ore., has moved his jewelry store to the Gallier building, opposite the postoffice. When completed, the new store will be exceptionally attractive.

A fire, which started recently in the jewelry store of L. A. Grogan, Good Water, Ala., did damage to the business district of that place amounting to several thousand dollars.

C. W. Schamber, of the Meyer & Schamber Jewelry Co., Meridian, Miss., has returned home after an absence of about a month, which he spent on a purchasing trip in the east.

Karl E. Kyllo has opened a jewelry and watch repairing business in Kyllo's drug store at Red Wing, Minn. He is a graduate of the Stone School of Watchmaking.

Jacobi & Co. were recently incorporated in Annapolis, Md., with a capital stock of $25,000. The concern's main office will be in Baltimore. According to a recent legislative enactment incorporation papers must first be sent to Annapolis.

A fire which started recently in the plant of the Ontario Silver Works, on W. Jackson St., Muncie, Ind., was extinguished by the automatic fire extinguishing apparatus, with which the establishment is equipped, before doing any serious damage.

Duderois & Belisle, New Bedford, Mass., have dissolved partnership. The business hereafter will be conducted by Harley L. Belisle. Mr. Duderois will devote his time to the management of a contracting business, which has been established by his father, in Fall River.

C. E. W. Bowers, Salt Lake City, Utah, who was recently struck and severely injured by a street car while riding a horse, at S. 5th and East St., has filed suit in the Third District Court, against the Utah Light & Railway Co. for $10,700 damages. The horse, whose value is placed at $700, was killed.

Arthur J. Henry, a member of the firm of A. J. Henry & Co., manufacturers of roll paper for time clocks, Camden, N. Y., died at the Arlington Infirmary in Rome, N. Y., about a week ago, as a result of injuries which he received in an automobile accident, which occurred near the latter city. The deceased was 46 years of age.

The police of Detroit, Mich., are investigating the mysterious disappearance of a case of silverware, weighing 110 pounds, from the rear of the store of Kunz & Rogers, 83 Woodward Ave. A delivery man says he left the case at an alley near the entrance to the store, but the firm never received it. The missing stock is valued at about $200.

The G. A. Bahn Optical & Diamond Co., of Austin, Tex., recently had reprinted in full in the *Daily Statesman* of that city the article published in THE CIRCULAR-WEEKLY giving the history of the Lemoine case from the time this swindler began to put forth his claim to make diamonds in 1905 up to the time that he exposed himself by skipping out of the jurisdiction of the court.

In the matter of the bankruptcy of the Greenbrier Jewelry Co., Marlinton, W. Va., and of G. L. Eakle and W. R. Sutton, the partners of the concern, the final meeting of the creditors has been called at the office of Referee W. G. Mathews in the Citizens' National Bank building, Charleston, W. Va., for July 28, at 11 A. M. At that meeting the trustee's final report will be submitted and a dividend declared and paid.

The will of the late Henry C. Klein, Muncie, Ind., was recently admitted to probate. To the deceased's widow was left block known as No. 4 and block No. 3 in the school section of the town and all the buildings and improvements thereon. The remainder of the property, real and personal, was bequeathed to Mr. Klein's four sons. Madison C. Klein, a brother of the deceased, and Edward A. Klein, a son, were named as testators of the will.

A dispatch from Paris, July 4, stated that a daring attempt had been made to rob the establishment of the well-known jeweler, M. Henri Sandoz, 24 Ave. de l'Opera. The thieves succeeded in concealing themselves in a vast unoccupied flat above the jeweler's shop. Knowing that the shop would be closed over Sunday, they bored a large hole through the roof into the shop, but found that all the jewelry had been taken from the windows and locked in the safe. They were preparing to dynamite the safe when apparently they were disturbed by the ringing of electric alarm signals, and decamped. The safe contained $1,750,000 worth of jewels.

The following traveling representatives were in Los Angeles, Cal., recently: H. C. Van Ness and Arthur Van Ness, Carl Platte, Julius Young and Joseph Brennan, all of San Francisco, Cal.

P. W. Harrison, representing Deykin & Harrison, London, Eng., was in Toronto, Ont., last week, in the course of his initial trip through Canada. S. B. Graham, W. R. Humphrey, Sheffield, Eng., also called on the trade there.

Traveling representatives who called on the Indianapolis, Ind., trade, recently, were: Rudolph Bruening, Schrader-Wittstein Co.; John F. Garland, Keller Jewelry Mfg. Co.; Jack Thompson, J. B. Bowden & Co.; Ferd. Phillips, Richter & Phillips; Alexander N. Thanhauser, Wolfsheim & Sachs.

Traveling representatives who called on the trade in Omaha, Nebr., during the past week, were: K. D. Yeaton, S. Sternau & Co.; Leo Cahn, F. De Simone & Son; Robert E. Kehl, F. H. Noble & Co.; Leopold Heyman, Stern Bros. & Co.; Frank I. Locklin, Battin & Co.; W. A. Moore, William Dixon, Inc.

Among the traveling representatives who visited the trade at Pittsburg, Pa., last week, were the following: D. Skutch, New Haven Clock Co.; Charles S. Miller, Ansonia Clock Co.; E. C. Stockton, E. Ingraham Co.; Joseph Phillips, Hipp. Didisheim & Bro.; L. H. Carpenter, Chas. E. Hancock Co.

The following traveling representatives visited the trade in Lancaster, Pa., recently: C. C. Sulzenberger, M. J. Averbeck; M. Adels, M. Adels & Co.; R. H. Claxton, Dennison Mfg. Co.; H. J. Fink, Jonas Kolb; Harry A. Platt, Rees & Yankauer; Lawrence C. May, Moskowitz Bros.; Harry Caro, Manchester Mfg. Co.; H. C. Kionka, H. C. Kionka & Co.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: Robert Kehl, F. H. Noble & Co.; John Garland, L. H. Keller Jewelry Co.; William A. Lamb, Geo. H. Fuller & Son Co.; Barney Hyman, Hirsh & Hyman; Edwin S. Strauss, Jacob Strauss & Sons; V. B. Carmichael, Bride & Tinckler; Henry W. Sherrill, Sinnock & Sherrill.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: Mr. Van Sant, Moore & Son; I. W. Rice, Stein & Gray; A. R. Bennett, Waite, Mathewson & Co.; Charles Sweet, R. F. Simmons Co.; W. M. Davidson, J. W. Forsinger; Millard E. Heise, Langfeld Bros. & Co.; H. W. Raymond, Worthington & Raymond; D. Wile, Buffalo Jewelry Case Co.

The following traveling representatives were in Savannah Ga., recently: W. C. Sharkey, Leroy Mfg. Co.; Frank W. Levy, Kiel & Arthe Co.; E. V. Bogart, Dennison Mfg. Co.; Morris Lissauer, Zach. A. Oppenheimer, H. H. Day, Day, Clark & Co.; John E. Valk, N. H. White & Co.; Thomas F. Fleming, Jones & Woodland Co.; Arthur Totten, Sansbury & Nellis; Oscar S. Schmidt, Moore & Son; V. A. Picard, Pryor Mfg. Co.; F. E. Finerty, T. B. Clark & Co.

Traveling salesmen visiting Boston, Mass., during the week, included: C. H. Crane, Strobell & Crane; L. P. Clark, Cory Bros. Co.; E. Cooper Stone, Jones & Woodland Co.; Joseph Keller, Keller Mfg. Co.; Alex. C. Chase; Henry G. Thresher, Waite-Thresher Co.; John Abel, Abel Bros. Co.; George L. Sweet, International Silver Co.; George Merrill, Merrill Bros.; Ed. Egfeldt, Egfeldt & Ackley, Victor L. Burgesser, Krementz & Co.; Louis Nordlinger, L. & M. Kahn & Co.

A petition in bankruptcy was recently filed against the Pittston Cut Glass Co., of Pittston, Pa., by the H. C. Fry Cut Glass Co., Rochester, Pa. The usual allegations of bankruptcy were made and also the claim that the defendant was seeking to give preference to a bank which holds notes aggregating $11,400.

What is Epidote ?

If you wish to know something about the new American Cabochon stone we will be glad to send you a descriptive leaflet.

Philadelphia

Marcus Golden, watchmaker, resigned his position, last week, with Wm. G. Earle, 11 N. 9th St.

Wm. Naltz, formerly of Perkasie, Pa., lately with John Ross, 1602 Market St., has resigned his position.

Frederick W. Schuler, president of the Philadelphia College of Horology, has opened his cottage at Wildwood, N. J., for the Summer.

Wm. H. Doebele, manufacturing jeweler and diamond importer, 722 Sansom St., expects soon to move into his new building at 803 Sansom St.

Joseph Wachs, with J. F. Neill, manufacturing optician, 727 Sansom St., left, last week, for a fortnight's vacation trip to the Delaware Water Gap.

F. C. Bode, Jr., retailer, 1804 Market St., has removed with his family to Ocean City, N. J., where he has taken a cottage for the balance of the season.

The Koshland & Italie Co. has completed attractive alterations and improvements to its quarters at 7th and Chestnut Sts.

Charles H. Dean, diamond broker, proposes to retain his headquarters at 717 Sansom St., although opening soon an attractive store on 8th St., above Sansom St.

Chas. S. Kepner, Chester, Pa., returned, last week, from an extended fishing trip to Lewistown, Pa., but left soon afterward to finish his Summer holidays at Asbury Park, N. J.

Among the manufacturers' agents here, last week, were: Wm. R. Cobb, jewelers' findings, Providence, R. I., and C. H. Butts, with George H. Fuller Sons' Co., Pawtucket, R. I.

Jeweler Kratz, Souderton, Pa., moved, last week, into his new store in Souderton. The new place is regarded as one of the most attractive retail jewelry stores in that section of the State.

F. Herman Voigt, a veteran watchmaker, 7th and Sansom Sts., is still confined to his home as the result of injuries received April 11, when a falling business sign knocked him senseless.

John E. Fisher, with Richard M. Cooper & Son, wholesale jewelers, 722 Sansom St., was seriously injured, last week, by being run over by an automobile. He was removed to the Hahnemann Hospital.

Actual work upon the alteration of the old Muhr building, once a beehive for watchmakers, at Broad and Race Sts., to fit it for occupancy by the Scottish Rite Consistory Masons, is soon to be started.

Miss Martha Moock, associated in business with her father, Otto T. Moock, manufacturing jeweler, 809 Sansom St., will take an extended vacation trip to Niagara Falls and Canadian resorts, about Aug. 1.

A hearing on the application of Gabriel H. Mayer, trading as George Mayer & Co., wholesale opticians, 728 Sansom St., for discharge from bankruptcy, has been fixed for Aug. 5 in the United States District Court.

E. L. Thomas, Phoenixville, Pa.; Albert Roberts, Trenton, N. J., and E. K. Bean, Lansdale, Pa.; M. E. Hunter, Beverly, N. J.; H. S. Kratz, Souderton, Pa., were among the out-of-town retailers purchasing here, last week.

Emil Bracher, formerly in the wholesale business for himself in this city, and at one time a manufacturing jeweler of Newark, accepted a position, last week, with the H. S. Meiskey Co., Lancaster, Pa., and will represent the house on the road.

Howard Claus, with C. R. Dankworth, manufacturing jeweler, 725 Sansom St., has completely recovered from a bullet wound in his hand received in celebrating July 4. The danger of tetanus was averted by persistent treatment at the Jefferson Hospital.

Charles F. Kuhn, E. E. Sanborn & Son, and O. E. Sanborn, retail jewelers, on Callowhill St., in the path of the boulevard to Fairmount Park, were awarded damages, last week in liberal amounts by the road jury, appointed to assess the damages of property owners.

The reception committee, which will have charge of entertaining the visitors at the convention of the Pennsylvania Retail Jewelers' Association, to be held in this city early in August, at the time of the convention of the American Association of Opticians, has gotten down to work and is now arranging and discussing plans for making this convention one of the most interesting and successful in the history of the association. The committee met at the Jewelers' Club on the evening of July 14, and organized with Ira G. Garman as chairman, L. P. White as treasurer and Charles H. Hamer as secretary. The representatives of the wholesale trade present were: Fred. B. Hurlbut, L. P. White, Mr. Nusselman and Mr. Cobb, while the retailers present included: Messrs. Garman, Davis, Haines, Saunders, Seltzer, Swartz and Hamer. The following members were appointed a committee to secure new members and contributions for the convention: J. V. Buzby, F. C. Bode, I. Bedichimer, M. J. Darevski, J. Warner Hutchins, J. B. Janssen, Frank Kind, Chas. B. Lynch, T. C. Mitchell, C. S. Powell, R. L. Saunders, C. R. Smith and Sons, H. F. Seltzer, Wm. H. Thompson, Jr., Riggs & Bro., Wm. Gibbons and Mr. Davis. After going over several matters of interest, the committee adjourned to meet Tuesday, July 28, at 2.30 P. M., at the Jewelers' Club.

Buffalo, N. Y.

Jewelers on Broadway, Genesee and Williams Sts., have signed an agreement to keep their stores open Monday and Saturday nights during July and August, but to close on other days at 6 P. M.

A fire that broke out early last week at 217 Genesee St., resulted in a loss of about $500 to Henry Prussmann, whose store is at 213 Genesee St. The damage done at Mr. Prussmann's store was principally by smoke.

Danner & Co., of this city, have been incorporated under New York State laws to manufacture and deal in jewelry, with a capital of $10,000. The incorporators are: Philip Danner, H. Kelsey and T. H. Noonan, all of this city.

Isaac Goldberg, New York, reported to the police of this city, recently, that he had been "flim-flammed" out of a diamond ring and gold watch by two men who were offering diamond earrings for sale. He parted with his watch and ring for the property only to find that the earrings which he received were imitation diamonds.

The premises of the Empire Jewelry Case Co., 150 Clinton St., were broken into by burglars, one night recently, and, although the place was evidently thoroughly ransacked, an investigation showed that nothing of value had been taken. The burglary was discovered when the store was opened on the following day. The police were notified but as yet there is no clue to the perpetrators of the burglary.

New Orleans, La.

The police are still looking for the thieves who recently smashed the show window in the establishment of J. Julius Weinfurter and stole six cheap watches valued at about $2 each. No clue to the robbers has been obtained.

Chas. E. Schoeber, whose death, July 4, was announced in the last issue of THE CIRCULAR-WEEKLY, had been known as one of the best known diamond setters in this town and had learned the business while employed by Leonard Krower. He later was employed by A. B. Griswold until his health broke down. He was a prominent member of the Druids, which organization had charge of the funeral services. The interment was in St. Vincent Cemetery.

Hutchinson Bros., Shreveport, La., are forming a corporation under the old firm style and have applied for a charter under which their jewelry, music and instrument business will be continued. The capital of the corporation is fixed at $100,000, of which $65,000 has been paid in. John B. Hutchinson is president of the concern, T. S. Hutchinson the vice-president, and J. W. Flournoy secretary and treasurer. The officers with C. M. Hutchinson and W. J. Hutchinson, Jr., compose the first board of directors.

Word was received from Lafayette, last week, to the effect that P. T. Shirkey, the jeweler, who had been employed for the past six months by T. M. Biossatt, had committed suicide by taking cyanide of potassium, the body being found a mile from the town. Mr. Shirkey, who was about 55 years of age, came from Olean, N. Y., and recently married a resident of Lafayette. He was a skilled workman, was apparently happy and no reason can be assigned for his act. He leaves practically everything to his second wife. He is survived also by two children at Olean, N. Y.

Baltimore.

A. Levine has filed a voluntary petition in bankruptcy.

Lemmert & Schmeltz is the firm style of the business formerly conducted under the name of August Lemmert.

Charles B. Keller, watchmaker for F. J. Euler, was married on Tuesday, of last week, and is now on his honeymoon.

Lancaster, Pa.

J. F. Costard, the engraver, is on a fishing trip to the Susquehanna River.

Charles Flora, watchmaker, formerly of King's Bridge, Pa., has opened a shop at Bismark, Pa.

F. A. Wheeler and C. E. Foose, of the Non-Retailing Co., have started off for their regular Fall trip.

Robert Zanker, a jeweler, of Marietta, this county, is laid up with an injured foot, the result of a fall from a fruit tree.

Elmer Pierce, late of Chambersburg, Pa., where he was watchmaker for C. A. Shinnaman, is in Lancaster, where he expects to reside.

G. William Reisner visited New York, last week. Logan White, enameler and engraver for Mr. Reisner, is at his camp on the Pequa.

E. N. Faegly, watchmaker for S. Kurtz Zook, is at Atlantic City, and Walter Cahill, clockmaker, is also off on his vacation. Elmer P. Shertzer, jeweler for T. Wilson Dubbs, has been spending his vacation at Harford, Md.

Juan A. Garcia, of Albuquerque, N. Mex., having finished a course in watchmaking and jewelry work at the technical school, has taken a position with George W. Mergenthaler, of Fostoria, O. Andrew Koleser, with an Easton, Pa., jeweler, is taking a course in engraving at the school.

T. Wilson Dubbs discovered a suspicious character about the residence of Frank L. Kraushop, a neighbor, on the night of July 15, notified the police and they arrested him. The man, who was provided with the articles used for housebreaking, was promptly jailed for attempted burglary. The prisoner was formerly employed at the Hamilton Watch Co.'s factory.

A telegram received last week by the brother of James H. Donnelly, a representative of Spoehnle & Co., Chicago, whose home is in Lancaster, stated that a short time before he had been run down in Portland, Ore., by the automobile of former United States Senator Simon, and his collar bone had been broken. He was in a Portland hospital at the date of the telegram.

Among the jewelers visiting Lancaster recently were: H. L. Oberlin, Aberlin Bros., and Frederick Kaufhold, Columbia, Pa.; M. H. Gehman, Terre Hill, Pa.; Max Baumiller, Washington, D. C.; C. E. Hinkle and J. M. Kreider, Ephrata, Pa.; Henry Wertsch, Lititz, Pa.; Arthur P. Campbell, Philadelphia, Pa.; Stuart Hemphill, Detroit, Mich.; George L. Hepp, Lititz; A. Frank Maurer, Strasburg, Pa.; William Hoover, with E. G. Hoover, Harrisburg, Pa.

Late patrons of W. T. Garner, who recently closed a shop he had opened here, have heard from him. The man came here several months ago from New York, worked awhile for W. W. Appel and then opened his own shop, but did not prosper. A few days ago Marcus Edelstein, jeweler, received a letter from Gardner, saying he was located at 124 N. Burdick St., Kalamazoo, Mich., asking that inquiring patrons be given his address, as they could get their jewelry on sending him the charges. His more prudent customers will arrange to receive their property C. O. D.

Pittsburg.

E. P. Roberts and Mrs. Roberts expect to leave in a few days for Europe.

Clarence Brush is visiting in Philadelphia and H. F. Borland is spending several weeks at Chautauqua.

Capt. William Klein expects to go to camp early in August with the Washington Infantry, of which he is commander.

George W. White, of West, White & Christy, has bought a handsome horse and buggy, which he presented to his wife as a present.

Sol. Cerf, of Sol. Cerf & Co., has returned from a business trip to New York and a 10 days' stay at Atlantic City. His son Howard is also home from the Freehold Military Academy, of Freehold, N. J.

The W. J. Johnston Co. employes recently defeated the E. P. Roberts & Sons Co. employes in a match game of ball played on the Western University grounds, by the score of 13 to 3. The players had a great time.

J. T. Montgomery, who was Pittsburg manager for M. A. Mead & Co., has located in New York and is manager for the same firm in the metropolis, and has gone there to conduct the business. W. C. Owen, who is now the Pittsburg manager of the firm, reports business improving steadily in this territory.

Frank Yaseen, a prominent young member of the jewelry trade at Berwick, Pa., has been put into bankruptcy and the personal property of his estate is to be sold by the receiver in charge. Mr. Yaseen has been in business in Berwick since 1905, in which year he came here from Pittston, where his father and brother are both in business.

George L. Neudorfer, formerly with the Geo. B. Barrett Co., is now city and local salesman for the Marsh, Brown & Mather Co. Paul I. Butler, who also was with the Barrett house, is assisting the Marsh, Brown & Mather Co. for the present. J. R. Brown has gone to the Lakes to spend his vacation. W. W. Mather, of the firm, was injured on July 4 by an exploding roman candle. His right hand was badly burned.

An information has been made against S. K. Reich, "the short change swindler," whose escapades have been published in THE CIRCULAR-WEEKLY and who was recently arrested in New York State and is awaiting trial in Brooklyn, by J. Bain, of 1015 Wylie Ave. Mr. Bain says he was the victim of Reich for the sum of $900 and over. Reich will be brought to Pittsburg and prosecuted just as soon as the charges in other States are disposed of.

The handsome Jules Jurgensen minute repeating striking watch presented to Hans Wagner, of the Pittsburg Ball Club, National League, was bought from the Hardy & Hayes Co., at a cost of $625, and was the gift of admiring friends of the champion batter of the league. The Hardy & Hayes Co. donated personally the handsome solid gold chain which was attached to the watch. The following was inscribed on the inside of the case: "Hans Wagner, from his friends and associates, July 17, 1907." The money was raised by subscription, collected by the Pittsburg *Dispatch*. The watch was exhibited in the Hardy & Hayes Co.'s window for several days and attracted great crowds.

The Pittsburg Chamber of Commerce in order to boom trade with Pittsburg merchants is arranging to run another of its famous trade extension excursions into Ohio and West Virginia, leaving Pittsburg Sept. 15. The merchants will travel in a special train of Pullman sleepers and dining cars. W. H. Neely is chairman of the Trade Extension Committee. The itinerary includes stops at McDonald, Cadiz, Dennison, New Philadelphia, Canal Dover, Newcomerstown, Coshocton, Newark, Zanesville, Malta, Waterford, Parkersburg, Marietta, Caldwell, Pleasant City, Cambridge, Barnesville, Sistersville, New Martinsville, Moundsville, Wheeling, Bellaire and Martins Ferry.

A meeting of the creditors of Charles H. Allen, of Turtle Creek, Pa., was held in a Pittsburg attorney's office in the Frick building, a short time ago, and about 90 per cent. of the claims were represented. It was shown by Mr. Allen that his assets amounted to $9,500, and his liabilities $7,200. The creditors showed a disposition to extend Mr. Allen additional time in order to enable him to get out of his present entangled position. He has a number of eastern creditors and several Pittsburg creditors, and most all of the eastern houses were represented through the Jewelers Board of Trade. Mr. Allen explained that he, like other merchants of Turtle Creek, which is a manufacturing community, had been hard hit because of the recent business depression, and all he needed was time to pay his debts. He has property in addition to his stock, and it is believed here that satisfactory arrangements will be made to extend him the nccessary time in order to enable him to pay his creditors.

Robert F. Kent, who pleaded guilty to robbing the store of Sol. Cerf & Co., was sentenced last week to the penitentiary for 10 years by Judge Josiah Cohen. Kent's "pal," F. Mason, who betrayed him, was sent to prison for three years, because of the State of his health. Kent was captured in Chicago after a long chase, as has already been told in THE CIRCULAR-WEEKLY. The Cerf establishment was protected by an electric protective system, and it appears that when Kent sawed through the skylight an alarm was sent in. The boy who responded, reported that he thought the alarm had been set off because of the cold weather. The man was in the store when the messenger arrived, but was working behind the counter, emptying the show cases of all the goods, and the boy could not see him. The jewelry firm, however, did not sustain any loss because of the robbery, the protective company having settled for the loss of the jewelry. Kent pleaded guilty to the theft, but denied having robbed other stores.

The Daynes Jewelry Co., Salt Lake City, Utah, has been incorporated with a capital stock of $50,000, composed of 500 shares of the par value $100. The officers are: President, J. C. Cutler; vice-president, J. Fred. Daynes; treasurer, Edgar S. Hills; secretary, Royal W. Daynes. These, with John R. Winder, John Q. Critchlow and L. W. Snow, are the directors.

Connecticut.

H. L. Wallace and Floyd Wallace, Wallingford, returned home about a week ago, from a pleasure trip to Virginia.

Henry Norton was in Saratoga, recently, on a business trip in the interests of the R. Wallace & Sons Mfg. Co., Wallingford.

G. P. Ittig has assigned to the E. H. H. Smith Silver Co., of Bridgeport, a novel design for the handles of spoons, forks, etc.

Displayed recently in the show window in the store of W. L. Smith, Seymour, was a specimen of a rare and curious plant known as the night blooming cereus.

Wm. H. Lyon, Gilbert Rogers, C. B. Rogers, George Wilcox and Charles C. Dodd were elected trustees at the annual meeting, July 14, of the Meriden City Savings Bank.

President Walter Camp, of the New Haven Clock Co., who has been at Pine Orchard, New Haven, ever since the college closed, left Thursday for the White Mountains, where he will spend three weeks.

The entire plant of the Sessions Clock Co., Forestville, resumed operations July 14, after having been closed for two weeks, for inventory. The concern will shortly begin the manufacture of marine clocks.

Henry M. Mather, a retired jeweler of Meriden, returned recently from a pleasure trip to Florida. Mr. Mather is engaged extensively in the growing of oranges and grape fruit in Bradentown, which is about 65 miles below Tampa.

Major Wm. H. Lyon, manager of the Chas. Parker Co., Meriden, was among those who attended the recent annual outing of the Manufacturers' Association of the city of Bridgeport. The outing was held at River Cliff, Milford.

The Waterbury Enameling Co. was recently organized in Waterbury, with a capital of $5,000, to engage in the manufacture of watch dials, indicator dials, etc. Herbert J. Phillips, manager of the concern, was for several years a foreman for the Waterbury Clock Co.

Ira E. Richmond, for several years engaged in business as an optician at New Haven, died on Tuesday, of last week, at the residence of his daughter. The deceased was 73 years of age and was born in Meriden. He is survived by his widow, one son and a daughter.

Horace G. Brown, at one time in the employ of the Upson & Merriman Clock Co., Bristol, and later employed at Chauncey Jerome's clock factory, died at his home, Wednesday morning, of apoplexy, in his 87th year. The deceased was born in Ware Village, Mass.

The police have thus far obtained no clue to the thief who, a short time ago, broke the plate glass window in the store of Frank J. Dahlmeyer, 903 Grand Ave., New Haven, and stole five watches. The adjoining show window contained the most valuable jewelry, but this was undisturbed by the vandal.

At the recent annual meeting of the Dime Savings Bank in Wallingford, Charles D. Morris was elected second vice-president. Among the directors appointed were the following, who are also well known in the jewelry trade: Albert Judd, George D. Munson and C. D. Morris.

Boston.

M. Myers will start shortly after Aug. 1 on a trip to the Pacific Coast.

M. S. Houlder, formerly with C. W. Sweetland & Son, is now with the C. G. Aldrich Co.

C. W. Davidson, president of the Thomas Long Co., has been at North Truro for a brief outing.

J. Herbert Weidhorn, formerly of Malden, has removed to this city and opened a store on Cambridge St.

E. L. Britt, a local jeweler, made a run from this city to St. John, N. B., in his steam runabout recently.

I. Warshauer goes this week to western Massachusetts and will visit the principal cities in the Berkshire Hills region.

Eli J. Boyce, formerly in business on Bromfield St., is now associated with his son, John W. Boyce, of the Washington building.

Sam Mendelsohn, accompanied by Mrs. Mendelsohn, is on a trip to eastern Maine Summer resorts. Their marriage took place in New York, July 5.

Freeman & Taylor, of 61 Temple Pl., who will retire from business at the close of the month, are disposing of the balance of their stock at auction.

John W. Boyce has been in camp during the past week at South Framingham, on a tour of duty with Troop A Cavalry, of the State militia, of which he is a member.

The assignment is announced of Abby N. Hill, a Lynn retail jeweler, whose liabilities are given as $1,600 and assets $600. An offer of 30 cents on the dollar has been made to the creditors.

The Geo. E. Smith Co., to deal in jewelry, has been incorporated with a capital of $10,000. The officers are: President and treasurer, Geo. E. Smith, Dorchester; clerk, Roxana A. Worcester, Boston.

The Mendelsohn Co. has been formed to carry on the jewelry business in the quarters occupied by the lately failed firm of Mendelsohn Bros. A. Mendelsohn, of the old firm, is the principal owner of the new one.

C. G. Aldrich returned, recently, from Winsted, Conn., where he is interested in the Aldrich-Murphy Co. The Winsted concern has just completed extensive alterations in the store interior, enlarging it and improving it materially.

David Mendelsohn, for the past 10 years with A. Mendelsohn and Mendelsohn Bros., will be located hereafter in the Paddock building on Tremont St., room 307, as the general manager of the Majestic Mfg. Co., a new concern in the jewelry line.

Arthur H. Clark, of the material department of the C. B. Norton Jewelry Co., Kansas City, was in Boston during the week. Other jewelry trade visitors included: A. B. Chapin, Worcester; S. P. Proodian, also of Worcester, and John Schneider, Lawrence.

Preparations are being made at Salem for the presentation of a silver service from the citizens to the United States Cruiser *Salem*, which was recently launched, and will visit the port during the city's "old home week" celebration, by courtesy of the Navy Department. The silverware will be made by Daniel Low & Co., of that city, and will cost upward of $2,000. The salver will have for its central design an etching of the famous frigate *Essex*, which was launched at Winter Island in Salem harbor on Sept. 30, 1799, having been built by the citizens of the then flourishing and wealthy port at an expense of $95,000 and presented to the government by them.

North Attleboro

Samuel E. Fisher is enjoying a vacation at Centerville.

Edward D. Sturtevant is spending the month of August at York Beach, Me.

A. B. Chace left Wednesday night on a western trip for Mandalien & Hawkins.

William O. Wray was in New York last week on business for R. Blackinton & Co.

Harold Totten, Ypsilanti, Mich., former western salesman for F. M. Whiting & Co., is the guest of Alton H. Riley.

William Lally, superintendent for Bliss & Co., of Meriden, Conn., was the guest the past two weeks of local friends.

William F. Maintien, of Maintien Bros. & Elliot, is enjoying a two weeks' automobile trip with his family in the White Mountains of New Hampshire.

Andrew B. Flagg will be one of the traveling representatives of the A. B. Lindroth Co., the new concern which has engaged large quarters in the Company Shops.

One of the local concerns reports the biggest order last week that it has received since its formation. The order was not confined to any special article, but embraced various kinds.

The firms located in the Riley & French building on Broad St., will close Aug. 1. The concerns affected are: Riley & French, W. & S. Blackinton Co., G. C. Hudson & Co. and C. Ray Randall & Co.

The jewelry plant of the W. A. Reed Co., of Providence, was sold at public auction last week. It was bid in by A. T. Wall, Providence, who it is thought was acting for John S. Jackson, one of the partners. Several North Attleboro business men were present intending to bid, but the announcement that the purchaser would be obliged to move by Aug. 1 had a dampening effect. The Reed Co. is the concern that Arthur P. Watson, of this town, intended some months ago to take over, but was prevented by unforeseen circumstances.

Washington, D. C.

Mr. and Miss Desio, of Victor E. Desio & Co., 1107 7th St., went to New York, last week, on a buying trip.

Henry Heureux, a manufacturing jeweler of Brussels, Belgium, who is making a tour of the United States, was in this city last week, stopping at the Raleigh Hotel, and an interview with him comparing the progressiveness of the American and Belgium people was published in a recent issue of the Washington *Herald*.

Abe Fineberg, charged with stealing diamonds worth $2,000, from the New York Loan Office, in Salt Lake City, Utah, last January, was recently arrested at El Paso, Tex., and was taken to Salt Lake City to answer the charge. Fineberg, it is said, admitted his g[illegible]

Attleboro.

TRADE CONDITIONS.

A prominent manufacturer, who is a keen observer of industrial conditions, commenting on the business situation, stated that he predicted that next year would see a record-breaking business for the jewelers. Everything was favorable for this end he added.

G. Fred Perry left Monday on a western trip.

James G. Hill and wife are enjoying an outing in Maine.

Raymond M. Horton, of W. E. Richards & Co., was in New York on business last week.

Representative William C. Lovering visited several of the Attleboro jewelry factories last week.

P. J. Cummings visited New York and other eastern cities the past week in the interests of his concern.

Joseph M. Bates, 2d, was married last Wednesday in Providence to Miss Kate Elizabeth Shaw, of Attleboro.

The D. F. Briggs Co. team beat the Horton, Angell Co. team in the Jewelers' League game, Saturday, by a score of 6 to 5.

Charles P. Keeler, of the McRae & Keeler Co., has returned from a vacation of two weeks passed among the mountains of New Hampshire.

John M. Fisher was honored at the recent National Prohibition Convention at Columbus, O., by election as national committeeman from Massachusetts.

Lester W. Nerney, son of William Nerney, was married last Wednesday to Miss Gladys Angell. The wedding took place at the home of the groom.

A. S. Ingraham is moving the house from the lot on the corner of Dunham and Union Sts., where he proposes to erect his new shop. The plans for the factory are expected to be out the latter part of the week.

A second continuance was granted in the Sixth District Court of Providence, Friday, in the case of John Nelson, charged with receiving stolen goods from the factory of the Fontneau & Cook Co. The trial is now set for July 24.

Col. Sidney O. Bigney will be tendered a dinner at the Vendome Hotel, Boston, Thursday evening, previous to his departure for Cincinnati, where he will be a member of the committee that notifies William H. Taft of his nomination for President.

A progressive report is that submitted by Edward A. Sweeney to the Commissioner of Corporations for W. H. Wilmarth & Co. The figures are: Machinery, $45,450; cash and debts receivable, $14,936; manufactures and merchandise, $41,188; total, $101,574. Capital stock, $60,000; accounts payable, $10,653; surplus, $30,921; total, $101,574.

The Attleboro *Sun* in a lengthy editorial urges the formation of a Board of Trade, which would assist in the advancement of the town. The contemplated removal out of town of two firms located in the Steam Power building and the threatened loss of another firm with a payroll of $100,000 a year are cited as examples of where such an organization would be able to do good work to say nothing of what might be accomplished in the bringing of new interests to town.

GORHAM SILVER

THE BEST IS NONE TOO GOOD

¶ The Jeweler of discretion concerns himself with only the best quality of silverware, for that, and that alone, is demanded of him by the most desirable class of his customers.

¶ It requires no argument on his part to establish the pre-eminent quality of Gorham Silverware, for this has a reputation extending over three-quarters of a century to commend it.

¶ Yet the advantages arising from these years of strenuous endeavor are placed freely and unrestrictedly at the service of the Jeweler whose stock consists of Gorham Silverware. Despite its recognized superiority it costs no more than wares which lack the prestige conferred by the Gorham name and trade-mark.

Troubles of the Jewelers During the Recent Floods 95

A REPORT from London, July 15, stated that a state monopoly in platinum is proposed by the Russian Minister of Finance, and that if this is accomplished the price of the material will be almost doubled, as Russia is the greatest producer of platnium to-day. Whether the report is inspired for the purpose of having an effect upon the market for the material, or is advance information as to the Russian Government's intention remains yet to be seen. If the latter, the effect will prove far more serious to the electrical industry in which platinum has come to play a most important part, than into the jewelry trade, though, of course, the latter will be affected to some extent.

OUR Consul-General at Rio de Janeiro, Brazil, George E. Andreson, reports that the importation of American watches and clocks greatly increased during the year 1907. The American watches in that year amounted to $42,203 and the clocks $67,202, as against $25,806 and $57,459 in the year 1906. This was in greater ratio than the increase in the importations from all other countries, the total watches increasing from $224,000 in 1906 to $311,918 in 1907, and the clocks from $114,283 in 1906 to $144,090 in 1907. While the proportion of the American product to the whole importation is not quite as satisfactory as we should wish to see it, the increase noted in our product is very gratifying, and it is to be hoped that it will continue. The consul's figures also help to call attention to the fact that Brazil is a big field for our exports, and one well worthy of cultivation.

Another Valueless Discovery.

NEWSPAPERS, last week, gave some prominence to a dispatch from Vienna and London, announcing the details of an experiment by a professor of the University of Vienna in regard to the effect produced on precious stones by radium. In brief it was to the effect that rubies and diamonds were affected but slightly, that blue sapphires turned paler, but did not change in hue as other investigators had asserted, and that the emerald's hue turned to a yellowish green. While the report, if true, may be interesting from a scientific standpoint, there is nothing in the experiments of any commercial value whatsoever, inasmuch as the facts so far made public simply indicate that the Vienna professor was able to alter the color of the stones in a way that would make them less valuable as gems than they were before.

Fortunately the newspapers seem to be learning their lesson in accuracy, and for once failed to announce that "this scientific experiment would have a most material effect upon the gem market."

Again the Dummy Clock Hand Story.

DESPITE the many times that that pretty fairy story to the effect that the dummy clock's hands point to 18 minutes after 8 to indicate the time that Lincoln was shot, has been explained by THE CIRCULAR-WEEKLY and other journals, it seems that this piece of fiction will not die, but continues to bob up from time to time in the daily press and start upon a new lease of life. One of the latest stories of this kind appeared early this month in the St. Joseph *Press*, which published a brief article on the subject, crediting the information to "a Felix St. jeweler," whose name is not given. It is hoped that the source of the story at least is fictitious and that no member of the trade is responsible for again starting this senseless canard.

Had the newspaper which published the story referred to any history it would have seen that Lincoln was shot about 9 P. M. and died between 10 and 11 A. M. on the following day; also that there are in existence to-day dummy clocks with the 18-minutes-after-8 position for the hands which were painted before Abraham Lincoln was ever heard of.

Any business will grow under the influence of plenty of good advertising.

Regulation of "Solid Gold" Marks.

AN interesting topic for discussion at various State conventions of the retail jewelers has been the question of amending the National Stamping Law by regulating the use of the term "solid gold" as a quality mark on the gold on which it may be stamped, but we fail to have heard from one of the supporters of an amendment which was drawn on behalf of the national association, an argument in favor of permitting 10-karat gold to be thus stamped and forbidding the words to be used on lower quality material, that is absolutely convincing and logical on all points. While there is much to be said in favor of the limitation to 10-karat, at the same time it has been well pointed out by some of the speakers that an amendment of this character leaves much to be desired, as it would *minimize* instead of *abolish* the fraud often committed by unscrupulous dealers upon the purchaser of such articles.

Logically the men who have contended that "solid gold" is in no way a *quality* mark, but applies to the constituency of the material of which the article is composed, seem to have the better of the argument because the word "solid" seems to more differentiate the word from "hollow," "filled" or "plate" than it does to indicate the quality of the metal. Another point raised by one of the speakers in a very clever address was that if the words "solid gold "are properly applicable to articles containing 10 parts gold and 14 parts copper, then by exactly the same reasoning "solid copper" should be used to designate articles composed of 14 parts gold and 10 parts copper. If an article is all gold, is it not, some say, as much gold if it is six, eight or 10 karat fine as if it is 10, 14 and 18 karat

ON MEMORANDUM

CROSS & BEGUELIN

Good Gold Jewelry

It's the only kind we make

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." ¶ OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

fine? As far as the word "solid" is concerned there is logic in the contention—the trouble is not there, but with the word "gold."

As a matter of fact there have been few arguments advanced that have given any substantial reason at all for the use of the word "solid" in connection with the word gold. If, as some contend, an article will sell better to the public if it is marked "solid gold" than if it is marked 10-karat, that means that the buyer considers "solid gold" better than 10-karat gold, and a man who buys an article so marked is deceived whether by his own ignorance or the sharp practice of the dealer who sells him. If the word has a quality meaning in the minds of the public it has probably a meaning synonymous with the "highest quality," and this may be due to the fact that the silver laws of many States provide that solid silver is 900 fine (and in some cases 925 fine), making the term synonymous with the terms "coin" and "sterling." If it be true that such a quality meaning is given by the buying public to-day to "solid gold," then to permit it to be stamped upon 10-karat gold would permit a large amount of deception, while if it has no meaning to the public the arguments in favor of drawing the line of demarcation at 10-karat would appear very weak.

Is not the solution of the whole difficulty to be found in following the suggestion of the Missouri retail jewelers and drop the word "solid" as applied to gold of any quality, and also by amending the law (if an amendment of this kind is necessary) to cover the use of the word gold alone or in conjunction with any other words, and prohibiting it being stamped on any articles that will not assay 10-karat or more, *i. e.*, upon gold that will not stand the acid test?

Rochester.

Involuntary bankruptcy proceedings were begun recently by Philip Present, Duffy-McInnerney Co. and the Union Clothing Co. against Davis L. Fleisher, 51 Joiner St., the usual allegations being made.

It is reported from Springfield, Mo., that a suit brought by Samuel Gordon & Co., wholesale jewelers of this city, against Miss Nellie Cordz, as surety, had been decided against the jewelry firm by the jury in that town. The defendant was surety for her son-in-law, G. E. Ward, and the dispute was over a credit of $300 on a bill by Gordon. Gordon claimed that the credit on the bill was forged on the bill, but the jury decided otherwise.

The suit against the N. Y. C. & H. R. R. to recover the value of two gold breastpins and two gold souvenir spoons which were shipped from Hamilton, N. Y., to this city by J. H. Beebe, was decided by Judge Hebbard, of the Municipal Court, in favor of the railroad, last week, on the contention that in the inventory the goods were classified as books, the company raising the point that the company did not take jewelry as freight and was thus not liable for the loss.

Max Friedman & Bro. have let the contract for a two-story brick store, 50 by 100 feet, to replace the establishment recently destroyed by fire at Barnesboro, Pa.

New York Notes.

Geo. W. Halton, Bowie, Tex., is in town buying his Fall line.

A. Kades, Newburg, N. Y., was among the out-of-town visitors last week.

T. L. Combs, an Omaha, Nebr., jeweler, is spending a vacation in this city.

Chas. C. Mussina, Williamsport, Pa., was registered at a New York hotel, last week.

L. S. Cohen, buyer for the Cohen Co., Richmond, Va., is on a trip to the metropolis.

C. B. Brown, Omaha, Nebr., visited friends in the Maiden Lane district last week.

R. Brandt, a retail jeweler at Athens, Ga., visited the jewelry district of this city, last week.

J. G. Donovan, of J. G. Donovan & Co., Los Angeles, Cal., was a caller in town last week.

Mr. Lande, of Freudenheim, Levy & Lande, Elmira, N. Y., is visiting friends in New York.

A. D. Garber, a jeweler of Blain, Pa., was among the out-of-town visitors in this city last week.

H. L. Lathrop, of this city, has taken charge of the C. O. Johnson store at Morgan City, La.

Jos. W. Mayer, of the firm of Powers & Mayer, 258 Fifth Ave., has returned from a trip abroad.

George Johnson, Chicago salesman for the C. O. Sweet & Son Co., is stopping in this city for a short time.

Fred Mittlacher, with I. Lewkowitz, Grand St., is spending a two weeks' vacation in the Catskills.

Raymond Horton, of W. E. Richards & Co., Attleboro, was a caller in the Maiden Lane district last week.

Benjamin Rees, of Zimmern, Rees & Co., returned from a trip abroad last week on the *Kaiser Wilhelm II.*

Mr. McGowen, local representative for Barden & Hull, Attleboro, Mass., is spending his vacation in Maine.

John Drew, local representative for Parks Bros. & Rogers, Providence, R. I., is enjoying a two weeks' vacation.

Geo. W. Ryan, of the Mawhinney & Ryan Co., Omaha, Nebr., is among the visitors in the Maiden Lane district, this week.

Timothy Tomes, with W. J. Ward, 9 Maiden Lane, returned Monday from a two weeks' vacation at a New Jersey lake.

Geo. Ferris, salesman for R. Blackinton & Co., left the local office, last week, for a trip west, which will take him to the Pacific Coast.

Charles H. Fulhardt, formerly associated with the Dreyfus Mfg. Co., Beekman St., is about to engage in the jobbing business. He will have offices at 170 Broadway.

James L. Hand, Jr., the jewelers' auctioneer, 14 Maiden Lane, New York, has just completed a successful sale, lasting over three months, of the stock of W. A. Sturgeon & Co., Detroit, Mich.

The C. & S. Novelty Co. has been incorporated under the laws of New York State to deal in diamonds, jewelry, cigar cutters, etc., with a capital of $50,000. The incorporators are Harry C. Gomprecht and Solomon Dannenberg, of this city, and Francis Butler, Elizabeth, N. J.

Adam Welch died last week at the home of his sister, Mrs. James Cunningham, 193 Johnson St., Brooklyn. Mr. Welch was engaged in the jewelry business and is survived by four sisters, Mrs. Cunningham, Mrs. William Whoepprecht, Mrs. Charles Essa, and Nellie. Funeral services were held at 2 P. M., last Wednesday. Interment at Holy Cross Cemetery.

Henry Clark, a jeweler, 23 years old, of 54 Cook St., attempted suicide last week at his home in Brooklyn, by drinking nitric acid. His moans were heard by other members of the family who were sitting on the stoop, and they found him in a semi-conscious condition. An ambulance surgeon removed Clark to the hospital, where he is in a serious condition. His family can assign no reason for the man attempting to take his life.

Louis Hinsberger, president of the Greenpoint Cut Glass Works, Greenpoint, N. Y., who resides at 710 Leonard St., departed with his family for Germany, last week, on the steamer *Vaderland.* They will go to Moubron, Loraine, Germany, where they have relatives. Mr. Hinsberger expects to return during the latter part of August, while the rest of the family will extend their visit into September. They were given a cordial send-off by a number of friends, who wished them bon voyage.

Charles Davis Langdon, who was buried, Monday, July 13, afternoon, from his late home, 75 Kosciusko St., Brooklyn, following services conducted by the Rev. Dr. W. W. Wilson, pastor of the DeKalb Ave. M. E. Church, Brooklyn, died the previous Friday at his home. He was born in New York in 1850, and had lived in Brooklyn since he was 25 years, making his home in the Eastern District, where he was formerly active in Republican politics. He had been for some years in the jewelry business. His widow, seven sons and a daughter, survive.

Detective J. H. Keen, of Boston, accompanied by Detective Griffin, of the Central Office, went to 625 Tinton Ave., the Bronx, last Wednesday, and arrested Nathan Shafken, 31 years old, who said he was a jeweler, and for whom Keen had a warrant issued in Boston, charging him with grand larceny. Keen says Shafken has a store at 15 Ingleside St., Boston. He went to a jewelry store owned by James Rapport, at 39 Devon St., Boston, Keen says, and told Rapport that he had a deal on for the sale of a diamond ring and gold watch. Rapport allowed him to take the articles from his (Rapport's) store. The detectives say the diamond ring and watch were found on his person when arrested.

Charles F. Duffy, who has been connected with the firm of Enos Richardson & Co., 23 Maiden Lane, for 40 years, has resigned on account of ill health on the advice of his physician. The firm feels that in parting with the services of Mr. Duffy, it loses one of its most valuable men. Mr. Duffy came with the concern in August, 1867, and by strict attention to his duties, won his way to the front. In February, 1878, he went on the road traveling in the South. He entered the employ of the firm as a boy, and rose to the position of vice-president. During his many years in the trade he has formed a large circle of friends and acquaintances, who will learn of his poor health with regret. He is one of the best known traveling men in the trade. In later years he visited only Philadelphia, Washington and Baltimore.

A petition in bankruptcy was filed in the United States District Court, Brooklyn, Tuesday of last week, by John J. Ashley, Jr., and David S. Merwin, who have been in business under the style of Ashley & Merwin, at 1327 Fulton St., Brooklyn. The schedules show liabilities of $2,681, and assets consisting of stock and fixtures and open accounts of $880. Among the unsecured creditors named are: L. Kroll & Sons, $196; John Keller, $190; James H. Hart, $186; H. J. Meyers, $260; D. C. Dercival & Co., $161; Martin Joost, $110. Mr. Ashley is an optician and originally had charge of the Brooklyn store of H. P. Alexander and was afterward in Paterson, N. J., for the same firm. From 1904 to 1905 he was in business for himself in Paterson, where he discontinued and had space as an optician in the jewelry store of H. J. Meyers, 1201 Broadway, Brooklyn.

It was held last week by the Board of United States General Appraisers that ornamental metal stands, made to hold boxes of safety matches, do not fall within the provision in the Dingley tariff for "smokers' articles." The Jordan Marsh Co., Boston, the importers of the stands, objected to the action of the Custom House authorities in exacting a 60 per cent. duty on the stands under the plea that they came under the paragraph dealing with smokers' articles. Instead, the firm made the claim that the articles should be admitted at 45 per cent., under the provision in the tariff for manufactures of metal. It is stated in the decision for the board written by General Appraiser Hay that there is nothing in the testimony to show that the stands are used chiefly by smokers, while an examination of the articles would not necessarily lead to the conclusion that they are exclusively used as alleged by the government. The Collector is ordered to classify the stands at the lower rate of duty.

There has been on exhibition, during the past week, at the downtown salesrooms of the Gorham Co., 17 Maiden Lane, the Lipton Cup, presented by Sir Thomas Lipton, for an ocean race held under the auspices of the Brooklyn Yacht Club, July 4, 1908. The cup was brought to this city recently by the steamer *New York,* and is very handsome. It is of solid silver with handles and cover on the Tudor style. The cup rests on a round base from which rises a stem enriched with masks of Neptune, and the flags of Great Britain and the United States. The base is relieved by a panel of sea nymphs and Tritons. On the top of the cover rests a ball, representing the terestrial globe, on which stands the figure representing victory and holding a wreath in one hand and a trident in the other. The handles are formed by female figures. The body of the cup is ornamented with shells and marine foliage, and the panel shows relief work, representing an ocean yacht race. The cup bears the following engraving: "The Brooklyn Yacht Club Ocean Race, 1908. Presented by Sir Thomas Lipton, Bart. K C V O." Smaller

(*Continued from page 61.*)

cups for the second, third and fourth prizes are also exhibited by the same house.

Samuel Osterweil, with David Kaiser & Co., is spending a two weeks' vacation at Sea Cliff, L. I.

John Nickell, a jeweler and diamond setter, Chicago, was a caller at the offices of THE CIRCULAR-WEEKLY Monday.

Mr. and Miss Desio, of Victor E. Desio & Co., Washington, D. C., are in New York, this week, purchasing Fall stock.

L. Witsenhausen, T. A. Brennan and E. Weber started Monday to cover their respective territories for the L. Witsenhausen Co.

C. E. Hastings, agent for the Silversmiths' building, 17 Maiden Lane, sailed yesterday on the *Kaiser Wilhelm II.* for Europe.

J. R. Gray, salesman for the Watson & Newell Co., started Monday on a two weeks' vacation. On his return he will start on his Fall trip.

The Greenwich Metal Co. has been incorporated under the laws of New York State to manufacture and deal in buttons and novelties, with a capital of $4,500. The incorporators named are Nathan Roggen, Julius Roggen and Harry Roggen, all of New York.

The big factory of the Ansonia Clock Co., at Seventh Ave. and 12th St., Brooklyn, reopened Monday, after a shut-down of two and one-half weeks. About 1,000 of the hands resumed work. At the factory it was said that the works had not been closed because of business dulness, but, as was customary in the Summer, to overhaul the machinery.

John J. McGrane, a local jeweler and one of the leading Catholic laymen in Brooklyn, has purchased a large building from the Lutherans at Hawthorn, Westchester County, at a cost of $50,000 and presented it to the Salesian Fathers as a novitiate for Italians studying for the priesthood. The present novitiate at Troy, N. Y., will soon be moved to Hawthorn. Mr. McGrane recently left on a pilgrimage to Rome.

The Jewelers' Protective Union has just issued a handsome new certificate of registration. It is printed on heavy white paper and has a dark brown border. At the top is the print of a watchdog guarding a trunk. Two other designs show a salesman with his sample carrier and a salesman checking his trunks. The idea of the designs in the new certificate is to impress upon the members of the union the necessity of care and precaution while traveling.

S. Warren Granbery, of J. A. & S. W. Granbery, 13 Maiden Lane, was the winner of a motor boat race from Marblehead to New Rochelle, which was finished Sunday. He won both the first prize and the time prize. The boat is 40 feet in length. The distance traveled was 270 miles, and the elapsed time for the distance was 32 hours and 33 minutes, and as an allowance was made of 5 hours, 29 minutes and 40 seconds, her corrected time was 27 hours, 3 minutes and 20 seconds. The *Irene II.*, as the boat is named, is a New York boat, entered from the Colonial Yacht Club.

How Ivory Is Purchased in Africa.

THE ordinary price in the interior of Africa for a tusk of 180 pounds is about 120 rupees, or $40. At Mombasa the same tusk would be worth $400 to $500. The ivory varies in price, according to locality and that which is worth 16 cents a pound on Lake Tanganyika will sell for $2.66 a pound at the seacoast, says Frank G. Carpenter, in a letter from Zanzibar. In buying ivory of the natives the current money is American cotton sheeting, which is turned in at the rate of 16 cents a yard. The same cloth sells in Europe for about 4 cents a yard. The European and Indian cloths are cheaper, and the traders try to put them in instead of the American. Many of these cloths come from Bombay. They are so thin that one can see through them. The German cloths are little lighter.

The bulk of the American goods brought into this part of the world is through Europeans. There are some American firms, but the most of the profits of our trade go to outsiders. There is a man at Marseilles who is doing an enormous business in American cottons throughout eastern Africa. He has a branch house here and one at Mombasa, and his agents are traveling through Abyssinia, Somaliland, British East Africa, Uganda and German East Africa. He has his cotton made to order in America in pieces of 42 yards each, and he brings a shipload of about 4,000 tons across the ocean every year. He trades a great deal of American cotton for ivory. The elephants' tusks are carried on the heads of porters down to the coast, or they are brought to Lake Tanganyika and sent to Mombasa by the Uganda Railway.

How the Price of Platinum Has Dropped in the Past Year.

IN view of the reports last week as to chance that platinum prices might double owing to the proposed monopoly by the Russian government, it is interesting to note that a marked decline in the price of platinum has occurred since the beginning of the financial panic last year, causing a drop in the price from $38 to $40 an ounce down to $20 an ounce, the present price at which the metal is selling.

In January, 1907, the price of platinum was at $37 to $38 an ounce. The increase in the price previous to that time was very marked. Fifteen years ago manufacturers can recall that they could buy all the platinum needed at from $8 to $10 an ounce.

M. Cohn, of Belais & Cohn, New York, in speaking of the present price of the metal attributed the decline to the stagnation in business causing a dropping off in the demand. The decline in the price, he said, began with the financial depression and has not as yet revived.

The future price of platinum is an uncertainty, but will depend upon business conditions.

Besides the jewelers other large consumers of platinum are manufacturers of electric, photographic and dental supplies.

Henry Zellenbach, Houston, Tex., is to open a jewelry store in a building now erecting in Hallettsville, Tex.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.

For the sum of $10 (payable in advance), a daily list will be mailed or delivered during the Fall season (July 20 to Dec. 15), to the offices of those desiring this service.

Canada Notes.

D. Ostrosser, of Engelhart, Ont., has assigned to N. L. Martin.

W. G. Kent, of Ambrose Kent & Sons, Toronto, Ont., is taking a month's vacation at Honey Harbor on the Georgian Bay.

White's jewelry store, Grand Forks, B. C., was burned down in an extensive fire which destroyed two and a half blocks of the business section of that town, on Saturday, July 10.

John Dobbs, of the silver department, and Robert Friend, of the jewelry department, of Ryrie Bros., Ltd., Toronto, Ont., have gone to Quebec City to attend the tercentenary celebration.

Out-of-town jewelers who called on the Toronto, Ont., trade last week, included: Martin Rosenthal, of A. Rosenthal & Sons, Ottawa; J. Willmott, Ottawa; J. T. Clarke, Fergus, and H. B. Rosevear, Port Hope, all Ontario.

One of the finest examples of the goldsmith's art ever accomplished in Canada is the casket that the citizens of Quebec will present to his Royal Highness the Prince of Wales to-morrow, Thursday, July 23. It is the work of the firm of Richard Hemsley, Montreal, and every bit of it has been made on his premises. Mr. Hemsley was the pioneer in the manufacture of enamel work in Canada. The casket is of the finest frosted gold and is designed in form of a cigar case, so that His Royal Highness may, if he chooses, use the casket for that purpose. It is seven inches high, 11 inches long and seven and one-half inches wide, and has a total weight of 150 ounces or more. Within the gold casket there is an inner case of genuine Canadian cedar, and within this will be placed the illuminated address of the citizens of Quebec to the Prince.

ENTERPRISING and successful jewelers everywhere are pushing the sale of some individual line of watches which they believe to be superior to all others, and upon which they can also make a satisfactory and justifiable profit.

This explains the growing demand for ILLINOIS WATCHES, in 0, 12, 16 and 18 sizes, by increasing numbers of leading jewelers throughout the United States.

If you are not familiar with the superior quality of — and advantages gained by handling—Illinois Watches, it will mean reputation and dollars for you to investigate.

Every one fully guaranteed.
Price List sent on application.

Vol. LVI. CHICAGO, WEDNESDAY, JULY 22, 1908. No. 25.

Chicago Notes.

John R. Brophy is on a vacation to Mackinac.

F. H. W. Schmidt made a business trip through Illinois, last week.

H. Schwarz and family are taking an extended vacation at Bridgman, Mich.

A baby girl recently arrived at the home of E. J. Hahn, of H. F. Hahn & Co.

A. Braude, of E. Braude & Bro., is having a week's outing in northern Wisconsin.

Frank Behrendt spent the latter part of last week with his family at Janesville, Wis.

Ernst Wyss, with the American-Swiss Watch Co., is on a vacation near Shawano, Mich.

George M. Poe and wife are taking a four weeks' outing among the Michigan lake resorts.

Jacob Frank, president of the Rockford Watch Co., has taken a house at Winnetka for the Summer.

Max Guenther, retail jeweler, 2895 Archer Ave., has improved his store by building a new front.

Harry F. Weber, late of the firm of Jones & Dreyer, has opened a theatrical booking agency at 73 S. Clark St.

Henry Ritter, formerly retail jeweler at 3150 S. State St., has opened a new jewelry store at Remona, S. Dak.

Geo. Danner, formerly watchmaker for the New England Watch Co., has gone into business for himself at 72 Madison St.

F. B. Tinker, western representative of the H. C. Fry Glass Co., has just returned from a 10 days' fishing trip at Manistee.

Robert L. Clark, who formerly traveled in the southwest for the Towle Mfg. Co., is now representing Simpson, Hall, Miller & Co.

E. M. Lunt, Chicago manager of the Towle Mfg. Co., with his family, are taking an outing at Ephriam, Wis., to be gone several weeks.

O. F. Samuelson and A. M. Kuhn, travelers for the Towle Mfg. Co. here, have left for their respective territories in the west and southwest.

Julius Linz, of Dallas, Tex., accompanied by his wife and daughter, stopped over here, last week on their way to the Muskoka Lake region.

L. H. Shafer and F. C. Strang attended the Michigan Retail Jewelers' Association's convention at Detroit, recently, and from there went to Cleveland.

Norbert Gunzburger, with L. & M. Kahn & Co., will take a well-earned vacation to the Yellowstone Park the latter part of July, accompanied by his wife.

W. S. Sparrow, Chicago, manager for Stern Bros. & Co., in company with Harry Miller, of Hutchison & Huestis, are at Minoqua, Wis., on a fishing trip.

Albert H. Kolker, traveler for the Juergens & Andersen Co., was recently married to Miss Florence Ryan. They will be at home after Sept. 1 at 939 Winthrop Ave.

John H. Nickell left last week for a four weeks' business and pleasure trip to eastern points, including New York and Washington. He was accompanied by his family.

A. R. Oughton, manager here for Jennings Bros. Mfg. Co., has taken a cottage for his family at South Haven, Mich. Mr. Oughton goes over at the end of each week.

The assessment of the Gorham Co. was recently reduced by the Board of Review from $50,000 to $40,000; and that of the R. Wallace Sons' Mfg. Co. from $45,000 to $31,076.

M. C. Eppenstein, of the Illinois Watch Case Co., left, last week, for a month's trip to Atlantic City and eastern points. He was accompanied by Mrs. Eppenstein and daughter, Irene.

W. J. Dunn, western representative of Arnold & Steere, is making a visit to the factory at Providence and incidentally visiting friends and relatives in the east. He is accompanied by Mrs. Dunn.

I. T. Pierce, Wm. Barker, J. H. Nichols and W. E. Spencer, travelers from the Chicago office of R. Wallace & Sons Mfg. Co., leave this week for their respective territories after several weeks' vacation.

E. A. Shetter, DeKalb, Ill., in the capacity of an innocent bystander, was struck by a flying brick, while in Chicago last Saturday. He was taken to the Alexian Brothers' Hospital, where he recovered in a day or so and returned home.

Walter Stevens, of the Bay State Optical Co., is forming a nest of Ku-Kus in Chicago. The dues for the first year, including initiation, are $2. The Ku-Kus is a social organization composed of wholesale and retail jewelers and opticians, and its objects are purely social.

H. C. Epstein, retail jeweler at 280 State St., has leased the store now occupied by J. H. Mower, 98 Madison St., and will take possession May 1 next, after the store has been remodeled. Mr. Epstein was offered a bonus of $2,500 for his lease, but refused it.

A. E. Madsen, of Rettig, Hess & Madsen, recently returned from a three months' trip to European points. He sailed on the *Tietgen*, from Christiansand, Norway, and was accompanied by his wife and daughter. Sol. Hess, of this firm, is taking a two weeks' outing near Ludington, Mich., with a party of friends.

Among the visitors in Chicago during the past week were the following: H. J. Harm, Albert Lea, Minn.; Frank Aushutz and wife, Shenandoah, Ia.; Frank Smith, Pontiac, Ill.; Gustav Rahm, Iron Mountain, Mich.; Mr. Plain, of Trask & Plain, Aurora, Ill.; J. E. Micks, of the J. E. Micks Co., Elkhart, Ind.; D. A. Stocking, Kalispell, Mont.; B. H. Britton, Kirkland, Ill.; F. H. House, Augusta, Ill.

During the absence of Hugo F. Franson, retail jeweler at 6441 S. Halsted St., a man walked into the store one day, last week, and after looking at a three-stone diamond and ruby ring valued at $60, ran away with it. The clerk, who was alone at the time, could not follow him. The ring was subsequently located in a pawnshop and was replevined upon the refusal of the pawnbroker to give it up.

James Donnelly, western salesman for a local house, was severely injured recently at Portland, Ore., by being run down by an automobile driven by Senator Simmons, of that State. He suffered a dislocation of the collar bone and severe body bruises and was immediately removed to a hospital. He will probably be about in a couple of weeks. In the meantime his many friends in the trade there are supplying him liberally with flowers and other kindnesses.

Edward Dyson, a colored boy, employed by the former firm of Jones & Dreyer, was convicted in Judge Chetlain's court of larceny by embezzlement, recently. Dyson was a salesman, and at the time of the failure of Jones & Dreyer he was requested to turn in his samples, which were found to be short about $1,400. Dyson's claim was that he had sold the goods, but the orders which he turned in could not be verified as the parties whose names were signed to them could not be found.

Jones & Dreyer have made an offer of 27½ per cent. net to their creditors in settlement of their indebtedness, and have deposited the money with the receiver. Both Judges Landis and Bethea were not in town last week, so the matter could not be acted upon. The usual procedure will have to be undergone, all creditors notified and

AN UP-TO-DATE, HIGH-GRADE CATALOG

Will help to Retain your Customers, Increase your Business and make YOUR STORE THE LEADING ONE in your Community

We can furnish such a Catalog at a Moderate Expense

STORE OF WILL H. BECK CO., SIOUX CITY, IOWA.

READ OUR CUSTOMERS' LETTERS

Sioux City, Ia., Jan. 9, 1908.

THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

Gentlemen—In reply to your inquiry again as to the general results of our 1907-8 Catalog, desire to say that, notwithstanding the general stringency in money matters existing during the several weeks preceding the Holiday Season, our Catalog mail orders were more numerous than ever before during the same period. We certainly will be pleased to have you make use of this letter in any way you may see fit. We are,

Very truly yours,
WILL H. BECK CO.,
Will H. Beck, Pres.

This firm used The Arnstine Bros. Company Catalogs in 1904, 1905, 1906 and 1907, and again placed an order for 1908.

Beaumont, Tex., Jan. 21, '08.

(Extracts from letter.)

THE ARNSTINE BROS. CO.,
Cleveland, Ohio.

Gentlemen—When the financial troubles came on, our mills closed down and the outlook was bad in a business way. Taking all things into consideration, the Catalog is a good business proposition, and I feel satisfied that I will try one again this year.

Yours respectfully,

R. M. MOTHNER.

This firm used The Arnstine Bros. Company Catalogs in 1907, and again placed an order for 1908.

STORE OF R. M. MOTHNER, BEAUMONT, TEXAS.

Our Salesmen visit every State in the Union. If you are interested, and will notify us, our representative will take pleasure in calling on you and explaining our method or write us for samples and particulars

THE ARNSTINE BROS. COMPANY

Originators of Our Exclusive Catalog Method for the Retail Jeweler

CLEVELAND, OHIO

IN WRITING US PLEASE MENTION THIS ISSUE "JEWELERS' CIRCULAR-WEEKLY"

time given for filing objections within 10 days before the composition can be confirmed. It is the intention of the concern to resume business at once if the proposal is accepted.

It is reported that W. A. Rath & Co. are about to ask for a trustee.

The J. U. Rutishauser Co. is offering to compromise on a discount.

A postal card was recently received by Stern Bros. & Co. for S. C. Powell, mailed at South Chicago, stating that the writer knew of the whereabouts of the diamonds recently lost by Mr. Powell, but no name was signed to the postal. A personal ad. inserted in the daily papers failed to get any further information. The wide publicity given this loss of diamonds by Mr. Powell and the mention of Stern Bros. & Co.'s name in connection has brought the latter concern a deluge of inquiries from curious people all over the United States. A great many samples of rock crystal, garnets, quartz and such stones have been sent them with a request for a check for their value.

August N. Stone, 387 E. Division St., who filed a voluntary petition in bankruptcy July 9, owing about $3,720, has scheduled assets of but $340, all of which he claims is exempt. Of his liabilities the sum of $220 is secured by a chattel mortgage. Stone has been engaged in business here for a number of years, but met with financial reverse in 1902, at which time his liabilities were $2,395 and his assets $125. Later he helped to conduct the retail business of J. M. Bredt, whom he succeeded in 1904. In August of last year he again became financially involved and offered his creditors a settlement of 25 per cent., payable in October, November, December and January. He was troubled in meeting the last installment of the composition.

St. Louis.

Sam Kober, of the E. Maritz Jewelry Mfg. Co., has been traveling in Illinois, all week.

D. P. Richards, of the Maschmeyer-Richards Silver Co., departed, Friday, for a month's trip through the southwest.

Joseph Auer and S. L. Lowenstein, of the Bauman-Massa Jewelry Co., have also left for the south, and A. B. Bauer, of the same firm, has gone to Kansas and Oklahoma.

Among the out-of-town jewelers in St. Louis, during the past week, were: W. J. Krug, Staunton, Ill.; H. F. Leffler, Gainesville, Tex.; J. T. Camp, Midland, Tex.; E. Gibson, Marissa, Ill.

J. J. McKenna, vice-president of the Bauman-Massa Jewelry Co., will be "it" at the picnic of the Church of the Blessed Sacrament, to be held Wednesday at Normandy Grove, outside of St. Louis.

Herman Mauch and Louis Kurtzeborn, jewelers, who are high up in the Mystic Shriners, are still in St. Paul, participating in the annual council there. They will return the early part of this week.

F. A. Durgin, of the Mermod, Jaccard & King Jewelry Co., will spend two weeks around Yellowstone Park, on his vacation. He left last week. Charles Buettner, of the watch department of the Mermod, Jaccard & King Jewelry Co., is also on his vacation. Goodman King, president of the Mermod, Jaccard & King Jewelry Co., will sail, July 23, on his annual trip to Europe. He will be gone two months. Two others of the firm will accompany him.

A trunk full of jewelry and jeweler's tools, the property of Auguste Baujot, a wealthy French jeweler, 3846 Russell Ave., is being held by the constables to satisfy an attachment gotten out by Daniel G. Golding, who claims commission on a bill of $1,450 worth of jewels, which he says he sold for Baujot. Baujot is not in this city, having left on an eastern train just 10 minutes after the constables got the trunk from the baggage room at Union Station. He is going to Belgium to be married, according to the constables, and closed his shop at 2237 S. Grand Ave. Golding claims the commission on part of this closed-out stock, which he helped sell. Constable Samuel J. Young, who has the trunk, declares that Baujot locked a deputy constable in the bath-room when the official called to levy.

Minneapolis and St. Paul.

H. E. Cobb, with the Daggett & Clap Co., was among the Shriners who attended the convention in St. Paul.

M. L. Stevens, with A. L. Haman, St. Paul, has been away for a three weeks' vacation, spent on the Great Lakes.

Mr. and Mrs. C. Simpson, father and mother of Benj. F. Simpson, the wholesaler, celebrated their golden wedding, recently.

W. J. Mawford and Miss Wilkins, Doland, S. Dak., have been visiting J. A. Light, of B. F. Simpson & Co., Minneapolis.

P. C. Nelson, formerly in business in Watertown, S. Dak., was in the Twin Cities, recently, and left for Forsyth, Mont., where he contemplates locating in business.

The annual conclave of the Imperial Council Nobles of the Mystic Shrine, held in St. Paul the week of July 12, brought a large number of visitors to the Twin Cities. Minneapolis entertained a large crowd as well at St. Paul, where the convention was held. The streets of both cities were decorated in honor of the guests, and the attendants included a number of jewelers from different sections.

Among the recent visitors in the Twin Cities were: A. Thompson, Suring Valley, Minn.; A. L. Mealey, Delano, Minn.; Paul E. Johnson, Abercrombie, N. Dak.; Gust. Werner, South Haven, Minn.; E. P. Sundberg, Fargo, N. Dak.; C. E. Wohlfahrt, Cannon Falls, Minn.; M. Weinstein, Webster, S. Dak.; T. J. Thompson, Barron, Wis.; S. H. Kantor, Moorhead, Minn.; Herman Shirley, Enderlin, N. Dak.; W. E. Chamberlain, Great Falls, Mont.; O. Larsen, Bowdle, S. Dak.; A. H. Pehrson, Mitchell, S. Dak.

The Twin City Jewelers' Club was recently formed by Minneapolis and St. Paul jewelers, there being an attendance of 15 at the first meeting. The officers elected were: T. B. Weld, Minneapolis, president; Mr. Bullard, St. Paul, vice-president; Max Kohen, Minneapolis, secretary. The object of the organization is mutual benefit, sociability and the exchange of views and methods. The next meeting will be held in Minneapolis. The joining by an individual gives the firm a membership, with dues for but the one membership. The dues are $5 per year.

Indianapolis.

E. M. Craft, of the A. P. Craft Co., made a business trip, last week, to Marion, Kokomo, Anderson, Frankfort and Lebanon.

J. P. Mullally, president of the Indianapolis Retail Jewelers' Association, was in Chicago, on Monday and Tuesday, of last week, on business.

William J. Despain and Mrs. Ida Scholtz, were arrested in Evansville, recently. They are wanted at Springfield, Ill., on a larceny charge.

Carl L. Rost and family were in Columbus, last week, visiting relatives. Mr. and Mrs. Rost returned home leaving Miss Rost to remain a few days.

Within a few days, A. P. Craft, of the A. P. Craft Co., will have mounted a 32-pound muscalonge that he caught recently at Three Lakes, Wis.

The force employed by Carl L. Rost has been increased by the addition of G. F. H. Steinbeck, a jeweler and watchmaker, who came here, recently, from New York.

Friends of Charles B. Dyer have received post cards from him dated at Frankfort-on-Main, Germany. Mr. Dyer is touring Europe and will not return for several weeks.

C. J. Kiefer is at Lake Maxincuckee with his mother, who is almost 88 years old. He will return this week, when L. A. Kiefer, his brother, will go to that resort for a few weeks.

Indiana jewelers in this city, last week, included: H. E. Kinnear, Marion; J. W. Hudson, Fortville; M. I. Kirkman, Pendleton; J. W. Thompson, Danville, and J. A. Pickett, Newcastle.

Frank Johns was in the city, last week, visiting relatives and calling on friends in the jewelry trade. For many years Mr. Johns was employed in this city, having been with J. H. Reed for three years. He is now manager for the Scribner & Loehr Co., Cleveland, O.

J. H. Reed is spending part of this week in Brown County, where he expects to purchase a large tract of land, where he can establish a Summer home. Reported finds of gold have induced Mr. Reed to investigate the situation. His son, Harry Reed, is negotiating for the purchase of 200 acres of land.

Members of the Indianapolis Retail Jewelers' Association enjoyed a watermelon feast at their meeting held on the evening of July 13. Instead of meeting at their rooms in the Commercial Club building, they gathered in the store of Gray, Gribben & Gray, on N. Illinois St. There were no attempts at speech-making, the session being given over entirely to social amenities.

George G. Dyer, of the Arts & Crafts Shop, last week, completed a necklace of unique design. Long gold links were held together by small gold rings, with a turquoise set on each side, about the middle of the necklace. The pendant was a large turquoise, at each side of which was a conventional flower of gold, set with a diamond. A smaller turquoise was suspended from this.

Carl Miller, Fruita, Colo., has sold out to H. L. Ford.

Read this unsolicited endorsement.

From the *Detroit Free Press*, July 1, 1908.

NOTED AUCTIONEER IN DETROIT

Seller of the Sturgeon Stock Famous in His Line of Work

Many of the thousands that have attended the great auction sale of the stock of W. A. Sturgeon & Co., jewelers, will be interested to know something of the man that brought this sale to such a successful conclusion. It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co., a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of famous silversmiths, objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit. This was due not alone to the high standing of the firm, but to the manner in which the sale was conducted. A raised platform built on the main floor of the store enabled the ladies to be comfortably seated and see each article exhibited and sold. The auctioneer, Mr. James L. Hand, is a resident of New York, a son of the editor of a leading daily paper of New Jersey. On finishing his college course he traveled much, visiting the countries famous for the production of the various arts, so that on embarking in the selling of high class jewelry, art wares, etc., at auction fifteen years ago, he found himself well equipped for the work. His eloquence and wonderful descriptive powers hold his audience interested and at the same time command confidence in the quality and value of the articles offered. The demand for Mr. Hand's services calls him to all the important cities of the country, and when asked the other day as to his opinion of Detroit, said: "It is the most beautiful city in the country and wherever my business shall call me, will sound its praises as the city where 'Life Is Worth Living.'"

Some of the Reasons That Have Made Hand the Leader of Jewelry Auctioneers:

His knowledge of precious stones, high class jewelry and art wares.

He knows how to address an intelligent audience and sell goods without exaggeration or misrepresentation.

He does not ask the jeweler to allow a cheap assistant to conduct his sale. He has no assistants. Assistants are usually men without individuality and cannot "make good."

He carries no goods to "sweeten" your stock. If you need them your jobber will supply you.

He guards your reputation and leaves you with more friends than before your auction.

The successful auction to-day must be conducted on lines up-to-date, so beware of the old timer with antique methods.

Before you select your auctioneer send for my booklet on auctions. It gives references from leading jewelers and wholesalers of this country.

JAMES L. HAND

America's Leading Jewelry Auctioneer

Mr. MAX FESSLER, :: :: :: PFORZHEIM, GERMANY

Los Angeles.

W. A. Lord, Goldfield, Nev., made a short visit here, last week.

S. Simmons has been spending a few days fishing at Catalina Island.

J. H. Padgham, of Santa Ana, was here on a business trip, a few days ago.

Paul D. Walsh, of Hambright & Walsh, is taking a rest in the Yosemite Valley.

Mr. Laird, of Laird & Dines, Tempe, Ariz., was here last week, on a short vacation trip.

Fred S. Guerrine, who represents Wallace Bros., has gone to San Francisco, on a business trip.

J. Jessop, of San Diego, was here, a few days ago, on his way home from a visit to Yellowstone Park.

J. M. Slade, a tourmaline mine operator, of San Diego County, made a brief visit here, a few days ago.

Harry Hudson, engraver and jeweler, recently of Fresno, Cal., has come here to spend the Summer months.

Mrs. M. M. Huff, optician, with the Geneva Watch & Optical Co., is taking a month's rest with friends in Oregon.

C. H. Walton, of Field & Walton, 348 S. Broadway, has returned from a brief visit to San Francisco and other northern points.

Joseph Lawton, of the H. J. Whitley Co., is spending two weeks with his wife at Follows' Camp, in the Sierra Madre Mountains.

The marble for the H. J. Whitley Co.'s new store has arrived. Work will be begun on the new store in the middle of August.

Fred Brown, foreman of the optical manufacturing department of the E. W. Reynolds Co., is taking a vacation at Catalina Island.

George A. Collins, formerly of Salem, Mass., more recently manager for Adams & Co., Riverside, is now in charge of the optical department of J. Wiesenberger, 453 S. Broadway.

Burr W. Freer, San Francisco, who came here on a business and pleasure trip, was quite seriously ill at the Hollenbeck Hotel, in this city, last week.

Before leaving for an extensive trip throughout the Coast last week, George Penniman ordered a new automobile, to be delivered in October next.

Louis Nordlinger, of S. Nordlinger & Sons, has returned from a pleasant vacation trip to Coronado, and is again attending to business in the store.

George Dudley, in the employ of the H. J. Whitley Co., who was recently operated upon for appendicitis, is improving rapidly, though he is still in the hospital.

The Raymond Jewelry & Optical Co., heretofore doing business at 404 S. Main St., has opened a branch store in the Germain building on S. Spring St., between 2d and 3d Sts.

Ed. Turner, of the E. W. Reynolds Co., after returning from a successful trip of six weeks through the north, has gone with his wife and a party of friends to spend a vacation of two weeks at Camp Rincon, in the Sierra Madre Mountains.

J. Wiesenberger, 453 S. Broadway, has just bought a lot in the aristocratic Westmoreland district, where he intends to build a new home. He reports that his diamond sales during the first six months of this year amounted to 40 per cent. more than during the same period last year.

Montgomery Bros. are exhibiting in their window a notable collection of trophies, including a massive silver cup awarded last year by the citizens of Honolulu as a prize in the transpacific yacht race from San Pedro, Cal., to Honolulu, Hawaii; the Montgomery Bros. Catalina Island race prize cup; the *Times* challenge cup, awarded to the South Coast Yacht Club; 11 sterilng silver cups, and other gold and silver prizes for the fifth annual lawn tennis tournament at the Hotel Potter, Santa Barbara.

The business of the Los Angeles Gem Co., 420 S. Broadway, has grown so rapidly that the management has decided to secure additional quarters and double the present capacity of the factory. C. W. Morrell, recently a banker in Charlotte, Mich., who has a large financial interest in the company, has come here to reside and will take an active part in the conduct of the business. The new plant will be devoted exclusively to the cutting of turquoise. The concern is far behind in its orders and A. P. Wood, who has been traveling throughout the east for the company, has returned because the company was not able to fill further orders. It is not a year since the company secured its present location, which it was thought at that time would be amply large for some years to come.

Savannah, Ga.

The Germania Bank of Savannah secured judgment, recently, against E. Muhlberg, executor of the estate of Mrs. Emma Muhlberg, for $250, interest and protest fees, being for the amount of a note endorsed by Mrs. Muhlberg and M. Sternberg.

In a recent suit of E. A. Cowan & Co. against Elias Muhlberg and M. Sternberg, tried in the City Court, a verdict for the defendants was found. The suit was on a note for $1,000, given by M. Sternberg for a consignment of diamonds. The note was originally signed by Mrs. Muhlberg, after whose death her husband, Elias Muhlberg, was made a party. Sternberg, after the note was made, went into bankruptcy, when his responsibility ceased. The other defendant contended that she signed the note simply as an accommodation and that she received no benefit from it.

Omaha.

Albin Kaas, with S. W. Lindsay, is in Lincoln, Nebr., for a two weeks' visit.

Miss M. E. Rutherford, with Jos. P. Frenzer, has returned from a visit to Toronto, Can.

A. Mandelberg was confined to his home, last week, having been overcome by the excessive heat.

Grover Peterson, with the Sol Bergman Jewelry Co., has returned from a fishing trip spent at Lake View, Ia.

Geo. Leban, Hamburg, Ia.; A. G. Kupka, Schuyler, Nebr., and Phil W. Folsom, Ashland, Nebr., were in this city, during the past week, purchasing stock.

Cincinnati.

Charles Glass, with A. & J. Plaut, is convalescent after a long illness.

Joseph Mehmert leaves this week on a business trip through his northern territory.

A. Feemster, bookkeeper for George H. Newstedt, has left for a sojourn in Canada.

Edgar Fox, of Lindenberg & Fox, has returned from a pleasure trip among the Great Lakes.

Dennis Schram, Jacksonville, Ill., was the guest of Eugene Frommeyer, of L. Gutmann & Sons, last week.

William Mueller has discontinued his repair business at Hamilton, O., and is now associated with D. Pollak, Arcade.

James C. Haslam, of the John Holland Gold Pen Co., has started on a three months' western trip as far as the Pacific Coast.

J. H. Drake is arranging to discontinue his business at Lebanon, O., as he contemplates locating in California in the near future.

Leonard J. Fox, manager of the Gustave Fox Co., is on a pleasure tour in the east, which includes a visit to New York and Atlantic City.

Word has been received here that the Sturgell Jewelry Co., Ashland, Ky., has suffered a serious loss by fire. The insurance, however, covers all damage.

Edward Schildman, representative of the Oskamp, Nolting Co., who was confined to his bed for several weeks, has fully recovered from his illness. He will make his usual Fall trip.

Burton Fox, of Fox Bros. & Co., left July 19 for New York, from whence he will sail on the *Kaiser Wilhelm II.* for a two months' business trip abroad. Henry Fox, of this company, and family, are spending a few weeks at Charlevoix, Mich

Arrangements are now being made by which a large delegation of local opticians expect to attend the American Association of Opticians' convention in Philadelphia on Aug. 10. The party will leave on Saturday immediately following the American National Retail Jewelers' Association convention and spend Sunday in Washington.

Out-of-town jewelers here in the past week purchasing stock included: William Shire, of Shire & Fithian, Paris, Ky.; E. Scott, Batavia, O.; J. H. Daugherty, Bethel, O.; E. F. Schermund, Greenville, O.; J. H. Young, Fort Wayne, Ind.; J. B. Hesselbrock, Liberty, Ind.; George H. Deck, Blanchester, O.; C. F. Held, Falmouth, Ky.; Hugh Murray, Danville, Ky., and E. Gratz, Lexington, Mo.

The Frank Herschede Co. was swindled last week by an old, but clever and bold scheme. A messenger boy called at the Herschede store and handed one of the salesmen a note, asking for a watch which had been left to be repaired by E. L. Lyon. The watch was given to the boy and it was not until a day or so following the incident that it was discovered the note was a forged one, as Mr. Lyon later called in person for his watch. Mr. Lyon declared he had sent no one for his timepiece, which he values at $200. The police are now looking for the schemer, who must have called at the store and read the name on the tag on the watch while hanging in the repair case.

$3000 To $10000 A WEEK IN YOUR CASH DRAWER

We can sell for you at auction from Three to Ten Thousand Dollars per week any time of the year.

We can sell all your dead Stock.

We will make you a satisfactory profit above all expenses of the sale.

We will teach you methods of advertising and merchandising that will be worth thousands of dollars to you in your future business.

We never sell shoddy or cheap goods, neither do we misrepresent or make misleading statements about the goods we sell.

We sell your goods; the kind of which you wish to dispose.

Allow us to send you the evidence - facts and figures - backed by the evidence of those we have served - to prove the character of our work.

MITCHELL & TILLOTSON

JEWELRY AND ART GOODS AUCTIONEERS

35 MAIDEN LANE, NEW YORK

San Francisco.

L. E. Price is in Los Angeles on business, this week.

Rennie Ettinger is sojourning in Stockton for a short time.

L. H. Smith, of A. I. Hall & Son, has returned from his Summer outing.

The Modern Loan Office, of which Wm. Schmalz is manager, is being moved from 1162 Post St. to 34 Ellis St.

The Clewell Studios have established a branch store at 1336 Van Ness Ave., where a full line of their metallique and ceramique goods in copper, brass and silver is carried.

Martin Goldstein, a dealer in precious stones, with an office at 25 Turk St., reported to the police, a few days ago, that he had sustained a loss of gems valued at over $600. Upon leaving the office with the stones in two packages reposing in his vest pocket, he had stopped for a few minutes in an electric shoe-shining parlor, where he thinks the gems were stolen.

A daring robbery was attempted, July 10, at the jewelry store of A. Anixter, 1722 Devisadero St., and the fact that it did not succeed was due solely to the lack of nerve on the part of the robber at the crucial moment. Anixter, who is a man well advanced in years, was alone in the store when a well dressed man entered, and asked to see some watches. As Anixter turned, the man drew a revolver and ordered him to open the safe. Instead of doing so, the jeweler ducked behind the counter and cried for help. There was no one near by on the street, but the robber turned and ran and succeeded in making his escape.

Henry Behrend, who was responsible for the capture of the gas-pipe thugs, Siemson and Dabner, will get the reward of $1,000 offered by the State for their capture, the State Board of Examiners having passed on the matter, last week. Shortly after the conviction of the thugs, Behrend sent a claim to the Board for the reward, but it was necessary to thoroughly establish the claim before it was paid. It was thought possible that some of the officers who came to the aid of Behrend would ask for a portion of the reward, but no such claims were presented. Besides receiving the State reward, Behrend has received rewards from private firms, as well as one from the City of San Francisco.

John O. Bellis, 1658 California St., now has on exhibition in his show windows a beautiful cup made by him at the orders of the petty officers of the fleet for presentation to the ladies of the California Club. The design of the cup is nautical, the base representing ropes, coiled round and round, and embellished in other parts of the polished surface by anchors, dolphins and other nautical ideas, including an engraving of a battleship of the Louisiana type, and laurel wreaths for the handles. The great seal of California, surrounded by the State flower, the eschscholtzia, accompanies the cheering words, "Our hearts are yours for evermore." The inscription on the other side is: "To the California Club from the Chief Petty Officers of the United States Atlantic Fleet, July, 1908."

Isadore Golden, who was arrested a few days ago, by Chas. F. Skelly, secretary of the police commission, shortly after he had attempted to rob the store of B. Hart & Bros., has been identified as a member of the jewelry firm of Boskin & Golden, which was robbed last December. At the time of this robbery, suspicion was directed towards Golden, but he managed to clear himself. The discovery that the burglar of this week and the former proprietor of the jewelry store are the same persons, has caused the police to again direct their attention toward him. The identification of Golden was made by Sergeant Matherson, who worked on the robbery of the jewelry store, and who expressed a belief at the time that Golden was the guilty party. The capture by Skelly was a spectacular one, the official chasing his man for several blocks, and, finally, with a heavy key which he handled as a revolver, brought him to bay.

The sale of smuggled pearls advertised by United States Marshal Elliott was held on the steps of the postoffice, recently, but the bidding was not as spirited as was expected. There were but two bidders and the California Jewelry Co., represented by J. Levinson, secured the lot for $4,800. These pearls were appraised by the government officials as having a foreign value of $8,685.07, and a value here of $9,236.07, and that the successful bidder was expecting to pay a larger price was shown by the large amount of gold that was left after the price was paid. There were in the lot 155 large pearls, weighing 1,581¾ grains, and a box of smaller ones of an aggregate weight of 1,439¼ grains. These had been smuggled into this country several months ago, by Miguel L. Cornejo, and had been confiscated by the government. Cornejo was released from custody on bonds, and as he has fled, these have been declared forfeited.

Many of the wholesale jewelers who secured quarters in the Kamm building, immediately after the fire, signed their leases for but two years, and as their time has about expired, a number of them are preparing to move into the Jewelers' building on Sutter St., now almost completed. A. I. Hall & Son will be among the first to move, and already some of the fixtures for the new store are being installed. Morgan & Allen Co., Nordman Bros. Co., H. C. Van Ness & Co. and J. S. Dinkelspiel will follow in a short time. This will be the first appearance of the two latter firms in the downtown district since the fire, both of them having occupied quarters in the vicinity of Van Ness Ave., ever since then. Other wholesale jewelry firms are preparing to move, and it is quite likely that by the time the new building is fully prepared to accommodate the trade, the available room will be taken. The work of installing the fixtures in the new store of Hammersmith & Co., at Sutter St. and Grant Ave., is now progressing rapidly, and the removal from Van Ness Ave. will be effected before the end of the month, if nothing unexpected happens. While no other large houses in the retail line have made selections of locations in the new retail district of late, the rapid movement of trade in that direction is attracting their attention and some of them will soon be able to take action in the matter. The removal of the Emporium to Market St., in October, is calculated to do more than any other one thing to cause an exodus to the old part of the city, and jewelers will be among the rest.

Kansas City.

Burton Fricke, with the Meyer Jewelry Co., is visiting in St. Joseph, Mo., this week.

F. W. Meyer and family left last week for a six weeks' vacation trip to Vineyard Haven, Mass.

M. D. Benkowitz has moved from 1407½ Grand Ave. to 108 E. 8th St., occupying the old quarters of H. N. Konrad.

J. B. Roper, Sarcoxie, Mo., was in this city, last week, on his way to Colorado on a combined wedding and vacation trip.

E. H. Ray, with the Edwards & Sloane Jewelry Co., has recovered from his recent illness and is now covering his territory.

R. Paye, who has completed a course at the Missman School of Engraving, has taken a position with the Preston Drug Co., in Oxford, Nebr.

Mr. Klein, a well known material man of this city, has been added to the force in the material department of the C. B. Norton Jewelry Co.

The administrator of the Konrad estate has turned the store over to Mrs. Konrad, and she is now operating it as the H. N. Konrad Jewelry Co.

C. P. Kionka, of H. C. Kionka & Co., New York, will be in the Kansas City territory this week, and will pay a visit to his brother, E. Kionka.

H. F. Wells, who for the past 18 years had been a traveler for the Woodstock-Hoefer Watch & Jewelry Co., died at his home in Estherville, Ia., July 16.

Mr. Dryden and Mr. Baer, of the Spencer Drug Co., Lee's Summit, Mo., were in this city, last week, buying an opening stock of jewelry, which they will add to their line.

George G. McDonald has opened a neat jewelry store in the Arcade in the Scarritt building. The store will be in charge of his brother, Wm. McDonald, formerly of Clinton, Mo.

Struby & Martin have opened a new stock of jewelry in Green City, Mo. Mr. Struby has been doing watch work at that point for some time, and was formerly with E. E. Branch, of this city.

A. H. Clark, manager of the material department of the C. B. Norton Jewelry Co., has just returned from a vacation trip to Boston, New York and other eastern points. He also visited Canada.

The following out-of-town jewelers called on the local trade last week: W. S. Noble, Drexel, Mo.; E. H. McClintock, Thomas, Okla.; J. H. Leighty, Spring Hill, Mo.; M. W. Watkins, Breckenridge, Mo.; C. W. Loper, Cumberland, Ia.

A. Hooper, formerly a jeweler in this city, but for the past two or three years a resident of Santa Barbara, Cal., has opened a jewelry store on State St., in the latter city. He has engaged A. C. Cheney, recently of Los Angeles, to take charge of his optical department.

Louisville, Ky.

Coleman Blackburn, a negro, was charged in the police court, recently, with breaking into the jewelry store of A. Lauber, 114 W. Market St., and stealing two silver watches. He was held for the Grand Jury under bond of $300.

David Roth, who conducts a jewelry and optical stand in front of 100 W. Market St., was robbed of a tray containing 84 signet rings in broad daylight recently, the thief stealing jewelry valued at $50 while the jeweler's back was turned. No clue to the thief has been obtained.

Mrs. Adam Wolf, while visiting her daughter, Mrs. Albert Fleckenstein, who lives in this city, received word, recently, announcing the death at Dresden, Germany, of her husband, Adam Wolf, a former well known jeweler of Louisville, who for many years conducted a store at 238 W. Market St. The deceased, who was 76 years of age, had been in his usual good health until the time of his death. He removed to Germany five years ago. His daughter, Annie Wolf, was with him when he passed away. The body was taken to Chemnitz, Saxony, July 9, for cremation. Mrs. Wolf and her daughter have left for Germany.

A young man of good address made his appearance among local jewelers about four weeks ago. He was a fellow of pleasing personality, it is said, and rapidly worked into the good graces of a 1st St. jeweler. The stranger told the jeweler he believed he would lend him $1,000 with which to enlarge his business. The jeweler gave his note for the amount, and the stranger tendered his check. When presented for payment the check was found to be worthless. The young man has now disappeared and the jeweler has sought counsel to ascertain if he will have to pay the note.

Pacific Coast Notes.

F. Marasco, San Luis Obispo, Cal., died at that place recently.

A fire at Eureka, Cal., last week, destroyed the store of W. D. Howard, entailing a loss of over $1,000.

L. A. Peck, who, a short time ago, established a jewelry store at Gilroy, was married, recently, to Miss Isabel Farnsworth.

C. E. Reid, formerly in the Georgeson building, Eureka, Cal., has taken charge of the watchmaking department in H. A. King's store, in the same city.

F. J. Stumm, who at one time conducted a store at Rio Vista, Cal., but who is now in business in Benicia, was in the former place visiting friends, last week.

W. S. Reed, whose stock was sold by the sheriff, recently, at his place of business at Lakeport, Cal., has re-entered business with Phil. Berryman, as a partner.

L. J. Lyons, Suisun City, Cal., has filed a petition in bankruptcy in the United States District Court. He schedules his liabilities at $1,546.67 and his available assets at $1,350.

E. M. Mather has removed his stock from Downey to San Pedro, Cal. The Los Angeles wholesale firm that recently attached his stock, found, after taking inventory, that he was well able to pay his indebtedness and not only released the attachment, but paid all expenses of the suit.

Milwaukee.

Irving Riley, Oconto, well known in this city, and formerly in charge of the J. W. Runkel jewelry store, at Oconto, is now manager of the jewelry department in Lauerman Bros.' store, Marinette.

E. H. Warnke, of E. H. Warnke & Co., will spend the next 10 days on a fishing outing in Waushara County, Wis. Mr. Warnke and a party of friends will make the trip in the former's automobile.

M. L. Werner, Deerfield; E. L. Fischer, Reeseville; L. R. Moore, Columbus, and J. R. Chapman, of J. R. Chapman & Co., Oshkosh, were among those who called upon the local trade during the past week.

On the charge that he stole rings worth $179 from Bruno Gerstenberg, a jeweler in the Matthews building, Chauncey Houston, aged 20 years, has been arrested by local detectives. He was bound over for trial. The theft was committed some time ago.

Oscar Fischedick, of the Maas-Fischedick Co., who is a prominent member and chairman of the Committee on Arrangements of the Milwaukee Automobile Club, is absent from the city on the inaugural Wisconsin tour which is being conducted by the club. The route covers some of the largest and most interesting cities of eastern and central Wisconsin.

With the object of bringing the Wisconsin jewelers into closer relationship in a business and a social way the State will be divided into districts, acting upon the recommendation of the Wisconsin State Jewelers' Association. Secretary Franklin Thomson, of Milwaukee, will have active charge of the work and will soon commence the task of organization. Every effort possible is to be put forth by the Wisconsin jewelers to strengthen the State association and make it a real power in the field, and it is thought that there is no better way than by forming sub-divisions in the State.

At an early hour one morning last week the front window in the store of Gross & Saxe, 349½ 3d St., was broken with a stone and an attempt was made to secure an array of diamonds on a tray inside. It is believed that the robber was frightened away, as nothing of value was taken from this place. On the same morning, robberies occurred in the jewelry stores of W. & E. Schmidt, 308 3d St., and E. F. Rohn, 274 W. Water St. In each case the front windows were broken with a stone. At the W. & E. Schmidt store a tray of watch cases and several trays of stick pins and rings were taken. At the Rohn establishment, the burglars also secured several watches, trays of pins and rings, amounting to more than $50. At each of the stores the destruction of the windows will add at least $50 to the loss. Detectives are now working on the cases, but as yet no clue has been obtained.

While out riding on a new motor cycle recently, Richard Lee, Waterloo, Ia., was forcibly thrown from his machine, while it was going at a high rate of speed. He is said to have broken his ribs and badly bruised his leg.

B. Jackson has opened a store at Calistoga, Cal.

Struby & Martin have started in business in Green City, Mo.

J. Eller has just engaged in the jewelry business in Roseburg, Ore.

P. C. Nelson contemplates engaging in business in Forsyth, Minn.

George Danner, watchmaker, has started in business at 72 Madison St., Chicago.

F. W. Grover has opened a small jewelry store at 10th and Oak Sts., Kansas City, Mo.

Feinberg & Bro. will soon start in business on 7th St., between First and Second Aves., Minneapolis, Minn.

B. B. Crowder, for several years with A. E. Dabney, Taylor, Tex., has opened a store of his own on N. Main St., in the same place.

The Waterbury Enameling Co., is the name of a new concern which was incorporated in Waterbury, Conn., recently, with a capital of $5,000, to manufacture watch tools, indicator tools, etc.

The Hamilton-Wilson Co. has been organized in San Diego, Cal., and has begun a jewelry manufacturing business. S. M. Joel is the manager of the concern. Messrs. Hamilton and Wilson are directors of the San Diego Gem Co.

Pacific Northwest

H. F. Shank, Arlington, Ore., has leased an adjoining building, thus considerably enlarging the quarters for his jewelry store.

Henry Wilbur, Seattle, Wash., who disappeared, recently, taking with him a large quantity of jewelry, is believed to be under arrest in Idaho.

To be chosen two years in succession as delegate to the National Jewelers' Association by the members of the Oregon Retail Jewelers' Association, is the distinction which has fallen to Charles H. Williams, Condon, Ore. Last year Mr. Williams was the first vice-president of the Oregon Jewelers' Association and went as a delegate to the national convention in Chicago, where he was elected vice-president of the latter organization. This year he will represent his State at the National conclave of goldsmiths, to be held at Cincinnati.

The Trepagnier Jewelry Co. has been incorporated in Plaquemine, La., with a capital stock of $20,000. J. W. Trepagnier is president and F. A. Trepagnier is vice-president.

George H. Wood, Lowell, Mass., has solved the holiday question to his clerks' satisfaction by giving one-half of his force of employes a full holiday on Thursday every other week.

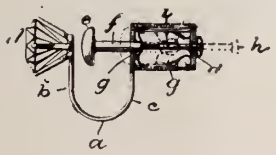
PATENT DEPARTMENT

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

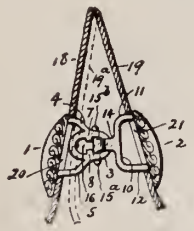


ISSUE OF JULY 14, 1908.

893,025. BARRETTE. George G. Sinclair, Leominster, Mass., assignor to Newton & Merriman, Leominster, Mass. Filed March 11, 1908. Serial No. 420,500.

A hair fastener comprising a body with teeth projecting from the inner side thereof and a pin pivoted to the body and having an opening to receive the teeth.

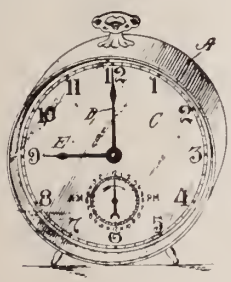
893,048. EARRING. August Balzer, New York. Filed Jan. 14, 1908. Serial No. 410,743.



In an earring, the combination with a yoke, of a spring-actuated clamping button having an ex-

tensible stem, whereby the pressure of the button may be regulated.

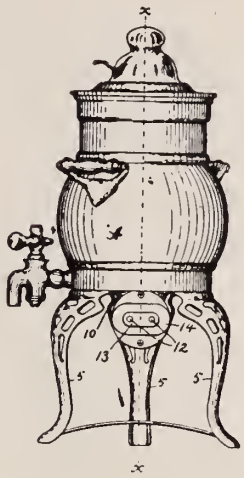
893,109. LINK CUFF-BUTTON. Frank R. Stafford, Providence, R. I. Filed Feb. 24, 1908. Serial No. 417,472.



The improved link cuff-button herein described, consisting of the combination of a button having an oblong loop supported thereon which is provided with two inwardly directed stop pins in alignment with each other but separated from each other by a space, which pins are located midway

the length of said loop; and a second button having a shank or bar supported thereon, which is wider than said space and is provided with a terminal cross bar, whose thickness is equal to said space, the cross bar being insertible into and engageable with said loop.

893,152. ALARM-CLOCK. William Dupen, Jr., Sacramento, Cal. Filed March 30, 1908. Serial No. 424,148.



An alarm-clock comprising an eight-day time-

train, alarm-mechanism adapted to sound once in 24 hours for a comparatively brief period, devices operated by the time-train for causing the alarm to sound intermittently during the alarm-period, and means for disconnecting these last-mentioned devices from the time-train except during the alarm-period.

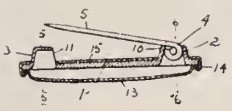
893,209. ELECTRICAL HEATING VESSEL. Alonzo A. Warner, New Britain, Conn. assignor to Landers, Frary & Clark, New Britain, Conn. Filed Dec. 2, 1907. Serial No. 404,810.

A vessel for heating liquids, comprising a socket having a chamber for an electrical heater and a central hollow stem extending from said socket

through the bottom of the vessel and secured thereto with the chamber of the socket underneath the bottom of the vessel.

893,237. PIN AND THE LIKE. Charles H. Gifford, Attleboro, Mass. Filed Jan. 23, 1908. Serial No. 412,274.

An article of jewelry comprising a stiffening or supporting middle member, joint and catch members connected to said supporting member, a front



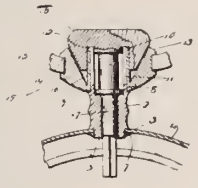


plate of very thin material, and a third member rolled over the edges of said front and supporting members to secure the same together, and a pin-tongue adapted to be held by said joint and catch members.

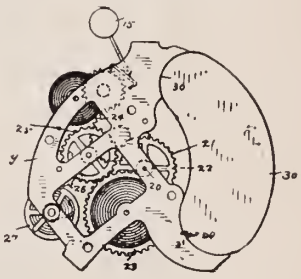
893,262. SWIVEL-PENDANT FOR WATCH CASES. Wilson E. Porter, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed May 11, 1908. Serial No. 432,245.

In a swivel-pendant for watch cases, the combination with a pendant-stem having a longitudinally split bearing-sleeve provided at its outer end

with a retaining flange, of a swivel-head adapted to be crowded over the said bearing-sleeve and engaged by the said flange, a ring carried by the said swivel-head, a winding-and-setting stem passing through the pendant-stem, and a crown located upon the outer end of the winding-and-setting stem.

893,448. SPRING-TONGUE SNAP-HOOK. Jas. C. Covert, Watervliet N. Y., assignor to the Covert Mfg. Co., Watervliet, N. Y. Filed Sept. 30, 1907. Serial No. 395,192.



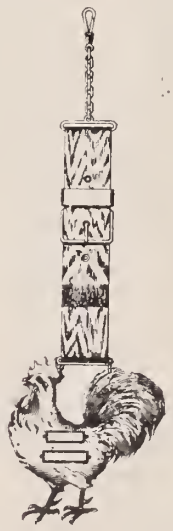
In a spring-tongue snap, the combination with a body having a hook part and a recess in its back near its rear end provided with an opening leading through the upper portion through said recess having a back part or wall extending upwardly and terminating at the plane of the underside of the body, a spring passing through said opening, one end being placed under the hook and its rear

end being seated in said recess, and means located within the recess wholly below the plane of the under side of the body passing through said spring and clamping the spring between the same and the said back wall, said means being located on opposite sides of the center of the spring.

893,506. ILLUMINATED ALARM-CLOCK. Fritz Ischer, Torrington, Conn. Filed Aug. 29, 1907. Serial No. 390,638.

A clock having a cylindrical case, and a lamp

for illuminating the dial, and a battery located within said case at one side of the works, the frame of the works being concaved and the battery being relatively formed to abut said concave frame.



Designs.

The business conducted by John H. Sanction, Oldtown, Me., was recently incorporated as Sanction, Herrick & Co., with a capital of $10,000.

Reginald W. Hollinghorst, 25 years of age, was brought back to Baltimore from Cleveland, O., July 13, on two charges, in one of which he was accused of obtaining jewelry by false pretences from Sol. Herzberg & Co., jewelers at 126 N. Eutaw St., Baltimore.

TRADE-MARKS

Manufacturers and Jobbers:

We now have in preparation a supplement to the second edition of ***"Trade-Marks of the Jewelry and Kindred Trades,"*** and in order that it may be as complete and accurate as to new marks as it is possible to make it, we request every manufacturer and jobber to send us a list of such marks as he may ***now use,*** or ***has ever used,*** together with such information (the kind and quality of goods upon which the marks are used, etc.,) as may be germane to the subject. Send cuts of marks if possible. If not, send clear, printed impressions or drawings.

The earliest attention is solicited, as it is of utmost importance to every manufacturer and jobber to have his mark recorded in this supplement.

THE JEWELERS' CIRCULAR PUBLISHING CO.

11 John Street, NEW YORK

This supplement when complete will be mailed to all holders of the second edition of this work without charge.

Now It's The Lord Elgin

The demand to-day is for thin watches.

The public have been waiting for a thin Elgin Watch—now it's here—the

LORD ELGIN

The Thinnest Watch Made in America with Enamel Dial

the thinnest watch made in America with enamel dial.

Like all Elgin Watches—it was not put on the market until worthy to carry with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory and timed in the case—the most accurate thin watch in America.

Four grades—7, 15, 17, and 17 Jewels adjusted. 18K and 14K solid gold cases, also 25 year filled cases.

Furnished with metal dials, plain or engraved, gilt or silver.

Prices furnished on application by your jobber, or write the Company for only authorized price list.

THE HOROLOGICAL REVIEW

A CATECHISM OF THE LEVER ESCAPEMENT

Being an Informative and Instructive Series of Questions and Answers for Watchmakers and Apprentices.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by T. J. WILKINSON.)

(Continued from issue of June 17.)

QUESTION:—Explain an instance wherein we find the following conditions and state the methods by which we detect and make corrections: First, we find the guard pin tight with one side of the roller table; second, we find on the opposite side a surplus of freedom between the guard pin and edge of roller table.

FIG. 83.

ANSWER:—In this, as in every instance, we commence our examination by observing Rule I., which calls for an inspection of the conditions of the lock of the escape wheel teeth on the pallet jewels. We will assume that the lockings are satisfactory; therefore we pass on to Rule II., and, guided by this rule, we close the bankings in to position of drop or first lock; this done, we replace the balance and discover that the watch refuses to run. An examination reveals the fact that on one side we are unable to find hardly any freedom between the edge of the roller table and the guard pin; there exists an over-contact between them, hence on this side the escapement fails to act, while on the opposite side a surplus of freedom is noticeable between the edge of the roller table and the guard pin. These conditions are in violation of Rule III. A correction can be made in one of two ways—first to alter the pallets by resetting the stones in such a manner that we are thereby compelled to open the bankings (on the side that the tightness exists) to allow the tooth to escape; this necessitates the closing in of the opposite banking in order to adhere to Rule II. The effect of resetting the pallet jewels should be to equalize the shake of the guard pin on each side of the roller table. The second method of correcting this class of error is to bend the lever away from that side on which the guard pin binds on the edge of the roller table, as our preliminary examination of the lock (Rule I.)

FIG. 84.

FIG. 85.

decided that it was practically correct; and, second, we will assume that the binding of the guard pin on the edge of the roller table is not very excessive, so we shall in this instance bend the lever; this we do, bending it away from that side on which the friction between the guard pin and edge of table was detected. As the result of the bend we discover that we are now compelled to open the banking on the side where the tightness existed before the tooth will escape from the pallet, while on the opposite banking we do the reverse, namely, close it in so as to conform with Rule II., thereby again establishing drop or first lock. On replacing the balance we find that the freedom of the guard pin on each side of the roller table has been nearly equalized, and as the result the watch starts running under strictly Rule II. conditions. We next employ test B; having wedged the lever, we guide the roller jewel into the notch of the lever and out the opposite side, when if the action is correct it will be found that the lever is not at rest against its banking, and, second, that the escape wheel tooth remains in contact with the impulse face of the pallet as illustrated in Fig. 83. Reversing the rotation of the balance, we make a similar test of the opposite action where we shall presume like conditions prevail, thereby indicating that the correct corelationship exists between the action of the roller jewel in the lever notch with the teeth and pallets. This decided, we pass on to test C, first removing the wedge from under the lever and placing it under the balance; having done so, we gently guide the roller jewel into the notch and at the same time observe the pallet and tooth action; the instant a tooth drops onto the locking face of the pallet, cease rotating the balance. *In test C,* we should then find the following: First, the lever is at rest against its bank; second, that a space exists between the corner of the lever notch and roller jewel as shown in Fig. 84. The extent of this freedom can be readily estimated by noting the extent we are able to lift the lever away from its bank. A like test on the opposite side should be made of the freedom of the roller jewel with corner of notch. If we are in any doubt as to the results obtained by test C, we should have recourse to test D as explained in a former paper. As tests A, B and C show that this escapement is now practically correct, we next observe Rule VI., opening

FIG. 86.

FIG. 87.

WALTHAM WATCHES

COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

RIVERSIDE; NICKEL;

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

ROYAL; NICKEL;

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

NO. 1425; NICKEL;

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

NO. 1420; NICKEL;

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint)

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

Movements manufactured and guaranteed by

WALTHAM WATCH COMPANY,

WALTHAM, MASS.

the bankings to allow for the second lock, and the job is completed.

QUESTION:—Before attempting to bend a lever, what rule and test should be made?

ANSWER:—First observe Rule III. by bending the guard pin very much away from the edge of the roller table; then employ test B and learn the relationship as it exists of the tooth and pallet action as related to

FIG. 88.

the action of the roller jewel in the notch of the lever.

QUESTION:—Is it wise to bend a lever a noticeable amount?

ANSWER:—No; the bend given a lever should be of such extent as to be hardly visible.

QUESTION:—Where the lever requires an excessive bend to equalize the freedom of the guard pin with each side of the roller table, what is the best procedure?

ANSWER:—The pallet jewels should be first reset, after which a slight manipulation of the lever is admissible.

QUESTION:—Is a special tool for bending the lever required?

ANSWER:—Yes; a tapering jaw concavo-convex pliers is necessary. It should be provided with a set-screw to regulate the distance the jaws shall come together; this avoids breaking levers.

QUESTION:—Follow out an escapement examination in which we find it best to substitute the roller table for one of lesser diameter.

TEST A, CASE D.

ANSWER:—The following, which we have designated as test A, case *d*, will explain

FIG. 89.

the method to be pursued: As in all former instances, we again commence the examination with a preliminary inspection of the condition of the lockings of the teeth on the pallet jewels, in accordance with Rule I. Our observation shows us that there is an unusual amount of draw or second lock present, while the extent of drop or first lock is about correct. Removing the balance, we next observe Rule II., namely, closing the bankings in, so that the first lock only is present; next we replace the balance and find the escapement will not act—the roller jewel is unable for some reason to make its exit out of the lever notch. This would indicate that either the action of the roller jewel with the lever notch was in some way incorrect, or that the guard pin was too far forward. To determine the cause of the trouble we apply Rule III. and bend the guard pin away from the edge of the roller table; we find that by giving the guard pin an excessive bend the watch starts running, and upon making an examination for the freedom which should exist between the guard pin and edge of the roller table we discover only the slightest amount of freedom between these parts. Where such a condition exists we attribute it to the guard pin being set too far forward, or, second, the diameter of the roller table is too great. We have three remedies to consider for the foregoing condition: First, drilling a hole in the lever whereby we can set the guard pin further back; second, obtaining a new lever (one in which the guard pin is not so far forward); third, replacing the original roller table with one of lesser diameter; as this appears the most feasible remedy, we measure the diameter of the old roller table with a micrometer gauge and select a new one 3/100 of a millimeter less in diameter. Having placed the new table on the balance staff, we straighten up the guard pin and replace the balance. We now find the watch starts running. Again we examine the freedom which should exist between the guard pin and edge of roller table and find it normally correct.

QUESTION:—Whenever a change of roller tables is made, or whenever we permanently adjust the guard pin so its pitch is away from the edge of the table, what point calls for immediate attention?

ANSWER:— We should bring the guard pin against the edge of the roller table and observe that the tooth remains locked on the pallet's locking face (see Fig. 85).

QUESTION:—State another test it is desirable to make when the foregoing alterations have been completed.

ANSWER:—The roller jewel being brought to a position beyond the end of the lever horn, bring the guard pin against the edge of the roller table; maintain the parts in this position of contact and then slowly rotate the roller jewel, bringing it back into the lever notch, when it should be found that the roller jewel is entirely free of contact with the lever horn; however, as the roller jewel passes the corner of the notch, a slight rub will be detected, but nothing in the way of a decided catch should be felt; in fact, the face of the roller jewel will slide over the corner of the notch as shown in Fig. 86, without any extra friction being discovered.

QUESTION:—At what phase of action of the above mentioned parts would it become possible for the roller jewel to come in contact with the corner of the lever notch?

ANSWER:—The roller jewel comes in contact with the corner of the lever notch the moment the guard pin enters the crescent (see Fig. 87).

QUESTION:—State what we should observe in regard to the tooth and pallet action when the corner of the lever notch is in contact with the face of the roller jewel in the manner shown in Fig. 87.

ANSWER:—An examination should be made to discover if the tooth remains locked on the pallet as illustrated in Fig. 85.

QUESTION:—Supposing the tooth was found on the pallet jewel's impulse face as shown by Fig. 88, would it be considered a sound action?

ANSWER:—No; such a condition is erroneous, productive of stoppages, and should be corrected.

QUESTION:—What might be the cause of this class of a tripping error?

ANSWER:—It might be due to any of the following: The roller jewel being set too far back; second, the roller jewel being set with a backward slant; third, the acting length of the lever being too short—*i.e.*, the corner of the notch being cut away too much as indicated by drawing Fig. 89.

QUESTION:—What other test will aid us

FIG. 90.

in discovering errors as related to the acting length of the lever?

ANSWER:—Test B. We shall now use it to continue the examination of test A, case *d*, where we left off. Test B is made, as already explained, by placing under the lever bar a wedge of some soft material. The balance being in position, we gently rotate it, thereby bringing the roller jewel out of the notch and beyond the horn. This done, we note the position of the escape wheel tooth on the pallet jewel. If the action of the roller jewel in the lever notch is correct the tooth will remain in contact with the impulse face of the pallet as indicated by Fig. 83. This action we will assume to have been found correct; a similar test should be made on the opposite side of this action. Presuming that we have found a similar correct condition, we pass on to test C. To employ this test we remove the wedge from under the lever, thus allowing the lever to act free and normally; as a matter of convenience we place under the balance another wedge for the reason that when we rotate it we want a slow, steady motion. Having thus wedged the

FIG. 91.

balance, we slowly rotate it, bringing the roller jewel into the lever notch. We continue to slowly guide the balance until a tooth is discharged from a pallet (Fig. 90). The instant this happens cease rotating the balance. Then with some tool lift the lever away from its bank and note the extent it can thus be lifted; the amount of this lift shows the freedom which exists between the corner of the lever notch and the roller jewel (see Fig. 91). A similar test should

21 and 23 Maiden Lane **New York City**

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

Absolute Security

Patented U. S. June 9, 1908.
Patents Pending in Foreign Countries.

UTILITY

It can be raised so as to read the time, and reversed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

Will not pull or wear off

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

Watch worn as Chatelaine, showing it lifted to read the time.

Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pinned to garment as additional security.

be made of the roller jewel's freedom with the opposite corner of the notch. Supposing that test C condition has been found satisfactory, we can, if we desire, prove them by test D, which is as follows: Slowly guide the roller jewel towards the lever notch, and at the instant that the roller jewel comes in contact with the side of the notch cease rotating. Then, as in test C, we again lift the lever off its banking and the extent of the lift represents the freedom which exists between the corner of the lever notch and face of the roller jewel under test conditions. A like test with the opposite side of the notch, we assume, again gives sound results—that is, a correct freedom between the parts exists. We have now proved that a change of roller tables in the escapement we have tested produces a correct action of all parts at all phases of escapement action; this being so, we open the bankings to allow for the second lock as directed in Rule VI. This job is therefore completed.

QUESTION:—What rule must be in force whenever we make tests C and D?

ANSWER:—Rule II., which calls for the closing of the bankings so that drop or first lock only is present; otherwise the tests are useless, as personal investigation will readily prove.

(To be continued.)

The Best Time to Wind a Watch.

THE best time at which to wind a watch formed a topic of discussion at a recent meeting of the British Watch and Clock Makers' Guild, held in London, and the consensus of opinion among the experts was against the generally prevalent practice of doing the winding just before going to bed.

Several members of the Guild were of the opinion that the winding should be done at night, as in the morning the mainspring would be colder and more brittle than after the watch had been carried about in the pocket all day.

On the other hand, the vice-president thought it was a decided advantage to wind up a watch in the morning. During the daytime the watch was carried about and subjected to all kinds of irregular conditions, which it was better able to withstand when fully wound. At night the watch was usually laid on one side in a horizontal position and was at rest, as it were, therefore its running down did not affect it so much.

This view of the case was agreed to by the majority of the members present.

An English contemporary, *The London Express,* took up the subject and obtained the views of George Russell, an expert on timepieces. "Given a good watch, it does not matter in the least whether you wind it at night or in the morning," he told a reporter. "But a watch never keeps the same time when the position is constantly altered. Watches which are sent to Kew and which are tested in several positions rarely keep the same time.

"The moral to be drawn, therefore, is keep your watch as much as possible in the position in which you wear it during the day. In other words, hang your watch up at night."

Trials of Chronometers, Etc., at the Greenwich Observatory, England.

THE report of Sir W. H. M. Christie, Astronomer Royal, dated May 25, 1908, which was read to the Board of Visitors at the Royal Observatory, Greenwich, on June 3, deals with the work carried on and the incidents which have occurred there during a period of 12 months preceding. For the appended items, which appear to be of especial interest to our readers, we are indebted to *The Jeweller and Metalworker* of London.

The number of Government marine chronometers and watches now at the Observatory is 389, viz., 255 box chronometers, 23 pocket chronometers, 68 chronometer watches and 43 hack watches. In addition to these there are at the Observatory 27 hack watches on trial for purchase, and also eight box chronometers and two watches belonging to the Indian Government.

In the year ending May 10, 1908, the average daily number of chronometers and watches being rated was 589, the total number received was 1,289, the total number issued was 1,415, and the number sent for repair 575. These include 11 box chronometers and two deck watches for the Indian Government.

For the annual trial of chronometers, which lasted 29 weeks with a range of temperature from 45° to 106°, 28 chronometers were sent in. During the trial 13 were rejected because the difference between one week's rate and the next exceeded 12 seconds. Of the remaining 15 chronometers, nine were purchased for the navy and six for the Indian Government. There is a serious falling off in the performance of the chronometers as well as in the number submitted for trial.

A competitive trial of pocket chronometers took place concurrently with the trial of box chronometers, and under the same conditions as regards length of trial and temperature, trials in position as for chronometer watches being included. Of the eight pocket chronometers sent in, three were purchased for the navy.

For the annual trial of chronometer watches, lasting 16 weeks, and including trials in the oven and in positions, 156 watches were entered, of which 43 were classified, and of these 32 were purchased for the navy. Among the watches classified were 10 with center seconds dials, of which eight were purchased. There were 17 "Karrusel" or "Tourbillon" watches classified, of which 15 were purchased. The performance of the watches this year shows an improvement on that of last year, and fairly comes up to the average of previous years.

It has been arranged that in future pocket chronometers and chronometer watches shall be tested together under the same conditions for the trial.

The new trial of box chronometers commenced June 10, and of pocket chronometer watches will commence Aug. 1.

"The automatic signals from the Westminster clock have been received regularly since June 6, previous to which date the clock was under repair. On eight days the signal failed, and on one day it was interrupted by telegraph signals. Its apparent error was not greater than 0.5 on 32 per cent. of the days of observation, not greater than 1.0 on 63 per cent., not greater than 2.0 on 93 per cent., not greater than 3.0 on 99 per cent., and exceeded 3.0 on only two occasions. Owing to an accumulation of snow on the hands, the clock stopped at 5 h. 30 m. A. M. on Jan. 8, 1908. It was restarted at noon."

Under the heading of Meteorological Observations it is reported:

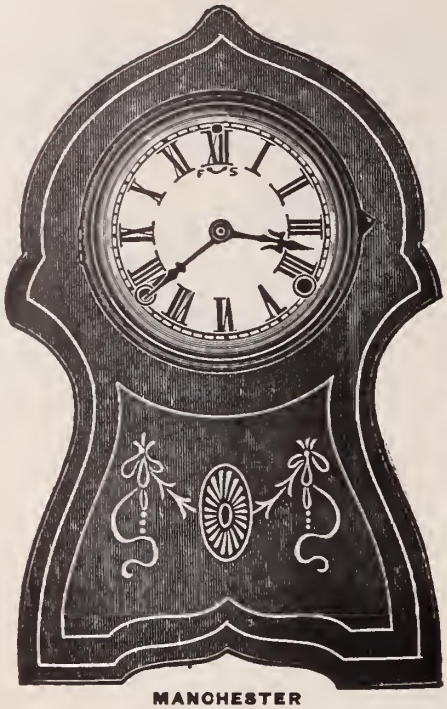
"The mean temperature for the year 1907 was 49.4°, or 0.2° below the average for the 65 years 1841-1905.

"During the 12 months ending April 30, 1908, the highest temperature in the shade (recorded on the open stand in the Magnetic Pavilion enclosure) was 82.7° on Sept. 25. On the same day the highest temperature in the Stevenson screen in the Magnetic Pavilion enclosure was 82.6°, and in in the Observatory grounds 80.2°.

"The lowest temperature of the air recorded in the year was 17.9° on Jan. 6 and 12. During the Winter there were 47 days on which the temperature fell below 32.0°, being nine less than the average number.

"The number of hours of bright sunshine recorded during the 12 months ending April 30, 1908, by the Campbell-Stokes instrument, was 1,386 out of 4,472 hours during which the sun was above the horizon so that the mean proportion of sunshine for the year was 0.310, constant sunshine being represented by 1.

"The rainfall for the year ending April 30, 1908, was 23.14 inches, being 0.98 inches less than the average of the 65 years 1841-1905. The number of rainy days was 167."



Exact as are the proceedings in the Observatory, accident occasionally intervenes. We learn that on Dec. 14, the Greenwich time ball was not raised, owing to the violence of the wind. On June 6 the clips failed to hold the ball, which fell about two minutes too early. It was raised again and dropped correctly.

On Dec. 3 the Greenwich Mean Solar clock gave a false signal 30 seconds before the hour, which dropped the Greenwich time ball.

From various causes, which are enumerated, the time ball at Deal failed on six days. Occasional failures of return signals from the clocks at Devonport, Portsmouth and Portland are duly noted, but though these records are doubtless useful for subsequent official reference, they scarcely call for reproduction here. It may be mentioned that these clocks receive time signals from Grenwich; automatically give signals for dropping time balls, and then should return signals to Greenwich, that the amount of their error from Greenwich mean time may be noted. They are fitted with apparatus for correcting error by electro-magnetic action on the vibrations of their pendulums.

A collection of historical and modern astronomical and meteorological instruments, models, chronometers and photographs, representative of the work of the Royal Observatory, has been prepared for the Franco-British Exhibition, and is now ready for delivery as soon as arrangements have been made to receive it at the exhibition.

C. E. Cummings has bought out the business of Willard E. Morse, Danvers, Mass.

THE

Ægis Case

(PATENTED)

THE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

GOLD

No. 132.

A NEW ONE AND A GOOD ONE

MR. EXCLUSIVE JEWELER:

Do you wish a case of maximum value at a minimum cost, in shapes the thinnest and models most superh—finish and engraving that of the finest 14K. solid gold line—a solid gold case of extra heavy weight at about the same price as the best makes of gold filled?

This is a large order but WE ONLY can fill it in every respect. These cases are made in triple stock, the outside of which is 14K., and this 14K. stock is ⅓ of the total thickness of the backs. The 10K. on the inside and low K. between, which is crystalized, make a harder, stronger and stiffer case in every way than either a filled case or 14K. solid. Ask your Jobber or write us direct for Prices and Samples.

MR. ASSOCIATION JEWELER:

Are you going to the National Convention in Cincinnati? If so, you will receive a most cordial welcome if you will call on our Mr. Bell at the Sinton Hotel during the Convention, August 3 to 7. He will show you this superb line of Gold Cases.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Learning a Business "From the Ground Up"

Useful Counsel for the Ambitious Store Clerk.

IT is probable that 90 out of every 100 of the clerks and employes of the United States are not concerned about their business further than to know that they are being paid for what they do, says the *General Merchants' Review*. To "hold their jobs" is often the sum and crown of the ambition of those who work for others, and as a result that is about all they accomplish. At a gathering of young men in Chicago the other night a lecturer talked for more than an hour about the secrets of advancement in the trades and professions.

One of the points he made was that nearly every employe would be pleased, flattered and encouraged if his employer would "give him an interest in the business." The speaker, himself an employer of thousands, added: "Don't wait for him to give you an interest in his business. Take an interest in it, for in that degree that you are deeply, seriously interested in your work, in just that degree is it your business, and your success in it will be finally measured by the interest you have manifested in your daily duty."

It must strike every intelligent employe that this advice is good. Of course, it is another change rung upon the old maxim that whatever is worth doing is worth doing well, but it has an added significance for those who do not follow what might be called regular trades or professions. To be stock clerk in some retail store may not seem a satisfying position to the average young man, but he can if he is diligent and observant make of such a place a station of importance, and one that may lead to better things. The mere performance of physical duties is not the summit of efficiency, though such service may satisfy the firm. The idea is for a stock clerk, or a salesman, or an accountant to set out to be the best stock clerk, the best salesman or the best accountant that it is possible to be. To do this most effectively he must take a genuine and mental interest in the business itself as distinguished from that small portion of the work which it is his task to perform.

It is the shiftless, the short-sighted, who ask, "What's the use? I won't get any more pay." It is a common mistake to believe that the employe generally earns all he gets. It would be a much wiser precept for workers to believe that they get, generally, what they earn. The man or woman who has a thoughtful, even a loving, interest in the business of his days, is rewarded in ways that cannot always be measured in wage or salary. For one thing, he or she comes in time to have a business and to know it. In casting about for heads of departments, for managers, for partners, business men always insist first that the appointee or the applicant shall "know the business."

It is quite possible to learn a business "from the ground up." Indeed, that is the best way, though it may seem slow to the young and hasty.

One of the best railroad managers in the United States began as a section hand. Now he is vice-president of his company, rich, and an acknowledged master of his business. He gave his son every advantage of education, taught him a trade, made of him an accomplished engineer and trained him for a high position in the railroad world. When the boy graduated his father put him to work at day wages in a machine shop. "If he takes any interest in the business I'll help him to get along. But he's got to show that he is interested, and he's got to work his way."

It is indeed a fact that the most hostile, the most begrudging employer, cannot prevent his employes from having "an interest" in the business, and such interest is to the young business man, of whatever station or grade, the very best stock in trade he could have. The interested employe may not gain advancement in the house where he is employed, but by the mere mastery of its details he becomes fit and ready to take a better place with a firm that may be more liberal, larger and more progressive.

An interest in the business may not always be purchasable, it may never come as a gift, but the zealous, industrious, wide-awake employe who knows his business from A to Z has an interest that his employer cannot take from him, and that will serve him well at last.

Maxson & McCarthy, Fresno, Cal., have dissolved, D. L. McCarthy continuing the business alone.

Storekeeping Wisdom.

"I DO not believe it an exaggeration to say that not one storekeeper in a thousand, the country over, adequately figures the cost of merchandise which he sells."

"The man who sells the right goods in the right way has no need to do business at a loss on any article, or to allow his competitor or his customers to make his prices."

"Few men have a natural merchandising genius big enough to win out as owners of a business about which they know little or nothing in the way of actual experience."

"Again, neatness and order are essential to the success of the storekeepers from the standpoint of economy, as well as from their effect upon the sensibility of customers."

"The knowledge that he will be 'taken care of' in sickness and calamity as well as in health does more to keep the employes steady and contented in his service than all other influences."

"Salesmen who try to make up for lack of orders by voluminous correspondence telling why they did not sell the goods do themselves harm instead of good through their epistolary efforts."

"It is not too much to say that good service is the most profitable thing which the merchant can sell, and that poor service is, by the same token, the most unprofitable thing that he can have about his store."

"The best capital that any employer can have is the knowledge and appreciation on the part of his employes that he is genuinely and sincerely interested in their welfare: that he really cares for them and their prosperity."—H. N. Higinbotham, in "The Making of a Merchant."

Timely Business Literature.

"HISTORICAL Quebec City," is the title of an exceptionally neat little pamphlet 2⅞ inches wide by 5½ inches long, which is being distributed by Henry Birks & Sons, Ltd., Phillips Sq., Montreal. The cover pages are of an excellent quality of paper designed to imitate real parchment. The title is printed in an attractive shade of olive green. The inside pages give dates of interesting events in the history of Quebec as well as a list of the places of interest in that city. An insert fastened into this "parchment" cover is entitled "When Passing Through Montreal." The first page shows an illustration of the concern's jewelry establishment. The inside pages call special attention to the facilities which the concern has for selling diamonds.

Storekeeping Department.

Competitive Publicity.

WHEN an advertiser arrives at a point of confidence where aggression seems desirable and opportune, then it is that he is beginning to achieve success, says a writer in the *Haberdasher*. Aggression in advertising proves one thing, viz., that advertising pays. Competition makes aggression and aggression produces success—sometimes instantaneous success and sometimes slower moving but none the less sure bound.

In soliciting business from one of the large mercantile houses in a big Massachusetts city, the representative of the leading paper of that town made a strong plea for an increase in space used in his publication. He said the way to "get from under the dominating influence of competition is to outadvertise it." By the dominating influence of competition this solicitor meant the effect of the advertising of one merchant who was using large space, and in order to secure the best results for his paper he wanted to make the advertiser understand that more space was necessary. The solicitor was working for the best interests of his paper and he was also working for the best interests of the advertiser, and this policy is correct.

A case in point may illustrate how some men believe in that form of advertising that brings success by simply overtopping and thus destroying, in part at least, the effect of competitive advertising. A struggling merchant, who had been doing some advertising, recently made up his mind that no matter what any of his several active competitors used in the way of newspaper space, he would use *double* that amount of space.

Considering that all of these advertisers were quite liberal users of space in the best papers in the city, it becomes apparent that this advertiser, fighting as he was to increase his business, made a big contract with himself. However, he lived up to his promise and actually doubled the largest space used by any of his opponents, and a personal knowledge of the results obtained through this effort to get out from under the "dominating influence of competition" is my authority for the statement that he is succeeding.

This aggressive advertiser is getting what heretofore was to him an unknown quality and quantity of business. He has overshadowed the other firms advertising in his own line. He has compelled attention through what might be termed volumetric force. His past success in advertising gave him courage to adopt aggressive methods. He calculated that if a given volume of advertising reached and made its impression upon a certain number of people, a larger volume would not only reach the same number of people, but would interest them more, impress them more favorably and insure him an increase in patronage.

Aggression is not necessarily born of past success, but is frequently the result of confidence in the future. The man who has been aggressive for this reason has been intelligent enough to investigate campaigns conducted by others in his line of business. He has figured upon his own success by noting the satisfactory results obtained by others. Watching the steady increase of space used by a certain advertiser or certain advertisers, he has decided that there must be a strong motive for such increase, and that, all things being equal, if this motive has been produced by another man's success, he is safe in using the same means to achieve his own success.

There is nothing in business that requires more thought and care to do really well than advertising. It is easy to get advice on many points, but to make a real success advertising must be studied as an art (a commercial art, if you will), and campaigns involving large expenditure must be entered upon with great caution. That advertising pays is an axiom. The most successful merchants to-day are advertisers. But they are original in methods and shrewd and careful in bargaining for position and space in the newspapers they have carefully selected.

He who would win the golden prize in the mercantile world must rely upon his own clear intellect to put his wares intelligently before the public in plain business-like statements, or must buy intelligence for his advertising department as he buys his choicest stock. There is nothing to be gained by making an appeal on the strength of personal prestige. He must continually advertise his business, and without honesty of purpose and integrity in presenting to the notice of the public the articles he wishes to dispose of, true and permanent success is impossible.

Never allow a small competitor to outdo you in quantity or quality of advertising. Prestige is maintained with quantity and sales made through the quality of the advertising.

The Newly Renovated Store of Gustafson & Henrickson, Omaha, Nebr.

AN attractive store in Omaha, Nebr., which has recently been completed, is that of Gustafson & Henrickson, in the new Loyal Hotel building, 16th St. and Capitol Ave. The store room, 24x65 feet, is situated directly on the corner. The interior furnishings and fixtures are of solid mahogany. Both gas and electricity are used to illuminate the store, and while the ceiling will not be decorated for some time it is the intention of the firm to use the graduated shades of blue as the color scheme.

A large front show window is situated at the left of the entrance, while at the right the window extends from the front to about 20 feet on the side. Wall cases of mahogany and show cases of solid glass with mirror backs and mahogany foundations give a rich and artistic finish to the store.

INTERIOR VIEW OF THE STORE OF GUSTAFSON & HENRICKSON, OMAHA, NEBR.

The diamond room is situated at the right upon entering the establishment. The watchmaking department is at the left. In the rear, at the right, is the office. Potted plants and vases filled with cut flowers add to the room's attractiveness.

Employes of the Sessions Foundry Co., Bristol, Conn., and their families, enjoyed about a week ago, the ninth annual lawn party given by the officers of the company on the spacious lawn in front of the big foundry on Farmington Ave. Upward of 4,000 persons were entertained. The arrangements were in charge of Joseph B. Sessions. Electric lights hung in festoons around the lake near the center of the grounds, and also around the fences. President Wm. E. Sessions and other officers of the company greeted all who came. Music was furnished by Colts band, of Hartford.

WORKSHOP NOTES AND QUERIES

[*Answers are also solicited from our readers to the questions published on this page.*]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2182.—**Silvering Mirrors With Copper.**—*Is there any other metal that I could use for silvering mirrors in place of silver. I want something less expensive that will make a good brilliant mirror.* S. M.

ANSWER:—Copper is now being used for mirrors, and as this is very cheap many believe that it will be used exclusively for mirrors in the near future. Until recently many attempts have been made with copper without success, but now a very brilliant and uniform mirror is produced. The copper is deposited upon the glass by reducing cupric oxide by an aqueous solution of phenyl hydrazine in the presence of potassium hydroxide, which accelerates the action in a remarkable degree. The copper thus deposited is much more beautiful than silver.

QUESTION No. 2183.—**Britannia Deposit on Brass.**—*How can I cover brass articles with a coating of Britannia metal without the electric current?* B. D.

ANSWER:—To coat brass articles with Britannia metal, first thoroughly clean and polish the brass pieces and prepare a solution of 45 parts of pulverized tartaric acid and four parts of tartar emetic, dissolved in 1,000 parts of hot water. Add to this 50 parts of hydrochloric acid, 125 parts of pulverized tin, and 30 parts of pulverized antimony. Heat the whole in a well-glazed vessel to boiling and immerse the articles. In from 15 to 30 minutes the coating is complete. This is well adapted for articles to be silver plated, the tin coating making a good ground for the silver deposit.

QUESTION No. 2184.—**Modeling Wax.**—*Please give me a few formulas for making modeling wax suitable for modeling decorations for silverware and toilet articles.* M. W.

ANSWER:—There are a number of mixtures for producing modeling wax for various objects. A thin model requires a finely worked wax that will be hard enough to stand alone and retain its shape until the impression is obtained, while a coarser and cheaper mixture may be used for the heavy and thick pieces. We will give the mixture of several, and one must try them to obtain the kind most suitable for the special work: (1) White wax, 50 parts; turpentine, 15 parts; cinnabar, 10 parts; glycerine, five parts; to be melted and stirred. (2) Ten parts white wax, 1.5 parts mutton tallow and 1.5 parts of dark resin; melt together, add one part of cinnabar, stir, remove from fire, pour into rod-shaped tin molds and stir until it sets. (3) Use a mixture of three parts of turpentine, five parts of wax and some olive oil or lard. To make it red, add a little powdered rouge or vermillion. (4) Pure white wax, 1,000 parts; 132 parts of pure lard, 132 parts of black pitch and 66 parts of cinnabar.

QUESTION No. 2185.—**Burnt Black for Metal Articles.**—*How can I produce a burnt black appearance on brass and copper trinkets, such as charms, medals and match cases?* B. B.

ANSWER:—To produce the burnt black on metals, make a solution of nitrate of copper by adding copper to nitric acid until the acid will take up no more. Also make a saturated solution of nitrate of silver. Then to one ounce of water add one ounce of the copper nitrate and from ⅛ to ¼ ounce of the silver. Dip the articles in this and heat until black oxide has formed. Repeat the dipping until the desired color has been obtained. After a few trials perfect results can be had without trouble.

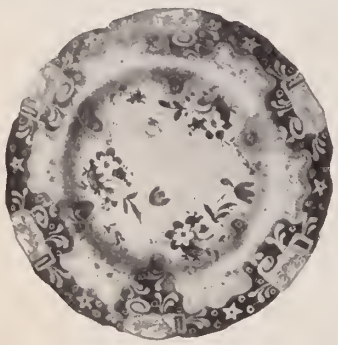
QUESTION No. 2186.—**Marking on Glass.**—*Can you give me a recipe whereby I could mark on glass in a rapid manner? I wish to place on glass articles a mark for identification. Is there a mixture which I could stamp on with a rubber stamp—a mixture with some kind of paint, so that when the paint is scraped off the marks would be eaten into the glass?* A. K.

ANSWER:—If there are no sand-blasting facilities, then the marking may be done with acid, as follows: A resist or etching ground is first prepared. This is brushed on the glass, covering a space three or four times larger than the designs or name to be etched. When this is hardened, trace the letters through the resist with a blunt needle or pointed engraving tool, so that the glass will be laid bare. The letters should be traced through this resist carefully, and on its neatness depends the appearance of the finished letter or design afterwards. If the letters or designs are to be uniform on a number of pieces, then it is best to cut a stencil out of tinfoil. This is done by laying the foil on a flat piece of glass, then drawing the design or letter and cutting out with a sharp penknife. This stencil is laid on the resist. The letters may then be traced through the stencil, taken off carefully and used on the next. The tinfoil, being pliable, will adjust itself to any shape. The resist or ground is made of white wax, 30 parts; gum mastic, 30 parts, and asphaltum, 15 parts, all melted together and painted on the glass while warm enough to be liquid. The glass should be clean and slightly warmed so that the resist will adhere closely. The etching acid is prepared in a lead or hard rubber receptacle, and consists of a mixture of sulphate of barium, three parts; fluoride of ammonium, one part, and enough sulphuric acid to decompose the ammonium and to bring the mixture to the consistency of rich milk. This mixture is applied with a brush or swab to the traced design on the glass in such a manner that a little fills the design. Repeat the swabbing several times, but do not use too much acid or it will run beyond the wax and affect the other parts of the glass. When it appears deep enough, rinse off the acid in water and remove the wax resist by putting in warm water. The acids should be handled carefully, as they are poisonous.

QUESTION No. 2187.—**Etching Nickel Knife Blades.**—*Would you kindly send us any information obtainable as to the method of etching nickel-plated knife blades? We wish to etch our name in quantities of this work, and would greatly appreciate any information about the same. Is a rubber stamp used?* B. M. C.

ANSWER:—For etching names on nickel knife blades, procure a rubber stamp with the required lettering made so that the letters that are to be eaten in by the acid shall be depressed in the stamp. Have a plain border around the lettering, large enough to allow a little border of common putty to be laid around the edge of the lettering to receive the acid. The ink for the stamping is made with resin, one-quarter pound; one teaspoonful of lard oil; melt and stir in one tablespoonful of lampblack; thoroughly mix and add enough turpentine to make to the consistency of printers' ink when cold. Use the stamp and ink in the same manner as stamping on paper. Make a thin strip of common putty and put it around the lettering to hold the acid. The acid for nickel may be nitric acid, diluted with a little water, so that it will produce a smooth etch. The acid is applied to the lettering with a dauber, and when etched deep enough is washed off in warm water to entirely destroy it. Take off the putty and wash off the ink with turpentine. It requires some experience and patience for a beginner to produce good etching. There are very many little details to be observed that can only be learned by experience. The resist or ground should be in right condition for the holding of the acid, and not work under. The temperature must be taken into consideration. During cold weather the resist and the acid may have to be warmed a little. The acid should be kept strong enough to do the work quickly and produce smooth, clean lettering. When everything works well the etching can be done very fast and some of the precautions used at the beginning are done away with, especially the putty.

The Levin Mercantile Co. has become the successor to A. J. Levin, jeweler and diamond broker, at 515 Edmond St., St Joseph, Mo.



C. S. Hammatt, vice-president of the Florida Electric Co., has disposed of his stock in that concern and resigned his office to engage in the precious stone business, becoming connected with the Hammatt-Dickey Co., now being organized at Jacksonville, Fla., to engage in the grinding and cutting of gems. Their mines are located in North Carolina.

The Pottery of "Older Spain."

THE history of every country is more or less linked up by its pottery. Indeed, the records of the rise, progress and even the fall of nations preserved in the work of the potter have often proved more reliable than those of scribes, while in some instances we are made acquainted with important incidents of which we should have known nothing if they had not been recorded on imperishable pottery. This is, perhaps, more true of Egyptian and Roman than of Spanish pottery, but that the pot-

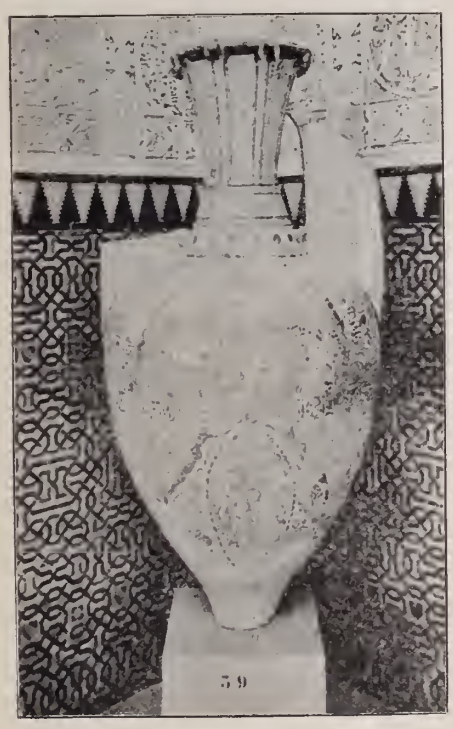

FIG. 1.—HISPANO-MORESQUE LUSTER VASE.

tery of "Older Spain" is full of interest Leonard Williams, in his chapters on pottery in "The Arts and Crafts of Older Spain" has demonstrated beyond doubt. He has confirmed and added to our knowledge of early Spanish pottery by detailed accounts of modern discoveries of specimens of it. Those, therefore, who are fairly familiar with the pottery of Older Spain will be interested in the more recently discovered examples of it described in this work.

In past centuries Spain exercised a great influence in the commercial world, and was noted for superiority in various branches of industry. From a very early date the Spaniards were famous for the production of artistic pottery, but they have not sustained either their commercial influence or their proficiency in ceramic art. The author, however, concerns himself with what they did rather than with what they are doing. He refers to quantities of pottery ware "believed to date from the time of the Phœnicians, or even earlier, which were unearthed in 1899 from Tumuli in the Guadalquivir Valley. Those objects are ornamented in relief with complicated patterns paler than the ground, obtained by using lighter colored clays."

He quotes Martin Hume, who says (in *The Spanish People*): "As similar Celtic pottery has been found in Portugal, it will be understood that the Celtic influence, having crossed the Pyrenees, reached the South by the western seaboard. It will thus be seen that long before the arrival of the Romans a relatively high degree of civilization had been reached at least in the south of Spain." He refers to even later discoveries. "In the Summer of 1905 two German archæologists, Messrs. Schulten and Konen, who had obtained permission from the Spanish Government to explore the site of old Numancia, filled four large cases with Celtiberian pottery they extracted from the ruins. These cases were forwarded to the University of Gottingen, but they are to be returned to Spain."

Long before the Christian era, Greek colonies existed on the Spanish coast at Rhodes and elsewhere. Pottery of good design and workmanship was manufactured there, and strongly influenced native art. "Roman potteries existed in the suburb of Seville. The name of 'Saguntine ware' was given by the Romans to a kind of pottery which seems to have been made along the Spanish littoral extending south from Saguntum. This ware is adorned with garlands, animals, hunting scenes, games, divinities or religious ceremonies, and also bears in nearly every case the potter's name or mark. More than 200 marks have been discovered which were used by potters of Ampurias alone.

Mr. Williams' work abounds in such interesting particulars of early Spanish pottery. The chapter on mosaic work and tiles is instructive. Seville is described as the principal center of the craft of decorative tile making. "These tiles made the potteries of Seville famous throughout Europe, and they are said to have been exported to Italy, Portugal and even to England." "The names of several hundreds of mediæval and post-mediæval makers of these Seville tiles have been extensively published."

The chapter on lustered pottery will appeal to potters of to-day. He says: "Probably no pottery in the world possesses greater loveliness or interest than the celebrated, yet even to this day mysterious, lustered ware of Moorish Spain. Our knowledge of the early history of this ware is still imperfect. . . . The origin of lustered pottery is yet a problem which awaits solution. Until some years ago it was believed to have had its source in

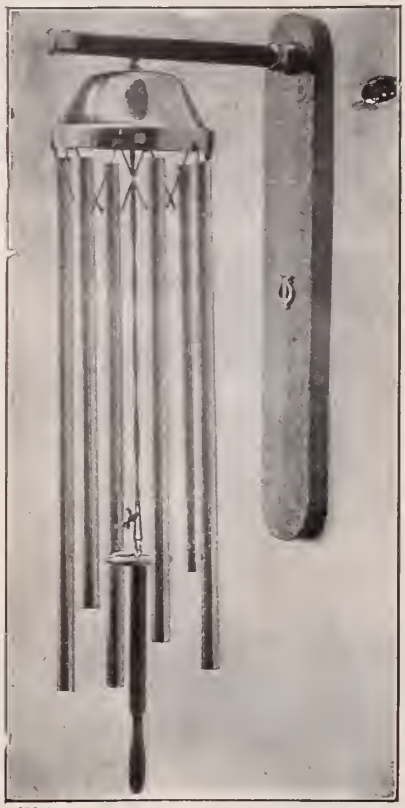

FIG. 2—TALAVERA VASE.

Persia, but this belief was shaken by Fouquet, who unearthed at Fostat, in Egypt, in the year 1884, specimens of lustered ware which are known to date from the 11th century." As to the methods of producing luster pottery, "chemical investigations have shown that the metals used to produce the characteristic reflex, which gives the ware its name were copper and silver, entering into the composition of an extremely thin glaze extended over the surface of the pottery, and employed, sometimes together and sometimes separately." . . . "The oldest specimens of this pottery extant today are those which contain the palest and

Importers and Makers of Novelties for Jewelers, in Metal, China, Leather, etc., etc. Smokers' Articles, Stationery Sets, Electroliers, etc., etc.

Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—

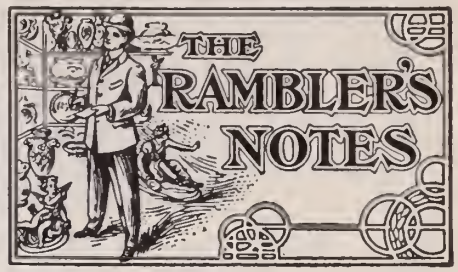
most pearly luster, and consequently the largest quantity of the costlier metal. In those of later date there is an evident inferiority, both in color, luster and design." An illustration and description is given of the celebrated Hispano-Moresque lustered plaque formerly belonging to Fortuny, which is said to date from 1408-1417. "No less remarkable for the quality of its golden luster than for the grace and elegance of its fanciful Oriental design." . . . A specimen of Spanish lustered ware more celebrated even than Fortuny's plaque is the Vase of the Alhambra, illustrated on page 93 (Fig. 1). The history of the mighty jar is interesting. Popular superstition affirms it to have been discovered filled to the brim with gold by the first of the Christian governors of the fortress of Granada. Exposed for many years to every stress of weather, and to every mutilation at the hands of passers-by, it stood, in company with other vases of enormous size, upon a rampart which is now the Garden Terrace known as the Adarves. The vase, which measures four feet six inches in height by eight feet two inches and a half in circumference, is of common earthenware painted with intricate devices fired after painting. This was a difficult operation in a vessel of such size, and in consequence the colors have slightly run and mingled. The belly of the vase is broken clean in half, and one of the handles is missing. The vase is colored blue and caramel upon a delicate yellow ground, and has a faint metallic luster. An Arabic inscription is repeated several times, and consists of the words "Felicity," "Welcome."

We can only make one more reference, although many fine old wares deserve lengthy notice. The pottery at Talavera was at one time much esteemed. It is mentioned in a manuscript history of the town in 1560. "Here was produced fine white glazed earthenware and other pottery, which supplied the country, part of Portugal and India. A writer of a history of Talavera in 1651 says: "Her pottery is as good as that of Pisa, and is used to adorn the front of altars, churches, gardens, alcoves, saloons and bowers. Two hundred workmen work at eight separate kilns, and four other kilns produce the commoner kinds of ware. Red porous clay vessels are baked in two other kilns in a thousand shapes to imitate birds and other creatures." The most important examples which have reached us consists of bowls of different sizes, dishes, vases, medicine jars and wall decorations. The other illustration (Fig. 2) is an illustration of a fine Talavera vase. "The potteries of Talavera were greatly celebrated for many years and supplied a lucrative and important branch of commerce."—London *Pottery Gazette.*

Troubles of the Jewelers During the Recent Floods.

THE accompanying illustration shows a rear view of the jewelry store of W. L. Speer, on the corner of Spear and Strong Sts., Argentine, Kans., a suburb of Kansas City, during the flood of the middle of June.



HOW AN ARGENTINE, KANS., JEWELER SUFFERED DURING A RECENT FLOOD.

It will readily be seen that business was not brisk when the picture was being taken, even if the stock had been moved to the roof.

The jeweler and his family not only moved the stock to the roof, but moved their telephones, so they could communicate with the outside world, and took along their phonograph to help them while away the time. They slept there with the stock, and now feel like they had just returned from a big camping trip, so it is probably appropriate to refer to this as their outing.

This gives some idea of the troubles the business men of these cities lying close to the river have been having during the past few weeks. The people of Argentine and Armourdale have moved in and out of their homes three or four times in as many weeks, owing to the fact that the river remains at so high a stage that a little rain out in Kansas puts it out over the streets again, although it has not reached so high a point as that shown in this illustration since the middle of June.

Plans are being drawn for remodeling and improving the store front of Henry Yoste Co., Vicksburg, Miss. New fixtures will also be added by the concern and when the improvements are completed the store will be one of the finest in that section of the south.

A BEAUTIFUL CLOCK SET

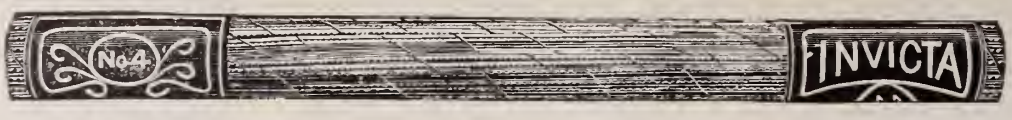
AT the New York salesrooms of Tiffany & Co. there is exhibited an attractive clock set in white marble, heavily overlaid in gold work. The base of the clock is oblong, and at its center rests a standard in which is the clock face. At one side of the clock is the figure of a young woman, and on the opposite side is a representation of a cupid. The figures are leaning toward each other with outstretched hands. On top of the clock support is a bronze dog. At the same saleroom is to be seen a bronze group depicting a young girl surrounded by a number of sheep. She has her arms full of feed for the sheep. A statue of a noble dog, a Great Dane, by G. Gardet, the original of which is in the Palace at Chantilly, France, is also shown at this establishment.

*

NEW IDEAS IN CUT GLASS

THE Maple City Glass Co. has on exhibition at the New York salesrooms, 253 Broadway, an attractive display of cut glass suitable for the Summer trade. Vases to be used for long-stemmed flowers are shown in a number of dainty patterns in different heights, varying from seven to 15 inches, and cut in star and other attractive patterns. These vases have rounded bases and dainty standards from which rise the body part. The display of water bottles, bonbon dishes, small servers, fruit holders and salad dishes affords an excellent opportunity for selection. Out-of-town buyers handling cut glass will profit by a visit to the salesrooms.

*



DAINTY BASKETS OF PORCELAIN

DAINTY and attractive wicker baskets made of finest quality porcelain are among the novelties now on exhibition. These baskets are shown in a variety of sizes and shapes and are a line sure to meet with the approval of jewelers carrying this kind of goods. One large basket is closely woven and has closely twined handles. About the top of the basket is a most dainty wreath of flowers in their natural colors, producing a most pleasing effect. The material from which these baskets are made, while in a plastic state, is woven by hand. The flowers are also hand-modeled and touched up with colors. Then the basket is fired and glazed. It is necessarily subjected to intense heat, and much precaution is taken to avoid warping.

S. O. BIGNEY & CO.

MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

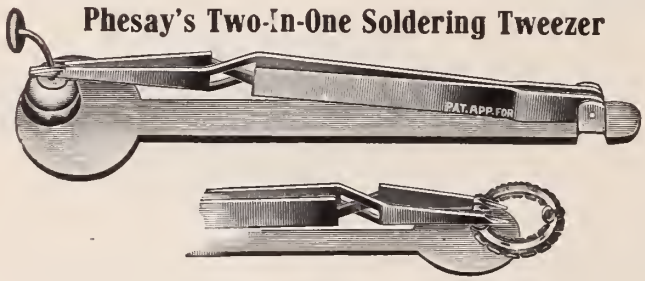
Pearl Setting Plier, No. 327

This tool should prove a useful addition to any jeweler's outfit. It is intended for setting half pearls or other stones of similar shape, which are imbedded in gold or other metal. It is used for cutting a burr and forcing it against the stone, either in brooches or rings, thereby holding the stone securely without liability of the tools slipping or breaking the stone, as is often the case with the use of other tools. The lower jaws are half round, to conform to the inner shape of rings. The work can be done more perfectly and under better control than with gravers or other tools used heretofore.

Made of best Swedish steel, nicely nickel-plated.

Price, each, $1.25

Randall Jewel Lamp

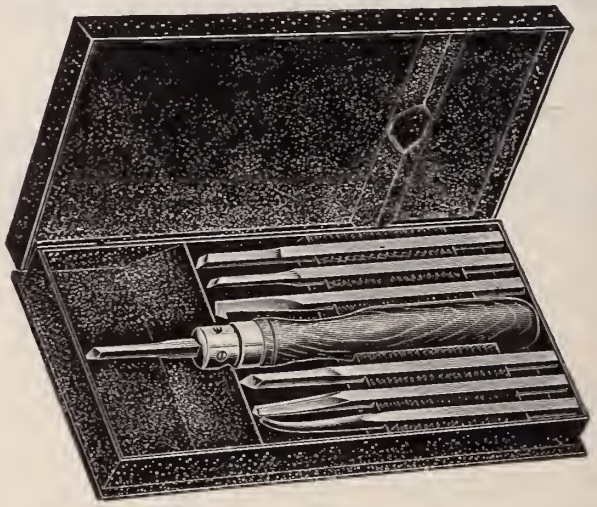


Cut is full size

Price, each, 50c.

Especially designed for work where very small flame is essential and very desirable when cementing roller and pallet jewels, for drawing temper of pivots and annealing small parts of watches. Made of brass full nickel plated. Has rubber washers inside of cap and under the hood to avoid leaking and evaporating.

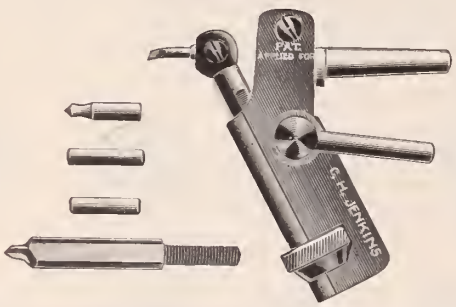
Phesay's Two-In-One Soldering Tweezer



Price, each, 75c.

By using Phesay's Two-in-One Soldering Tweezer the joint catch or Back is handled only once.

SAVES TROUBLE.—Phesay's Two-in-One, Soldering Tweezers will solder plumb and true. Will not let article slide when solder flows. Will hold pieces of jewelry with rounded stones or flat surfaces with equal firmness.



Guaranteed "E.F.B." Turning Gravers No. 33

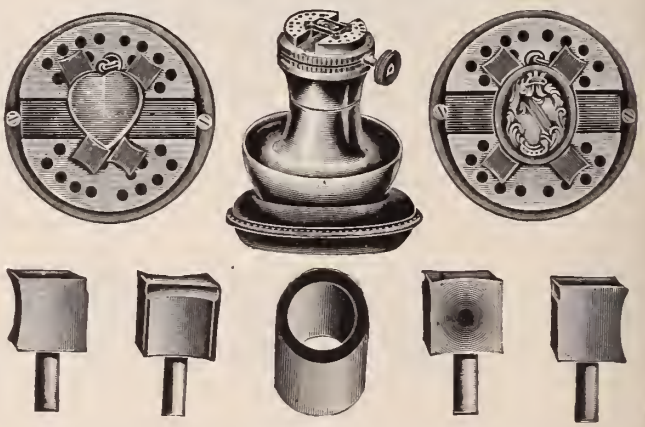
Price, per set of 7, in case, $3.00

The finest set of gravers on the market. Handle is of the finest cocoholo, fitted with nickel plated socket in which the gravers can be moved in or out as desired. The two set screws hold the graver rigid and prevent rocking or chattering. They will be appreciated by all users of fine tools.

Improved Turning and Jeweling Attachment No. 33

New Features

Adjustment for alignment, fine feed, with direct connected screw. Positive binder operated by slight movement of the thumb or finger. Cutters may be changed quickly. No small projecting parts to become lost or broken. Special cutters can be made from wire.



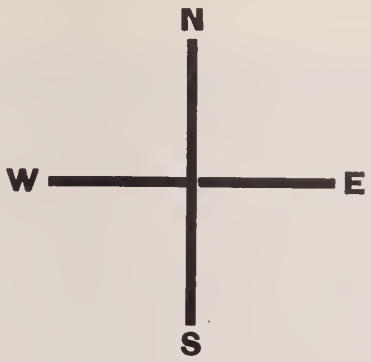
And Other Good Points

One tool may be used on different makes of lathes by simply changing tapers. Can be changed quickly.

All Standard Tapers in Stock

Each attachment is furnished with two cutters, one hurnisher and two blanks. In ordering, please give name and size of lathe. **Price, each, $4.50**

"Ideal" Pins for Engraving Blocks



Per set of 4 with 4 pure rubber tubes, 50c.

The faces are milled to various shapes to take regular and irregularly formed articles. The few illustrations show their possibilities. Four pure rubber rings are furnished to slip over the pins when very delicate and highly polished articles are to be clamped. Made for all Standard Engraving Blocks. Please state name of Block when ordering.

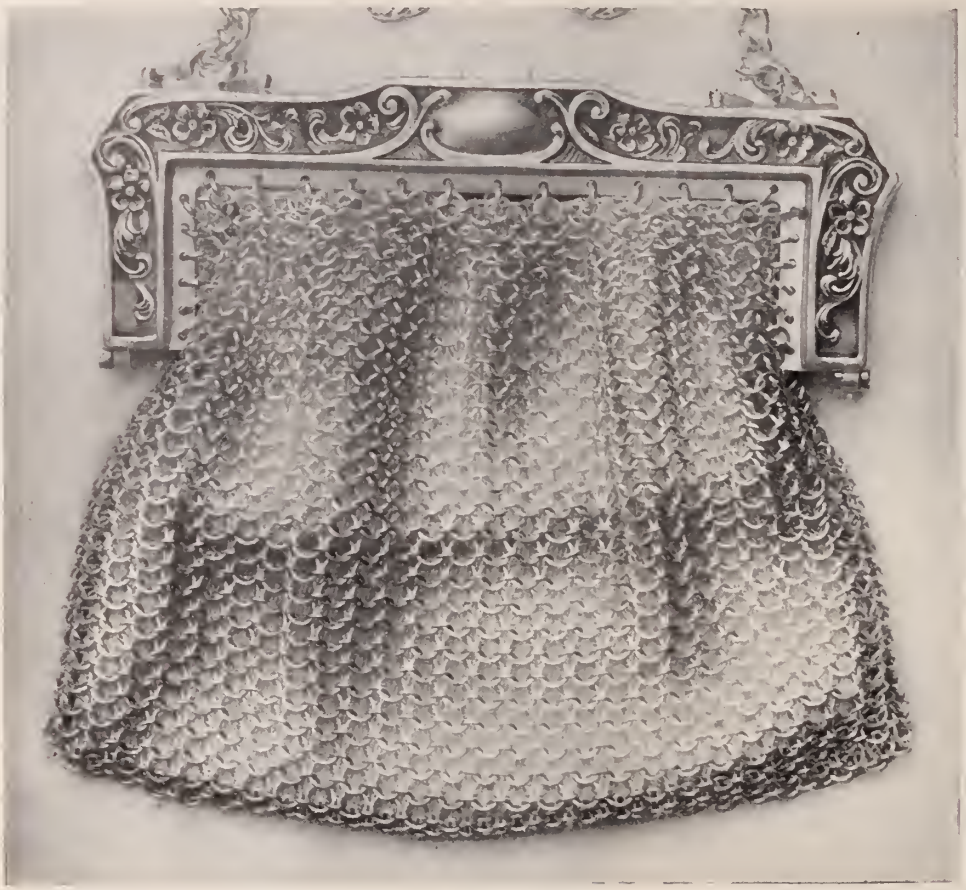
EXHIBITION BULLETIN

16th Year WEDNESDAY, JULY 29, 1908 Vol. VI. No. 10

Personal tastes are as the sands of the sea, but, while one may reject all that another admires, we, with our complete manufacturing plant of thoroughly competent designers and craftsmen, have striven successfully to satisfy a multiplicity of tastes.



No matter how small or how important the piece, there is always a tacit regard for the conventions of good form. Each new season we create a series of models conforming to the last word of Fashion as to Diamond Jewelry. You will find a great many of these novel features in our Necklaces, both in all Diamond and in combinations of Diamonds with other precious stones. With the ready resources at the command of our organization, we are enabled to produce these new styles in so many variations that it is a matter of ease to satisfy exactly the personal ideas and preferences of all. That this is really so, you can see for yourself when you visit our SIXTH ANNUAL EXHIBITION, which will take place at our offices between August 24th and 29th, inclusive.

POWERS & MAYER

258 & 260 FIFTH AVENUE

NEW YORK

"Purchase direct from first hands."

Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS

MEET A LONG-FELT WANT

THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased,* as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of	**18 (full set), in box,**		**$6.00**
"	" 12	" "	4.00
"	" 9	" "	3.00

The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "**Krementz-Bodkin Back**" **Stud** and **Vest Button** is the simplest and best mechanical Stud or Vest Button made.

The "**Krementz-Bodkin Back**" **Stud** and **Vest Button** is not one piece, but **is one-piece construction,** which makes it very simple and the strongest and most durable, because:

1—It is **Solderless**
2—It has **no** spring or hollow wire to bend or break
3—It is made of **solid, hard spring metal throughout**
4—It is made by **Krementz & Co.** which insures perfect **quality, construction** and **workmanship**

THE STORY OF THE HEAD

Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "**Krementz-Bodkin Back**" Studs and Vest Buttons are sold also under the unique **Krementz Collar Button Guarantee.**

THE STORY OF THE BODKIN BACK

GUARANTEE

If for any cause whatever, a "**Krementz-Bodkin Back**" **Stud** or **Vest Button** should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "**Krementz-Bodkin Back**" **Studs** and **Vest Buttons** are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

METALLIZED

REAL ROSE HAT PINS

Something really new to sell —which sells. The largest selling article put on the market for years. Not only a large profit maker and seller, but a great drawing attraction for the stores which sell them.

DELAMOTHE Real Rose Hat Pins are made out of live roses, which by a secret process changes them into metal, and are then mounted on hat pins and finished in several colors to conform to the prevailing fashions in millinery. Being made out of real roses there can be no two alike. The process used for making DELAMOTHE Real Rose Hat Pins is the discovery of Prof. L. G. Delamothe, and is the only process by which open roses can be perfectly metalized. This process is owned solely by the DELAMOTHE Natural Art Decorating Co., of which this company are the sole distributors to retailers.

WE DO NOT SELL THROUGH JOBBERS.

Handsome Silver Loving Cup Presented to Commodore Benedict.

THE accompanying illustration shows an attractive loving cup made by Black, Starr & Frost, New York, which was presented recently to E. C. Benedict, formerly commodore of the Seawanhaka-Corinthian Yacht Club, at a dinner given by Commodore Frank J. Gould to the officers, trustees and committees of the club of this year and last, at Sherry's, some time ago.

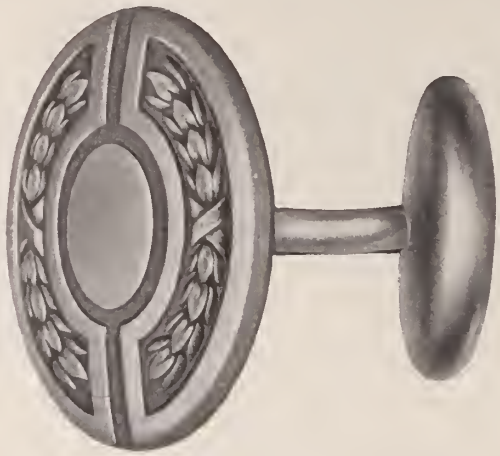
LOVING CUP PRESENTED TO COMMODORE BENEDICT.

The loving cup is of sterling silver and very handsome with three handles and the sides appropriately etched and decorated. This inscription on the cup tells the story of the occasion: "Presented to Commodore E. C. Benedict with the affectionate regard of the officers, trustees and committees of the Seawanhaka-Corinthian Yacht Club, 1907-1908."

On the other panels of the cup are Commodore Benedict's steam yacht *Oneida* under sail, handsomely etched, and the Seawanhaka burgee and commodore's pennant, with "Oneida" below the flags. Mr. Benedict was vice commodore of the club in 1893 and commodore in 1895, 1906 and 1907. His Seawanhaka service has been extended and the club's present position in the yachting world in a great measure is the result.

The N. A. Nabstedt & Sons Co. has moved to its new location at 3d and Brady Sts., Davenport, Ia.

Beautiful Silver Service Presented to the United States Cruiser "North Carolina."



AS noted in THE CIRCULAR-WEEKLY of July 15 a beautiful silver service, consisting of 120 pieces, was presented recently to the United States cruiser *North Carolina* on behalf of the people of the State of North Carolina, after which the vessel was named. The presentation exercises took place on board the vessel two miles off the coast and were very elaborate. Among those participating was Lieutenant Governor Winston, of North Carolina, who made the presentation speech, a number of judges of the Supreme and Superior courts of that State and Representative Harris, of Raleigh. The presentation was followed by a brilliant entertainment in the ward room, at which about 1,000 guests were entertained at luncheon and the silver service was used for the first time.

The service, an idea of which may be had from the group photograph which appears in the front page of this issue, includes a beautiful combination punch bowl and centerpiece, with candelabra on a plateau, 24 punch cups and tray, punch ladle, six-piece tea set, water pitcher and tray, 24 ice cream plates, 24 finger bowls, 24 finger bowl trays, four match holders, cigar lamp, cigar chest, three wine decanters and three coasters.

The centerpiece-punch bowl, which is the salient piece of the service, is extremely beautiful in the perfection of the work shown thereon, from the silver eagle at the top rim of the crown down to the last detail of the marine design on the rim of the plateau. On the front of the bowl is an etching of the cruiser *North Carolina* and below are the colors of the navy and the North Carolina flags enameled in colors. On the reverse side of the bowl is an etching of the State Capitol, and below it a picture of Johnston Blakely, who was an admiral from North Carolina during the War of 1812.

The inscription on the plateau reads: "From the Citizens of the State of North Carolina to the Battleship *North Carolina* by the Legislature, 1907. Joint Committee: Governor Robt. B. Glenn, Lieutenant Governor Francis D. Winston, chairman; Speaker E. J. Justice, Senator John C. Drewry, Representative Chas. U. Haris, Representative G. F. Hankins."

About the various other pieces of silver set are seaweeds, shells and dolphins, these being especially beautiful around the base of the punch bowl, tea set and pitcher. The trays have rope borders, tied with the sailor bow-knot, and on each side is the American Eagle. On each is the coat-of-arms of the State and the navy. The entire service is heavy, massive, exquisite in design and beautiful in finish. The service was furnished by H. Mahler's Sons, Durham and Raleigh, N. C., and was made by Domi-

No. 2447G.

A Complete Comprehensive Line in Patterns and Sizes of Stiff Bar Buttons

Our stock of sleeve buttons has been broadened in scope by the addition of many new patterns at popular prices. All are made in 14-K gold with the strongest construction possible.

We make eight distinct lines of patterns at the following prices:

$2.75	$4.25
$3.15	$5.50
$3.50	$6.00
$3.75	$7.00

Wise, progressive jewelers before they purchase elsewhere, will look at the above lines of sleeve buttons when our travelers call, or, we will be pleased to forward a selection package to jewelers in good standing.

Yours very truly,

A recent fire in the establishment of W. A. Walker, Kalkuska, Mich., did damage amounting to about $500 above the insurance.

A swindler, operating under the name of "Anderson," has been trying to obtain jewelry under false pretenses from Newark, N. J., stores during the last few days. At the stores of Castleberg & Co. and R. S. Schindel & Co., the man presented orders bearing the forged signature of the business manager of the *Evening News*, and attempted to secure a diamond stud and watch fob. In both cases the merchants became suspicious and communicated with the *News*. When it was found that the orders were fraudulent the police were notified, and the Detective Bureau is working on the case.

PENNANULAR BROOCHES.

ONE of the most interesting of recent exhibits installed in the Metropolitan Museum of Art, New York, and the one that, perhaps, attracts more popular attention of visitors than any other collection of its size is the case of reproductions of ancient Irish brooches. These beautiful products of Hibernian origin were fully

FIG. 1

illustrated and commented on in THE CIRCULAR-WEEKLY of March 18 last.

These "pennanular" brooches, so called from the opening in the ring through which the brooch pin was passed to give a firm hold on the cloth, leave in the minds of most of us a mystery as to how they were used in actual practice. Their extreme size creates the supposition that their use would prove awkward to the wearer and the length of the projecting pin a source of danger.

Nowhere in ancient pictures do we strike an example as to their appearance on the human body. Probably there are but two representations of these pins in actual use depicted by the artists' hands, and these are in sculptures. The one figures on the panel

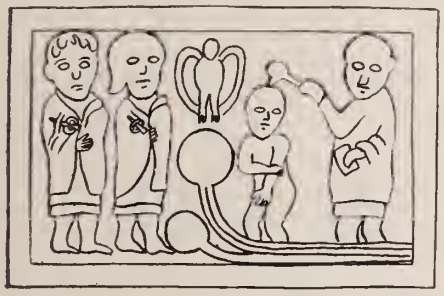

FIG. 2.

on the shaft of the stone cross of Moiredach (Murdock) at Monasterboice, county of Louth, while the other is on the broken stone cross-shaft in Kells churchyard, in County Meath. Both, therefore, are in Ireland. The former is on the bottom panel, at the side of the shaft, and is said to represent "Christ seized by the Jews." It is represented in Fig. 1. This cross of Muirdoch was erected A. D. 924. The other penannular brooch depiction, found on the Kells cross, is in a panel showing the baptism of Christ. The date of this is uncertain, but it was probably done during the ninth or 10th centuries. An outline of this stone panel is given in Fig. 2.

It will be noticed that in these two sculptures all three persons wear the brooches on the right breast. From these unique works we can assume the Celtic brooch was used to fasten the right-hand front fold of the outer garment. Probably this was to leave the right hand free. The breach in the ring in Fig. 1 is *below*, as will be seen.

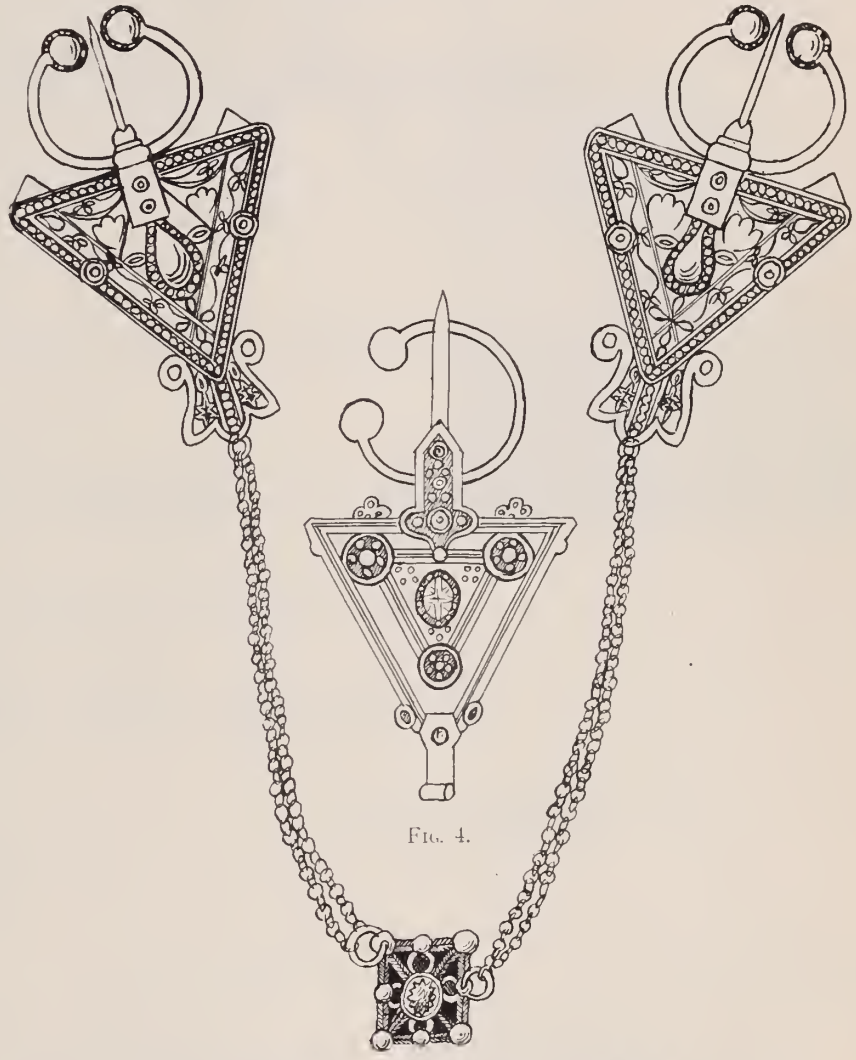

FIG. 3.—SILVER BROOCH WORN BY KABYLES OF ALGERIA.

while the pin is at right angles to it. All three pins point outward and upward, as might be expected, in order to reduce the danger of scratches to a minimum.

A peculiar and interesting feature in Fig. 2, that will probably puzzle most readers, are the two bulbs, or globes, that branch upward toward the "Holy Dove." They represent two rivulets that are supposed to have been the Joe and the Dan. These, when they came together, were supposed to form the River Jordan.

But, to return to the subject of Celtic brooches, as shown in these illustrations, we must not fail to notice that the figure at the extreme left has the point of the pin inserted through the cloth a *second* time beyond the ring. This would give a firmer grip on the garment and, at the same time, dispose usefully of what to present ideas is a superfluous length of metal—a point that has bewildered many when they came across these ancient trinkets.

It is the prevailing opinion that these penannular brooches originated in Ireland, Scotland, North England or possibly Norway. In all of these northern sections of Europe they have been discovered. In THE CIRCULAR-WEEKLY, Oct. 23, 1907, the writer gave these countries as their source of origin. Numerous authoritative works afford this information. The bulbous, thistle-like ends of many of these broken rings would lead one to suppose these thistle-growing countries must have produced such a motif of decoration.

But a study of the "Tara" brooch (see page 39, issue of March 13) and several others, with their triangular or keystone-shaped pin heads, as well as the peculiar disposition of "jeweling," strike one as suspiciously *Oriental* as well as barbaric. The interlacing knot work (often called "Solomon's knot") or continuous intertwining strap work generally found in these brooches as the decorative ground work over which the bold designs are superimposed was almost always found in all Celtic ornaments of this period, whether of stone

or metal, in architectural as well as jewelry designs.

A deeper investigation, however, discloses the fact that this continuous knot work was a "guild mark" of the Comacine (Italian) cathedral builders—those architects to whom are due many of Europe's most magnificent sacred edifices; and a little piecing together of historic data will bring us, apparently, proof that the style and make-up of these Celtic brooches owe their direct origin to southern Europe.

The penannular brooches of Ireland and Great Britain date from about 450 to 1066 A. D. Now the civilization represented in these brooches was brought about by the monks in their propaganda, as influenced from Rome. St. Patrick came to Ireland in 440 A. D., and from that time Rome and Ireland became closer and closer connected each century. Monasteries were built on Irish soil and peopled by ecclesiastical emissaries from Rome who taught the gospel and, at the same time, practised the fine arts, including metal working. Irish and British natives were sent to Italy to study the Bible and learn the arts. They returned as expert artificers as well as great mission workers. And thus to Italy we are evidently indebted for the early Irish metal work.

But the barbaric Oriental motifs shown in those Celtic brooches smack but little of Christian, more of Mohammedan, design. Their bold features of outline are far away from the delicacy of style of Roman, emanating from Grecian refinement.

And, sure enough, among Mohammedans we can find to this day penannular brooches. And, what is more, those brooches carry out in their design an unmistakable similarity to our Celtic productions.

In Algeria (Africa) swarthy women are bedecking themselves to this day with these self-same jewels and the triangulated forms so noticeable on the "Tara" and other brooch pins are also here present. On page 43 are illustrated (Figs. 3 and 4) such examples as worn by the Algerian Kabyles. For the most part they are in silver and are worn in pairs, which fasten on each side of the chest. A chain joins them, to which a pendant is attached. This latter is usually a perfume holder. In these illustrations it will be noted that these penannular rings are above the triangular ornament so as to leave the entire piece hanging. Some are worn singly, as shown in Fig. 4. These ornaments are known as "fiziman"; they measure about six inches to the top, or point of the pin, and the pendant hangs down into the wearer's lap. They are, for the most part, made of silver.

In their make-up they are extraordinarily close to the ancient Celtic brooches. They have knobs or bosses of coral and silver and very artistic effects are produced in their designs.

The Scandinavian bowl-shaped brooches are also always found in pairs, with chain attaching them. Another peculiar feature is the fact that Mohammedan coins have been found in all those localities where ancient penannular brooches have been unearthed in the north. In this connection it must be remembered that Oriental traders carried their wares into Norway, Sweden and Great Britain and doubtless jewelry would have been part of their stock of merchandise.

Did the Roman artificer wrest his brooch styles from Africa and thence carry them into north Europe? Or did the Mussulman take his penannular brooch wares in person into those northern wilds, there to exchange them for products of the barbarians? Anyhow, it seems hardly likely that the Viking and the Celt originated those styles of ornament to bequeath them to his more civilized southern brethren. C. W. C.

Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from the Port of New York.

WASHINGTON, D. C., July 22.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Adelaide: 12 cases clocks, $250.
Antwerp: 4 cases plated ware, $124.

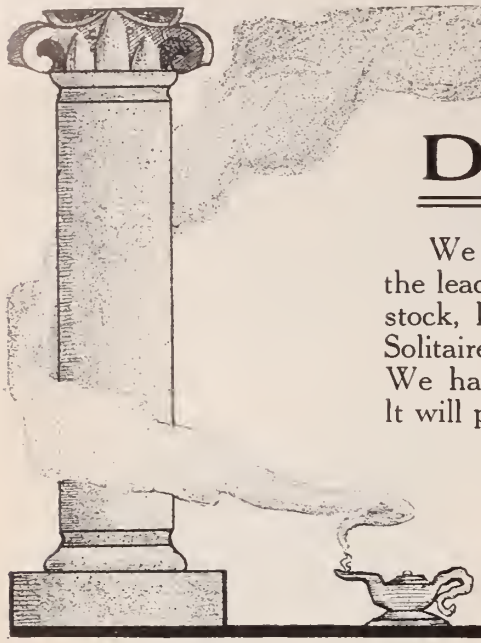
London: 25 cases clocks, $1,021; 5 cases perfumery, $244; 5 cases optical goods, $1,423; 69 cases clocks, $1,676; 3 cases watches, $330.
Montevideo: 58 cases clocks, $1,042.
Mombassa: 8 cases clocks, $105.
Murovan: 1 case watches, $784.
Pirocus: 4 cases clocks, $750.
Rangoon: 18 cases clocks, $236.
Sidney: 2 cases optical goods, $852; 366 cases clocks, $4,618; 31 cases plated ware, $2,978; 3 cases watches, $578; 109 cases clocks, $4,425; 48 cases perfumery, $557.
Singapore: 12 cases clocks, $157.
Southampton: 6 cases watches, $869.
Trinidad: 1 case clocks, $100.
Valparaiso: 1 case watches, $840.
Vera Cruz: 7 cases plated ware, $447; 25 cases clocks, $465.

The South Bend Watch Co., South Bend, Ind., is sending customers in the trade interesting cards printed in colors, giving a chart showing how the various States of the Union have voted in the presidential elections since 1876. On the back of the card is a little statement about South Bend watches, and space is left for the name of the jeweler who distributes them.

Does Anyone Know the Whereabouts of This Watchmaker Who Has Been Missing for Many Years?

PITTSBURG, Pa., July 24.—Any one knowing the whereabouts of Samuel Weinberg, a watchmaker, who has been missing for 11 years, is asked to notify his brother, H. Weinberg, a watchmaker with Sol. Cerf & Co., 947 Liberty Ave., this city. The missing man is a watchmaker by trade, and nothing has been heard of him since 1897, when he landed in New York from Johannesburg, South Africa.

Weinberg had been a soldier in the British army, but drifted into South Africa and then decided to come to America, where



SAMUEL WEINBERG, A WATCHMAKER, WHO HAS BEEN MISSING FOR MANY YEARS.

his brother has been located for a number of years. He brought his tools with him, but since the day he landed in New York the Pittsburg Weinberg has not been able to find any trace of him. Weinberg said that he intended to join the United States army, but inquiry at the War Department, on behalf of the Pittsburg man, revealed the fact that he had not enlisted either under his own name or the name of Samuel Wilson, by which he was sometimes known.

Knowing the extent of THE CIRCULAR-WEEKLY's circulation, Mr. Weinberg has requested that his brother's photograph be published, believing that if he is working in this country or in foreign lands it will help to find him. The missing brother does not know that H. Weinberg lives in this city.

Samuel Weinberg is described as being five feet seven inches in height, of medium build, and has a woman tattooed on one of his arms.

Millard F. Davis, Wilmington, Del., will soon occupy as an uptown store that part of the Ford building formerly used by the Gilpin Insurance Agency. Mr. Davis has secured a 10 years' lease of the premises in which he will make extensive alterations and improvements. It is expected that the quarters will be ready for occupancy about Oct. 1. The store at 9 E. 2d St. will be continued as usual. It is one of the oldest establishments in the city. Friends of Mr. Davis are anxious to have him nominated on the Democratic ticket for Governor.

Other countries	.....	1,247
Totals	$240,934	$12,602

Benefits to be Derived from the Organization of Jewelers' District Associations in Wisconsin.

MILWAUKEE, Wis., July 22.—J. R. Chapman, Oshkosh, who has been elected president of the Fox River Valley Jewelers' Club, enjoys the distinction of being the first president of the first district association of Wisconsin. Mr. Chapman is a member of the board of directors of the Wisconsin Retail Jewelers' Association, and has been one of the leading factors in the organization. During the recent convention at Milwaukee, Mr. Chapman was a member of several committees, and took an active part in the important measures that came up during the sessions.

President Gustave Keller, of the State association, in his address at the recent Milwaukee convention, strongly advocated the idea of organizing district associations. He said in part:

"Although the jewelers of the Fox River valley have been organized but a short time, I feel that much has been done already. I am sure that the first meeting of the organization has accomplished much toward bringing about that social and fraternal feeling which must exist would we be successful. We should have district organizations in every section of the State."

Secretary Franklin Thomson, of the State association, has in hand the matter of organizing the State into district associations, and is meeting with signal success. Mr. Thomson reports that the eastern district of the State will be formally organized by September, and that the northern district, with headquarters at Ashland, will present a complete organization some time this Fall.

Milwaukee has been organized for some time as a district association, and the Milwaukee Jewelers Club has become a factor in the State association. Leading Wisconsin jewelers see no reason why the whole State cannot be subdivided and each district association be as successful as the Milwaukee club.

Death of John W. Irion.

LOUISVILLE, Ky., July 22.—The death on Monday of John W. Irion is a loss that will be felt not only in the jewelry trade but through the mercantile world of Louisville and in fraternal circles as well, as Mr. Irion was well known and highly regarded as a business man. Mr. Irion succumbed to a stroke of paralysis at his home, 516 E. Market St., after an illness of over four months, during which time he had suffered several paralytic shocks; the last one occurred Saturday, and he sank gradually until the end came, early Monday morning.

Deceased, who was 40 years old, was a native of Louisville, and had been in the jewelry business for about 20 years. He was the son of the late John Irion, and after learning the jewelry business in the employ of several firms, started for himself in 1889, continuing successfully until his ill-health incapacitated him. Mr. Irion was a member of the Cherokee Tribe of Redmen, of the Shepherd of Bethlehem, the Union Labor League and of other fraternities. His wife, who was formerly Miss Mary Stumps, and his two daughters survive him.

The funeral services to-day were conducted by the Cherokee Tribe of Redmen and the interment was in St. Stephen's Cemetery.

Paris Pearl Market.

PARIS, July 14.—Business in the precious stone trade of this city during June and July progressed in a way that was decidedly satisfactory. Some of the local dealers bought and sold large lots of pearls, while retailers have recorded important sales of necklaces which had been on their hands for some time.

Sapphires are still very much in demand, being asked for continually, and good qualities have realized high prices.

A few American buyers who were here have purchased pearls and colored stones, and altogether there is a much better feeling in the trade, confidence increasing as time goes on. Most of the dealers are starting earlier than usual this year for their Summer holidays, with the idea of getting back correspondingly early, in the belief that business will pick up with the beginning of the Fall, but it is not expected that any important transactions will occur before September.

Dealers of India are still holding out for high prices, and all poor offers have been refused.

It is reported here that a traveler of the Paris house of H. H. Ullmann, while on a trip to Italy, was recently robbed in Genoa of gems and jewelry valued at over $100,000.

G. K.

William Arcona, Brooklyn Jeweler, Disappears and Family and Creditors Seek to Find Him.

Wm. Arcona, a jeweler at 326 Court St., Brooklyn, disappeared about a week ago and as yet the police have been unable to locate him. Previous to his departure he disposed of most of his stock and pawned a greater part of the material left for him to repair. He left his wife and child almost penniless.

The store was opened last week to give customers an opportunity to get their jewelry which had been left with Arcona for to be repaired, and when the store was opened a large crowd sought to get in, but only a few were admitted at a time. In most cases those who came looking for their jewelry, watches and other valuables were disappointed. In a few instances men who left gold watches to be fixed found pawn tickets for them. Most of the articles pawned were pledged by the clerk of the jeweler, probably under instructions.

The officers found the jeweler's clerk and took him to the Butler St. station. There he told the police that he was 15 years old and lived at 396 8th St. He said he had been employed by Arcona after school hours for about two years. During that time, he said, he was sent around to various pawnshops in Brooklyn and instructed to get as much as he could on various articles of silverware which Arcona gave him. For this he received a quarter every afternoon.

He said that when a customer brought in a watch or a ring to be repaired, Arcona would label it, not with the person's name, but with a description of the person, such as "Blondy," "Peach," and various other characteristic names. He would then repair the article and send it to a pawnshop. When the customer whose property the article was could be held off no longer, Arcona would buy it back again with the proceeds of another pledge.

The police have received about 100 complaints and have thus far recovered some of the goods and expect to recover more. They broke into the store and opened the safe, where they found a number of pawn tickets.

Arcona, who had been in business since 1902, originally came from Bremen, Germany, in 1900, and had worked for different people in the trade previous to the time that he went into business for himself. He was at one time in the employ of L. Hirsh, 776 Third Ave., New York, and also with C. Francini, 14 Maiden Lane. He has always been regarded as responsible and his credit generally up to this time has been good.

Irving Riley, Oconto, Wis., has taken charge of the jewelry department in Lauerman Bros.' store at Marinette, Wis.

Chas. Christianson, Sioux Falls, S. Dak., is at the Rushmore Hotel, Rushmore, Minn., every second Wednesday in each month.

AMERICA'S NEWEST GEM :: AMATRICE

The most remarkable, beautiful and individual matrix precious stone ever offered to jewelry wearers. Color and matrix polish equally. No porosity or roughness. Amatrice positively does not fade or change color.

No retail stock is complete without an assortment of Amatrice jewelry in gold mountings.

Wonderful individuality in matrix effects. Exact duplicates do not exist, but beautiful matching effects for sets are obtainable.

Retailers should require manufacturers to supply different types in each lot bought, as the range of color combinations and innumerable matrix effects appeal strongly to the individual buyer.

If your regular manufacturers do not offer Amatrice jewelry, write us and obtain list of first-class manufacturers who will meet your requirements.

Friends Pay Last Tribute to the Late Emil Oscar Zadek.

MOBILE, Ala., July 23.—The funeral of the late Emil Oscar Zadek, head of the E. O Zadek Jewelry Co., this city, whose death was noted briefly in the last issue of THE CIRCULAR-WEEKLY, took place yesterday afternoon from late home of the deceased at Conception and Theatre Sts., and the high regard and esteem in which Mr. Zadek was generally held in the business and social worlds was more than manifested by the great crowds which came to pay their last tribute to him, as well as by the hundreds of floral offerings received from all parts of the country. There was not a business line of the city that was not represented in some way among the mourners during the impressive service, which was read by the Rev. Dr. Mathew Brewster, of Christ Church.

When the service had been completed the members of Mobile Lodge No. 40, A. F. & A. M., of which the deceased had long been

THE LATE EMIL OSCAR ZADEK.

prominent, formed lines leading from the house to the hearse through which the remains were carried, and the Masonic fraternity, Frohsinn and other organizations of which Mr. Zadek was a member, followed the remains to Magnolia Cemetery, where the interment was made with Masonic rites, the service being read by Chaplain A. F. Carr. After the members of the Frohsinn had sung the funeral dirge and a prayer had been offered, the vault was closed.

Prominent among the floral tributes which were sent by a host of friends and which were among the most elaborate ever seen in Mobile were: A handsome wreath on a pedestal with clock in center, the hands pointing to "11 o'clock," with sympathy from Mobile Lodge No. 108, B. P. O. Elks, of which the deceased was a charter member; a wreath from staff and officers, Alabama National Guard; a massive cross from Gulf Fishing and Hunting Club; wreaths from the Athelstan and Manassas clubs, a lyre from the Frohsinn, a magnificent wreath of roses from Mobile Lodge of Perfection, Scottish Rite Masons; a wreath with square and compasses from Athelstan Lodge No. 369, A. F. & A. M.; a wreath from the Strikers' Club, the Barney-Cavanagh Hardware Co. and the Mobile Dry Goods Salesmen's Association; a vacant chair of roses and ferns, upon which sat a "winged messenger" as white as the driven snow, from the employes of the E. O. Zadek Jewelry Co.; a wreath from the Female Benevolent Society, from the Italian Benevolent Society, from the Mobile Yacht Club, from the athletic committee of the Y. M. C. A., from the Mobile Turnverein.

Major Zadek passed away about midnight July 20 after a brief and comparatively light illness. In fact, until 9 o'clock of the day before he died his condition was considered in no way serious. The news of his death proved a great shock not only to his friends here, but throughout the jewelry trade, as there was hardly a large jewelry center in which Major Zadek was not known and respected.

The deceased had been a resident of Mobile for half a century, and was one of the most prominent jewelers in this section of the south. He was born at Gleiwitz, Prussia, Oct 29, 1841, and came to America when about 18 years of age. Coming to Mobile as a youth he quickly imbibed the spirit of his adopted country, and at the outbreak of the Civil War enlisted in the Home Guards, commanding that company throughout the four years' struggle.

Mr. Zadek entered the jewelry business with Fred Bromberg, and later served with F. Baudoin. After mastering the details of the business he decided to go into business for himself, and in 1867 formed a partnership with Edward Caldwell, which was known under the style of Zadek & Caldwell. At the death of Mr. Caldwell he continued alone until 1887, when he formed the E. O. Zadek Jewelry Co., of which he remained president until his demise. Associated with him as vice-president in the concern was O. Godfrey, who died in 1906, and R. C. Fosdick, the present secretary and treasurer of the corporation.

Mr. Zadek was married in 1866 to Miss Elizabeth Bromberg, of this city, who with one son, Emile O. Zadek, of Jackson, Tenn., survive him, his only daughter, Mrs. Dorothy Dixon, having died in 1897.

There were few men in the business world who gained the confidence and respect of their associates, customers and those from whom they bought to a degree that the deceased had in his long business career, and there were none who were more highly regarded, or who had stronger business friends than did Mr. Zadek. A public-spirited citizen, a musician of high talent, a man of energy and enterprise, Mr. Zadek made his personality felt in many directions. He was president of the Forhsinn for many years, and his fine tenor voice was many times heard at the entertainments and operas given in the south. He at one time also sung in the Cathedral choir. How he was regarded in the social and fraternal world was indicated in a slight way by the tributes that were paid to him at the funeral service.

In his death all who knew him feel they have lost a friend who was always steadfast and unflinching, ever cheerful and full of courage, while the residents of Mobile mourn one who thoroughly believed in the city and its possibilities and who was ever ready to aid any movement for the betterment of the community.

Burglars Gain Admission to Store Through Window Protected by Iron Shutters.

STAMFORD, Conn., July 22.—Burglars gained an entrance into the store of Samuel Phillips, on Monday, and stole emblems, charms, lockets, scarf pins, several silver teaspoons and other stock valued in all at about $200. Mr. Phillips is a member of the Jewelers Security Alliance and detectives are working on the case.

The thieves entered from a rear window. On the south side of the repair room there is a space about eight inches between the upper casing and the top of the iron doors that protect the window, which was down from the top. A thin wire netting was all that covered this eight inches of space. It is believed that a small boy crept in through the opening which was made by cutting the netting. The rear door was then opened.

Most of the valuable stock was stored in the safe, the loot having been taken from the show cases and the display windows.

Involuntary Petition in Bankruptcy Filed by Creditors of W. H. Rath & Co., Chicago.

CHICAGO, July 22.—An involuntary petition in bankruptcy was filed on July 20 against the W. H. Rath & Co., a corporation doing an installment business in the Masonic Temple. The creditors petitioning, with the amounts of their claims, are: A. H. Bliss Co., Attleboro, Mass., $522.56; William C. Green Co., $199.08; D. Wilcox & Co., Providence, R. I., $547.86.

The petition alleges the insolvency of the concern; that preferential payments have been made to certain creditors, and asks for a receiver.

The assets are estimated at $6,000 and the debts at $10,000.

Modern Cameos

The first samples of the MODERN CUT CAMEOS were brought over by us about two years ago.

Confident of the ultimate success of the stone we never tired in our efforts to acquaint the trade with its merits. Its immense popularity now attests to our correct foresight.

The same effort has been exerted on the other side in improving the quality as well as securing an adequate supply. We have succeeded also in this respect, and our Cameos are unexcelled in the matter of superior engraving, and precision of size and finish—and at right prices.

ONYX CAMEOS in MODERN and CLASSIC DESIGNS on hand in all sizes and colors for immediate delivery.

Burglars Blow Open Two Safes of New York Manufacturing Jewelry Concern and Get Loot Worth Over $7,000.

Burglars entered the offices of Thomas J. Dunn & Co., makers of medals, badges, etc., 101 Chambers St., New York, early Saturday morning of last week, blew open two safes and escaped with about $8,000 worth of gold, diamonds and society emblems. The Dunn concern occupied the three upper floors of the five-story building at the corner of Church and Chambers Sts., only a block away from City Hall police station. The thieves gained entrance to the store from the roof, evidently prying the scuttle open, and found their way down through the shop on the fourth and fifth floors to the offices on the third floor, where were the two safes side by side, both of which were used for the storage of manufactured goods and for materials used in the manufacture of insignia, badges and jeweled buttons.

When the janitor of the building arrived about 5 o'clock in the morning he found both safes standing wide open, with doors shattered. Boxes were strewn in confusion about the floor and a cloud of smoke was noticeable hanging near the ceiling. Beneath the safe and near the door were bags of sawdust, office coats and bundles of paper which the burglars had apparently used in deadening the sound of the explosion. On the floor near the safe lay a burlap bag marked "Walabout" which had evidently been used to carry the burglars' tools to the building. The tools consisted of a number of bits, jimmies, rope ladder 30 feet long and several other implements.

The burglars evidently thought that they were not safe after the explosion, as it is apparent in their haste they forgot to remove the inside steel compartment of the large safe; instead they carried it away bodily with its contents. The other safe they looted and left intact, except for the ruined door.

In speaking to a CIRCULAR-WEEKLY reporter relative to the robbery, Mr. Dunn, of the firm, placed the valuation of the goods taken at between $7,000 and $8,000, but said that he could not be accurate, as no inventory had as yet been taken. He said that the booty consisted of gold emblems, charms and pins, diamond emblems, Knights of Columbus Fourth Degree charms, cut diamonds unset, fine gold in sheets, 20 gold Roman Catholic centenary medals, gold jewelry dies and samples, including a die of Wm. H. Taft, valued at about $200, and about $175 in cash. In all, the goods taken weighed about 75 pounds. The thieves carried it away in salesmen's satchels which they found in the office.

During the Spring the firm had a contract for making 150,000 medals of gold plate for the Catholic Centenary celebration, and at that time had in its employ 150 extra workmen, few of whom had ever been in the place before. One theory advanced is that one of these men had observed the methods of the firm and the evident lack of precaution from thieves, and that he had, with the assistance of one or more professionals, planned and executed the robbery.

Mr. Dunn said that he personally was not of the opinion that any former employe of the firm was implicated in the matter. He pointed out that had the robbery been committed by one or more men who knew the exact conditions at the establishment that a large amount of valuable property which was kept in other places in the establishment would have been taken, whereas the men who robbed the place took only what they found in the offices and did not visit the workrooms for other valuable loot.

The detectives are now working on the matter, but as yet no report has been made of the apprehension of the thieves.

Jewelry Workman Shoots at Superintendent for Tiffany & Co., and Then Commits Suicide.

Considerable excitement was caused at the station of the New York, Susquehanna & Western Railroad Wednesday morning of last week when David C. Bourquin, a jewelry repairer, fired five shots at William C. Van Posl, superintendent of the jewelry repairing department of Tiffany & Co., as the latter was about to board a train for New York at Ridgefield Park, N. J. One of the bullets struck Mr. Van Posl in the leg, but the others went wild. Bourquin then pointed the revolver at his own head, fired and fell dead.

Bourquin used to work under Van Posl at Tiffany & Co.'s, and since that time Mr. Van Posl secured for him two positions. Bourquin went to Mr. Van Posl's house at Ridgefield Park on Tuesday night of last week and told him that he had an offer of a position with a jewelry firm in John St., and Mr. Van Posl advised him to take the position, and that later he might be able to give him a place at Tiffany's. Coroner Curry found several letters on the dead man which evidently had been written the night before, and in a rambling way spoke of the prospective killing of Van Posl. On the day of the shooting a constable in obedience to a dispossess order was moving his effects from a cottage he had leased at Richmond Terrace.

Death of Granville Rider.

DELAWARE, O., July 22.—Granville Rider, who for a number of years had been engaged in the jewelry business, died at his home in this town Thursday evening, after an illness that lasted about a year. The funeral services were held yesterday afternoon.

Mr. Rider, who was quite well known in this section, had conducted a business at Marion, O., for a long time before coming to Delaware. Owing to ill-health he retired from active control of his business over a year ago, and since that time his brother has been in charge.

He is survived by a widow and three grown children.

"	25	24 1-4d.	.54½
"	27	24 3-16d.	.54⅜

Death of Albert Bach.

SANDUSKY, O., July 22.—The sudden and unexpected death of Albert Bach, for many years a prominent jeweler of this city, which occurred Friday night at the family home in Perry St., was a source of deep regret and sorrow to all who knew him, and the news that he had passed away was no less shocking because of the fact that he had been in failing health for more than a year. A short time ago he was stricken with paralysis, but recovered from the attack, and though hopes were held that he might get well, he suffered another shock a week ago and the third on Friday night, the last of fatal results.

Deceased was practically in the prime of life. He was a native of Sandusky, having been born here 45 years ago, and for the last 14 years had been connected in the jewelry business. His store at 130 Columbus Ave. was one of the best known establishments in this section of the State. He learned the trade when in the employ of Mrs. G. D. Levin, whom he succeeded in 1894, and had carried on the business successfully until failing health caused him to determine to retire, but death came before he had completed his arrangements.

Mr. Bach was a member of Perseverance Lodge, F. & A. M., of Sandusky Lodge, B. P. O. E., and of the new Automobile Club. He is survived by a widow, mother, one sister and four brothers.

The funeral services, which were held Monday afternoon, were largely attended and conducted by the Rev. Andrew I. Keener.

Sam W. Rose, St. Joseph, Mo., Gives a Deed of Trust Under State Laws.

ST. JOSEPH, Mo., July 22.—Sam W. Rose, who runs a jewelry store at 712 Edmund St., yesterday filed in the office of the County Recorder a general assignment in favor of his creditors, 33 firms being named in the trust deed. The deed provides that the trustee shall sell at either open or private sale all the assets, the proceedings to be turned over to the creditors with the exception of $300 for which Rose claims exemption. The trustee is W. D. Rusk, of Rusk & String. The assets are supposed to be in the neighborhood of $7,000 to $8,000, while his liabilities are more than $8,000.

Rose, who is a young man but 25 years of age, has been in business only a short time. He was formerly in the employ of the Union Mercantile Co., of New York.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended July 25, 1908.

The U. S. Assay Office reports:

Philadelphia.

Charles Ginnand, engraver, 722 Chestnut St., is at Souderton, Pa., for a short stay.

Frank F. Hendry, 628 Chestnut St., is spending a few days on a vacation outing to Atlantic City.

William Bovard, a prominent Manayunk retailer, spent last week taking a vacation trip by sea to Boston.

D. C. Hart, Camden, N. J., recently spent a day with his brother, S. W. Hart, a Kennet Square jeweler.

Theodore Lassen, Germantown Ave. and Chelten Ave., spent part of last week with his family, enjoying an outing at Sea Isle City.

Fred. T. Barry, of L. Stern & Co., is quartered with his family at the Hotel Strand, Ocean City for the balance of the Summer.

H. E. Cain, with the Dennison Mfg. Co., returned, last week, from a vacation trip to Niagara Falls, Thousand Islands and Canadian resorts.

Frank Meddie, 8th and Sansom St., who has been ill with stomach trouble, is reported to be speedily convalescing and hopeful of returning to business soon.

A thief hurled a brick through the bulk window of Kennedy Bros.' store at 13th and Arch Sts., last week, but was frightened off before he could secure any loot.

J. F. Neill, wholesale optician, 727 Sansom St., returned the latter part of the week from an extended business trip through the western part of the State.

Charles Diesinger, diamond dealer and manufacturing jeweler, 726 Sansom St., departed, last week, for a vacation trip to the Yellowstone Park and other western places.

William Denney, of Denney Bros., Hartsville, S. C., who has been in this city attending the Philadelphia College of Horology, returned last week to his home in the south.

John Fisher, with Richard M. Cooper & Son, 722 Sansom St., has gone to the White Mountains to recover from injuries received in being run down, recently, by an automobile.

William Bode, son of F. C. Bode, Jr., a prominent retailer, 1804 Market St., and with whom he is associated in business, is spending the Summer with his family at Elwyn, Pa.

Friends of E. P. Ledos, the Newark manufacturing jeweler, in this city received, last week, picture postal cards notifying them of his arrival in Paris on a European vacation trip.

H. A. Blank has moved his jewelry and engraving business from 516 S. 5th St. to 716 Passyunk Ave., where he has more commodious quarters and better facilities in every way for accommodating his patrons in the trade.

Donald M. Rodgers reconveyed, last week, to Riggs & Bro., jewelers and mathematical instrument makers, 310 Market St., the property occupied by them at his location for a nominal consideration subject to a mortgage for $14,000.

Mr. Atlas, of Atlas & Fisher, importers of diamonds and manufacturing jewelers, 7th and Sansom Sts., returned recently on the *Deutschland* from a trip to Europe, where he visited the precious stone markets of Paris, Amsterdam and Antwerp, buying his stock for the coming season.

Charged with stealing two diamond rings from the store of Isador Wiseman, 15th St. and Ridge Ave., Ross St. John, a colored man, was sent to jail last week. The robbery was a bold one, the thief snatching the rings from a tray and running off. He was captured by citizens after an exciting chase.

Out-of-town retailers visiting this city's trade last week included: E. K. Bean, Lansdale, Pa.; H. A. MacFarland, Downingtown, Pa.; H. S. Kratz, Souderton, Pa.; A. M. Kendall, Millville, N. J.; John MacPherson, Mauch Chunk, Pa.; H. S. Fitzsimmons, West Chester, Pa., and W. K. Schlotterer, Schwenksville, Pa.

Andrew Kass, diamond dealer, Market and 13th Sts., purchased, last week, the property 604 Market St. for a nominal consideration, subject to a mortgage for $45,000. Mr. Kass gave to Louis Stecher, from whom he purchased the property, a second mortgage for $15,000 on the property, the assessed valuation of which is $60,000.

Miss Reba Rubenstone, in charge of the jewelry department of N. Snellenberg & Co.'s store, departs this week for a vacation to be spent at Long Branch. Miss Rubenstone, who was formerly associated in business with Jacob Rubenstone, wholesaler, 7th and Sansom Sts., has been conducting his business during his absence on a vacation trip.

Col. J. Warner Hutchins, president of the Jewelers' Club, returned Saturday from the State National Guard encampment at Gettysburg, where he had been as one of Governor Stuart's military staff. Col. Hutchins came from St. Paul, Minn., where he had been attending a meeting of the Imperial Council of the Lu Lu Temple, to attend the encampment ceremonies.

Lou Sickles and son, of M. Sickles & Sons, spent the week's end as the guest of Ed. Sickles at the latter's cottage at Atlantic City. During the week Ed. Sickles made a business trip to Newark and New York. Gus. Sickles, associated at the Newark headquarters, was in Atlantic City with his wife, spending a short vacation last week. Samuel Chestnut, of M. Sickles & Sons, is spending a vacation in Tamauqua and at Atlantic City.

A man giving his name as Frank Lang, and representing himself as a salesman for a New York wholesale jewelry house, but refusing to divulge the firm name of his employers, had an unpleasant experience while in this city Thursday night. Lang got into an altercation with a street car conductor over the collection of a five-cent carfare and the argument between the two ended in a fight. Both were pummeling each other at a great rate when a policeman interfered and took Lang off to the 11th and Winter Sts. police station. The conductor was permitted to go on his promise to present charges against Lang at the police hearings next morning. Lang was locked up over night, and the eyes of the police fairly bulged when, upon searching him, they brought to light diamonds, mounted and unmounted, and diamond-set jewelry. At first it was suspected by them that a big jewelry robbery had been committed and the unfortunate salesman, boiling with indignation, was forced to disclose his identity. At a hearing the next morning before Magistrate Gallagher he was permitted to go after paying a fine of $10 and costs for alleged disorderly conduct.

Pacific Northwest.

Geo. Arthur Clarke, Hood River, Ore., will soon open a larger store in that city.

T. J. Booth has reopened a store at Newport, Ore., his former store there having been burned last January.

A fire in Seattle, Wash., July 14, practically destroyed half of the stock of H. E. Silver Co. It was valued at $125,000. There is said to be no insurance.

Henry A. Wilbur, University Station, who is wanted in Seattle, where it is alleged he defrauded a number of his customers, and who was apprehended at St. Joseph, Idaho, has escaped from the officers there and the search for him is on again.

A party of capitalists, headed by R. F. Hogan, Spokane, Wash., are about to organize a company for the purpose of developing opal mines near Queretaro, Mexico. Machinery to cut and polish the opal stones will soon be purchased in the United States and shipped to Mexico to be installed at the quarry.

Three jewelry stores in Portland, Ore., were robbed one night last week, and the robber was captured, after a running fight. The prisoner, who gave his name as Fred Hamilton, had on his person 42 gold rings, valued at almost $300, and secreted near by was found jewelry to the value of about $1,000. The places robbed were the Oregon Jewelry Co.'s store, 114 3d St., owned by Mrs. K. Silverstein; Aronson Bros., at 294 Washington St., and Heitkemper's, at 286 Morrison St. Hamilton is a well-known athlete of Portland, and has been a county official in Skamina County. During the past two or three years his friends have considered him a little queer, and it is thought that he is insane.

Springfield, Ill.

The Illinois Watch Co.'s plant resumed operations July 20, after the regular annual Summer vacation. All departments returned to work on the eight-hour day schedule.

Word was received in this city, last week, to the effect that a jewelry establishment in a nearby town was entered on the night of July 20 by burglars who got away with some gold watches, four razors, a revolver and $10 in cash. The safe was unlocked but was not touched. The thieves escaped without leaving a clue.

During the month of August the following jewelers are closing their stores at noon Wednesday: J. C. Klaholt, Lochman Bros., Tobin & Canham, John C. Pierik, O. J. Armbruster, A. F. Gourley & Bro., Henry Rabenstein. The movement began about the middle of the month and is fairly general among local business men.

William E. Tracy, a watchmaker, who has been in business on his own account at Coalinga, Cal., has taken charge of the jewelry department of the Whitney Co., of the same place.

Pittsburg.

Miss Sutmeyer, a sister-in-law of Otto E. Heineman, died last week at the latter's residence in Bellevue.

Harry Heeren, buyer for Heeren Bros. & Co., has gone on a fishing trip in the northern part of Pennsylvania.

W. J. Johnston, of the W. J. Johnston Co., went to New York last Wednesday night on a few days' business.

George W. White, of West, White & Christy, left this week for New York to spend a two weeks' vacation and is accompanied by Mrs. White.

Edward Sisenwain, of S. Davis & Co., has returned from a short stay at Sandusky, O., where he took his wife and family to spend the Summer.

Secretary C. S. Wiley, of the Pennsylvania Retail Jewelers' Association, is mailing the programme for next month's convention to members of the association and others interested.

Among the out-of-town merchants who last week visited Pittsburg were F. M. Smith, Morgantown; B. E. Brown, Monessen; G. W. Hoffman, Latrobe; F. B. Theakston, Brownsville.

W. W. Wattles & Sons have been making a display during the last week, which has attracted a great deal of attention. Some very pretty gold-plated penknives appear to be the object which has been drawing the attention of crowds, together with a splendid display of diamonds and hammered copper mugs. At times during the last few days it has been difficult to get close enough to the window to see the exhibit.

Considerable interest was last week manifested in the announcement that the Henry W. Oliver estate had let the contract for a 25-story building, which will be the largest in Pitsburg. The structure will occupy the square bounded by Oliver Ave., Smithfield St., Sixth Ave. and the Trinity Church property. The old house of C. Hauch, 541 Smithfield St., and the W. M. Stieren Optical Co., 544 Smithfield St., are situated in this block. Mr. Hauch has been a tenant in his present location for the last 24 years, and is at a loss to know now where to move. His lease does not expire until next April. The proposed building is under contract to be finished April 1, 1910. In discussing the matter Mr. Hauch said that he did not propose to rent elsewhere and pay the large rents being asked for store rooms. "I have been in business for many years," said he, "and I am at a loss to know what to do. I suppose I must hunt a new location." A number of really good buildings will be razed to make room for the onward march of progress in this town.

An air of mystery surrounds prosecution which has been begun by L. M. Smit, of the M. J. Smit Co., 212 Fifth Ave., against James Rush, whom it is alleged secured diamonds, valued at $1,100, from the jeweler. An information was laid against Rush before Alderman John A. Fugassi, but neither the justice or the prosecutor will give out the particulars concerning the case until Rush is arrested. It was, however, learned that Rush is wanted for failing to return jewelry which he had secured from Smit on memorandum. Rush, who is a powerful fellow and weighs about 350 pounds, has been a customer of Smit's for some time, and is said to have frequently secured jewelry on memorandum, always making good for his transactions. According to one story, Rush ordered a tray of diamonds sent to his hotel one day last week, and Smit carried around the tray himself to Rush's apartments and found the latter very busy. Rush requested Smit to leave the diamonds and gave the merchant a small deposit. That is the last Smith saw of his prosperous customer, and last week Smit went before the Alderman and made an information. Rush is reported to have been arrested at Uniontown and to have given $2,300 bail until the hearing.

John Henry, a trusted employe of West, White & Christy, was, last week, arrested charged with stealing from his employers and spent several days in the police station. Harry Harvey, whom, it is alleged, secured some of the goods which Henry took, was also held by the police pending an investigation. Members of the firm learned that Henry was sporting some goods which did not belong to him and furnished the police with information and Henry was taken to the Central police station. The articles which Henry took were valued at about $50, but some of the local newspapers made a sensational story out of the affair, much to the annoyance of the jewelry house. The fact of the matter is that Henry admitted taking one boy's watch, valued at $12; one lady's watch, valued at $16; one diamond pin, valued at $8; one pair of cuff buttons, valued at $7, and one ribbon fob, valued at $1.50. All the articles were recovered. Henry had been employed by the house for four years. He is only 20 years old and had entered the employ of the firm as an errand boy. He is not strong physically and in consideration of this and the fact that it was the boy's first offense, the firm decided not to prosecute, believing that several days spent in jail has taught him a lesson.

Washington, D. C.

Victor E. Desio & Co., 1107 F St., N. W., reopened their Summer resort store at Bethlehem, N. H. This is the 10th season that this branch has been conducted.

The Grand Jury recently found an indictment against Louis Krooler, a former employe of Mr. Robey, a local jeweler, on a charge of embezzlement. Krooler was recently arrested in Chicago, and has been brought to this city. Last March, it is alleged, he failed to account for jewelry belonging to his employers.

Emil E. Host, 1107 Rhode Island St., N. W., applied to the courts recently to straighten out a legal tangle so that he can get a clear title to property through the release of a debt paid July last. The trouble arose over some notes given in June, 1899, by E. G. Jefferys to Emma and Anne Milburn, which were secured by a deed of trust in which two trustees were named. Though the indebtedness was paid last July, one of the trustees cannot be found and the property cannot be cleared until a new trustee is named.

Lancaster, Pa.

B. Frank Hershey, with John B. Roth, Jr., is on a vacation trip in eastern Pennsylvania.

George Imhoff, Lancaster, has entered the Bowman Technical School as a student in engraving.

Milo B. Herr, secretary of the Non-Retailing Co., and Alfred W. Moyer, manager, with their wives, are at Atlantic City.

C. S. Oberlin, Columbia, was elected a director of the Columbia Telephone Co. at the annual meeting of the company, last week.

Bartholomew Kempf, a Milwaukee jeweler, stopped off in Lancaster a few days last week to see relatives, while on his way to New York.

Ernest Foster is taking his vacation in Quebec, Canada, visiting his brother, a jeweler, and is taking in the tercentenary celebration of that city.

The Arion Musical Association, composed of the Hamilton Watch Co.'s factory employes, gave a supper to 250 guests on the evening of July 24.

Christ. Bowman, of Ezra F. Bowman's Sons, was one of the prize winners in the late boat carnival on the Conestoga river, having a novel representation of a monitor.

Charles Weidler, late a salesman for Charles J. Lederman, has returned to the William B. Kerr Co., Newark, N. J., to resume his old work as an engraver.

Edward Rosenstein, of the Lancaster Silver Plate Co., was one of the star players in a game of baseball, Friday, between teams of the Suburban Club, Harrisburg, and the Harmonie Club, Lancaster, played at Lancaster.

The store of Wolf Yoffe, Mt. Joy, was robbed on the night of July 21 of stock worth $200, considerable jewelry being among the spoils taken. The robbers, two negroes, were found by the police at Lancaster on the 23d inst., and one of them, Frank Smith, was shot and killed while resisting arrest. The plunder was recovered.

G. William Reisner has just equipped his factory with an enameling department for all kinds cloisonné work, as well as for enameling of watch cases, etc. It is in charge of Cecil H. Sherman, late of New York. Karl L. Reisner, of the force of traveling men of G. William Reisner, has started on an eastern trip, and John W. Reisner has gone to New England.

The effects of W. S. Gardner, who disappeared some weeks ago, leaving debts behind, but taking along watches and jewelry left with him to be repaired, were sold by the sheriff a few days ago. The last heard of Gardner he was at Kalamazoo, Mich. The owners of the property left to be repaired are endeavoring to get it back on paying for the work, as Gardner wrote that he would do it if they forwarded the charges.

Levi Schinew, a colored man, who was arrested recently in Buffalo, N. Y., on suspicion, while trying to sell about $400 worth of diamonds, was later released when Superintendent Regan received word from the New York police that the man was a legitimate diamond dealer.

What is Epidote ?

If you wish to know something about the new American Cabochon stone we will be glad to send you a descriptive leaflet.

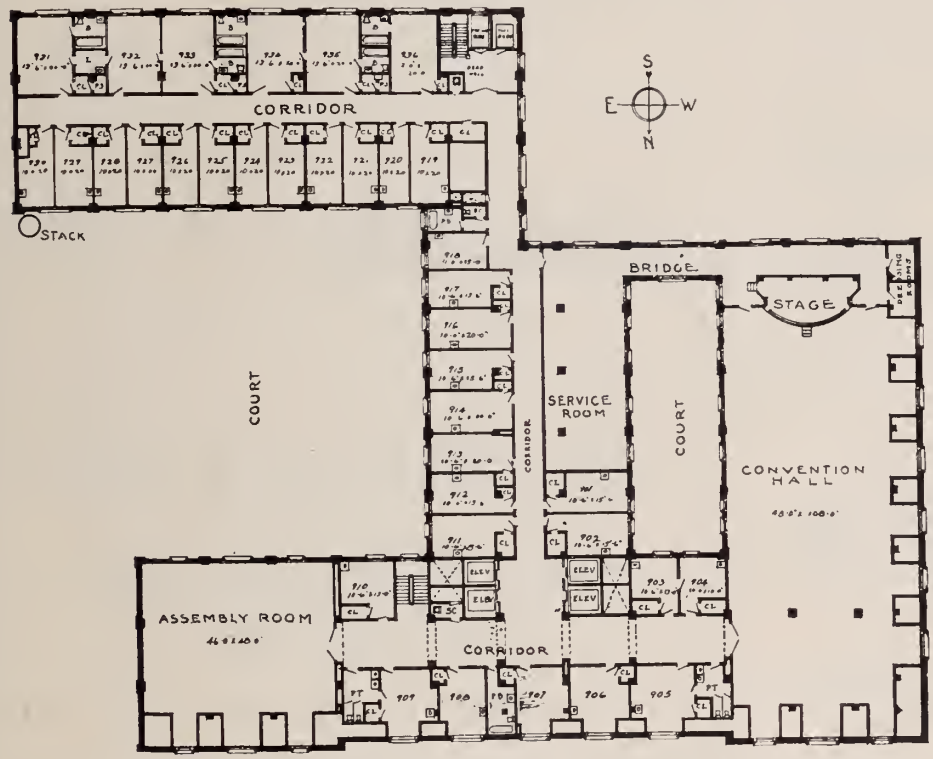
CAREW BUILDING



CATER EXCLUSIVELY TO RETAIL JEWELRY STORES

Preparations Complete for the Great Annual Convention of the American National Retail Jewelers' Association, which Begins at Cincinnati, Monday Evening, Aug. 3.

CINCINNATI, O., July 25.—Arrangements have been fully completed for the coming convention of the American National Retail Jewelers' Association, which will be held in this city, Aug. 4-7, in the Sinton Hotel. The entire ninth floor has been leased, where all the meetings will be held and displays made. This convention will no doubt surpass anything in the nature of a trades convention ever held here, and the citizens of our city generally are looking forward to this coming event, especially to the "River" outing Aug 6, as many residents have received tickets through their friends in the trade, who have been bountifully supplied by the local retail jewelers' association. All jewelry stores will close at noon in order to join in the trip to Coney Island.

Jewelers throughout Cincinnati and vicinity are taking great interest in and have not been backward in the least in contributing toward the entertainment of the visiting members of the trade whom they want to see turn out in goodly numbers from all parts of the country. The jobber, manufacturer and retailer give a most hearty and sincere invitation to one and all to come and have a good time here, telling the jeweler to make himself at home and drop in wherever he secs a jeweler's sign. Visitors are urged to secure a badge, which is beautifully worked up in bronze, and be identified with the crowd. Don't forget the exhibits, which will be an important feature of the convention. Many of the representative houses have taken space, and it is expected their displays will prove most interesting. Hotels are plenty and rates can be had from $1 a day up. Someone will be on hand to look after all visitors.

The convention proper does not open until 9 A. M. Tuesday morning. The Kentucky and Ohio state associations will hold their business sessions on Monday, Aug. 3. On Monday evening the president's reception, an informal affair, takes place, and it is hoped a large number will be here to attend and become better acquainted with one another before the regular proceedings of the convention begin. The members of the Ku-Kus, Nest No. 2, are also going to take a prominent part in the convention. A. L. Thoma, king of the Piqua, O., nest, will be here, and many other visiting Ku-Kus. Robert Freisens, king of the Cincinnati nest, says he expects this nest will be considerably enlarged during the week, as there are and should be many applicants for membership. The local order will entertain members and visiting Ku-Kus with a supper Thursday evening, Aug. 6, at Coney Island.

FLOOR PLAN OF HOTEL SINTON, SHOWING CONVENTION HALL AND ROOMS FOR EXHIBITS.

The following is the schedule of the programme covering the features for entertaining the visiting members:

Wednesday afternoon, Aug. 5—A trip to the Rookwood Pottery, Art Museum and Zoological Gardens. By compliment of local retailers' association.

Thursday afternoon and evening, Aug. 6—Boat ride on the Ohio river to Coney Island, where other entertainment has been arranged. By compliment of the local retailers' association.

Friday afternoon, Aug. 7—A trolley ride through Cincinnati's suburbs and 6 o'clock supper at Chester Park.

Friday evening—A theatre party to grand opera (Carmen) at Chester Park. This and the trolley ride are tendered by the Cincinnati Wholesale Jewelers and Manufacturers' Association.

In the list of exhibitors who have already taken space are the North American Watch Co., Mansfield, O.; Peninsular Engraving Co., Detroit, Mich.; Bay State Optical Co., Attleboro, Mass.; W. & S. Blackinton, North Attleboro, Mass.; R. F. Simmons Co., Attleboro, Mass.; Allsopp Bros., Newark, N. J.; Buck Silver Co., Salamanca, N. Y.; the Queen Silver Co., Cincinnati, O.; Illinois Watch Co., Springfield, O.; G. P. Altenberg, Cincinnati, O.; Icy Hotbottle Co., Cincinnati, O.; Lindenberg & Fox, Cincinnati, O.; Dueber-Hampden Watch Works, Canton, O.; Rockford Silver Plate Co., Rockford, Ill.; the Western Mfg. Co., La Salle, O.; S. O. Bigney & Co., Attleboro, Mass.; South Bend Watch Co., South Bend, Ind.; L. W. Lewis, Columbus, O.; E. H. H. Smith Silver Co., Bridgeport, Conn.

The committees of the local Retail Jewelers' Association are:

ENTERTAINMENT—Henry Doepke, Louis Hohneck, George Heintz and L. E. Dornslifer.

PUBLICITY—Robert Freisens, Otto C. Lightner and Joseph Pieper.

RECEPTION—Andrew Alich, Mr. Barker, Edward Simper, Louis Hummel and August Hohneck.

EXHIBITS—John Bertling, Edward Simper, L. C. Eisensmith, William Fink, George Nagel, A. Schemel and Edward Kaelin.

BADGES—George Rekart, George Link and Gus A. Zimmerman.

EXECUTIVE—John Bertling, William Fink, Edward Kaelin, George Nagel and Otto C. Lightner.

The Committee on Entertainment appointed by the Wholesale Jewelers and Manufacturers' Association of Cincinnati includes: A. J. Thoma, of Thoma Bros.; Arno Dorst, of the Dorst Co.; Edgar Fox, of Lindenberg & Fox; George Gruen, of D. Gruen, Sons & Co.; Herbert Schwab, of A. G. Schwab & Sons; William Pflueger, of Joseph Noterman & Co.; D. J. Gutmann, of L. Gutmann & Sons; Huburt Oskamp, of the Oskamp, Nolting Co., and Irwin Herman, of Herman & Loeb.

The present officers of the American National Retail Jewelers' Association are: Mack A. Hurlburt, Ft. Dodge, Ia., president; J. P. Archibald, Blairsville, Pa., vice-president; C. H. Williams, Condon, Ore., second vice-president; I. M. Radabaugh, Hastings, Mich., secretary; R. C. Bernau, Greensboro, N. C., treasurer. Officers of the local association of retail jewelers are: John Bertling, president; William Fink, vice-president; Edward Kaelin, secretary, and George Nagel, treasurer.

L. E. Chamberlain, Loyal, Wis., lately bought a line of jewelry and watches in Chicago.

A. J. and Julius Krueger have returned to North Branch, Minn., after a trip of several weeks to Otto, Minn.

GORHAM SILVER

THE JUDICIOUS BUYER

¶ The judicious buyer is he who safeguards his own interests by purchasing Gorham Silver.

¶ Because—it represents the ultimate perfection of style, material and workmanship.

¶ Because—it is actually cheaper, value for value, than inferior goods.

¶ Because—it is always in demand by people of refinement whose cultured taste it has largely helped to form.

¶ Because—during the past half century the public has learned to repose its fullest confidence in the Gorham name and the Gorham trademark.

Airships and Smugglers.

A CORRESPONDENT calls our attention to the fact that jewelers have reason to look with fear and perturbation on the development in aerial invention now going on in all sections of the country, because the successful operation of airships and dirigible balloons will mean an opportunity for the smuggler to operate without the chance of being caught. The horrible vision comes to us of balloons traveling over the Mexican and Canadian border of the country, incidentally dropping at various points the entire product of the De Beers Consolidated Mines and the Premier Diamond Mining Co., neatly tied up in bags and used as ballast, or the transatlantic airships stopping at night on the top of our 40 and 50 story skyscrapers in New York and leaving the product of the manufacturing jewelry trade of Hanau and Pforzheim, without the knowledge of the customs inspectors.

Must the success of the aeronaut doom the manufacturer and lapidary? Perish the nightmare and the welsh-rarebit fiend who saw it first.

Express Companies May Not Limit Liability.

A SUBJECT in which the jewelry trade has always been interested, and one about which THE CIRCULAR-WEEKLY is constantly receiving inquiries from subscribers is the liability of an express company or other common carrier for goods lost in transit when no value has been given by the shipper, the question hinging on the right of the carrier to limit its liability to $50 by a clause in the printed contract on the receipt which it gives. The question has come up in so many forms and has been decided in so many ways that it has been impossible heretofore to lay down a general principle as to how far the carrier has a right to limit its liability, the court decisions in some States differing materially from those in others on the point, and even courts within one State differing apparently in principle in their decisions in different kinds of cases. Jewelers, therefore, with other merchants will appreciate the work of the Merchants' Association of New York in getting from its counsel, John W. Griggs, former Attorney-General of the United States, an opinion on this point, calling attention to the fact that the Appellate Term of the New York Supreme Court has held that the usual clause of the express companies' receipt limiting the liability to $50 is void, as it violates Section XX. of the Interstate Commerce Act, which provides as follows:

That any common carrier, railroad or transportation company receiving property for transportation from a point in one State to a point in another State shall issue a receipt or bill of lading therefor, and shall be liable to the lawful holder thereof for any loss, damage or injury to such property caused by it or by any common carrier, railroad or transportation company to which such property may be delivered or over whose line or lines such property may pass, and no contract, receipt, rule or regulation shall exempt such common carrier, railroad or transportation company from the liability hereby imposed.

Section X. of the same act, on the other hand, provides that a consignor or consignee—

Who shall knowingly and wilfully, by false billing, false classification, false weighing, false representation of the contents of the package, or false report of weight or by any other device or means, whether with or without the consent or connivance of the carrier, its agent or agents, obtain transportation for such property at less than regular rates then established, and in force on the line of transportation, shall be deemed guilty of fraud, which is hereby declared to be a misdemeanor.

The court, says Mr. Griggs, accordingly takes occasion to add to the opinion the following statement:

But the fact that the contract of exemption shall be deemed void would not imply that a shipper may recover if he has been guilty of an act of misrepresentation or fraud, whether the common carrier thereby was innocently and unconsciously led into an agreement to quote a lower rate to the shipper than he would have been otherwise entitled to or even where the misrepresentation was made with the connivance or consent of the carrier to evade the provisions of the act.

In such a case, the shipper being guilty of fraud under the act, must suffer the consequences that pursue the wrongdoer.

In the case at bar there is no evidence or claim of fraud on the part of the plaintiffs. The defendant's agent received the goods without any statement or representation on the part of the plaintiffs or their representatives, and nothing was said with respect to the rate to be charged for shipment. As pointed out, no value was given nor was any rate fixed.

Saying that "No doubt the express companies will have the question passed upon by the court of final resort, in some other case, if not in this," Mr. Griggs adds:

Section XX. of the act is broad enough in its terms and was doubtless intended to apply to these exception clauses in express receipts. But anticipating an affirmance of this decision, I think your members in the meantime may expect the express companies to so instruct their agents in receiving goods for shipment as to get the benefit of the court's suggestion with reference to Section X. of the Act, either in the shape of an increased rate of carriage or exemption from liability for the reason stated.

Curtailment in Diamond Mining.

DISPATCHES to London from Kimberley, South Africa, last week, stated that the De Beers mine would be closed down, July 31, in pursuance of the policy of the company to restrict the output of diamonds for the present. The Dutoitspan mine closed in April, but the Kimberley, Wesselton (or old Premier) and Bulfontein mines will continue working. According to a report an official of the company expressed the opinion that the restricting of the output may send up the price of the diamonds in the market, though another director is quoted as saying that the amount which has been taken from the De Beers mine has been comparatively small. This is hard to verify, as the statistics which have been given out by the company have generally included the De Beers and Kimberley mine together, as they have joined those of the Premier or Wesselton and the Bulfontein.

The statement of the officials of the com-

Good Gold Jewelry

It's the only kind we make

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." ¶ OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

pany to the effect that the closing of the mine would not have any bearing on the amount of diamonds on hand, owing to the fact that the diamonds in the blue ground already mined include the product for two years, seems to have been misunderstood in some quarters where it was not known that the production of diamonds does not take place directly from the mine, but from the blue ground which has been brought to the surface and allowed to lie and disintegrate before the diamonds are taken out. On the whole, however, the news was handled by the daily papers with considerable intelligence compared to the way it would have been had the matter been reported a few months ago, none of them announcing that diamonds would therefore be put "on the bargain counter," or that the price would drop because they would be scarce or harder to get.

Milwaukee.

Gustav Slinwinski, Oconomowoc, Wis., was a recent visitor in this city.

James B. Kimball, Waukesha, Wis., called upon the local trade the past week.

F. P. Beswick, Racine, Wis., and wife, recently stopped over in Milwaukee for a few days while en route for an outing at Chain o' Lakes, near Waupaca, Wis.

With his pockets filled with gold watch cases which he was trying to sell, Bert Davis, alias "Shorty" and "Preacher," was arrested by city detectives last week. "Shorty" is a stockily built negro. He says that his home is in Sparta, Ga.

The proposition for the formation of a mutual fire insurance department by the Wisconsin Retail Jewelers' Association is meeting with much favor by all of the leading jewelers in the State. The active work of preliminary organization is in the hands of Franklin Thomson, secretary of the association, who is taking up the question with the jewelers on a business basis. The idea seems to appeal to all of the jewelers, and it is probable that the new department will be organized similar to the fire insurance auxiliary of the Wisconsin Retail Hardware Dealers' Association, which has been in operation for four years and is regarded as a remarkable success. Leading and influential jewelers all over the State have responded to Mr. Thomson, and have agreed to take out insurance in the new organization in the belief that it will offer safe and reliable insurance and at more reasonable rates than are being paid into the old line companies. The insurance laws of Wisconsin provide that $100,000 of insurance must be secured, and that a $5,000 cash deposit must be in evidence before the charter is granted by the State Department of insurance. It will be one of the rules of the new insurance organization that a jeweler, to be a member, must be affiliated with the Wisconsin Retail Jewelers' Association.

Chas. Harrington, engaged a short time ago by Lon Smith, Stuart, Ia., has shipped his household goods to Collins, Ia.

A recent fire in Kalkaska, Mich., which in all caused damage amounting to $125,000, gutted the jewelry store of W. A. Walker, whose loss is estimated at $1,000.

New York Notes.

Mr. Sickles, of M. Sickles & Sons., Philadelphia, was a visitor in town last week.

Jas. H. Lincoln, representing the Wolcott Mfg. Co., was a caller in town last week.

J. H. Merrill will represent Rogers & Co., makers of artistic jewelry at 53 Ann St., on the Pacific Coast, after Aug. 1.

Max Schoener, of 827 Saratoga St., Cincinnati, O., sailed from this port recently on the *Lusitania* for a trip to Germany to visit his native home.

O. M. Bliss, of the Engineering Specialty Co., 143 Liberty St., has been suffering from an attack of acute nervousness for the past six weeks which has kept him at home. Recent reports state that he is recovering.

The first series of composition notes of L. Witsenhausen indorsed by the L. Witsenhausen Co., were paid, July 23, at the Market and Fulton National Bank, and amounted to over $14,000. Wm. A. McCrea is in charge of the business.

A meeting of the creditors of Maurice Brower, wholesale dealer in pearls, 12 John St., was held last week at the offices of Stanley W. Dexter, referee in bankruptcy, 71 Broadway, at which time Leon J. Van Gelder was elected trustee, his bond being fixed at $50,000.

De Loid Safford, secretary of the Jewelers Board of Trade, left Friday for a five weeks' vacation. During his trip he will attend the annual convention of the Commercial Law League of America, of which he is a member. The convention is to be held at Mackinac, Mich.

The protest of L. Heller & Son, New York, against the assessment of duty at 35 per cent. ad valorem on shell cameos under Par. 450 as manufactures of shells, has been overruled. The importers claimed the goods dutiable at 10 per cent. as precious stones cut but not set.

A book on pearls, which has been prepared by Dr. Geo. F. Kunz, the gem expert, will be ready for issuance about the end of the month. The book contains 100 illustrated plates and has about 550 pages. It will be carefully and artistically bound and will be well worthy of a place in any library.

Tiffany & Co. have received the order from the Adjutant General's office for a medal, which will be given to First Sergeant A. M. Barger, of the First Separate Company of Rochester. The medal is one such as is given by the State to the national guardsmen for 10 years of faithful service.

A recent decision by the United States General Appraisers in regard to the protest of L. W. Levy & Co., New York, overrules the importers' claim and sustains the Collector's decision. The merchandise in question was blown glassware, ornamented or decorated by cutting. Duty was assessed at the rate of 50 per cent. ad valorem under Par. 100. The importers claimed the proper duty applicable to 45 per cent. ad valorem under Par. 112.

Frank Lang, said to be a jewelry salesman of this city, spent a night last week in a Philadelphia jail because he wouldn't pay a five-cent carfare. He was not allowed to give his diamonds as bail as the police were not sure that his story about being a gem salesman was correct. He, however, had no trouble in establishing his identity when he faced the police magistrate the next morning. He was fined $10 for assault and battery on the street car conductor and said that he was glad to get away so cheaply.

The Gorham Co. has received an order from the North Carolina "Society Daughters of the Revolution" for a bronze tablet to be placed in the rotunda of the Capitol at Raleigh. The tablet will be commemorative of the "Edenton Tea Party," which was the signing of resolutions by 51 women to use no tea or other articles of English manufacture until such time as all unjust acts relating to the colonies should be repealed. It is thought that the signing of the resolutions occurred before the famous Boston Tea Party.

Charles Guterman, an importer and dealer in diamonds, 53 W. 113th St., was about to board a car near the Brooklyn Bridge last Thursday afternoon when a push cart man struck him with his cart, knocking him down. The diamond dealer quickly arose and caught his car, but returned shortly and told a policeman that he had lost a small wooden box containing 19 rings worth $1,300 from an inside coat pocket, but could not state definitely that he lost the box when he was knocked down in Park Row, or whether it had been taken from his pocket when on the car. He gave this description of the rings: One containing 2¼ carat stones, worth $500; six rings set with diamonds, worth $50 apiece; six set with stones, worth from $35 to $40, and six plain gold signet rings valued at $300. These, he said, were the wholesale prices of the articles.

An appeal has been taken in the famous Citroen pearl case to the United States Circuit Court of Appeals and it is expected that the case will be reached some time early next year. As will be recalled by CIRCULAR-WEEKLY readers, this case involves the duty on 37 pearls imported by Bernard Citroen and sold to Mrs. W. B. Leeds. The stones were entered as dutiable at 10 per cent. as pearls in their natural state. The government officials afterwards reliquidated this appraisement claiming that the pearls were dutiable at 60 per cent. as jewelry. It was decided that the additional duty of $110,338 must be paid by the importers, which was done and an appeal from this decision was taken to the Circuit Court, which confirmed this decision. The case is now being taken by the importers to the appellate court in the hope of regaining the extra duty which has been paid over to the government.

There has been on exhibition during the past week at the Fifth Ave. store of Tiffany & Co. a punch bowl, ladle and plateau to be presented to the United States gunboat *Chester* by the City of Chester, Pa. The punch bowl is gold lined. The plateau is embellished with raised work and different kinds of State and national seals. The bowl rests on a triangular platform in the center of the plateau, and on this platform is a decorative design in coiled rope effect. The decorative effects of the bowl include an engraved representation of a ship under full sail together with other relief work. Near the top of the punch bowl is a circlet of red and white enamel joined at intervals by a field of blue on which are white stars. The punch bowl is also embellished with a colored enameled seal of the United States Navy. The cup bears this inscription: "Presented to the U. S. S. *Chester* by the City of Chester, Pa., MCMVIII." The ladle is decorated with seals of the navy department and has a gold lined bowl.

General Appraiser Sharretts in a recent decision affirmed the Collector of the Port of New York in assessing duty upon hat pins, with heads of metal scroll work and set with imitation precious stones at 60 per cent. J. C. Johnson & Co., the importers, claimed the duty should be 45 per cent. ad valorem under Par. 112 or 193 of the present tariff law. General Appraiser Sharretts also decided last week that the protests of Albert Lorsch & Co. *et al.*, New York, on imitation pearl beads temporarily strung and composed of wax in chief value, be sustained. The protest claimed duty on the goods at the rate of 25 per cent. ad valorem under Par. 448 of the Tariff Act. The decision of the Collector is reversed.

The program of the athletic events for the Jewelers' 24-Karat Club of New York City, which will be carried out at the seventh annual outing to be held Saturday at the Port-au-Peck Hotel, Long Branch, N. J., has been received by members of the club. The programme contains five specified events, the first of which will be a lemonade race. In this race the contestants will run from a starting line to tables, where they will find the different ingredients for making lemonade. The first one reaching the judges with the glass of lemonade, certified by the judges at table 6 as having been correctly made, will be the winner. Event No. 2 is a quoit tournament for teams of two. This event has proved very popular in the past years. For the president's cup a genuine 24-karat contest with real "simon pure" carrots will be the order of the day. This event is causing considerable conjecture among those not "on the inside," but the committee promises to furnish further details at the starting line. The great event of the day will be the baseball game between teams representing the 24-Karat Club of New York and the Jewelers' Club of Philadelphia. A handsome challenge cup has been offered for the baseball game, to be played for annually at the outings, to be kept in the custody of the club for one year and to become the permanent property of the team winning it twice in the next three years. The New York baseball team will be captained by Allen Power. It is said that the members of the team are under strict training, and although it has not been made public as yet who will twirl for the home team, it is safe to say that the collection of curves served up to the visitors will be the real thing. The last event on the programme is a story-telling contest. The stories will be limited to three minutes. It is expected that some startling tales will be told. Beautiful cups with the 24-Karat seal will be given to the winner of the lemonade race, the quoit tournament and the story-

John H. Mitchell, a Chicago jeweler, is stopping in this city.

Julius Lobel, 608 E. 138th St., Bronx, has sold out to W. M. Reider.

Louis Hodes, of the E. A. Potter Co., Providence, is in town this week.

C. P. Kionka, of the H. C. Kionka Co., is visiting his brother in Kansas City.

Miss Edith Getz, with Louis C. Moss, 13 Maiden Lane, is on her annual vacation.

Leonard Fox, manager of the Gustave Fox Co. store, Cincinnati, is a local visitor.

J. Goldberg, Prairie du Chien, Wis., is among the out-of-town visitors in town this week.

Goldstone Bros., pawnbrokers, 518 Sixth Ave., have been succeeded by Morris L. Goldstone.

Mr. Silverthorn, buyer for the B. Nugent Co., St. Louis, has been in the city for the past few days.

S. H. Brunner, of Brunner Bros., Cleveland, O., was seen in the jewelry district during the week.

William H. Cotter, of Jacques Bazinger & Co. on Fulton St., is spending a vacation at Oak Bluffs, Mass.

G. H. Clapp, of A. B. Clapp & Co., Brattleboro, Vt., was among the visitors in this city during the week.

Maurice W. Grinberg is receiving the congratulations of friends in the trade on the recent advent of a son.

Mr. Workman, of Workman & Newman, Providence, visited the New York office of the concern last week.

Fred M. Cook, of the Whiting & Davis Co., and Mrs. Cook are spending a vacation at the Thousand Islands.

Willard F. Main, proprietor of the Boston Piano & Music Co., Iowa City, Ia., expects to be in the city this week.

Daniel Chisholm, of the Bugbee & Niles Co., has returned to North Attleboro, after a three weeks' stay in this city.

G. Percy Clap, representing locally the Daggett & Clap Co., is at present in the White Mountains spending a vacation.

Miss Ray S. Merebaum, jewelry buyer for the Simpson-Crawford Co., registered at the *Herald's* Paris office last week.

A. H. Clark, manager of the material department of the C. B. Norton Jewelry Co., Kansas City, Mo., is a local visitor this week.

W. & S. Hurtig, formerly at 11 Waverly Pl., have moved to Providence, R. I. The style of the firm is now the Perfex Mfg. Co.

C. G. Perry, vice-president of the Ripley-Howland Mfg. Co., Boston, Mass., was a visitor at the New York office of the firm last week.

John Coburn, local representative of the Bugbee & Niles Co., is expected to return to-day from Scotland, where he spent a short vacation.

Mr. Little, manager of the Maiden Lane store of the Gorham Co., is spending a part of the week at the factory of the concern on a business trip.

Naum Welkinson, 45 Maiden Lane, lost a double row diamond ring out of the window of his establishment last week, and has offered $50 for its return.

Miss F. Schweitzer, bookkeeper for M. Schiff, 82 Nassau St., has been detained from work because of the death of her father, which occurred last Friday.

Hugo Oppenheim, of Oppenheim & Strauss, and Wm. Hofman, of Eichberg & Co., returned from a European trip last week on the *Kaiser Wilhelm der Grosse*.

The Mann Bros. Jewelry Co. has been incorporated under the laws of New York State, with a capital of $6,000. The directors are Louis Mann and Joseph Mann, of this city, and Samuel Mann, of Brooklyn.

Thos. J. Bolger, previously with the Blue Book Store, in the City of Mexico, now represents the L. E. Waterman Co. in that city, with headquarters at Gante 6. Mr. Bolger has resided in Mexico for the past seven years.

C. G. Alford, of C. G. Alford & Co., 192 Broadway, is on a fishing trip on the Grand Cascapedia River, in Canada, and expects to remain about 10 days fishing for salmon. He is fishing in private waters and expects to have some startling fish stories to tell upon his return.

Judge Hough has dismissed a petition in bankruptcy filed on May 11 against the H. & H. Mfg. Co., which makes novelties in copper, brass and nickel-plated ware at 554 to 562 W. 25th St., as the petitioning creditors did not press the matter when the case was called for trial.

Herman F. Marschner is no longer in the employ of O. M. Farrand, 3 Maiden Lane. Mr. Marschner went on a vacation on July 3, and has not as yet returned. Mr. Farrand warns the trade against giving his former clerk articles on memorandum in his behalf, as he will not hold himself responsible for any such transaction.

Bernard Strauss, of Oppenheim & Strauss, 87 Maiden Lane, while watching a ball game the first of the week, was struck in the face by a foul tip with such force that his nose was broken and one eye severely, but fortunately not seriously, injured by pieces of glass from his spectacles, which were broken. He will be confined to his bed about a week.

Notice has been given that W. Earl Youker, receiver in bankruptcy of the firm of Ashley & Merwin, formerly in business at 1327 Fulton St., Brooklyn, will sell at public auction, through J. W. & W. H. Reid, auctioneers, the property of the bankrupts on Aug. 5, at 10.30 A. M., at the store of the concern. The property to be sold consists of a line of jewelry, cut glass, silverware, optical goods, fixtures, etc. The schedules in bankruptcy filed by the concern showed liabilities of $2,681 and assets, consisting of stock, fixtures and open accounts, amounting to $880.

John Einsel, for 18 years an employe of the International Silver Co., 11 Maiden Lane, was arrested last week, charged with the theft of silverware from his employers. At police headquarters he is alleged to have admitted his guilt. His arrest followed that of Mabel Drew, 63 W. 38th St., at a pawn shop in Eighth Ave. She had some silverware with her and more was later found in her room, the police say. The newspaper accounts placed the value of the goods taken at about $700, but at the offices of the International Silver Co. it was said that the loss was much less than newspaper accounts had it, and, in fact, was an amount of very little consequence. The goods taken were plated ware.

A meeting of the creditors of Max Abrahams, San Francisco, Cal., was held last Friday at the office of the Keller & Untermeyer Mfg. Co., 71 Nassau St., at which time an offer of 50 per cent. in settlement was made, the notes to be for two years and endorsed. This offer was rejected. An offer was then made to turn over the assets of the debtor to his creditors, with the understanding that he be relieved in full of his obligations. The creditors looked favorably upon this proposition. The liabilities, including outstanding accounts, cash, etc., are estimated at $64,000, with assets in the neighborhood of $62,000. The meeting was adjourned for a week. Mr. Abrahams began business in 1893.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.

For the sum of $10 (payable in advance), a daily list will be mailed or delivered during the Fall season (July 20 to Dec. 15), to the offices of those desiring this service.

Providence.

O. C. Devereaux and family are at their Summer cottage at Prudence Park, on Narragansett Bay.

Craft & Newton have removed their factory to the top floor of the building, 109 Friendship St.

Edward B. Hough, of the Wightman & Hough Co., sailed last week for a month's vacation in Europe.

Louis Stern, of L. Stern & Co., this city, accompanied by his family, is enjoying a vacation visit at Atlantic City, N. J.

Samuel A. Baldwin, of Fessenden & Co., is spending a two weeks' respite from business at his old home in Manchester, N. H.

A. L. Newman & Co., manufacturing jewelers, rear 283 Thurber's Ave., have gone out of business after a few months' experience.

Frank A. Burdette, formerly at Newark, N. J., has opened a retail jewelry and watch repairing store on Taunton Ave., East Providence.

Charles Fuller is enjoying his leisure time this Summer, as usual, in cruising about Narragansett Bay and contiguous waters on his yacht, *Tartar*.

The manufacturing jewelry plant of George F. Greene & Co., at 79 Laura St., was sold at auction last week to the mortgagee, John H. Harvey, for $1,350.

The Providence Mfg. Co. will move early in August from 107 Friendship St. to the shop vacated several months ago by L. Davidsburg & Co., at 25 Calender St.

During a severe thunderstorm last Thursday morning, the building occupied by the Kay Jewelry Co., at 168 Somerset St., was struck by lightning, but escaped serious injury.

Water did damage of several hundred dollars at the retail store of Herbert S. Tanner, 64 Westminster St., early Sunday morning, during a fire in the upper portion of the building.

John R. Welbsby, who has been employed at the Gorham Co.'s plant in this city for 21 years, died recently at his Summer home at Shawomet Beach. He was a native of Manchester, England.

The George H. Fuller & Son Co., manufacturing jewelers' findings at Pawtucket, has announced the closing of their plant, July 29, until Aug. 10, for the purpose of making necessary repairs to machinery and giving their employes a vacation.

August Westeren, who has been conducting a retail jewelry and watch and clock repairing business at 433 Westminster St., has gone out of business, and his stock, tools and fixtures were sold at auction last Thursday, at his home, 92 Dudley St.

The Gorham Co.'s extensive works in the Elmwood district, and employing 2,000 workmen, resumed on an eight-hour schedule last Monday. The works have been closed for two weeks. Previous to that time they had been running on short time.

A patent has been granted to Frank R. Stafford, of 144 Pine St., this city, relating to separable link cuff buttons. The device consists of two button heads, to one of which is fixed an apertured link, and to the other of which is fixed a shank and cross bar insertable in the aperture of the link.

The men employed at the manufacturing jewelry factory of B. A. Ballou & Co. enjoyed an outing at Emery Park on Saturday afternoon, the party numbering about 50. Games of various kinds were in order and a shore dinner proved a delightful feature.

Frank C. Murray, for four years manager of the local office of the Jewelers' Board of Trade, has resigned to accept a position with the Osceola Turpentine Co. in Florida. Franklin C. Wood, who has been associated with Mr. Murray in the Providence office for a couple of years, succeeds to the management thereof.

The William J. Feeley Co. has just completed a handsome memorial lamp for presentation to St. Mary's Seminary for the chapel at Bay View. It is designed especially for this purpose, and its lines harmonize with the classic style of architecture in the chapel. It is octagonal in shape and chaste in design.

Thomas S. Jackson, one of the stockholders in the William A. Read Co., manufacturing jewelers, 116 Chestnut St., was the purchaser of the stock, tools, fixtures and machinery of the company when disposed of at public auction, last week, by order of the assignee. The price paid was $1,650, and it is understood that Mr. Jackson will continue the business.

Alleging unwarranted arrest, false imprisonment and assault and battery, Theodore Clyde Foster, vice-president of the Theodore W. Foster & Bro. Co., of this city, has brought a $10,000 damage suit against Chief of Police Frederick Sackett, of Norwood, Mass., as the outcome of his detention by that officer the night of May 16, while on his way in an automobile to this city from Boston.

Among recent trade visitors in this city were: W. J. Sabbath, of J. L. Sabbath & Co., Montreal; B. C. Foster, Bristol, Pa.; W. L. Roberts, Wilmington, Del.; Miss Henrietta Graf, Berg Bros., New York; Donald Smedley, Washington, D. C.; R. C. Green, Jr., Pottstown, Pa.; D. H. Krause, North Wales, Pa.; Harry L. Harman, Baltimore, Md.; Frank Kline, Spring City, and and John Kaufman, Cincinnati, O.

The petition for a new trial in the cases of Abel Violette and others of Fall River, against William H. Manchester, of this city, has been withdrawn in the United States Circuit Court for the Rhode Island District. Judgment has been entered for the plaintiffs aggregating $4,000, and the judgment satisfied. The suits, of which there were five, which were tried conjointly, were to recover $29,000 damages for injuries claimed to have been inflicted by a collision of Mr. Manchester's automobile with a carriage in which the plaintiffs were riding near New Bedford.

The annual outing of the members and friends of the S. & B. Lederer Employes' Association was held Saturday at Vanity Fair, on Narragansett Bay. There were four special cars to transport the party, and upon arriving at the grounds the various attractions were visited, a shore dinner enjoyed and in the afternoon an exciting game of baseball played between a nine from the Lederer shop and one representing the Ostby & Barton Employes' Relief Association. A second game was played between the employes of the S. & B. Lederer Co. and the Providence Stock Co.

Boston.

Charles Wilson, of Wilson Bros Co., is at Berlin, Me., on a midsummer outing.

Arthur Stephens, formerly with W. B. Foster, has accepted a position in Manchester, N. H.

Myles Byrne, formerly of Boston, and more recently at Pawtucket, is now with the Wilson Bros. Co.

Work was resumed, July 20, at the factory of the E. Howard Watch Co., in Waltham, after the annual vacation.

George W. Hopkins, for many years well known in the Boston jewelry trade, is now with a concern that makes a specialty of store fittings.

The Lombard-Skoog Co., of which Willard D. Lombard and George Skoog are the chief owners, is located in the Paddock building, where it is conducting a jewelry business.

The George E. Smith Co., of this city, has been incorporated to do a jewelry business with a capital of $10,000; George E. Smith, Roxana A. Worcester, Mary L. Mandell are the directors.

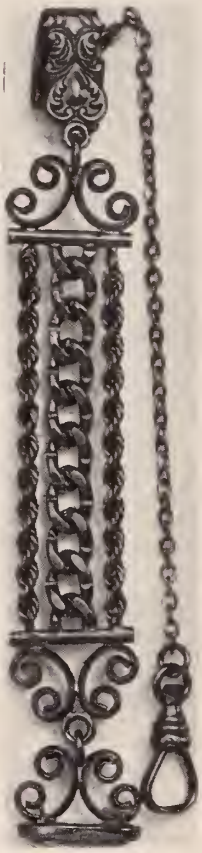
L. C. Remick is now with the F. F. Place Co. He came here from Colebrook, N. H. Samuel G. Learned, of the same concern, is receiving congratulations on his marriage, which took place recently to Miss Wentworth, of Lexington.

James W. Campbell, aged 61, a well-known resident of Waltham, who died July 18 at his home, 316 Moody St., had been employed in the Waltham Watch Co.'s factory in recent years. He leaves a wife and one daughter. He was a member of Isaac Parker Lodge, A. F. & A. M.

Louis Sonnabend, formerly at 2 Portland St. for 18 years and Brattle Sq. for five years, and his brother Joseph, who has a store also at 1984 Washington St., where he has been located for 14 years, have formed a partnership under the name of Sonnabend Bros., and have located at 94 Court St.

Myers & Franks have added two watchmakers to their force, Joseph Adler, of New York, and B. O. Lawson, of Waltham. Mr. Franks has just returned from a three weeks' fishing trip and outing at Belgrade lakes. On Saturday next Mr. Myers will start on an extended automobile trip through the cape district and Connecticut.

Representative Robert Luce, who aided materially in securing the passage of the Gold Stamping Law through the last legislature, is a candidate for lieutenant-governor, and his candidacy meets with much favor, therefore, among those who appreciate his good work in that matter, which was the result of a campaign engineered at the State house by Albert R. Kerr.



An event which recalled the mystifying tin box robbery at the store of Wilson Bros. Co., jewelers, on Court St., this city, was the hearing on Monday, before a master, of the charge of negligence, preferred against John Wilson, in connection with its disappearance. This question was brought before the court by vote of the directors of the corporation, of which Mr. Wilson is the manager, and is in the nature of an inquiry, with Mr. Wilson acquiescing with the other directors in the taking of such action.

Connecticut.

Cephas B. Rogers, Danbury, has purchased a large touring automobile.

F. Ischer, Torrington, was recently granted a patent on an illuminated clock.

The entire plant of the Sessions Clock Co., in Bristol, has resumed operations and is working 55 hours per week.

Walter A. Ingraham, well known in the jewelry trade, was recently elected vice-president of the Bristol Savings Bank, Bristol.

The Wm. L. Gilbert Clock Co., Winsted, resumed operations on Monday of last week, after having been closed for three weeks for inventory.

Wm. B. Comstock, foreman of the Bradley & Hubbard Mfg. Co., Meriden, on Monday, of last week, celebrated the 71st anniversary of his birth.

Among the factories which resumed operations, July 20, was that of the Landers, Frary & Clark Co., New Britain. The plant was closed for two weeks.

W. E. Porter has assigned to the New Haven Clock Co., New Haven, a patent which was granted to him, a short time ago, on a pendant for the swivel of watch cases.

The R. Wallace & Sons Mfg. Co., Wallingford, has just awarded the contract for the construction of a large brick gate house to replace the present wooden structure on Bull Ave.

Factory "E," International Silver Co., Meriden, has given its generous aid to the Undercliff Sanitorium by donating to that institution all the necessary silverware, including knives, forks, spoons, etc.

Factory "E," International Silver Co., Meriden, started on a full working schedule on Monday of last week. The Wilcox Silver Plate Co. also started on an increased time schedule the same day.

Llewellyn W. Hart, for some time in the employ of the Morgan Silver Plate Co., Winsted, of which his father, Gilbert L. Hart is general manager, died at the Winsted Hospital, July 16, of typhoid fever.

George M. Curtis, treasurer of the International Silver Co., and C. P. Bradley, of the Bradley & Hubbard Mfg. Co., Meriden, have been selected by Mayor Reilley to serve on the Industrial Committee in charge of the big bridge celebration to be held in Hartford, next October.

About 16 cheap watches and a lot of general merchandise were stolen, recently, from the store of Balch & Brown, Manchester. The total loss will amount to about $300. The thieves broke a rear window through which they entered by standing on a pile of boxes, which they found in the yard.

H. J. Dunlap, whose store in Naugatuck, was entered last March, by burglars, who were subsequently taken into custody, exhibited in the show window of his store last week a check for $100 awarded by the Jewelers' Security Alliance to George M. Beach, superintendent of the police of Waterbury, for the arrest and conviction of the thieves.

Two Poles who were arrested last Wednesday in Canaan and who claim to reside in New York, are believed to have been implicated in the recent robbery of the store of George Odell, in Kent. When searched the prisoners had in their possession a silver watch, about $45 in bills and about $3 in pennies. The timepiece and the pennies are believed to belong to Mr. Odell.

Attleboro.

The W. H. Saart Co.'s factory is closed this week.

Frank H. Sadler is enjoying a vacation at Oak Bluffs.

The Cunningham, McCarthy Co. will close Aug. 1 for a week.

C. H. Allen & Co.'s factory was closed last week for the usual Summer vacation.

Ira W. Smith, salesman for the Horton-Angell Co., has returned from a Pacific Coast trip.

Miss Grace Hodges has resigned as bookkeeper for Walter E. Haywood & Co., after working 13 years for the concern.

John Killion, formerly foreman for the H. F. Barrows Co., has taken a similar position with the Attleboro Chain Co.

C. Adin Smith and wife enjoyed an automobile tour, last week, through the Berkshire Hills and western Massachusetts.

Harry P. Kent, of F. W. Weaver & Co., enjoyed an automobile trip last week with his family through the New Hampshire mountains.

The R. F. Simmons Co. nine has given up its place in the Jewelers' Baseball League. The C. H. Eden & Co. team was substituted in its place.

The C. O. Sweet & Son Co. closed Saturday for a week's vacation. The concern worked overtime last week in order to grant the usual respite from labor.

Thomas E. McCaffery is home from a visit to the Denver Democratic convention, the home of William J. Bryan at Fairview, Neb., and the Elks' convention at Dallas, Tex.

David E. Makepeace, Col. Sidney O. Bigney, Albert S. Ingraham, Thomas E. McCaffery and Carl M. Wendelstein, in interviews in the local press, urge the creation of a board of trade.

John M. Fisher subscribed $3,000 for the Prohibition campaign fund, with the stipulation that one-third shall be returned to the Massachusetts committee for distribution among New England States.

Failure on the part of William Wallace to appear as a witness in the Providence District Court caused the case of John Nelson, who is alleged to have received goods stolen of the Fontneau & Cook Co. from Wallace, to be again continued.

Col. Sidney O. Bigney left Saturday for Cincinnati to represent Massachusetts on the committee that notified W. H. Taft of his nomination. Mr. Bigney was given a reception on Thursday evening at the Hotel Vendome, Boston, which was attended by 350 representative citizens of Massachusetts. Col. Bigney responded with a short address. He was given a handsome picture of the nominee for President and was instructed to give it to Mr. Taft with the compliments of the Massachusetts Republicans.

A. S. Ingraham has received the plans for the big three-story factory that will be built at the corner of Union and Dunham St. It will be a wooden structure, and in addition to the three floors will include a basement which will be suitable for occupancy. It will be "L" shaped. One wing will be 90 feet long and the other 67 feet. Both will be 40 feet wide. The building will be equipped with a sprinkling system and other modern improvements. It will be one of the best-lighted factories in town. It is expected that the building will be complete within four or five months. Mr. Ingraham is planning to occupy the first floor, the basement and two other floors.

North Attleboro

Raymond V. Draper is at Oak Bluffs.

J. A. Lucas, Chicago, was a local visitor last week.

E. I. Franklin & Co. closed last Saturday for two weeks.

H. H. Curtis & Co. will close next Saturday for a week's vacation.

George Ferris is in the west in the interests of R. Blackinton & Co.

Mr. Angell, western representative of the George L. Paine Co., is back from a trip.

The engagement is announced of Oscar H. Hornig, former salesman for Codding & Heilborn Co., to Miss Ethel Carpenter.

Frank E. Whiting, Chicago representative for Whiting & Davis, is enjoying a vacation at one of the Rhode Island shore resorts.

Herbert L. Brown and Walter H. Barber, two young Plainville jewelry workers, have just completed a walk from Plainville to San Francisco. The journey was made in five months, two weeks and two days.

A dividend of 25 per cent. has been declared by the Jewelers' National Bank, which closed its doors last December. This dividend amounts to $164,125 and makes 85 per cent. of the total deposits now returned.

Frank M. Sturdy, treasurer of J. F. Sturdy's Sons Co., has presented to the Commissioner of Corporations the following report: Machinery, $60,491; cash and debts receivable, $365,304; merchandise, $164,602; total, $590,397 Stock, $300,000; accounts payable, $42,392; surplus, $248,-005; total, $590,397.

In the reorganization of the North Attleboro Country Club well-known jewelers hold conspicuous places. Fred A. Howard, of Frank M. Whiting & Co., is president, and Wallace G. Franklin, of E. I. Franklin & Co., is secretary. Orin W. Clifford, of G. K. Webster & Co., Andrew E. Morris, of G. C. Hudson & Co., and Fred B. Brigham, of Cheever, Tweedy & Co., are given important committee places.

Otto Rhefold, a Newark, N. J., chemist, says he has discovered a process for soldering aluminum which apparently makes a perfect union without the use of any flux such as muriatic acid or resin.

R. P. Coughlin, who travels for the New Haven Clock Co. in Ohio, Kentucky and West Virginia, had a narrow escape from death while alighting from an interurban car in Louisville, Ky., July 22. Fortunately he escaped with a few painful bruises, which confined him to the Seelbach Hotel for a few days under the care of a surgeon. He hopes to be able to resume his trip in a short time.

ENTERPRISING and successful jewelers everywhere are pushing the sale of some individual line of watches which they believe to be superior to all others, and upon which they can also make a satisfactory and justifiable profit.

This explains the growing demand for ILLINOIS WATCHES, in 0, 12, 16 and 18 sizes, by increasing numbers of leading jewelers throughout the United States.

If you are not familiar with the superior quality of—and advantages gained by handling—Illinois Watches, it will mean reputation and dollars for you to investigate.

Every one fully guaranteed.

Vol. LVI. CHICAGO, WEDNESDAY, JULY 29, 1908. No. 26.

Chicago Notes.

Charles T. Spence is taking a vacation at Chapman's Lake, Ind.

Otto Lieberman, with the Stein & Ellbogen Co., is now on a vacation.

Sam Zimmern, of Henry Zimmern & Co., New York, was recently in Chicago.

Wm. Hirsch, of A. Hirsch & Co., is spending the Summer at Manitou, Col.

The family of Abe Levy has been increased by the arrival of a baby girl.

A. B. Towers, of Lapp & Flersham, is taking a vacation at Lake Koshkonong.

Frank Alter, of Holsman & Alter, is taking a vacation on a tour of the Great Lakes.

G. S. Robinson, traveler with L. H. Schafer & Co., has started on a trip northwest.

Grant R. Simons and Mrs. Simons, Langford, S. Dak., were in Chicago recently on a pleasure trip.

J. F. Kiser, of the Muncie Jewelry & Plating Co., Muncie, Ind., was a recent visitor in Chicago.

B. T. Roberts, representing T. A. Wilson & Co., recently made a trip to Milwaukee and nearby points.

H. M. Lane, Chicago, manager for Reed & Barton, is spending a few weeks' vacation at Green Lake, Wis.

Albert Cohn, western representative of the Lyons Mfg. Co., has just returned from an extended western trip.

A baby girl was recently born to Mr. and Mrs. John I. Larsen. Mr. Larsen is in business at 4765 N. Clark St.

A. C. Becken and family left for Oregon, last week. Walter F. Brown has withdrawn from the A. C. Becken Co.

A. Vauderzee, Appello, Ia., was a recent visitor in Chicago. He was on his way home after a three months' visit in Holland.

D. T. Merxhon, of the Electrolytic Art Metal Co., Trenton, N. J., was a recent visitor to the Chicago office of the company.

Thos. F. Kennedy, Chicago manager of the Star Watch Case Co., made a trip to St. Paul, Kansas City and intermediate points.

L. Prigozen, a retail jeweler at 604 Milwaukee Ave., has opened a new store at 556 Milwaukee Ave. He intends to operate both stores.

Miss Imogene J. Goodnow, sister-in-law of Fred. H. Young, Maquoketa, Ia., is engaged to be married to Dr. George McIntyre, of that town.

Geo. Spies has returned from his honeymoon trip to Mackinac and northern Wisconsin. Fred A. Spies spent last week playing golf at Lake Villa, Ill.

Harry Saltsman, El Paso, Ill., was a visitor in Chicago, last week, on his wedding trip, having recently been married at Pueblo, Colo., Mrs. Saltsman's home.

W. R. Stevens, representing the Bay State Optical Co., will attend the convention at Cincinnati, Aug. 4-7, after which he will spend a week or so in the country.

H. W. Fields, who was formerly in business at Plymouth, Wis., was recently in Chicago, buying stock for his new store, to be located at 1326 State St., Milwaukee.

H. Weiseman, silver buyer for the Grand Leader, St. Louis, was a Chicago visitor, last week, stopping here a few days on his way to spend his vacation in Wisconsin.

A postal card from "Billy" Lamb says he is at Huntsville in the Wahsateh Mountains of Utah. Mr. Lamb reports seeing one bear, five wolves and plenty of trout and snow.

Robert L. Clark, formerly with the Towle Mfg. Co., now represents Simpson, Hall, Miller & Co. (the International Silver Co.) in all the large cities between Boston and Chicago.

Jonas Silverstein, 413 Hermitage Ave., has complained to the police that he was robbed of $800 worth of diamonds by a man whom he believed to be a prospective customer.

Frank D. Stratton, formerly with Smith, Patterson Co., Boston, Mass., is now connected with the Meriden Cutlery Co.'s office in Chicago, as assistant to Dr. J. R. Payne, local manager.

M. Weil, of the M. Weil Co., Salt Lake City, Utah, was recently called to this city on account of sickness of Mrs. Weil's mother. He was accompanied by Mrs. Weil and daughter.

Wm. Marks, formerly employed in a jewelry store at Calumet, Mich., was in this city, recently, buying stock. He will locate in some town in northern Minnesota, just where he has not yet decided.

The Lande Jewelry Co. was recently incorporated to manufacture and deal in jewelry and other merchandise with a capital of $2,000. The incorporators are: L. Hornstein, H. M. Fisher and M. Fisher.

Frank M. Whiting, of Whiting & Davis, Attleboro, will represent his firm in Chicago and western territory. He is moving his family to Chicago and will have his office at room 405, Columbus Memorial building.

Emil Schaffer, proprietor of the Keystone Jewelry Co., 322 State St., and the Peerless Jewelry Co., 174 Madison St., has closed a lease, July 23, for the entire building at 306 State St. for a term of five years at $36,000.

Chas. E. Child, representative here for the Chas. M. Robbins Co., has just returned from the Shriners' convention at St. Paul with his complete exhibit on the "Street of Mecca" at the Ryan Hotel there, exhibiting badges and souvenirs. Mr. Child goes this week to the factory for two weeks.

Rud. Noel, of Rudolph Noel & Co., New York, is engaged to be married to Miss Rose Greenbaum, 572 E. 45th St., this city. An engagement party was given at that residence, July 24. The wedding will take place Sept. 16. Mr. Noel is receiving the congratulations of his many friends in the trade.

At Minocqua, Wis., last week, were Harry H. Miller, with Hutchison & Huestis; Fred Haller with J. Ziegler & Co.; W. S. Sparrow, with Stern Bros. & Co.; Mr. Morgan, with the C. B. Norton Jewelry Co., and Mr. and Mrs. M. H. Berg. Mrs. Berg caught a muskallonge weighing 28 pounds.

A plate glass window in the Adams St. side of C. D. Peacock's jewelry store, State and Adams Sts., was broken with a paving brick tied in a handkerchief in the early morning on July 22. A tray of diamond rings and scarf pins was stolen, valued at about $1,000. A suspect was arrested the following day who had jewelry in his possession identified as part of the stolen goods. The prisoner claimed that he had purchased the jewelry from a dock laborer.

John U. Rustishauser has been very ill for a long time. He is suffering from a rare disease, known as Addison's disease, and very little hope is entertained of his ultimate recovery. The mail-order business of the J. U. Rustishauser Co. is about to pass into the hands of Jos. A. Schoenthaler, a mail-order firm in the Columbus Memorial building. The Rustishauser Co. is offering 75 cents on the dollar. Mr. Schoenthaler will continue the Rustishauser business as a separate enterprise from his own, but the stock, etc., will be removed to his present quarters.

Among the visitors from out of town during the past week were the following: A. J. Reinhart, Lincoln, Ill.; J. C. Grasborg, watchmaker for A. Mandelberg, Omaha; J. C. Klahalt, Springfield, Ill.; L. A. Fonder-

How Shall a Retail Jeweler Advertise?

STORE OF F. E. FEARL & SON, HUTCHINSON, KANSAS.

Hutchinson, Kan., July 8, '08.
THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen — The Catalogs you made for us last Fall proved in every way satisfactory and brought excellent results and made a nice increase in December. They are a splendid salesman and place one's entire stock in the homes of the people to study over at their leisure. They bring competitors' customers to the store and are a great power in placing one's business in the lead of all others. Your goods are rapid sellers and far better than the usual run of goods and are of high standard quality

The best recommendation we can give you is, we will use your Catalogs again this year.

Very truly,
F. E. FEARL & SON.

This firm used The Arnstine Bros. Company Catalogs in 1907, and again placed an order for 1908.

Toledo, Ia., Jan. 8th, 1908.
THE ARNSTINE BROS. CO.,
Cleveland, Ohio.

Gentlemen—Replying to yours of the 4th inst. Owing to the financial conditions this past Holiday Season, I find it most difficult for me to estimate the value of my Catalog advertising to my Holiday Sales. For this reason, I take the year's business, as a whole, and compare it with the first year of your Catalog, and I find that my business has experienced a substantial increase, showing the best percentage of increase for fourteen years.

I wish to thank you for the exceptional merit and style of the goods furnished me this past fall, and for your careful attention to my needs.

Respectfully yours,
J. M. R. HANSON.

IN WRITING US PLEASE MENTION THIS ISSUE "JEWELERS' CIRCULAR-WEEKLY"

smith, Hoopeston, Ill.; C. H. Alguire, Bridgman, Mich.; R. E. Lincoln, Plano, Ill.; Carl Olsterle, Joliet, Ill.; Al. Smith, Bloomington, Ind.; Henry Volkman, Kankakee, Ill.; R. H. Faris, Winfield, Ia.; Moe Ehrlich, Detroit, Mich.; W. H. Smith, Golden, Colo.; F. H. House, Galva, Ill.; George Mayr, South Bend, Ind.; H. S. Record, Cambridge, Ill.

A meeting of the executive committee of the Illionis Retail Jewelers' Association was held here last week. Those present were: F. A. Marean, president, Belvedere; Frank Smith, first vice-president, Pontiac; F. A. Pearce, second vice-president, Milford; secretary, Geo. B. Elbe, Chicago; Lorenz Holland, Cullom, director; W. G. Werner, Chicago, director. The following delegates were elected to represent the association at the coming national convention at Cincinnati: F. A. Marean, Geo. B. Elbe; alternates, Frank Smith, F. A. Pearce. The next meeting will be held here Sept. 16. Secretary Elbe will send a circular letter to every jeweler in the State of Illinois, and a large attendance is expected

St. Louis.

W. J. Krug, Staunton, Ill., and C. F. Gash, Fredericktown, Mo., were in this city last week.

E. Massa, of the Bauman-Massa Jewelry Co., has returned to his desk, after a month's tour through Colorado.

W. E. Susong, of the Bauman-Massa Jewelry Co., will leave this week for a month's tour through the north.

Alvan T. Hatch, representative of four eastern manufacturing companies, has been at the Hotel Jefferson for a week.

Samuel E. Morrison, of Morrison, Levy & Co., 205 N. 7th St., has withdrawn from the firm. Mannie Levy, the other partner, is now conducting the business at the same place under the name of the M. Levy Jewelry Co.

The Mermod, Jaccard & King Jewelry Co. has furnished the St. Louis *Republic* with three little silver and gold-lined drinking cups, which the paper will present to the three children born last Sunday, July 12, the day on which the *Republic* celebrated its anniversary. The babies are all girls and were named Louisa Republica, in honor of the paper.

Kansas City

The Hassig & Krieke Jewelry Co. has secured the services of Wm. Stephen, of Providence, R. I., as an engraver.

P. O. Hinrich, Detroit, Mich., is the new instructor in engraving at the Kansas City Horological and Optical School.

George A. Young, Moberly, Mo., stopped over here last week on his way to Colorado, where he has gone on a pleasure trip.

A. E. Storey, a former student at the Kansas City Horological and Optical School, has opened a jewelry store at Lockhart, Tex.

John Wyche, who represents the Woodstock-Hoefer Watch & Jewelry Co., in Texas, has returned to his territory, after his Summer vacation.

A. W. Hailey, a former student of the Kansas City Horological and Optical School, has started in business for himself at Delphos, Kans. He bought his stock and material equipment in this city.

The following out-of-town jewelers called on the local trade last week: H. L. Morrison, Pittsburg, Kans.; A. L. Cline, Edgerton, Kans.; Charles Weber, Lexington, Mo.

R. N. Eaton, of the Eaton & Pease Jewelry Co., is preparing to build a new home that will cost $6,000 at 42d St. and Grand Ave. A morning paper here recently published an illustration and description of a bungalow that pleased Mrs. Eaton, and the house will be a reproduction of it. It will be ready for occupancy by the Fall.

Detroit.

Simon Lachman spent some time last week in Chicago.

Charles Schaub returned recently from a visit to New York.

D. E. Holland, Lapeer, was in this city buying stock last week.

Herman A. Rolshoven returned recently from a long European trip.

George H. Johnston, Northville, was here a few days ago buying stock.

J. H. Garlick returned last week from his trip to St. Paul with the Shriners.

Charles H. Kellar has taken the northwestern territory for Noack & Gorenflo.

Hugh Connelly is spending the Summer recuperating at Lake Orion, after a recent severe illness.

W. C. Noack, of Noack & Gorenflo, is spending several weeks at Whitmore Lake with his family.

Noack & Gorenflo have been awarded the contract for clocks and bells in the new high school additions.

Ernest E. Albaugh, of Albaugh & Sons, was in this city last week, combining business with pleasure.

E. H. Cressey has moved to a different location at Saline and is putting in new fixtures, besides laying in considerable stock.

H. T. Blank and wife, Elsie, were in the city last week. Mr. Blank is buying a stock of china and glassware, having established a new china department in connection with his jewelry store.

Among the visitors who stopped at the wholesale houses to buy goods last week were: George Haller, Ann Arbor; B. S. Gaylord, Owosso; F. N. Pauli, Pontiac; W. H. Skeman, Wyandotte.

L. Plamondon, San Francisco, who conducted a jewelry store at Woodward ave. and Elizabeth St. many years ago, is in Detroit visiting his sister. He went west 23 years ago, and this is his first visit to his old home since.

Friday evening, Aug. 14, will be the big evening for the jewelers and opticians, as there will be a nesting of the Ku-Kus in St. Andrew's Hall, East Congress St. Local members of the order are preparing to make this lodge meeting a very interesting one, and a big class is expected to come in for initiation.

George G. Haller, Jr., Ann Arbor, Mich., writes THE CIRCULAR-WEEKLY that the item recently published, in regard to charges against him made by a surety and an insurance company, was absolutely incorrect; that the newspapers mixed up the affair, owing to the fact that there were counter suits against the insurance companies relative to their not paying certain losses, and that the statements in regard to charges against himself were wholly untrue. Mr. Heller states that the newspapers of the vicinity which published the story have made a retraction. Mr. Heller, who is now a special agent for an insurance company, was formerly a well-known jeweler and is the son of one of the most prominent jewelers of the State.

Detroit wholesalers and retailers all through the State are looking forward to the big week of the year, which will be from Aug. 10 to 15. The program has been announced now for the Buyers' Excursion week, and it is believed that the entertainment and other inducements will bring a record-breaking crowd of merchants, who will come at that time to look over goods and get acquainted with the wholesale houses. It has been estimated that 2,500 retail merchants will visit the city at that time. Tuesday, Aug. 11, there will be a river parade, a water fete in which all kinds of craft will take part, and a display of fireworks at Belle Isle. On Wednesday the merchants visiting will be shown about the city and given a chance to inspect the big passenger steamer *City of Cleveland*. Wednesday evening a lecture on industrial topics will be given by Prof. G. H. Maxwell, editor of the *Talisman*. Thursday evening the crowd will visit the pleasure parks, while Friday there will be an excursion by steamer.

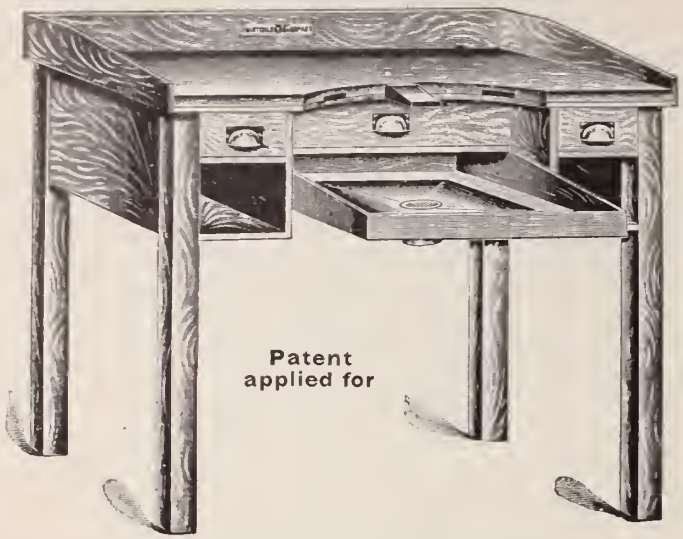
Omaha.

H. S. Knapp, with the Shook Mfg. Co., is home from a business trip.

A. H. Hastings, Arcadia, Nebr., was in the city purchasing stock last week.

C. Hansen, with Fred Brodegaard & Co., left last week for St. Paul, Minn., where he will spend a two weeks' vacation.

Miss Rosina Mandelberg, daughter of A. Mandelberg, is spending a few weeks in New York and Boston. She will return by the lake trip.



J. L. Borsheim, of Louis A. Borsheim, Sr. & Son, accompanied by his family, left last week for a stay of several weeks at Sulphur Springs, Ark.

A. H. Scott was in the city last week purchasing stock for a new store which he will open at Crofton, Nebr. This is just a new town on the Northwestern Railroad.

A. Mandelberg is at the office again, having been confined to his home on account of heat prostration. As soon as business permits he will leave for a month's stay in the mountains of Colorado.

While H. Copley and family were sojourning through Vancouver, B. C., last week, a telegram came to this city announcing the death of Mr. Copley's sister, Mrs. A. J. King, of Superior, Nebr. At that time Mr. Copley could not be located.

Frank Irving Fay, well known in the jewelry trade in Milford, Mass., died recently of neuralgia of the heart at Willimantic, Conn., aged 49 years. The deceased is survived by a widow and five children.

11 John St., Cor. Broadway, New York.

TRADE-MARKS

Manufacturers and Jobbers:

We now have in preparation a supplement to the second edition of *"Trade-Marks* of the *Jewelry and Kindred Trades,"* and in order that it may be as complete and accurate as to new marks as it is possible to make it, we request every manufacturer and jobber to send us a list of such marks as he may *now use,* or *has ever used,* together with such information (the kind and quality of goods upon which the marks are used, etc.,) as may be germane to the subject. Send cuts of marks if possible. If not, send clear, printed impressions or drawings.

The earliest attention is solicited, as it is of utmost importance to every manufacturer and jobber to have his mark recorded in this supplement.

E. H. Cressey has moved to a different location at Saline and is putting in new fixtures, besides laying in considerable stock.

H. T. Blank and wife, Elsie, were in the city last week. Mr. Blank is buying a stock of china and glassware, having established a new china department in connection with his jewelry store.

Among the visitors who stopped at the wholesale houses to buy goods last week were: George Haller, Ann Arbor; B. S. Gaylord, Owosso; F. N. Pauli, Pontiac; W. H. Skeman, Wyandotte.

L. Plamondon, San Francisco, who conducted a jewelry store at Woodward ave. and Elizabeth St. many years ago, is in Detroit visiting his sister. He went west 23 years ago, and this is his first visit to his old home since.

Friday evening, Aug. 14, will be the big evening for the jewelers and opticians, as there will be a nesting of the Ku-Kus in St. Andrew's Hall, East Congress St. Local members of the order are preparing to make this lodge meeting a very interesting one, and a big class is expected to come in for initiation.

George G. Haller, Jr., Ann Arbor, Mich., writes THE CIRCULAR-WEEKLY that the item recently published, in regard to charges against him made by a surety and an insurance company, was absolutely incorrect; that the newspapers mixed up the affair, owing to the fact that there were counter suits against the insurance companies relative to their not paying certain losses, and that the statements in regard to charges against himself were wholly untrue. Mr. Heller states that the newspapers of the vicinity which published the story have made a retraction. Mr. Heller, who is now a special agent for an insurance company, was formerly a well-known jeweler and is the son of one of the most prominent jewelers of the State.

Detroit wholesalers and retailers all through the State are looking forward to the big week of the year, which will be from Aug. 10 to 15. The program has been announced now for the Buyers' Excursion week, and it is believed that the entertainment and other inducements will bring a record-breaking crowd of merchants, who will come at that time to look over goods and get acquainted with the wholesale houses. It has been estimated that 2,500 retail merchants will visit the city at that time. Tuesday, Aug. 11, there will be a river parade, a water fete in which all kinds of craft will take part, and a display of fireworks at Belle Isle. On Wednesday the merchants visiting will be shown about the city and given a chance to inspect the big passenger steamer *City of Cleveland*. Wednesday evening a lecture on industrial topics will be given by Prof. G. H. Maxwell, editor of the *Talisman*. Thursday evening the crowd will visit the pleasure parks, while Friday there will be an excursion by steamer.

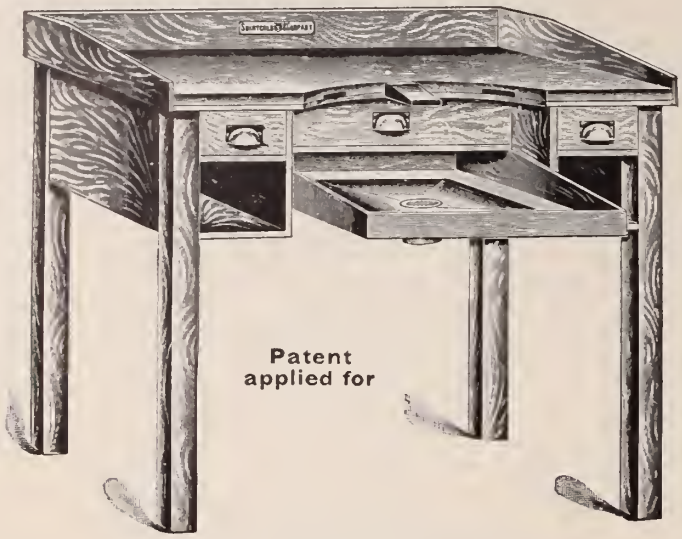
Omaha.

H. S. Knapp, with the Shook Mfg. Co., is home from a business trip.

A. H. Hastings, Arcadia, Nebr., was in the city purchasing stock last week.

C. Hansen, with Fred Brodegaard & Co., left last week for St. Paul, Minn., where he will spend a two weeks' vacation.

Miss Rosina Mandelberg, daughter of A. Mandelberg, is spending a few weeks in New York and Boston. She will return by the lake trip.



J. L. Borsheim, of Louis A. Borsheim, Sr. & Son, accompanied by his family, left last week for a stay of several weeks at Sulphur Springs, Ark.

A. H. Scott was in the city last week purchasing stock for a new store which he will open at Crofton, Nebr. This is just a new town on the Northwestern Railroad.

A. Mandelberg is at the office again, having been confined to his home on account of heat prostration. As soon as business permits he will leave for a month's stay in the mountains of Colorado.

While H. Copley and family were sojourning through Vancouver, B. C., last week, a telegram came to this city announcing the death of Mr. Copley's sister, Mrs. A. J. King, of Superior, Nebr. At that time Mr. Copley could not be located.

Frank Irving Fay, well known in the jewelry trade in Milford, Mass., died recently of neuralgia of the heart at Willimantic, Conn., aged 49 years. The deceased is survived by a widow and five children.

WORKSHOP NOTES

(Third Edition)

For Jewelers and Watchmakers.

A collection of the latest practical receipts on the manufacture and repairing of watches, clocks and jewelry.

Price, $2.50

300 pages (size 7½x10½ inches), bound in cloth, stiff covers. Should be on every workbench.

Published by
THE JEWELERS' CIRCULAR PUBLISHING CO.,
11 John St., Cor. Broadway, New York.

TRADE-MARKS

Manufacturers and Jobbers:

We now have in preparation a supplement to the second edition of *"Trade-Marks* of the *Jewelry and Kindred Trades,"* and in order that it may be as complete and accurate as to new marks as it is possible to make it, we request every manufacturer and jobber to send us a list of such marks as he may *now use,* or *has ever used,* together with such information (the kind and quality of goods upon which the marks are used, etc.,) as may be germane to the subject. Send cuts of marks if possible. If not, send clear, printed impressions or drawings.

The earliest attention is solicited, as it is of utmost importance to every manufacturer and jobber to have his mark recorded in this supplement.

The Jewelers' Circular Publishing Co., 11 John Street, New York

Los Angeles.

TRADE CONDITIONS.

The moderate improvement in business conditions noted heretofore in this correspondence continues. This improvement is no douht due to a considerable extent to the number of people who come here and to other points of southern California to spend the heated term. One of these visitors says that be saw an average of $60,000 a day drawn from the banks of Phoenix for three days, to he used for the purpose of coming to this coast. Equally large sums in proportion, he said, are flowing to Los Angeles from Prescott, Tucson, Bisbee and other territorial towns. Another man of high financial standing in Arizona estimates that within 90 days Arizonans will spend in and around Los Angeles the sum of $3,500,000 or more. They are liberal users of money and plan weeks ahead for their outing here. New Mexico also sends thousands of "good spenders" to Los Angeles and the exodus is now on. Many come also from Texas, Nevada and Utah, and it is estimated that Old Mexico will send fully 5,000 of her pleasure-seeking countrymen here to enjoy themselves during the heated term. While, of course, only a fraction of the money brought by these tourists is spent for jewelry, jewelers are being helped indirectly hy the large amount of money being thus put into circulation bere.

Ross Campbell has been engaged as superintendent in the manufacturing department of Brock & Feagans.

John M. Hartzberg, salesman for J. Wiesenberger, has gone to San Francisco for a short period of recreation.

A. C. Ingram, bookkeeper and salesman for S. Meyer & Co., has just returned from a pleasant outing spent at Follows Camp.

H. B. Crouch is exhibiting in his window four handsome cups supplied by him for prizes at the Kennel Club show in Venice, Cal.

Amos M. Buley, head diamond salesman with Brock & Feagans, for several years past, is no longer connected with that concern.

H. T. Brown, traveling for Gilmore & Lee, returned, last week, from a trip over the coast between this city and San Francisco.

Nearly all the machinery of the Pacific Gem Co. has been removed from the Spring St. store to the new location at 622 S. Broadway.

A. Fink, of the J. P. Trafton Co., is making a trip through Arizona, and C. C. Abel, of the same company, is touring the towns of Southern California.

C. T. Dunsmoor, of the H. J. Whitley Co., who has been confined to his home by illness, for some time, is again able to attend to business at the store.

Floyd R. James, of the J. P. Trafton Co., has recently bought a new home in South Pasadena and is spending his vacation putting things in shape there.

George Lenoir, a manufacturer of jewelry at Geneva, Switzerland, has been spending some time in Southern California. This is his first visit to America.

M. E. Josephs, traveling for J. Levinson, of this city, is making a tour of the towns of Central and Southern California, going as far north as San Luis Obispo.

Joseph Lawton, of the H. J. Whitley Co., has returned from his vacation trip to Fellows Camp in the San Gabriel Cañon, where he spent 10 days with his wife.

W. C. Libs, a salesman for Hambright & Walsh, wholesalers, has gone on a visit to his old home to Adrian, Mich. Before his return he will visit Buffalo, going by steamer on Lake Erie from Detroit.

George M. Williams, manager of the Geneva Watch & Optical Co., has engaged the services of Mr. Haliburton, recently of Fresno, as an additional watchmaker.

George M. Williams, proprietor of the Geneva Watch & Optical Co., and Paul G. Grim, of the J. P. Trafton Co., went hunting in the vicinity of Saugus, last week.

S. Meyer, of S. Meyer & Co., has taken a cottage at Ocean Park, where his family will reside during the rest of the summer. He will go and come daily by electric car.

C. M. Henkel, Bisbee, Ariz., was in this city a few days ago, after which he went to Catalina Island, where he will spend some time enjoying his favorite pastime, fishing.

Burr Freer, San Francisco, who has been ill in this city, has so far recovered as to be able to return home. Joe Brennan, his traveling salesman, remained several days after Mr. Freer's return.

Out-of-town jewelers in this city, recently, include: Joel Kloss, Corona; Frank De Arman, Ontario; J. E. Russell, Corona; J. L. Foote, Fullerton, and J. P. Rasmussen, with the Bartlett Co., Ventura.

George A. Brock, of Brock & Feagans, who intended to start for the east, early in July, has been detained at home by the sickness of his child. The child is improving, however, and Mr. Brock expects soon to make his trip to the east.

H. F. Wallace, wholesaler at 414½ S. Broadway, is taking an outing at Mt. Lowe and Wilson's Peak. W. A. Wheeler, who has returned from his vacation at Catalina Island and Long Beach, is taking Mr. Wallace's place during his absence.

Mr. Donnelly, traveling representative for Sproehnle & Co., Chicago, has written to the trade here that he will not be able to visit this city for several weeks. He was injured in an automobile accident, at Portland, Ore., where he expected to have to remain for at least four or five weeks.

E. E. Peck, president of the Los Angeles Gem Co., has gone to the company's turquoise mines in Arizona to engage and set to work an additional force of men. The heat in Arizona at present makes it difficult to secure workmen and the demand for turquoise at the factory here has been greater than the company has been able to supply.

Pacific Coast Notes

W. E. Tracy has removed his stock to the C. E. Whitney Co. store, at Coalinga, Cal.

H. A. King, Eureka, has given a trophy cup to be presented to the winner of the motor boat race to be held there shortly under the auspices of the Humboldt Motor Boat Club.

Henry Otterberg, a diamond importer of New York, P. Dosch, a watch manufacturer of Bridgeport, Conn., and Ralph E. York, a manufacturer of silverware of New York, are at present touring the southern part of the State of California.

That the wheels of justice move quickly at times in Sacramento was shown last week when George Walsh, the confessed diamond thief, was arrested one morning, and in the afternoon was tried and sentenced to three years in San Quentin. The robbery occurred at the store of S. Sturmer.

P. H. Goodwin, San Diego, has just received a patent on a gem holder, by means of which it will be possible for jewelers to display gems to the best advantage without the danger of dropping them. The new invention consists of a ring with prongs so arranged that a gem or diamond can be fixed in them and the ring slipped on the finger of the prospective purchaser.

San Francisco

W. A. Hodger, of the retail force of Shreve & Co., is away for a two weeks' visit to the mountains.

Martin Goldstein, who was robbed of jewels, valued at $800, July 7, has offered a reward of $200 for their return to him.

G. S. Pomeroy, one of Shreve & Co.'s skilled designers, has just returned from a two weeks' vacation to Los Gatos and Santa Cruz.

R. B. Stanley, formerly of Chicago, but now connected with the jewelry department of Shreve & Co., was married last week.

J. Christian, Santa Clara, and F. W. Petersen, Bakersfield, were in this city during the past week visiting the wholesale trade.

Henry M. Abrams is now an enthusiastic commuter. He is spending the Summer months across the Bay at Escale, in Marin County.

Mrs. Charlotte Friedman, wife of Ralph Friedman, San Francisco, is visiting in southern California, accompanied by her daughters, Evelyn and Fannie.

De Ferrari & Peters have decided that their old location on Montgomery Ave. is now superior to the present one on Van Ness Ave., and as soon as a store can be fitted up they will be located near their old home.

Mabel Genevieve Lundy, daughter of T. Lundy, was married last week to Eugene Harney. Mr. Lundy is well known on account of the notoriety he gained last Spring, when his store was robbed of approximately $50,000 worth of gems.

One of the most important events that has occurred in the jewelry business in San Francisco for many months was the recent removal of the firm of Hammersmith & Co. from the Van Ness Ave. district to a permanent location in what will shortly be the best shopping district in the now rapidly developing greater San Francisco. The building, which was designed especially for the use of this firm, consists of three stories and basement, all of which is occupied by Hammersmith & Co. The location is all that could be desired, being at the southwest corner of Sutter St. and Grant Ave. among houses of similar high character and at the juncture of the most heavily crowded street car line and the most exclusive shopping street in the downtown district. The building is unique architecturally and is as nearly fireproof as modern building methods can accomplish.

A. Green will continue the business of the dissolved partnership of Gorman & Green, Salisbury, N. C.

Indianapolis.

TRADE CONDITIONS.

Indiana retail jewelers, outside of this city, are having a very gratifying midsummer trade, now that the wheat crop is turning out so satisfactory. Very few jewelers were in this city last week, wholesalers attributing it to the fact that the jewelers were in the midst of their busy season.

J. W. Thompson, Danville, left last Thursday for Texas, where he has extensive business interests. He expects to be away for about three months.

C. S. Wallace, of the Baldwin-Miller Co., will leave this week for his annual vacation. He will spend most of the time in western Indiana and will visit Terre Haute.

Jewelers at Farmland are buying fresh water pearls in large quantities. Regular shipments of pearls are now being made by them to eastern markets. They range in value from $5 to $500, although not many of the larger variety have been found to date.

An additional room on the ninth floor of the State Life building has been leased by Hoffman & Lauer, dealers in jewelers' supplies. They will occupy it as soon as decorations can be made and new fixtures installed. The company contemplates handling a much larger stock.

J. H. Reed and his son Harry spent last week in Brown County, investigating the gold situation there, it having been reported that gold is being found in paying quantities. Mr. Reed, Sr., is negotiating for a tract of land where he will establish a summer home and do prospecting.

The local police have arrested William Rice, a negro, who is suspected of having stolen $2,500 worth of jewelry from various Indianapolis homes last week. All of the robberies occurred in day time and a servant girl has identified Rice as the man she saw in her employer's home. All local jewelers and pawn brokers have been given descriptions of the missing jewelry and are on the lookout for it.

Indianapolis is being overrun with venders of "phony" jewelry who attempt to give the impression that it is of first quality and has been obtained under questionable circumstances. Much of the jewelry is engraved with initials and dates to help the deception. Walter Smith, a negro, was arrested last week and found to have a lot of the jewelry in his possession, and after an investigation he was ordered to leave the city. Charles Workman and William Carpenter were also arrested and found equipped with a number of cheap rings and watches. They were held for peddling without a license. The police say they are determined to stamp out the "phony" jewelry business, and in this they are being given the support of jewelers.

J. P. Mullally, one of the best known retail jewelers in Indiana and president of the Indianapolis Retail Jewelers' Association, will be a candidate for the presidency of the National Association of Retail Jewelers at the convention to be held at Cincinnati, next month. The matter was first suggested to Mr. Mullally while he was attending the convention of a fraternal organization at Knoxville, Tenn., a few weeks ago. Upon returning to Indianapolis Mr. Mullally was urged by local jewelers to act favorably upon the suggestion and at a meeting last week the Indianapolis Retail Jewelers' Association gave him its indorsement. Since then he has received assurances of support from New York, Ohio and the south. Last winter Mr. Mullally suggested the organization of a local association of jewelers, but was told by wholesalers and manufacturers that Indianapolis jewelers were so far apart an organization would be hard to effect. With two others, however, Mr. Mullally began work and in two weeks about 30 out of 36 of the principal jewelers in the city were enrolled as members while the other six gave assurances of their support. A large delegation of local jewelers will go to Cincinnati to work for his election.

Cincinnati.

James Baker, of the Henkes-Baker Jewelry Co., Vincennes, Ind., was seen among the trade here last week.

John Owen, with M. A. Mead & Co., was here as the guest of his brother, William Owen, 425 Elm St., last week.

William Owen, Elm St., and his wife have started on a pleasure tour, which will include Pittsburg, Pa., and West Virginia.

Lee Loeb, of Herman & Loeb, has returned from an extended western trip and has left for a stay at Martinsville Springs, Ind.

Richard Welling, watchmaker for Herman A. Rohs, Cynthiana, Ky., stopped off here on his return from a two weeks' stay in Canada, last week.

C. C. Hyde, a new jeweler at Newcastle, Ind., was here last week buying new fixtures and stock, and while here was the guest of A. C. Tepfert, with A. & J. Plaut.

Edward Herschede, secretary and treasurer of the Frank Herschede Co., will sail from New York to-morrow (July 30) for Europe, where he will combine business and pleasure on his trip.

Out-of-town buyers who called here during the past week included: Frank Fullilove, Owenton, Ky.; Chase Hoffman and T. M. Jackson, of the Arcade Jewelry store, Springfield, O.; William Keller, Georgetown, Ky.

Clarence Prentice Tiller, recently sentenced to seven years' imprisonment for the robbery he committed at the Michie jewelry store 18 years ago, has been taken to the penitentiary at Columbus, O., where he will serve a part of his term while his attorney, Raymond Ratliff, is seeking to secure for him a new trial in the circuit court. The old indictment against him had been nolled, but when he was arrested here, after serving his last term in prison, the charge was revived and he was re-indicted, convicted and sentenced. His attorney secured a 30 days' stay of execution in order to take the case to the circuit court on error. The time will be up Aug. 2 and the circuit court will not have time to hear the case. Attorney Ratliff gave notice that he would apply for additional time, but a protest was immediately made by the assistant prosecuting attorney in behalf of the sheriff and jailer, who object to the responsibility of keeping Tiller in jail so long, he having a reputation as a jail breaker and the jail being known to every cracksman for its wornout condition makes escape easy. The circuit judges considered the report of these officials sufficient ground upon which to refuse another stay of execution and ordered that Tiller be sent to the penitentiary to serve out his sentence of seven years, unless, after the hearing of the error proceedings, it should be determined that he is entitled to a new trial.

Columbus, O.

C. E. Radebaugh, 579 N. High St., is able to be out again after two months' illness with typhoid fever.

George Charters, Xenia, and his son are both very ill with fever, according to reports brought from there by traveling salesmen.

Ralph N. Whitford, treasurer and manager of the Hofmann Jewelry Co., will return home this week after an outing in Michigan.

J. B. White, president of the White-Haines Optical Co., sailed, Thursday, for Bremen. From there he will go to Berlin, and make a tour of Germany, Holland and France, and probably of England. He is accompanied by J. B. Hanna. Mrs. White will sojourn in the Adirondacks while Mr. White is in Europe.

John M. Fisher, a prominent Attleboro (Mass.) manufacturing jeweler, who attended the Prohibition national convention here, subscribed $3,000 to the campaign fund, giving that sum to the national committee on condition that $1,000 of it be expended in New England. B. A. Sanborn, a Middleport (O.) jeweler, was also a delegate to the convention.

The D. C. Beggs Co., department store with a jewelry department, is in the hands of W. F. Burdell, banker, and Quinton R. Lane, attorney, as receivers, appointed by the Federal court with instructions to keep the store open and not to sacrifice any of the stock. The assets are estimated at $900,000 and the liabilities at $600,000. A receiver was also appointed for Mr. Beggs personally.

Toledo.

Mr. and Mrs. J. J. Freeman are spending a two weeks' vacation in Wisconsin.

M. D. Teal, of the firm of J. J. Freeman & Co., was called to his former home at Ligonier, Ind., through the death of his father, who died July 22. Mr. Teal will be absent some days.

Toledo jewelers, headed by J. George Kapp, are taking a lively interest in the Boosters' Club of the Chamber of Commerce, which was organized during the past week at a luncheon given at W. L. Milner & Co.'s. The purpose of the club is to invite trade to the city and to do so special excursions will be run on the various roads entering the city.

A. J. Heesen, 321 Adams St., is seriously ill at the Toledo hospital, where he was removed several days ago for an operation for gall stones. Mr. Heesen has been a sufferer from kidney trouble for some time. Late reports from his bedside are to the effect that he has slightly improved, although yet very seriously ill. During his absence his store will be under the management of Louis C. Minke.

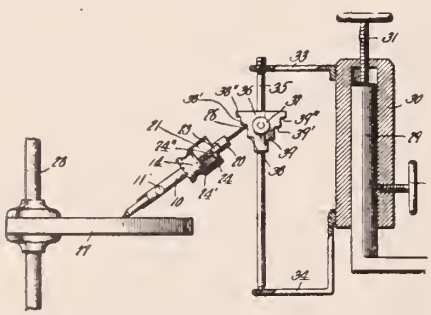
PATENT DEPARTMENT

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF JULY 21, 1908.

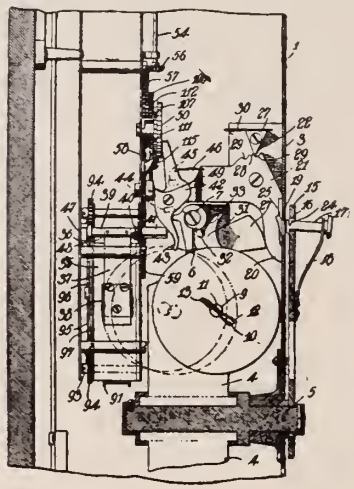
893,772. TIMEPIECE. Emanuel Aufiero, Brooklyn, N. Y. Filed June 6, 1907. Serial No. 377,554.



A timepiece of the character described, provided with a centrally disposed stationary dial having arranged thereon radially disposed lines representing the meridians of longitudes, which are divided midway between their ends to indicate east and west longitude, an outer annular stationary dial arranged concentrically to said inner dial and spaced therefrom, said outer dial

having arranged thereon divisions indicating minutes of longitude, an annular revolubly mounted minute dial arranged between said inner and outer stationary dials, and having indicated thereon radial divisions representing minutes of time, and an outer revolubly mounted dial arranged around said outer stationary dial, said outer movable dial having indicated thereon radial division lines representing hours of time.

893,920. GEM CUTTING AND POLISHING APPARATUS. William H. Griesch, Brooklyn, N. Y. Filed April 4, 1908. Serial No. 425,275.



In an apparatus of the character set forth, the combination of a cylindrical stick holder having an arm projecting laterally therefrom, said arm terminating in a finger extending substantially parallel to the said holder, a thimble having a central cylindrical bore to receive one end of said stick holder, one end of said thimble being provided with a plurality of parallel circular rows of

holes extending around its periphery, the holes in each row being equi-distant and the several rows having different numbers of holes, the other end of the thimble being provided with sets of notches for the reception of the said finger, one set for each row of holes aforesaid, the notches of each series being staggered with respect to the row of holes corresponding thereto, and a foot piece comprising a shank, a cup secured to the shank to receive the end of the thimble having the rows of holes, the cup having a series of holes registering with the aforesaid parallel rows of thimble holes, a spring pressed plunger extending through said shank and having its end turned at substantially a right angle to its main portion and lying adjacent to said cup, and a plurality of independently adjustable members mounted in said plunger end and adapted to co-operate with said row of holes and through the said cup holes.

894,173. WORKMAN'S TIME-RECORDER. Willard D. Doremus, Washington, D. C., assignor to Henry L. Bryan, trustee, Washington, D. C. Filed April 20, 1908. Serial No. 428,105.

A time recorder comprising a carrier adapted

to bear a plurality of separate record blanks, a time stamp and means for presenting the blanks individually to the stamp.

DESIGNS.

39,427. BADGE. Bernice M. Branson, Lincoln, Nebr. Filed May 26, 1908. Serial No.

435,182. Term of patent three and one-half years.

39,428. WATCH-FOB. Roland John Stokes, Curwensville, Pa. Filed May 26, 1908.

Serial No. 435,179. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

PUBLISHED JULY 21, 1908.

Ser. No. **34,028.** (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) Alfred Constantine, Birmingham, England. Filed April 11, 1908.

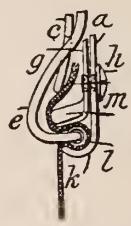
BRITISH PATENTS.



(Abridgments of Specifications, 1907, from *The Illustrated Official Journal.*)

ISSUE OF JULY 8, 1908.

6,748. CLIP FASTENINGS. J. L. Muller, Sannois, France. March 20. (Date applied for under Patents Act, 1901, March 21, 1906.)

Relates to fastenings for use with braces, dress suspenders, tie-clips, show clips, etc. The material to be held is gripped between a hook-shaped part *k* of the fixed member *a* and the extremities of two movable members, *e*, *g*, which are fulcrumed

FIG. 4.

in a lever *c* pivoted to the fixed part *a*. The part *m* of the member *g* is guided by a screw *h* in a slot in the part *a*, and serves, when the lever *c* is pressed home, to force a gripping-pad *l* on the end of the member *e* firmly into the hook *k*. In using the device, the member *e* is first caused to grip the material against the plate *a*, and then the lever *c* is pressed down so that the parts assume the positions shown in Fig. 4.

Canada Notes.

T. W. Jebb, Jr., Clarksburg, Ont., has sold out to A. B. Kee.

J. A. Hartley & Co., Grand Forks, B. C., recently sustained a fire loss.

C. E. Slater, Vermillion, Alberta, has assigned to H. V. Fieldhurst.

The Sovereign Jewelry Co., Toronto, Ont., has assigned to E. R. C. Clarkson.

Judgment has been entered against R. B. Spence & Son, Parrsboro, N. S., for $819.

The assets of D. Ostrosser, Englehart, Ont., insolvent, were sold on Wednesday, July 22.

M. Cochenthaler, Montreal, has issued a writ against Geo. D. McKay, Winnipeg, for $2,040.

A. Cook, Montreal, has sold the jewelry stock in his St. Catherine St. establishment to C. Bennett.

The death is announced of William Northgraves, Perth. A meeting of creditors has been called.

The Consul Optical Co., Montreal, has issued execution against Jacob and Israel Kaufman, Montreal, for $130.

The Sovereign Jewelry Mfg. Co., Toronto, has assigned to E. R. C. Clarkson. Meeting of creditors took place July 21.

Robert Strachan, Fort William, Ont., was burned out in an extensive fire on Monday, July 20, sustaining a loss of $10,000, partly covered by insurance.

Moses Astrofsky has been arrested on a charge of having broken into the premises of Alex. Horowitch, Montreal, and stolen a quantity of watches and jewelry.

For the third time in a few months the store of R. A. Girard, Montreal, has been entered by burglars. This time nearly $1,000 worth of jewelry, etc., was stolen.

Out-of-town jewelers visiting Toronto, Ont., last week included W. Howell, Windsor; John S. Beck, Brampton; W. Hollingshead, Woodbridge; W. G. Young, London; E. H. Flach, St. Thomas; L. A. Jeanneret, Elmira, and B. Harris, Hamilton, all Ontario, and O. B. Knight, Winnipeg, Man.

Death of Emil Haffa.

PHILADELPHIA, July 27.—Emil Haffa, one of the best-known diamond brokers of Philadelphia, died suddenly Sunday at the Philadelphia Hospital, where he had been removed by friends with whom he had been dining, when he was taken ill with uraemia. He died in the hospital in a convulsion shortly after being admitted. The news of his death came to-day as a shock to many friends and business acquaintances.

Mr. Haffa had been known to the Sansom St. trade and to wholesalers and retailers of this city and New York for many years. He was located in business at 7th and Sansom Sts. and prospered. For some years he had offices with the Jewelers' Exchange on S. 7th St. Deceased was 41 years old. Arrangements for the funeral have not yet been made.

A. E. Morro, Los Angeles, Cal., has closed a lease for the building at the corner of 4th St. and Broadway, and will spend $10,000 in remodeling and decorating the interior, to be occupied by his jewelry store.

A. H. Scott will shortly open a store at Crofton, Nebr.

Richard Helmer has engaged in the retail jewelry business in Auburn, Nebr.

Capt. Charles J. Swanson has opened a store at 119 East St., San Francisco, Cal.

John Hill has begun business at the corner of Buena Vista and Jackson Sts., Ione, Cal.

A retail jewelry establishment was opened about a week ago at East Providence, R. I., by F. H. Burdette.

H. W. Fields, formerly in business at Plymouth, Wis., will shortly open a new store at 1326 State St., Milwaukee, Wis.

A. E. Storey, a former student at the Kansas City Horological, and Optical School, has opened a jewelry store at Lockhart, Tex.

J. D. Scott, formerly manager of A. C. Stanners' jewelry store, West Toronto, Ont., is starting in business on his own account in East Toronto.

Philip Euler, formerly connected with J. Kahn & Co., at 234 Park Ave., Baltimore, Md., has engaged in business on his own account at 203 W. Saratoga St., in that city.

The American Optical Protective Association has been incorporated with a capital stock of $25,000 in New York. The members of the firm are Irving G. Fox, 350 Broadway, and others.

Expert Die Cutter and Engraver Arrested on Charge of Counterfeiting.

PROVIDENCE, July 27.—Mark T. Rounds, an expert die cutter and engraver who has been in the employ of the Pairpoint Corporation, New Bedford, Mass., was arrested at Rocky Point, a shore resort on Narragansett Bay, yesterday afternoon, charged with having in his possession with intent to pass certain counterfeit 10, 25 and 50 cent pieces. He was arraigned before United States Commissioner William P. Cross in this city late this afternoon, and his case continued one week for a hearing.

Rounds made no secret of the fact that he not only attempted to pass the coins, but that he also made them himself and that he had no confederate in the business. He says he made the plaster casts and then taking brittania scraps he would melt them and cast the coins. He has been making the 10-cent pieces for about two months and spreading them forecast at New Bedford, and his success prompted him to make the 25 and 50 cent pieces. He is held in $2,500.

Arthur Arnold, Cedar Springs, Mich., has admitted a partner into the business, making the firm style Arnold & Roberts.

C. M. Wallace, Huntington, W. Va., has been remodeling his store on Third Ave., putting in a new tiled flooring and adding new fixtures.

Will You Spend 2 Cents to Get a Sales Device that Cost Us $2.00 ?

We've got a package here in our office for you that costs us from 60c. to 85c. to express — a package containing the most novel device for building up your umbrella sales that has ever been utilized.

It enables us to show you many hundreds of handles, just as though you had the real articles to look at, and you can interest every customer who comes into your store with this same device.

We want to send you this device absolutely without a cent of cost to you, provided we are not already represented in your city.

The purpose of this novel idea, of course, is to interest you in the

Hull Detachable and Interchangeable Umbrella

the original and only perfect and practical detachable umbrella with detachable handle.

You incur no obligation; we only ask that if, after examining this device, you are not in any way interested, you will return it at our expense. Mail the coupon today, and the package will go forward immediately upon receipt.

Please send package mentioned in Jewelers' Circular-Weekly.

Practical Course in Adjusting

By THEO. GRIBI

Comprising

A review of the laws governing the motion of the balance and balance spring in watches and chronometers, and application of the principles deduced therefrom in the correction of variations of rate arising from want of isochronism, change of position and variation of temperature.

Elucidated and Demonstrated

By original experimental researches in the actual problem, never before published, showing the causes that are operative in the variation of rate, and leading to correct remedies. To which have been added chapters on

How to make a Balance Arbor with Modern Appliances; How to Clean a Watch Properly; and, the Lever Escapement — Some Current Defects in it and How to Remedy Them.

Published Price, $2.50.

SPECIAL REDUCED PRICE, $1.50,

Post Prepaid.

250 pages, including 18 diagram plates; Fine Paper; Large Type; Clear Illustrations; Systematically arranged; Solid Binding. :: :: ::

That "Piano Advertising Plan" from Iowa

Pulls prosperity out of a lean year of panic. It never had an equal among advertising and premium propositions for building up trade in the teeth of a gale of adversity. It doubles sales for merchants and puts on subscriptions for the newspaper publishers. And it's brand new to-day.

The smallest merchant can work it just as successfully as the largest. The puzzle of it is that it does not cost the merchant one dollar, but actually makes him big money.

Nobody ever fails at this money-making enterprise who uses my plan and my pianos, which are of uniformly excellent quality. I superintend the manufacture of them myself, so I know.

And let me tell you it would be suicidal for any merchant to give away a cheaply made, inferior piano to any customer if he wants to reap a permanent benefit from the enterprise.

Here is a plan by which the merchant and publisher alike can turn hard times into hard cash, increase their business amazingly — literally make two dollars grow where there was one before—and pocket no possible loss for their thrift.

Live Ones—Write me *Needy Ones—Wake Up* *I'll Show You How it's Done*

SALESMEN—Boys with Grit and "Go"—

IT'S YOUR CHANCE. I want a few Reliable Salesmen to Canvass the Retail Trade. Samples in coat pocket. Don't worry trying to revive dead lines. Get one with breath in it now. It's a boom year for you if you connect right. Get wise to the "Iowa Idea."

Now It's The Lord Elgin

The demand to-day is for thin watches.

The public have been waiting for a thin Elgin Watch—now it's here—the

LORD ELGIN

The Thinnest Watch Made in America with Enamel Dial

the thinnest watch made in America with enamel dial.

Like all Elgin Watches—it was not put on the market until worthy to carry with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory and timed in the case—the most accurate thin watch in America.

Four grades—7, 15, 17, and 17 Jewels adjusted. 18K and 14K solid gold cases, also 25 year filled cases.

Furnished with metal dials, plain or engraved, gilt or silver.

Prices furnished on application by your jobber, or write the Company for only authorized price list.

THE HOROLOGICAL REVIEW

The Scientific Adjustment of Watches

By Prof. E. James of the School of Horology and Mechanics at Geneva, Switzerland

(*Continued from issue of July* 15.)

PART II.

QUESTION:—What is the influence of the thickening of the different kinds of oil on the running of watches?

ANSWER:—The thickening of oil in watches produces an acceleration of short extent of vibrations of the balance.

QUESTION:—Is not the timekeeping of a watch modified by changes in the nature of the steel?

ANSWER:—In the course of time steel will

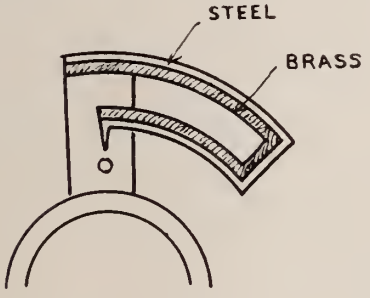

FIG. 17.

crystallize, its tenacity will diminish, its elasticity will increase, and these changes will cause an acceleration in the timekeeping of a watch.

QUESTION:—What is the effect of a blow on the escapement and the consequent effect on the timekeeping of a watch?

ANSWER:—A blow before the dead point of an escapement is reached will produce an acceleration in the short vibrations. A blow after the dead point in an escapement is passed will produce a retardation in the short vibrations.

QUESTION:—What is the effect of a want of poise in the balance?

ANSWER:—When the center of gravity is below the center of its pivotal bearing, and when the extent of the vibration of the balance does not exceed 360°, a gain of time will be the result. When the center of gravity is above the center of its pivotal bearings, a loss of time will be the result. When the extent of vibrations attains 440° the want of poise in the balance is scarcely appreciated in defective timekeeping, as this amplitude produces a sort of compensation, because the errors produced by the want of poise in a balance vibrating beyond 360° have an inverted effect.

QUESTION:—What are the variations in the timekeeping of a watch by a change of temperature affecting the balance spring?

ANSWER:—Very careful experiments have shown that a change in temperature of 1° C., when such change is an increase in heat, will cause a loss of time of 11 seconds in 24 hours, which loss is subdivided as follows: Two seconds for the expansion of the balance spring, and nine seconds for the loss of its elastic force.

TEMPERATURE ADJUSTMENTS.

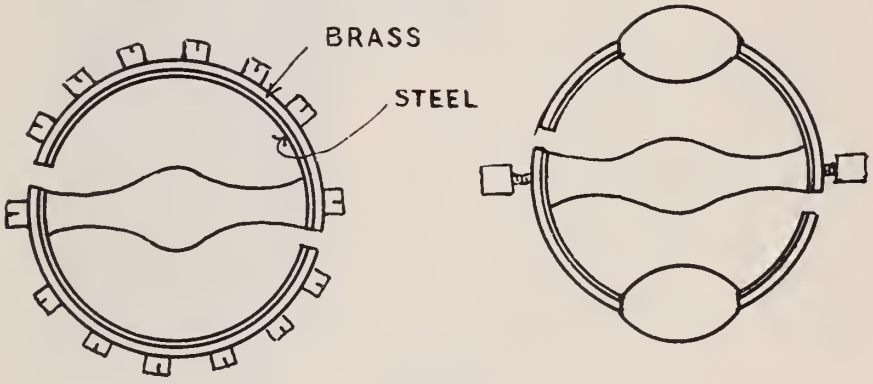
QUESTION:—What means are used for compensating the effects of the changes of temperature?

ANSWER:—Breguet has invented a regulator with a bimetallic blade, which, however, had an imperfection, inasmuch as it did not furnish means for adjustments and for rendering the correction of the balance spring progressively very irregular. (See Fig. 17.) The compensation balance was invented in 1754. This is constructed with two bimetallic laminæ, on which may be placed, as means of adjustment, either some screws or some sliding weights. Those bimetallic laminæ are composed of brass, steel or palladium. The brass is on the outside. (See Fig. 18.)

QUESTION:—How does the compensation balance operate?

ANSWER:—When the temperature rises the balance spring becomes longer and loses some of its elastic force, which causes the watch to lose time. The bimetallic laminæ of the balance bend toward the center, caused by the fact that the brass is on the outside, and that this metal expands more than the steel. The balance then becomes smaller; it moves quicker and causes a gain. It is a necessary condition that this gain should be equal to the loss caused by the change in the balance spring. When such is the case the temperature adjustment has been obtained.

QUESTION:—How can you determine that the gain caused by a change in the balance should be equal to the loss of time due to the balance spring?



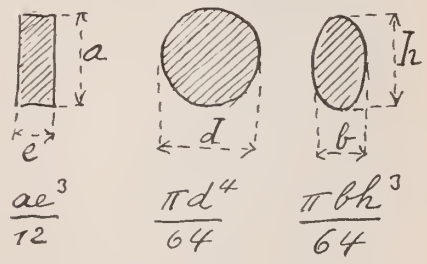


FIG. 18.

ANSWER:—By changing the location of the screws or the sliding weights of the laminæ. When the balance does not compensate sufficiently, or, in other words, if the watch loses in heat, the screws must be moved more to the free ends of the bimatellic laminæ.

QUESTION:—Can you obtain a perfect adjustment for all different temperatures?

ANSWER:—The adjustments, which may be obtained by a compensation balance, are

not perfect. If a watch is adjusted for +5° and +30°, it will gain between these two temperatures and it will lose below +5° and above +30°. This defect is called by

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

Absolute Security

Patented U. S. June 9, 1908.
Patents Pending in Foreign Countries.

UTILITY

It can be raised so as to read the time, and reversed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

Will not pull or wear off

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

Watch worn as Chatelaine, showing it lifted to read the time.

Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pinned to garment as additional security.

Dent an anomaly. It can be represented upon the axis of co-ordinates. (See Fig. 19.)

First Operation—The curve shown, which the watch had first described:

Sec.					
— 3.5	at	the	temperature	of	+ 2°
0	"	"	"	"	+ 7°.5
+ 3.7	"	"	"	"	+ 18°
0	"	"	"	"	+ 28°.2
— 4	"	"	"	"	+ 35°

After a correction it shows:

Sec.					
— 2.5	at	the	temperature	of	0°
0	"	"	"	"	+ 7°.5
+ 1.4	"	"	"	"	+ 19°
0	"	"	"	"	+ 30°
— 1.5	"	"	"	"	+ 35°

QUESTION:—Which are the advantages for an adjuster to represent the rates in

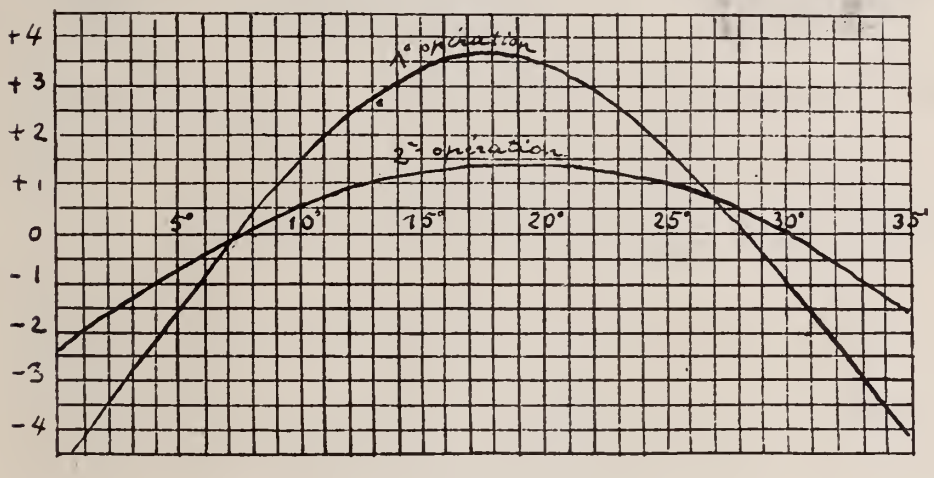

FIG. 19.
(Table showing rate of watch in different temperatures.)

different temperatures upon the axis of the co-ordinates?

ANSWER:—The adjuster can more easily keep an account of the effects of corrections made in order to reach temperature adjustments. The representation of rates upon the axis of co-ordinates has this advantage, namely, that the rate of the watch is lost when only kept by the sight, while in keeping an account in cyphers you have an exact memorandum.

QUESTION—By what means can you remember the changes made in the balances?

ANSWER:—To register the shifting of the screws you make figures in which the screws are represented by crosses. (See Fig. 20.)

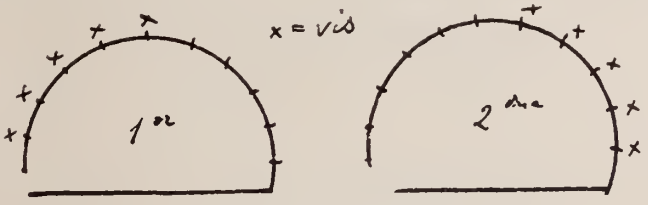

FIG. 20.

COURSE OF PROCEDURE FOR THE ADJUSTMENT OF A WATCH.

QUESTION:—How should an adjuster proceed in adjusting a watch?

ANSWER:—He must determine (1) if the mainspring barrel is free and has not too much side and end shake; if the inside and the cover of the barrel are nicely finished; if the mainspring is not too wide or binding in the barrel; if the stopwork does not catch and acts without impediment, and if the side of the barrel is upright and the winding arbor is parallel to it and both are square and upright with the inside of the barrel. (2) If the center wheel is in an upright position, and if it is free and does not bind in its bearings. (3) If the pivots are well polished and perfectly round according to a test invented by Thury. (4) If the jewel holes are of proper thickness, olive shaped, well polished and securely set. (5) If all the depths are correct; if the diameters of the wheel and pinions are in the proper proportions; if the shape of the teeth of the wheels are as they should be. Ingold cutters are very useful for any modification, if such should be needed. (6) If all the end shakes of the train, etc., are correct. (7) If all the details and functions of the escapement are strictly correct. (8) If there is any possible way to reduce friction in any part. The ends of the balance pivots must be rounded and the end stones must be perfectly level and flat. (9) Whatever small defects be found must be noted and corrected. (10) Adjuster must true up the balance in every direction, and he must put it in poise. It is only when he is perfectly sure that all the functions of the watch are as they should be that he can proceed with the final adjustments, because even defects of construction will produce variations and cause errors.

QUESTION:—How close must a watch run to stand a final adjustment?

ANSWER:—(1) A watch must be timed, that it may lose about 30 seconds in 24 hours. (2) Begin with the temperature adjustment. (3) The next point to be examined is the isochronism. For this purpose you must keep the watch going for two hours with the mainspring wound very little. To do this you may remove the stopwork. After making a note of the variation during this time you must set the watch going again for two hours with the mainspring entirely wound. You must again make a note of the variation. If the balance spring is isochronous, the difference between the two tests will be nil. (4) Next you will have to undertake the adjustments for positions. For this purpose you have to run the watch successively for 24 hours in the following positions. Pendant up, pendant to the right, pendant to the left, dial up, and dial down. (5) You will have to finish the work with the final temperature adjustments.

QUESTION:—What precaution should be taken when the watch is removed from the ice box?

ANSWER:—You must be careful never to let the watch pass hastily from the heating apparatus to the ice box, and vice versa. You must guard against the deposition of moisture upon removing the watch from the ice box, and you must not open the watch before it has again acquired its normal temperature.

CALCULATION ACCORDING TO WHICH A BALANCE MAY BE FITTED WITH ITS PROPER SPIRAL.

QUESTION:—What is the formula according to which the oscillations of the balance are to be controlled by its spiral?

ANSWER:—This formula, discovered by Mr. Phillips, a mining engineer, is the following:

$$T = \pi \sqrt{\frac{A\,L}{m}}$$

in which T = the duration of one vibration; π = 3.1416; A = the moment of inertia of the balance; L = the length of the balance spring; m = the moment of elasticity of the spiral.

QUESTION:—What is the moment of inertia of a balance?

ANSWER:—That is the mass of the balance multiplied by the square of the axis of gyration. For example, $A = M R^2$.

QUESTION:—What is the axis of gyration?

ANSWER:—That is an axis (semi-diameter) of such kind that if all the component parts of a balance were concentrated in a mass at the extremity of such an axis, the continuation would represent the material balance. There is, between the axis of gyration and the balance, the same analogy as there is between a simple pendulum and a compound pendulum.

QUESTION:—How can you demonstrate the formula of the moment of inertia?

ANSWER:—In the formula of the active force $t = \frac{m v^2}{2}$ (1), t = the action, m the mass, v the linear velocity. It is known that the angular velocity is the velocity at the extremity of an axis, or $w = \frac{V}{R}$, hence $V = W R$. If we replace V by its value in the formula (1) we have:

$$t = \frac{m w^2 R^2}{2}.$$

Every molecule which is part of a balance represents a mass m m_1 m_2 m_3, etc., and is found at a distance r r_1 r_2 r_3, etc., from the center of rotation. We have, therefore:
$\frac{1}{2}$ m w^2r^2 + $\frac{1}{2}$ m, wr_1^2 + $\frac{1}{2}$ wr_2 $w{\cdot}r_2^2$ + $\frac{1}{2}$ m_3 w r_3^2 + ...

Setting in evidence $\frac{1}{2}$ w^2 we obtain $\frac{1}{2}$ w^2 ($m r^2 + m_1r_1^2 + m_2r_2^2$ and $m_3 r_3^2$ + ...). It is this quantity in the parenthesis which

68 Nassau Street, NEW YORK GENEVA, SWITZERLAND

is called the moment of inertia. For example:

$$\Sigma\, m\, r^2 = M\, R^2$$

QUESTION:—What is the moment of elasticity?

ANSWER:—The formula which gives the moment of elasticity for a rectangular section is the following:

$$m = \frac{E\, a\, e^3}{12}$$

in which E = the coefficient of elasticity, a = the width of the blade of the spiral, e = the thickness of the blade of the spiral.

QUESTION:—What is the coefficient of elasticity?

ANSWER:—That is the material which would be required for a hypothesis to lengthen a metal wire an equal quantity of its proper length. It can also be described to be the material which is required to lengthen to size a piece of wire of the length of Fig. 1.

For steel the coefficient of elasticity is 20,000 kilos; for brass, 6,500 kilos; for copper, 11,000 kilos; for brass wire, 10,000 kilos; for copper wire, 13,000 kilos.

QUESTION:—What does $\frac{a\, e^3}{12}$ represent?

ANSWER:—That is the moment of rectangular section.

The following are different moments of inertia:

QUESTION:—What will be the formula of Phillips when A and m are replaced by their respective values?

ANSWER:—This formula becomes:

$$T = \pi \frac{\sqrt{M\, R^2\, L \times 12}}{E\, a e^3}$$

QUESTION:—How can this formula be interpreted?

ANSWER:—This formula shows (1) that the time of one vibration is proportional to the axis of the balance; that is to say, that a balance having a diameter twice as large as another will consume twice as much time to perform one vibration.

(2) The time of one vibration is proportional to the square root of the weight of the balance; consequently, to double the time of one vibration it is necessary to have a balance four times as heavy.

(3) The time of a vibration is proportional to the square root of the length of the spiral. Therefore in order to double the time of vibrations it would be necessary to have a spiral four times as long.

(4) The time consumed in a single vibration is inversely in proportion to the square root of the value of g, but as this time consumed is also proportional to the square root of the weight of the balance, and as the relation between $\frac{P}{g}$ is constant, it is conclusive evidence that the watch is not subject to variations with breadth or height.

(5) The time needed for one oscillation is inversely in proportion to the square root of the cube of the thickness of the blade; hence to double the time needed for the vibrations it would need a blade the thickness of which should be the 0.63 of the first,

because $\frac{1}{2} = \frac{\sqrt{x^3}}{\sqrt{1^3}}$ or, $x = \sqrt[3]{\frac{1}{4}} = 0.63$.

(6) The time needed for one oscillation is inversely proportional to the square root of the width of the blade; hence for doubling the time of the oscillations it would require a spiral four times narrower.

This reasoning shows us that in discussing the axis of the balance we have more control over the time of the oscillations. This explains, too, how delicate is the operation of regulating screws. These screws must turn friction tight in order to prevent their shifting during the going of the watch. (See Fig. 21.)

QUESTION:—How can you render a practical account of the variations produced by the modifications effected in the weights and the axis of the balance, the length, the width and the thickness of the spiral?

ANSWER:—By studying the following

PROBLEMS.

QUESTION:—A watch gains three minutes in 24 hours. Its balance has a semi-diameter of eight millimeters. What modification must be made in this axis, so that the watch may be regulated in this axis, that the

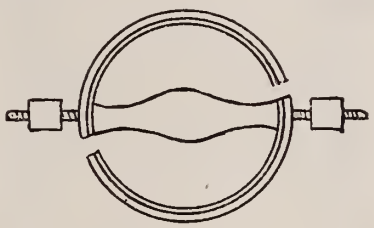

FIG. 21.

watch may be brought to time without modifying the weight of the balance and the dimensions of the spiral? The watch beats 18,000 vibrations.

ANSWER:—Vibrations numbering 18,000 per hour make 432,000 vibrations in 24 hours, or 86,400 seconds. Since the watch gains three minutes in 24 hours, the minute hand is found at noon, $3 \times 60 = 180$, in advance of a well-regulated watch. It has, therefore, accomplished 43,200 vibrations in 86,400 — 180 seconds, which amount to 86,220 seconds. The time used for one vibration is therefore

$$\frac{86{,}220}{432{,}000} = 0.1996 \text{ seconds.}$$

If this watch had not been well regulated the time consumed for one vibration would be 0.2 seconds.

The formula to be applied will be

$$\frac{T}{T_1} = \frac{R}{R_1}$$

$$\frac{0.2}{0.1996} = \frac{x}{8}, \text{ hence } x = \frac{1.6}{0.1996} = 8.016.$$

It suffices, therefore, to enlarge the axis of the balance 0.016 millimeter, which will be 16 milliemes of a millimeter.

QUESTION:—A watch gains three minutes in 24 hours when its balance weighs 0.62 grams. What modifications must be made in this weight that the watch may be regulated without modifying the axis of the balance nor the dimensions of the spiral? The watch beats 18,000 vibrations per hour.

ANSWER:—The following formula is to be applied:

$$\frac{T}{T_1} = \frac{\sqrt{P}}{\sqrt{P_1}}$$

$$\frac{0.2}{0.1996} = \frac{\sqrt{x}}{\sqrt{0.62}} \text{ from which}$$

$$x = \frac{(0.2)^2 \times 0.62}{(0.1996)^2}; \text{ hence } x = 0.6226 \text{ grams.}$$

The balance should weigh 0.6226, which is 2.6 milligrams more.

QUESTION:—A watch gains three minutes in 24 hours; its spiral is 415 millimeters long. What modification must be made in this length, that the watch may be regulated without modifying the other dimensions of the spiral or of the balance?

ANSWER:—The following formula must be applied:

$$\frac{T}{T_1} = \frac{\sqrt{L}}{\sqrt{L_1}}$$

$$\frac{0.2}{0.1996} = \frac{\sqrt{x}}{\sqrt{415}} \text{ from which follows}$$

$$x = \frac{(0.2)^2 \times 415}{(0.1996)^2}\ x = 416.7$$

The spiral must be lengthened 1.7 millimeters.

QUESTION:—A watch gains three minutes in 24 hours. The width of the blade of its spiral is 0.22. What modification must be made in this width, that the watch might be regulated without modifying the other dimensions of either the spiral or of the balance?

ANSWER:—The following formula has to be applied:

$$\frac{T}{T_1} = \frac{\sqrt{a_1}}{\sqrt{a}};\ \frac{0.2}{0.1996} = \frac{\sqrt{0.22}}{\sqrt{x}}$$

$$\text{therefore } x = \frac{(0.1996)^2 \times 0.22}{(0.2)^2} = 0.2191$$

$$0.22 - 0.2191 = 0.0009 \text{ mm.}$$

The width of the blade of the spiral has to be diminished by 9/10000 of a millimeter.

QUESTION:—A watch gains three minutes in 24 hours. The thickness of the blade of the spiral is 0.06 millimeter. What modification will have to be made in this thickness, that the watch may be regulated without modifying the other dimensions?

ANSWER:—The following formula will have to be applied:

$$\frac{T}{T_1} = \frac{\sqrt{e_1^3}}{\sqrt{e^3}};$$

$$\frac{0.2}{0.1996} = \frac{\sqrt{(0.06)^3}}{\sqrt{x^3}} \text{ or}$$

$$x = \frac{\sqrt{(0.1996)^2 \times (0.06)^3}}{(0.2)^2}\ x = 0.05901.$$

It will be sufficient to diminish the thickness of the blade 1/1000 of a millimeter.

To regulate a watch which gains three minutes in 24 hours it is necessary (1) to augment the axis of the balance 16/1000 of a millimeter; (2) to augment the weight of balance 2.6 milligrams; (3) to augment the length of the spiral 1.7 millimeters; (4) diminish the width of the blade of the spiral 10/1000 of a millimeter; (5) diminish the thickness of the blade of the spiral 1/1000 of a millimeter.

[THE END.]

E. L. Hilkins, Waterford, N. Y., and H. C. Haverlin, Glens Falls, N. Y., have formed a partnership and opened a new store in Mechanicsville, N. Y. The store will be located on Park Ave., one of the main thoroughfares in that town. Mr. Hillkins already has a store in Waterford, which he will continue. The store in Mechanicsville will be in charge of Mr. Havelin.

THE

Ægis Case

(PATENTED)

THE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

An Old Hall Clock Which Once Ticked Off the Hours for Nathaniel Hawthorne.

THE tall, graceful hall clock illustrated herewith is 110 years old, and is at present owned by N. T. Worthley, Jr., Portland, Me. This quaint, old timepiece is particularly interesting owing to the fact that it once ticked off the hours for that pleasing American writer, Nathaniel Hawthorne, having once occupied a conspicuous place in the home of Richard Manning, at Raymond, Me., where Hawthorne spent his

STATELY OLD HALL CLOCK OVER 100 YEARS OLD.

boyhood days. Mr. Manning, who was an uncle of the well-known writer, originally lived at Salem, Mass., from which place he moved to Raymond.

The clock was made by Simon Willard, whose business circular advertising a large variety of clocks is pasted on the inside of the door of the case, which is of mahogany. The clock has a calendar dial, above which is an oil painting representing a shepherdess carefully guarding her flock. The pilasters on the case are ornamented with brass trimmings. The same metal is used to embellish other parts of the gracefully designed case.

The use of brass on the pilasters aids considerably in determining the age of the clock. Notwithstanding its age, the old timepiece still indicates the time quite accurately.

Mr. Worthley, who is now a well-known optician in Portland, in his younger days, devoted considerable time to horology.

Serious Depression in the Case-Making Branch of the Swiss Watch Industry.

OUR Consul, R. E. Mansfield, writes from Lucerne that, although Switzerland has not yet been seriously affected by the general business depression that has made itself felt throughout Europe since the beginning of the present year, some branches of industry in the confederation are now beginning to complain of the lack of export orders and a serious decrease in trade. In stating that this is especially true in the manufacture of watch cases, he says:

"Watch cases constitute an important branch of Swiss industry. It is claimed by some manufacturers that the present falling off in the watch trade is due to the law of compensation in commerce, which shows that a period of unusual prosperity in business, such as has been experienced in recent years, is invariably followed by a depression, and not infrequently by strikes and a general crisis.

"But the great decrease in the production of watch cases in Switzerland for the first four months of 1908, as compared with the corresponding period in 1907, would indicate that there are special, rather than general, reasons for the present depressed condition in that particular branch of industry. The figures in the following table show the number of watch cases in silver and gold produced in Switzerland during the four-month periods mentioned:

Month.	1907. *Pieces.*	1908. *Pieces.*	*Per cent. decrease.*
January	327,622	221,050	32.5
February	329,162	244,562	25.7
March	345,675	220,677	36.2
April	335,367	211,634	37.0
Total	1,337,826	897,923	32.9

"These figures show a decrease in production of nearly a half million cases for the first four months of the year. It is estimated that there was a like decrease in the number of steel and other metal watch cases other than gold and silver, as the last named are the only kinds registered and stamped, and consequently the only classes concerning which the Government keeps a record.

"So serious is the depression becoming in some of the Cantons where the watchmaking industry is large that a general crisis and threatened strikes are imminent. In some instances the Cantonal governments have lent assistance to the local industries in order to give employment to the people in the factories.

"A general industrial depression in Switzerland produces a more serious situation than a similar condition does in some other countries. A large per cent. of the territory comprising the Confederation is mountainous, which, together with a sterility of soil, renders much of the country non-productive. Because of these naturally unfavorable conditions, the Swiss people have directed their energies to industrial pursuits, which furnish the basis for the general commercial stability of the country.

"The watchmakers' trade, or guild, is one of the oldest in the Confederation, and Swiss watches have a world-wide reputation. They represent various styles and grades, the enameled cases being especially popular for export trade. In looking for specific causes for the present crisis in the watch industry, the fact that other countries, including the United States, have made wonderful progress in recent years in the production of watches by modern methods must be taken into account. In Switzerland portions of certain classes of watches are made by hand, and it is a well-demonstrated fact that hand labor, no matter how cheap and proficient, can not compete with modern machinery in the world's markets.

"The crisis in the watch industry in Switzerland does not, however, affect seriously the trade of the Confederation with the United States. The total value of watches and clocks exported from Switzerland in 1906 was $29,000,000, of which only $175,000, or a little over six per cent., is credited to the United States. The total imports of watches and clocks into Switzerland for the corresponding period amounted to $862,500, of which practically none is credited to the United States."

The Cook's Clock.

"I GOT down to the office half an hour ahead of time yesterday morning," said Mr. Billtops, "and then I remembered that I had let my watch run down the night before and had set it in the morning by the kitchen clock, which evidently was half an hour fast.

"And I didn't understand about that, because Mrs. Billtops looks after all the clocks in our house, and she is such a precise woman that I didn't see how any of them could be wrong. But when I came to tell her of my experience, of how I had set my watch by the kitchen clock and found it half an hour fast——

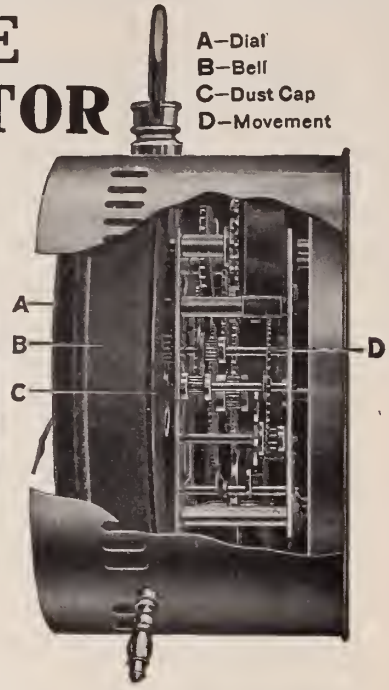
"'Why, that's the cook's clock,' she said.

"'Well, what of that?" I asked her. 'Is that any reason why it should be half an hour fast?'

"'Why, Ezra,' said Mrs. Billtops, 'didn't you know that all cooks keep their clocks half an hour fast?'

"And I was obliged to confess that that was something new to me."

A resident of Altoona, Pa., has at his home an old clock that bears the date 1771. It was manufactured by Peter Geist, of Kutztown, Pa., and is quite a mechanical curiosity. It is over eight feet tall, and its dial indicates the time of the day, the phases of the moon and the signs of the zodiac.



Price & Strickland Bros., Enterprise, Ala., have dissolved. E. N. Price will continue alone.

F. L. Miller, New Vienna, O., is now at Wilmington, O., where he has succeeded to the business of Elliott F. Marble & Bro., of that place.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Business Building in the Dull Days of August

Written expressly for The Jewelers' Circular-Weekly by Frank Farrington

AUGUST days are very generally considered dull days for the average retail jeweler. Any plan that will help increase receipts during this period is sure of a welcome from the man whose expenses keep up even when the receipts go down.

The bulk of the business during this month is of an unimportant sort. There is no general demand for gifts, and the call for seasonable goods is at its lowest since this particular season has no gift compelling holidays.

Every jeweler in a town which has Summer guests, whether it be a regular Summer resort or simply a favorite resort of old inhabitants as visitors, has a chance to develop a good souvenir business.

There is a great increase in transient population during the Summer, and in the warm weather this population as well as the resident population is out of doors much, especially evenings, and looking for amusement, is easily interested in almost anything.

In this connection the writer, though a believer in the advantages of early closing, suggests that a store can do no business when it is closed, and the man who is really anxious for the Summer trade ought to make a specialty of lighting his place brilliantly and keeping it open late on the pleasant Summer evenings, when more people will pass and look at his windows in one hour than will see them in a whole evening in January.

Window displays of souvenir goods, popular-priced novelties and Summer goods, will bring customers in just as long as you keep open in August, while nine out of 10 of those same sales would be lost forever if the prospective customer had to wait till the next day to buy.

The August days at the resort towns find people thinking of a return to the city, and then they are most susceptible to the allurements of any class of goods desirable to take home as souvenirs for friends or for mementos of the visit.

There are two classes of these souvenir goods. One class is the cheap, five-and-ten-cent kind that are made to sell. They are cheap in quality and cheap in price and they sell mainly to cheap people. The customers who want these goods are not the kind who will buy better ones. If the town you live in caters to this class of Summer people and gets them, you probably have to sell their kind of goods, though in any town there is more demand for good goods than most people realize.

The best souvenir trade, though, is the trade in actual souvenirs; goods that are really distinctive and representative of the place from which they come. The five-and-ten-cent novelties are the same for all sorts of places. If the place is away from the seashore the goods are birch bark and Indian novelties. If it is a shore resort there may be shell and other things besides, but any one of those articles might have come from any one of a thousand places. At the best they have nothing more to identify them than a name inscribed on them. They represent nothing.

A better class of trade wants a class of goods that mean something. For these goods the photographic art lends itself best, and many are the varieties of glass and china ware that can be decorated with actual pictures of local scenes. Handsome leather goods can also be made thus representative, and if possible some local peculiarity should be utilized in the souvenir line.

Perhaps a local manufacturing enterprise enables a dealer to sell something in silk, leather, china, glass, wood or stone that is actually made in that town. That is the idea intended by suggesting articles that are really representative of the place where they are sold.

The sale of these souvenir goods is pushed best by window and other displays. The transient population seldom gets a chance to read the advertisements of the local newspapers and always gets a chance to see store windows.

There should be plain and conspicuous signs of "Souvenirs" outside of the store that has those goods for sale, and the dignity of a severely plain and rich outside front cannot be upheld too rigorously in August without losing a valuable chance to advertise by signs.

The obtaining of lists of names from hotel and boarding house keepers facilitates the mailing of advertising matter to transients and attracts trade of this sort. The newspapers also provide valuable lists of visitors.

The jeweler who handles photographic goods needs to use such advertising, since newcomers in town in Summer are often camera users and are open to suggestions from the dealer as to where they can buy camera supplies to the best advantage.

Actual photographs, handsomely framed, make good souvenirs, and these can be made as expensive as desired, miniatures being very attractive in this line.

Silverware souvenir goods are always salable, and in getting such stock made up the dealer is wise who takes pains to have really artistic patterns designed at the outset. Good stock of this kind, besides affording better profits stamp the store as a high-class establishment and attract better trade than clap-trap souvenir trash.

It is the way of the big stores to stimulate trade in the normally dull seasons by sharp price reductions and special sales. There is no reason why the jeweler should not also use these methods.

Such plans will work best if carried out along the line of staple goods, and though a special sale on spoons or any staple table silverware may have a tendency to spoil a few fat profit sales later in the Fall, a bird in the hand is worth two in the bush, and all the goods you sell in August will positively not be sold by any of your competitors in October. The time to sell goods is when you can sell them. The future can be safely discounted to a certain extent so long as there is always plenty more future to work on.

The persons who are ready to buy now, if they can save money by doing it, constitute a large class and purchase large quantities of goods well in advance of the time they need them.

If a department store can make a success of a white goods, Summer wearing apparel, sale in February (and they all do), or of a woolen blanket sale in August, Mr. Jeweler can make a success of a table silverware sale in August.

This is not saying that every dealer should do it, for the man who goes after the souvenir business the right way, where there is plenty of it to be had, will have no time to handle such a sale. There are many towns, however, where there is no special Summer business. These towns offer only standard opportunities, and of them the dealer there must take advantage.

The jeweler has not yet received his Fall goods in August. He has not often bought them and rarely has he been to the city to stock up.

Storekeeping Department.

There is little in his stock that he would not willingly sell below its regular price, and as a season for clearance it is unequaled. It is always satisfactory to clean house before buying Fall goods. On this account special staple or novelty sales in August should be desirable and, if properly conducted, should pay.

The dealer who can keep his store cool and pleasant in August has gone a long step toward getting people to come in. If his store is attractive in that respect he ought, by means of window signs, to call attention to the fact.

The sale of novelties as prizes for progressive euchre and other parties reaches considerable importance in towns where Summer sojourners are numerous. In this line cut glass is very salable and silverware articles of new design and attractive pattern. A great variety of prices is necessary to suit all kinds of prize parties, but such goods are profit-makers and have a steady sale.

One branch of the jewelers' trade that has no reason to be stagnant in August is the repair department. Just as many watches go wrong at one time of the year as at another, and the fact that more people are traveling offers a reason why more people ought to want their watches to keep correct time.

If there is no other line that the dealer wants to push in August, let him give up his advertising for the entire month to repairs. He will find that that amount of attention to this important line will do him a great deal of good, not only during that month, but also afterwards, when people will remember that his is the repair shop for irregular timepieces.

Along this line a little class advertising will be profitable in the Summer to automobile owners, who very commonly carry small clocks or watches on their cars. The sale and care of these timepieces is worth going after, and as not much attention is given it in that way, one dealer in a town may easily become the headquarters for such.

In August, as in any other month, there is business to be had if the jeweler looks the situation over carefully and bears on hard along the lines of least resistance. People are spending their money in August, and it is up to the jeweler to make them spend part of it with him.

How He Does It.

JEHOSOPHAT—True as the sun shines on the desert, Methalla, I lose five piasters on every ring I sell to you.

Methalla—Like a Persian imbecile you speak, Jehosophat. How could such a bargain come to pass?

Jehosophat—It's easy. I can do it, you see, because I sell so many of them.

The store of Elias Williams at West Nanticoke, Pa., was destroyed by fire recently. The loss was about $3,600, with $1,300 insurance. Mr. Williams had been in business there but a short time. He will rebuild.

An Attractive Window Display.

A VERY interesting and attractive display was made in the show window of the jewelry store of F. W. Hinrichs, Kalamazoo, Mich., June 3 and 4, during the State convention of the Michigan Elks. An illustration of the window appears herewith. The objects shown in the window were all trimmed with white and purple bunting ribbon, to the effect of which small electric lights added greatly, especially at night, when the window was illuminated.

The decorations at the side of the window were purple and white draping. On each appeared an American flag and a set of antlers and a bronze elk's crest. In the center of the window appeared a fawn between two palms, and in front a large mirror, on which were shown elk's buttons, charms and pins on purple ribbons, and also some elk souvenir spoons and a few watches upon a white silk ribbon. Mr. Hinrichs' display was the subject of favorable comment and many expressions of approval.

AN "ELK" DISPLAY BY F. W. HINRICHS, KALAMAZOO, MICH.

Business Paragraphs.

THE man who is so wise that he never laughs is the greatest fool of all.

There's nothing more contagious than anger—unless it is good nature.

Give your customers a "square deal"—and you'll give yourself one, too.

Try to sell your own goods to yourself once in a while, and then take notes.

The business genius is the one who knows to-day what people will do to-morrow.—*Ex.*

H. T. McClelland, who was recently arrested in Spokane, Wash., has confessed to the burglary of Ackenhansen & Co.'s jewelry store in North Yakima, Wash.

Edward Koenig, a jeweler of Green Bay, Wis., surprised his friends by returning from Chicago recently, accompanied by a bride, who was formerly Miss M. S. Schmidt, of Chicago.

How To Keep Cool.

A NOVEL method of cooling a store during the "sweltering season" was recently described in the *General Merchants' Review:*

"A substantial barrel is placed on top of a water-tight box of sufficient capacity to accommodate the drip from the melting ice, and three or four hundred pounds of ice are placed inside of the barrel. The latter is provided with a couple of auger holes in the bottom, to permit the escape of water, and a small opening measuring about eight inches square is cut in the side of the barrel, just high enough from the bottom to come directly opposite the blades of an ordinary 12-inch electric fan, supported on a shelf across the box.

"When in operation, the fan draws a current of air down through the open top of the barrel and out through the square opening. The fan blows this chilled air through the store and maintains a constant circulation. The barrel is filled with ice once a day, and the result secured is satisfactory, the temperature of the store being from 20 to 40 degrees lower than that of the outside air.

"The only expense of this system of cooling is for the ice required, and an additional cost of one cent an hour to operate the fan. Economy may be observed according to weather conditions, by regulating the speed with which the fan is operated.

D. J. Fream, Appleton, has taken a position with A. M. Harper, the jeweler, Renville, Minn.

Samuel C. Park, of the Boyd Park Jewelry Co., Salt Lake City, Utah, has perfected a contrivance for use in the selling of diamonds which will prevent thefts such as that which took place at the store some time ago. This is a table at which the diamond customer is seated for inspection of all jewels. Five drawers of the table hold the gems and are so arranged as they are accessible only to the salesman, and no drawer can be opened except by him.

The use of this department is open to every member of the retail jewelry trade. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.

AUGUST, the generally conceded dull month of the year, will be here shortly, when jewelers will be casting about for effective means of enlivening business. August being a vacation month causes dulness in one town and brings business to another, namely—the Summer resort or the town visited by tourists. An interesting article telling how the jeweler who lives in a town which is patronized by vacationists may build up business will be found in the Storekeeping Department in this issue of THE CIRCULAR-WEEKLY.

As mentioned in that article, souvenirs will make a good article to advertise extensively during the month of wilted collars and general inactivity. The advertising of souvenirs, therefore, is something which should receive prompt attention. Attractively printed advertisements, varying in size from about three inches, single column, to six inches, double column, may be run to advantage for this purpose.

A GROUP OF SUMMER ADVERTISEMENTS USED DURING THE MONTH OF JULY.

Among the advertisements used last month by retail jewelers are those illustrated on this page. The first, that of Andrew H. Frandsen, Monmouth, Ill., occupied a space of five inches, double column. The catch phrase is particularly well suited to attract the attention of women of fastidious taste, who aim to make their jewelry trinkets as fashionable as their shirtwaists and Summer frocks.

The advertisement of E. L. Entrikin, Findlay, O., occupied a space of four inches, double column. The illustration, set in a border and forming part of it, is rather striking and goes well with the catch-phrase "Diamonds and Bracelets." Prices might have been quoted in this advertisement, the text of which, by the way, is not especially strong or convincing.

The J. J. Sweeney Jewelry Co., Houston, Tex., during its recent sale, ran a number of advertisements which were pretty well written, but not as atractively displayed typographically as they might have been. A catch-phrase more suggestive of the jewelry trade could have been substituted for the words, "This sale will end Saturday." If the present catch-phrase were run in smaller but nevertheless very bold type, double column width, and the word "jewelry" substituted for the word "this," the advertisement would be improved. Or the phrase, "Our jewelry sale will end" might be set on one line in bold type and, in smaller type underneath, might be set the time, "On Saturday evening, July 11." This would look fairly well and dispense with the necessity of emphasizing by a different kind of type in the body of the ad. the time of the expiration of the sale.

Wedding rings were advertised last month in a space of 2¾ inches by nine inches by A. J. Reinhardt, Lincoln, Ill. The text under the phrase, "There-

Retail Advertising Department.

are a number of reasons why you should buy the wedding ring here," was poorly set. Each separate reason might have been set up in neat type in a distinct paragraph, with an ornamental paragraph symbol before each one.

M. Rothste'n, Johnstown, Pa., in his advertisement of 10¾ inches, single column, officers to give a handsomely engraved marriage certificate with each wedding ring purchased at his establishment. "529 Main St., and the wedding ring will be right" makes rather an original catch-phrase.

The Bauer Jewelry Co., Elgin, Ill., in a space of 4¾ inches, single column, advertises its optical department in an unobtrusive and impressive manner.

The advertisement of A. Kurtzeborn & Sons, St. Louis, Mo., looks rather "empty" in the original space, which was seven inches, double column. While it is advisable to use white space generously it seems that the present advertisement does so too lavishly, considering the style of the announcement. The border is very good. It would undoubtedly have been more satisfactory to feature in this amount of space at the time at which the advertisement appeared (July 12 last) some good "specials" which could be sold at a reduced price. The price, of course, should have been quoted.

The accompanying advertisement of the Mermod, Jaccard & King Jewelry Co., St. Louis Mo., has been reduced from 5½ inches, triple column. The original of this advertisement appeared July 11. The articles illustrated are judiciously chosen and well calculated to appeal to a high-class trade.

A Meritorious Booklet.

A MOST interestingly written little booklet recently issued by Ryrie Bros., Ltd., 134, 136, 138 Yonge St., Toronto, Can., is entitled "About Diamonds." The cover pages are of a fine grade of reticulated paper, the inside pages being of super-calendered paper. Aside from its worth as an advertising vehicle, the booklet will be valuable on account of the information which it imparts. Among the noteworthy chapters are: "The Origin of Diamonds," "In the Mines of Kimberley," "With the Cutters at Amsterdam," "Famous Diamonds of the World," etc. The chapter on "The Mines of Kimbrely" is profusely illustrated with well chosen half-tones. There are also half-tone illustrations of the various departments of the concern's establishment. Under the caption "Diamonds a Paying Investment" are given substantial arguments why diamonds may profitably be purchased as an investment. A timely page at the end of the booklet contains illustrations of appropriate and moderately priced souvenirs of Canada.

H. C. Calkins, Ladysmith, Wis., has moved into new quarters, just north of Worden's store.

The store of N. A. Allen & Co., Mandan, N. Dak., was entered recently by burglars. Some cheap watch cases were taken.

Catch phrases, descriptions and arguments which retail jewelers have used in their newspaper advertisements.

A STYLE of brooch which is popular just now is the jeweled bar. We have a fine assortment. Most of them are set with about a dozen small gems, including pearls, turquoises and amethysts. Johnston Bros., Montreal, Can.

Diamonds.—Of course, an engagement ring should be a diamond ring. We have an assortment of fine rings which seems to meet with approval, and they like to be looked at. Drop in any time. Rainey & Akly, Pittsfield, Mass.

"As Your Fellows See It."—If you judge a man by the clothes he wears—as nine out of 10 men unconsciously do, what then about jewelry? Isn't a man who wears cheap jewelry as surely "labeled cheap" as if the word were written on his shirt front in letters of crimson. The touch of refinement that is given by good jewelry—a gold watch, a ring, a pin or a diamond, is unmistakable and it is the reason why good jewelry only should be worn. We keep only the good kind and you will find our prices of a modest profit kind. Diamond rings from $7.50 up. J. H. Booth, Alton, Ill.

Diamonds and pearls in rings, brooches, bracelets and all other jewelry. We make a specialty of fine jewelry. Call on us for a diamond or a pearl and compare our prices. H. W. Curtis, Knoxville, Tenn.

There's the true ring. No matter what article you may purchase. We have been in business long enough to earn the respect and confidence of the community and our reputation is second to none for keeping the newest and latest designs in jewelry of the highest grade and our prices are reasonable. L. Daiches, Laredo, Tex.

We make a specialty of watch cleaning and repairing of all kinds. Work entrusted to us is certain to receive careful and intelligent treatment from expert and skilful hands. Clocks cleaned, repaired, regulated and set in fine running order. Jewelry and all small wares mended, cleaned and repolished in the most workmanlike manner. All work guaranteed. Our motto—"Good work, low prices and prompt attention." A. J. Miller, Massillon, O.

Surgery for Sick Watches.—From five minutes to a week as the trouble demands will serve us for making your watch right. Careful, skilful, well trained workmanship and guaranteed work. That's us. Andrew H. Frandsen, Monmouth, Ill.

Diamond Rings are not only the most beautiful ornaments that can be worn by man or woman, but have real marketable value, a thing not lightly to be estimated in these days of shifting and fluctuating securities. But you have to be sure that the diamond is flawless and of the first water. To select such a stone you need the services of an expert, and that's what we offer you. We are diamond merchants. Hess & Slager, Jacksonville, Fla.

When a watch is left in a jewelry store for repairs it means just two things to rebuild or to ruin it. I rebuild them. When I take in a watch for repairs I don't just make it tick. I make it keep time; that's what they make watches for. H. H. Cutting, Real Watch Maker, Rockford, Ill.

"The Good Fellowship of a Good Watch"—There is something in the good fellowship of a good watch that is always felt by the owner; that is, in words, hard to define. Ask your friend who has a good watch—a watch that keeps perfect time—how much he will take for it and he will laugh at you. It is because there is that attachment to it—that knowledge of its faithfulness that places it above its actual intrinsic value. These are the kind of watches we sell, and only these kind that you become attached to. From $10 up. Geo. W. Custer, Dubois, Pa.

Our Diamond Supremacy will be more firmly rooted during 1908 than during the year just closed. "First in the west for diamonds" will ever be our motto. As in the past we will sell nothing but first quality steel blue white Wesselton stones of guaranteed perfection. A visit to our diamond rooms will conclusively prove all our claims. McMillan, Vancouver, B. C.

Beautiful cut glass out of the ordinary design. Not only is our showing of cut glass particularly interesting just now because of the character of the glass, but also interesting because of the exceptional savings that can be made by buying now. You save 20 per cent. of cost if you make a purchase in our cut glass section. This offer is for one week only, so govern yourself accordingly. E. F. Jakeman, Norfolk, Va.

If we can't make that watch of yours go you might just as well give it to the baby to play with. Its days of service are surely ended—and it is a question with you now of buying a new one. As we said, we can get all the service out of a watch that there is in it—down to the last tick—if you will let us look at it occasionally. And as for new watches—well, just take a few moments some day to look over what we have. That's all we ask. C. H. Bowen, Winchester, Ky.

Watches—Right now is a good time to buy a watch. We have a large and well selected stock and guarantee quality and price. Ask about the "Fischer Special" movement. It will appeal to any one who is interested in a good watch. W. F. Fischer & Bro. Co., Chattanooga, Tenn.

The merit of jewelry is hard to decide upon, and only an expert is familiar with the tell-tale earmarks. We never buy cheap, common bargain counter jewelry, and in dealing here you run no risk of getting it. The frank assurance of the actual intrinsic value of a purchase is invariably given. Isn't this some inducement, then, for you to pay a visit here and favor us by giving us the pleasure of showing you our several different lines? In silverware we have as complete an assortment as money will buy. Beautiful berry spoons, $2, $3, $5, $7 to $10. J. H. Booth, Alton, Ill.

Waterman's Ideal Fountain Pen

The pen with the Clip-Cap

SECRETARY PEN

A DAINTY new style fountain pen adapted particularly for library and writing desk purposes. Delicate, yet very strong and durable, and of that fineness and pattern which make it so popular and appropriate.

Many writers find great convenience in a slender pen of this kind for general writing purposes. This latest development is a particularly appropriate pen for ladies' use.

A perfect and complete Waterman's Ideal, of a de Luxe style.

In one size only and of the several styles described below. Patterned after our regular cone cap holders, but somewhat shorter and about one-half the diameter.

Illustrations Actual Size.

Fig. 1. Showing actual size of No. 12½ plain when closed.

Fig. 2. No. 12½; Chased, $2.50. Also made in plain and mottled.

Fig. 3. No. 12½; G. M., $3.50. Also with chased bands or one plain middle band.

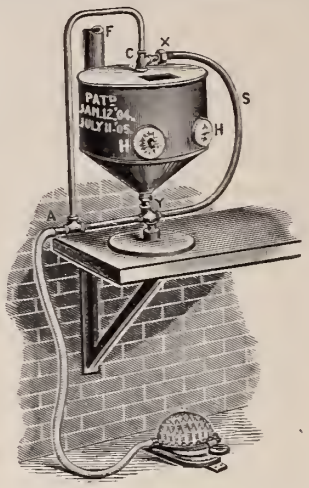

Fig. 4. No. 512½; Colonial, $23.50. (Solid Gold).

Fig. 1 Fig 2. Fig. 3. Fig. 4.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2188.—**French Gray.**—*Please give us the solution for French gray silver in light and dark shades on brass, copper, white metal and silver.* *S. D. & Co.*

ANSWER:—To obtain a silvery French gray on copper, brass and white metal it is necessary (1) to silver plate all the articles, then apply the oxidize and finish as desired. The French gray is produced by oxidizing the surface with sulphuret, which produces a dark black color. The dark color is allowed to remain in the deep recesses, and the high parts are relieved with the aid of fine moistened pumice and a bristol or tampico brush. The dark being brushed off, the high parts produce the gray silver appearance, leaving the deep or recessed parts as dark as may be desired. The copper, brass or white metal may be oxidized directly on the articles, but the finish obtained would not be a silver French gray; the copper would be a copper oxidize, the brass oxidized brass, and the white metal oxidized white metal. These can all be blackened with an oxidizing liquid suitable for the different metal, but when the high parts are relieved with pumice and brush then the underlying metal will show through, producing, as mentioned above, copper, brass or white metal oxidize. To produce the silver French gray, proceed as follows: All the metal articles, except the silver pieces, should be well polished; the better the polish, the better will the gray finish appear afterwards. Then silver plate with a good deposit of silver. Scratch-brush lightly all over, as is usually done with silver plated articles; rinse off well. Prepare a solution of sulphuret, which is done by simply dissolving enough sulphuret in warm water to produce a dark solution. In this warm solution place the silver-plated or solid silver articles and let remain long enough to obtain a black oxidize. If the articles are large they can be painted over with a brush. The piece should be left standing with the oxidize on a little while, so the sulphuret can work in well; then rinse off in water and proceed to relieve the high lights with pumice, as mentioned above. A brush, revolving on a lathe, will produce the best result, but a hand brush can be used if necessary. Here it requires a little artistic taste in order to produce a surface pleasing to the eye. If the desired shade is not obtained the first time, then it can be done over again, but there should not be more brushing than is necessary. Excessive brushing would soon cut through the silver. The finished pieces should be well rinsed off in water and dried and lacquered as soon as possible. The oxidizing chemical can be purchased from supply houses, also from the larger drug stores, and is known as liver of sulphur, or sulphuret.

QUESTION No. 2189.—**Platers' Compound.**—*Kindly inform me what I could use for cleaning or dipping polished metal surfaces, such as silver, nickel, copper and brass. I want something which will thoroughly clean the surfaces and will not oxidize or discolor them.* *P. C.*

ANSWER:—The prepared platers' compound is perhaps the best that can be used for cleaning polished metal surfaces. It is especially suitable where articles contain soft solder, which would be attacked if much potash were used. The platers' compound solution can be improved by adding half an ounce of cyanide and two ounces of ammonia water to a 20-gallon solution, which will prevent discoloring and oxidation. The solution should be used boiling hot and the cyanide and ammonia is added once a week. Platers' compound is also known as fish soap, or whale oil soap, and contains ammonia and less potash than is used in ordinary soaps.

QUESTION No. 2190.—**Moulds from Natural Leaves.**—*I wish to produce leaves and flowers in Britannia metal by casting in moulds. How must I proceed so that I can produce the model from nature for the plaster cast for the mould?* *M. F.*

ANSWER:—In order to produce the plaster from natural leaves and flowers, it is necessary to thicken the leaves before attempting to produce the plaster cast. Take fully developed natural leaves or flowers and brush over one side with softened wax, let cool and then brush over another coating. Repeat until the leaves are thick enough. Then take the impression in plaster, in halves or sections as may be necessary. When set, take apart, let dry, burn out the dried leaves and melt out the wax. This will produce a model that will show all the veins and mattings and will be true to nature. If only two or three castings are desired, then the same can be cast in a well-dried and smoked-over plaster paris mould.

The Hanson-Pearce Jewelry Co., Berkeley, Cal., has been succeeded by C. A. Kline.

Oscar Gustafson has sold out his business at Elgin, Ill., which he conducted under the style of Oscar Gustafson Jewelry Co., to C. J. Lehman and others. Mr. Gustafson retires from active business owing to the poor state of his health, though he will be connected with the new concern for a short time.

Electro-Plating Non-Metallic Articles.

THE prime requisite in producing an electrolytic coating on wood, paper, cloth or other non-metallic material is that the latter shall first be made capable of receiving such a coating. Once this is done, the article can be coated as readily and permanently as though consisting of metal. For many purposes a coating of fine graphite suffices to make it sufficiently conductive; but naturally this process cannot be employed with very delicate articles, such as flowers, since the application of the graphite would destroy the texture and structure by filling up the fine lines.

One of the best processes for making the surface of the article an electric conductor consists in giving it an impalpable coating of metallic silver. This can be done by first immersing it in a 10 per cent. alcoholic solution of silver nitrate, and letting this dry on; then dipping in a 10 per cent. solution of yellow phosphorus in carbon disulfid. There will at once be formed a deposit of metallic silver, on which a further deposit of silver or any other metal may readily be made by the aid of a battery in the usual manner. Another process consists in dissolving silver nitrate in several times its weight of distilled water and adding ammonia until the precipitate which at first forms is redissolved. A second solution is then made of formaldehyde in three times its weight of distilled water. The article to be electroplated is dipped in ordinary collodion and let dry. There is next made a mixture of the two solutions in the proportion of one part by weight of the first to two of the second. This is at once applied to the collodioned article. In a few minutes the silver is reduced and precipitated on the article to be metal-plated, and the process of electroplating in the ordinary manner may then be taken up.—*Scientific American.*

Non-Corrosive Qualities of Aluminum.

THE employment of aluminum for the construction of tools and apparatus subjected to the action of acids is finding great favor in Germany. In chemical works it is being used as a substitute for porcelain and copper in sieves, stirring apparatus, etc. The *Electrotechnischen Zeitschrift* cites the results of tests extending over two years in arsenals at Siegburg. Here aluminum has been found to resist the action of sulphuric and nitric acids—concentrated or diluted—very much better than copper.

Perhaps the most severe test was in the nitroglycerin plant where mixtures of concentrated nitric and sulphuric acids are warmed in aluminum vessels. Even in this case the aluminum was so little corroded in two years' time that the vessels will last years longer, whereas according to previous experiences it would have been necessary to replace vessels of copper, brass or bronze several times during this period. For tools such as tongs, ladles, etc., the aluminum has the additional advantage of lightness.

Ceramic Triumphs of Early French Potters.

By J. A. R., in the *Canadian Pottery and Glass Gazette.*

EVERY European potter of the 17th century who understood his craft was quite aware that the materials he was accustomed to use for the manufacture of faience would never produce anything closely resembling fine Chinese porcelain. His task then was to find some substance which would. He probably was quite certain in his own mind that the European pottery world was acquainted with all the clays available in their respective countries which were fit for their use, and in the majority of cases instead of searching for the true porcelain clays the potters contented themselves by trying to find out artificial compositions which would achieve their object. The experiments of the French potters in this direction resulted in the production of the beautiful soft porcelain of Sèvres, which has won for France the crown of honor as the producer of the greatest triumphs of art and skill combined in the ceramic industry. The interesting story of Sevres ware has already been told. The present article will be devoted to short studies in sundry French wares that achieved more or less celebrity in their day.

SCEAUX.

The Sieur Chapelle established a porcelain factory at Sceaux about the year 1749 under the protection of Madame la Duchesse du Maine. He was obliged, however, to discontinue it, as he had failed to obtain the royal permission. Chapelle appears to have been, in the first place, a maker of faience, and to have joined de Bey, an architect who formed a small company to manufacture porcelain. When the company was broken up by the authorities at Vincennes—Bey and Chapelle continued to devote themselves to porcelain until in 1759—Chapelle became sole proprietor. When he retired in 1763 he granted a nine years' lease of the works to Jullien & Jaques, porcelain makers at Mennecy, and at the expiry of this term in 1772 he sold the factory with the secrets to Richard-Glot for 40,000 livres.

The period 1763-1772 was that in which Sceaux gained for herself her greatest fame for the making of soft porcelain. The paste is very fine and transparent. Most of the pieces are small, although a few large examples are known. Plates also are rare, the greatest attention having been given to toilet table sets, salt cellars, soup bowls and coffee services. The favorite subjects of decorations were cupids and love scenes in rose camaieu; sprays and festoons of flowers were also common subjects.

BRANCAS-LAURAGAIS.

Louis-Leon-Felicite, Duc de Brancas, Comte de Lauragais, Marquis de Lassay, was a member of the French Academy of Science in 1758. To him is generally awarded the credit of having been the first to manufacture hard porcelain from materials obtained from French soil. In his chateau at Lassay is still to be seen a furnace which he used for his chemical experiments, and probably where he succeeded in making his first specimens of hard porcelain. The necessary ingredients, kaolin and petuntse, were discovered in the neighborhood of Alencon about the year 1750, and there is no doubt that these were used by the count in the manufacture of his porcelain. The real discoverer of the clay appears to have been one Guettard, in the service of Louis-Philippe, Duc d'Orleans; but less successful than Lauragais he failed to turn his discovery to account.

Brancas-Lauragais does not appear to have extended his manufacture of porcelain into a commercial enterprise, and probably only made a few pieces as presents for friends. He never seems to have been quite successful in his experiments, as the pieces which exist are characterized by a want of whiteness and are more or less speckled, showing a lack of preparation of the materials before firing.

VINCENNES.

Pierre-Antoine Hannong, whose father had successfully manufactured hard paste porcelain at Strasbourg, came to Paris in 1763, and at length in 1765 induced the Marquis de Voyer to exert his influence in obtaining for him the use of the old chateau of Vincennes, formerly occupied by the factory of soft porcelain, which afterward was removed to Sevres. Probably owing to Hannong's earlier troubles with the police, he deemed it advisable to have his name kept in the background as much as possible, for we find that the royal letters patent of 1767 confirming the grant of the chateau of Vincennes for the purpose of a porcelain factory, together with the rights of manufacture and sale of faience and porcelain in Paris and the kingdom of France for a period of 20 years, was made out in the name of Maurice des Aubiez, who seems to have acted as ostensible director of the company virtually formed and managed by Hannong. In 1774 the factory was purchased by a person of the name of Seguin, who is said to have obtained the protection of the Duc de Chartres. In 1776 he was allowed the privilege of calling his factory the "Royal Factory of Vincennes." The privilege granted for 20 years expired in 1788, and the chateau being required by the authorities for other purposes the factory was closed. The productions of Vincennes are similar in style to those of the Paris factories of the same period, but are occasionally imperfect in the glaze and firing.

NIDERVILLER.

The Baron Jean-Louis de Beyerle founded a factory of faience in Niderviller in 1754, which he changed into a porcelain factory in 1765. At first he imported his material from Germany, but not for long. The discovery of kaolin at Limoges, which occurred shortly afterward, enabled him to procure his ingredients more easily. In 1780 Beyrle sold the factory to General, the Comte de Custine, a distinguished officer, who, after seeing a great deal of service, perished by the guillotine in 1793 at the hands of the revolutionary tribunal. General Custine, whose duties made it quite impossible for him personally to superintend the working of the factory, employed Claude-François Lanfrey as manager, a very capable craftsman, who eventually, became proprietor of the factory and retained it till 1827, when it was acquired by M. Dryander.

The Niderviller factory produced all the various services and vessels which were made in porcelain at that time, but they are not characterized by any special feature which might distinguish them from the porcelain of other French factories of the period, except that, as a rule, the body was opaque.

LUNEVILLE.

It was in 1769 that Cyffle obtained permission to start a factory in Luneville, which he carried on successfully until 1780, when he sold all the plant to Lanfrey, of Niderviller. Cyffle confined himself entirely to groups and figures, usually known as *terre de Lorraine.* They were made both in fine earthenware and in porcelain, which are distinguishable from each other by the yellowishness of the former as compared with the whiteness of the latter.

Owing to the fact that after 1780 the Niderviller factory possessed the moulds, and probably also the marks and seals of Cyffle, it is extremely difficult to differentiate the products of the two factories. Those of Luneville are, however, usually more smooth and soft to the touch than Niderviller.

The Perils to Which the Jeweler is Exposed.

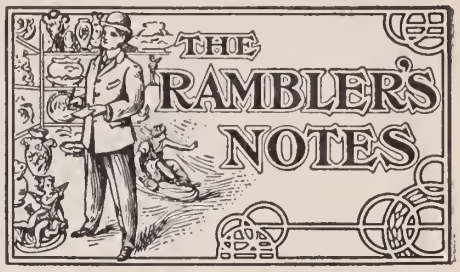
"IN the struggle for supremacy, which goes hand-in-hand with the march of progress in our trade, the condition has been vividly defined in the battle between jewelers and the 'crooked,'" says Frank Heywood, traveling man for the Jewelers Security Alliance. "The rivalry is so close that it is hard to award a blue ribbon to either. The safemaker, for instance, who would throw an impassable barrier about the valuables of his patrons is ingenious, inventive and progressive. But brains are not monopolized and the skilled safebreaker who works in the opposite direction is equally ingenious in securing means to accomplish his end. There are no more daring and skilful men in the world than the breakers of safes, and many are robbed under conditions which make the feat seem as impossible as looting the national treasury.

"Yet the actual work of looting a safe is comparatively easy. There are several crooks who by a keen sense of feeling or hearing can twist a combination so effectively the door will come open with a swish. Then, too, while a combination may be set in a million ways, it actually is set in one of very few. This is due to the fact, perhaps, that great minds run in the same channels, but actually the human mind runs in multiples, and if a safe owner makes 'five' one number of a combination, it is more than probable the other two numbers can be divided by five. In fact, the man will have to make a mighty mental effort to set it any other way.

"One method of opening safes is that of tearing off the fronts, backs, tops or bottoms of them. The sides are seldom touched, except by novices, for then the crook has the extra work of cutting through the partitions of the pigeon-holes. The back of the safe is preferred, for steel plates are seldom placed in that wall. Then, too, as a usual thing the safe is so placed the burglars can work upon the back unobserved.

"In tearing open a safe holes are usually drilled in the metal. If iron, about any old drill will do; if steel, the drill hole is kept wet with turpentine. If a saw is needed it is kept well lubricated with hard soap. If nitro-glycerine is resorted to, the sound is deadened by felt, in which the safe is first enveloped. Nitro-glycerine is easy to obtain by boiling a stick of dynamite in water, the glycerine rising to the top. With two cylinders of compressed oxygen and an acetylene generator charged with calcium carbide and water, a blowpipe flame of such intensity can be produced that steel will fuse in it like lead in an ordinary gas jet. The same effect can be produced by the judicious use of the 'juice' with which trolley or electric light wires are loaded. In either case it takes but a brief space of time to melt away the door that the contents are easily accessible.

"The burglar, to keep from sneezing, closes his eyes, opens his mouth and presses his upper lip until the desire vanishes. He blacks his face when doing a job and carries soap to wash off with. He carries a bottle of arnica or turpentine for cuts and bruises. He tries all chisels before using and puts a rubber washer on the bottom of vises to make them soundless. He uses an electric flashlight and holds that at arm's length when flashed, so if it is shot at he will not be hit. To break a window he usually cuts the glass with a diamond, then spreads thick white lead on a flannel or in lieu thereof takes a piece of flypaper and first presses it on the glass front and then draws it toward him.



"Very few of the old-class of burglars are in the business nowadays. The old-class had enough education and good manners to enable them to butt into about any kind of society and some of them have become so exemplary that they have been able to enter into legitimate business, though all of them are under the constant surveillance of the Pinkertons, who are the protective agents of the Security Alliance and other organizations. They carried jimmies, pullers, spreaders and wedges. Nowadays the burglar, instead of toting around 73 pounds of tools, carries a rubber bottle of nitro-glycerine, a cake of brown soap, a fuse and a handful of detonating caps.

"The burglars of to-day may have been of good antecedents and breeding who, going broke in their wanderings, or from too close an acquaintance with 'King Booze,' have gone 'shady' from what they considered necessity. The individual burglar, the crook of necessity, as a criminal is usually started on his career by some occurrence which has deprived him of work. The man out of work often sets out with the best of resolutions to look for fresh employment. He meets other and more experienced loafers and becomes their associate. Finally they hold some one up; the victim resists and perhaps is accidentally killed. Then there's murder on the head of your tyro, and from that moment he is a reckless criminal. Human life is no more to him than the life of a dog.

"In burglary, as in every other industry, there are captains and lieutenants, high privates and low and humble water carriers. There is the 'plant hunter,' who goes about as a peddler, a beggar or an unimpeachable swell and finds out where there is a safe to be robbed, and he seldom takes part in the actual robbery. Then there are the men who understand the use of explosives and perform the real operation of blowing the safe; and finally there the the 'stick-up' men, who would as soon kill as not and perhaps a little rather.

"Grafters, confidence men, pennyweighters, hold-up men and sleight-of-hand artists are largely to be feared. About the only protection jewelers have against these people is eternal vigilance and a quick perception. These men have a fertility of resources truly wonderful.

"Burglaries are on the increase. Over 35,000 were reported in New York City last year. Several hundred were reported from eastern New England. There is an average of four burglaries to every fire throughout the country. Eleven jewelers are robbed to every one who is burned out. The percentage was larger until the Baltimore and San Francisco fires reduced it considerably. From 400 to 600 jewelers are robbed every year, though only 27 members of the Security Alliance have had safes blown in 26 years, and a very few cases coming under the other forms of crooked work."

A FINE MARBLE PLAQUE

A MARBLE plaque skilfully carved, and having as a central design a young woman sitting on a shelving projection and reaching down to capture a butterfly, is among the attractive Summer exhibits seen at a New York salesroom. The figure of the woman is carved from the central part of a solid block of marble. The background is colored a creamy brown and is roughened, thus bringing out the figure very clearly.

*

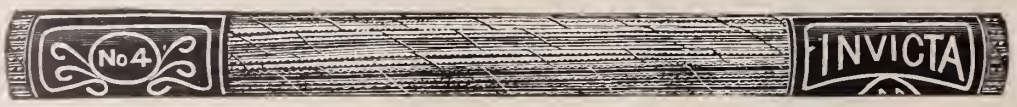
SEASONABLE VASES AND SETS

TALL cut glass vases in a number of patterns are proving attractive exhibits for this season. Some of these vases are nearly straight from top to base, while others are more highly embellished, with scolloped and notched tops, which are made to flare outward. The Summer season attracts attention to ice water sets, among which are several dainty exhibits. Bonbon dishes and fruit receivers in a number of styles are popular at this season, and with the above are shown by Ling & Stewart, 68 West Broadway, New York.

*

SUMMER NOVELTIES IN GLASS

OFFERINGS for the Summer and Fall trade at the salesrooms of Bawo & Dotter, 32 Barclay St., New York, include an attractive display of flower bowls and tall vases. One vase shows a rounded base supporting a short standard. The vase gradually widens until at the top the piece bends outward and then downward. The decorative scheme embodies floral effects. Another has a larger rounded base, the stem growing smaller toward the top and ending in an uneven serried edge. A dainty rose bowl is shown by the same firm. This offering is supported by curved legs and is round in shape. It is decorated with flowers in gilded effects. One large bowl suitable for holding pansies or roses, has a rim in gold at the top, within which is a wide band of green glass, on which are flowers in gold work. The bottom part of this attractive bowl is of white glass and is overlaid with gilded flower effects. Attractive also are a line of compots, one of which is shown with a rounded base and green stem.



THE RAMBLER.

Tobin & Co., Green, Ia., will hereafter be known under the firm style of Tobin & Doore.

On account of the death of David S. Porter, Jacksonville, Fla., the business will be closed out.

Dunn & Loomis, Clifton, Ariz., will hereafter be known as Dunn & Co.
